(iii) *Steps in making scarf patch (back of skin not accessible).* (*a*) After removing damaged sections, install backing strips, as shown in figure 2–15, along all edges that are not fully backed by a rib or a spar. To prevent warping of the skin, backing strips should be made of a soft-textured plywood, such as yellow poplar or spruce, rather than solid wood. All junctions between backing strips and ribs or spars should have the end of the backing strip supported by a saddle gusset of plywood.

(*b*) If needed, nail and glue new gusset plate to rib. It may be necessary to remove and replace the old gusset plate by a new saddle gusset or it may be necessary to nail a saddle gusset over the original.

(*c*) Attach nailing strips to hold backing strips in place while the glue sets. Use bucking bar where necessary to provide support for nailing. Unlike the smaller patches made in a continuous process, work on the airplane must wait while the glue holding the backing strips sets. After setting, complete finishing in usual manner.

(5) *Plug patches*—(i) *General.* Two types of plug patches, oval and round, may be used on plywood skins provided the damage can be covered by the patches whose dimensions are given in figures 2–12 and 2–16. As the plug patch is strictly a skin repair it should be used only for damage that does not involve the supporting structure under the skin. Oval patches must be prepared with the face grain carefully oriented to the same direction as the original skin. Orientation of the face grain direction of the round plug patch to that of the skin surface is no problem, as the round patch may be rotated until grain directions match.

(ii) *Steps in making oval plug patch.* (*a*) Explore the area about the hole to be sure it lies at least the width of the oval doubler from a rib or a spar. Refer to figure 2–12 for repair details.

(*b*) Lay a previously prepared oval plug patch over the damage and trace the patch. Saw to the line and trim the hole edges with a knife and sandpaper.

(*c*) Mark the exact size of the patch on one surface of the oval doubler and apply glue to the area outside the line. The oval doubler should be made of some soft-textured plywood, such as yellow poplar or spruce. Insert doubler through the hole and bring it, glue side up, to the underside of the skin with its pencil outline of the patch matching the edges of the hole. If the curvature of the surface to be repaired is greated than a rise of one-eighth inch in 6 inches, the doubler should be preformed, by hot water or steam bending, to the approximate curvature.

(*d*) Apply nailing strips, outlining the hole, to apply glue pressure between doubler and skin. Use bucking bar to provide support for nailing. When two rows of nails are used, stagger nail spacing.

(*e*) Apply glue to remaining surface and to an equivalent surface on the patch.

(*f*) Lay the patch in position over the doubler and screw the pressure plate to the patch assembly using a small nail to line up the holes that have been previously made with patch and plate matching. No. 4 round-head screws are used. Lead holes in the plywood doubler are not necessary. Waxed paper or cellophane between the plate and patch prevents glue from sealing the plate to the patch. No clamps or further pressure need be applied as the nailing strips and screws exert ample pressure. Hot sandbags, however, may be laid over the patch to speed the setting of the glue. Finish in the usual manner.

(iii) *Round plug patch.* The steps in making a round plug patch shown in figure 2–16 are identical with those for making the oval patch except the insertion of the doubler. In using the round patch, where access is from only one side, the round doubler cannot be inserted unless it has been split.

(6) *Fabric patch.* Small holes not exceeding 1 inch in diameter, after being trimmed to a smooth outline, may be repaired by doping a fabric patch on the outside of the plywood skin. The edges of the trimmed hole should first be sealed, and the fabric patch should overlap the plywood skin by at least 1 inch. Holes nearer than 1 inch to any frame member or in the leading edge, or frontal area of the fuselage should not be repaired with fabric patches.

(f) *Finishing structural repairs*—(1) *General.* Any repair to spars, ribs, skin surfaces, or other structural parts of the airframe involves finishing as the final step in the job.

(2) *Precautions to be observed.* (i) When making repairs, avoid excessive contamination of surfaces with glue squeeze-out at joints and on all surfaces. Excess glue should always be removed before applying finish. Because paints and glues are incompatible, even a slight amount of glue underneath the finish may cause premature deterioration.

(ii) Soiling substances, such as oil and grease, should be removed as completely as possible. Naphtha may be used to sponge off oil and grease. Markings that are made by grease pencils or lumber crayons containing wax are harmful and should be removed, but marks made by ordinary soft graphite pencils and nonblotting stamp-pad inks may be safely finished over. All dust, sander dust, dirt, and other solid particles should be cleaned off.

(iii) Sawdust, shavings, and chips should be removed from enclosed spaces before they are sealed off by replacement of skin. A vacuum cleaner is useful for such cleaning.

(iv) Since no satisfactory gluable sealer has yet been developed, it is necessary to avoid applying sealer over the areas where glue will be applied. Areas to receive glue should be marked off with pencil, allowing an additional one-fourth inch on each side of the glue area to provide for misalinement when mating the parts. It is preferable to leave some unsealed areas rather than risk weakening the glue joint by accidental overlap of the sealer into the glued areas.

(v) Finish is likely to crack when applied over flush-driven nails and screws. To avoid this a strip of tape may be applied over the heads after application of sealer and before the final finish is applied.

(vi) Fill all holes left from nail-strip gluing or countersunk nails and screws with a wood filler before finishing the surface. It may be necessary to cover with a patching putty the slight depressions left after applying filler if a completely smooth surface is desired, but as a rule patching putty may be dispensed with safety.

(vii) Surfaces which are likely to come in contact with fabric during the doping process should be treated with a dope-proof paint, cellophane tape, etc., to protect them against the action of the solvents in the dope.

(3) *Finishing of interior surfaces.* Repaired ribs, spars, interior of plywood skin, and other internal members, including areas of contact between metal and wood, should be finished by applying at least two coats of spar varnish. Built-up box spars and similar closed structures should be protected on the interior by at least one heavy coat of spar varnish or linoil. Where better protection is required, as on the surfaces of wheel wells and the bottoms of hulls below the floor boards, an additional coat of aluminized sealer consisting of 12 to 16 ounces of aluminum paste per gallon of sealer may be applied.

(4) *Finishing of exterior surfaces.* Exterior surfaces should first be sealed with at least two coats of sealer or spar varnish. The surface finish should then be completed by the application of enamel, aluminized varnish or other special finish as required to duplicate the original finish. If dope or lacquer is used to complete the finish, the sealer coats should be dope-proof. Spar varnish or sealer conforming to Specification MIL–V–6894 is satisfactory.

(5) *Finishing of end-grain surfaces.* (i) End-grain surfaces, such as edges of plywood skins and holes in spars and other primary structural members, require careful protection. Sand these surfaces smooth. Apply two coats of a highly pigmented sealer, or 1 coat of wood filler, and 1 coat of clear sealer to end-grain interior surfaces and cut holes. Exterior end-grain surfaces (except those covered with doped fabric) require

an additional (third) coat of clear sealer. A final coat of aluminized varnish may be applied to end-grain surfaces. If the surfaces are to be finished with dope or lacquer, a dope-proof sealer similar to Specification MIL–V–6894 should be used.

(ii) Exposed end-grain includes such surfaces as those around vent holes, inspection holes and fittings, and exposed scarfed or tapered surfaces such as those of tapered blocking.

(6) *Finishing with fabric or tape.* (i) To refinish with fabric or tape, it is first necessary to insure that paint has been removed from an area greater than that to be covered by the fabric.

(ii) Apply 2 brush coats of a dope-proof sealer similar to Specification MIL–V–6894, allowing the first coat to dry 2 hours and the second coat at least 6 hours. Follow with 1 coat of clear dope, and allow it to dry 45 minutes. Apply a second coat of clear dope and lay into the wet film a piece of pinked-edge airplane cloth. All air bubbles should be worked out by brushing to insure maximum adherence. Allow this to dry 45 minutes. Apply 1 brush coat to insure proper penetration and at least 1 spray coat of clear dope, allowing each to dry 45 minutes. The dried spray coat may be scuffed with fine sandpaper to obtain a smoother finish. Complete the refinishing of the surface by application of lacquer, enamel, or aluminized varnish as required to match the adjacent area.

(iii) The size of the fabric patch should be such as to extend at least one-half-inch on each side of any crack or group of cracks, at least 1 inch on each side of a scarfed joint glue line, and at least 2 inches beyond any edge of a skin patch, to insure proper adhesion.

§ 18.30–3 *Fabric covering (CAA policies which apply to § 18.30)*—(a) *Textile materials.* All fabric, surface tape, reinforcing tape, machine thread, lacing cord, etc., used for re-covering or repairing an aircraft structure should be of high-grade aircraft textile material of at least as good quality and equivalent strength as those described in subparagraphs (1) through (7) of this paragraph.

(1) *Aircraft fabric.* Acceptable fabric such as cotton and linen for covering wings, control surfaces, and fuselages are listed in table 3–1. Fabrics conforming to the Automotive Material Specifications incorporate a continuous marking showing the specification number to permit identification of the fabric in the field. (See § 18.30–8 (e).)

(2) *Re-covering aircraft with original type fabric.* Aircraft should be re-covered or repaired with fabric of at least as good quality and equivalent strength as that originally used on the aircraft. In re-covering aircraft which were originally covered with low strength or "so called" glider cloth, however, it is considered more desirable to use Grade A or intermediate fabric conforming to AMS 3806 or 3804, as amended, respectively.

(3) *Reinforcing tape.* Acceptable reinforcing tape is listed in table 3–2. Reinforcing tape should be of similar quality to the fabric and at least one-half the strength of that conforming to specification MIL–T–5661.

(4) *Surface tape.* Surface tape (also finishing tape) should have approximately the same properties as the fabric used. See table 3–2.

(5) *Lacing cord.* Lacing cord should have the strength of at least 80 pounds double or 40 pounds single strand. Acceptable lacing cord is listed in table 3–2.

(6) *Machine thread.* Machine thread should have a strength of at least 5 pounds single strand (Table 3–2).

(7) *Hand-sewing thread.* Hand-sewing thread should have a strength of at least 14 pounds single strand (Table 3–2).

(b) *Covering practices*—(1) *General.* The method of fabric attachment should be identical, as far as strength and reliability are concerned, to the method used by the manufacturer of the airplane to be re-covered or repaired. Fabric may be applied so that either the warp or fill threads are parallel to the line of flight. Either the envelope method or blanket method of covering is acceptable. (See subparagraph (5) of this paragraph.)

(2) *Flutter precautions.* When repairing control surfaces, especially on high-performance airplanes, care should be exercised that the repairs do not involve the addition of weight aft of the hinge line. Such a procedure may adversely disturb the dynamic and static balance of the surface to a degree which would induce flutter. As a general rule, it will be required to repair control surfaces in such a manner that the structure is identical to the original so that the weight distribution and mass balance are not affected.

(3) *Preparation of the structure for covering.* One of the most important items in covering aircraft is proper preparation of the structure. Dope-proofing, covering edges which are likely to wear the fabric, preparation of plywood surfaces and similar operations, if properly done, will do much toward insuring an attractive and long-lasting job.

(i) *Dope-proofing.* Treat all parts of the structure which come in contact with doped fabric with a protective coating such as aluminum foil, dope-proof paint or cellulose tape. Clad aluminum and stainless steel parts need not be dope-proofed.

(ii) *Chafe points.* All points of the structure such as sharp edges, bolt heads, etc., which are likely to chafe or wear the covering should be covered with doped-on fabric strips or covered with an adhesive tape. After the cover has been installed, the chafe points of the fabric should be reinforced by doping of fabric patches. Where a stronger reinforcement is required, a cotton duck or leather patch should be sewed to the fabric patch and then doped in place. All portions of the fabric pierced by wires, bolts, or other projections should be reinforced.

(iii) *Inter-rib bracing.* Conventional wing ribs, which do not have permanent interrib bracing, should be tied in position by means of cotton tape running parallel to the beams. Apply the tape bracing to both the top and bottom capstrips, maintained parallel to the plane of the cover rather than diagonally between the top and bottom capstrips. Apply the tape continuously with one turn around successive capstrips, arranged so that the tape between the ribs is separated from the cover by a distance equal to the depth of the capstrip. Tie the turn of tape around each capstrip by means of a short length of lacing cord.

(iv) *Preparation of plywood surfaces for covering.* Prior to covering plywood surfaces with fabric, prepare the surface by cleaning and applying sealer and dope.

(*a*) *Cleaning.* Sand all surface areas which have been smeared with glue in order to expose a clean wood surface. Remove loose deposits such as wood chips and sawdust. Remove oil or grease spots by carefully washing with naphtha.

(*b*) *Application of sealer and dope.* Apply one brush coat or two dip coats (wiped) of a dope-proof sealer such as that conforming to Specification MIL–V–6894 thinned to 30 percent nonvolatile content and allow to dry 2 to 4 hours. Finally, before covering, apply two brush coats of clear dope allowing the first coat of dope to dry approximately 45 minutes before applying the second coat.

(4) *Seams*—(i) *Location of seams.* Seams parallel to the line of flight are preferable; however, spanwise seams are acceptable.

(ii) *Sewed seams*—(*a*) Machine-sewed seams (parts D, E, and F of figure 3–1) should be of the folded-fell or French-fell types. Where selvage edges or pinked edges are joined, a plain lap seam is satisfactory.

(*b*) Hand-sewing or tacking should begin at the point where machine-sewing stops and should continue to the point where machine-sewing or uncut fabric is again reached. Hand-sewing should be locked at intervals of 6 inches, and the seams should be properly finished with a lock stitch and a knot (fig. 3–5). At the point where the hand sewing or permanent tacking is necessary, the fabric should be so cut that it can be doubled under before sewing or permanent tacking is performed (figure 3–1C). After hand-sewing has been completed, the temporary tacks should be removed. In hand-sewing there should be a minimum of four stitches per inch.

(*c*) A sewed spanwise seam on a metal or wood-covered leading edge should be covered with pinked-edge surface tape at least 4 inches wide.

(*d*) A sewed spanwise seam at the trailing edge should be covered with pinked-edge surface tape at least 3 inches wide. Notches at least 1 inch in depth and 1 inch in width should be cut into both edges of surface tape if it is used to cover spanwise seams on trailing edges especially the trailing edges of control surfaces. The notches should be spaced at intervals not exceeding 6 inches. On tape less than 3 inches wide, the notches should be one-third the tape width. In the event that the surface tape begins to separate because of poor adhesion or other causes, the tape will tear at a notched section thus preventing progressive loosening of the entire length of tape.

(*e*) A double stitched lap joint should be covered with pinked edge surface tape at least 4 inches wide.

(*f*) Sewed spanwise seams on the upper or lower surface should be made in a manner that the amount of protuberance is a minimum. The seam should be covered with pinked edge tape at least 3 inches wide.

(*g*) Sewed seams parallel to the line of flight (chordwise) should not be placed over a rib or be so placed that the lacing will be through or across such a seam.

(iii) *Doped seams.* (*a*) A lapped and doped spanwise seam on a metal or wood-covered leading edge should be lapped at least 4 inches and covered with pinked edge surface tape at least 8 inches wide.

(*b*) A lapped and doped spanwise seam at the trailing edge should be lapped at least 4 inches and covered with pinked edge surface tape at least 3 inches wide. It should be notched at intervals not exceeding 6 inches. (See subdivision (ii) (*d*) of this subparagraph for notch configuration.)

(5) *Covering methods*—(i) *The envelope method.* The envelope method of covering is accomplished by sewing together widths of fabric cut to specified dimensions and machine-sewn to form an envelope which can be drawn over the frame. The trailing and outer edges of the covering should be machine sewn unless the component is not favorably shaped for sewing, in which case the fabric should be joined by hand sewing.

(ii) *The blanket method.* The blanket method of covering is accomplished by sewing together widths of fabrics of sufficient lengths to form a blanket over the surfaces of the frame. The trailing and outer edges of the covering should be joined by a plain overthrow or baseball stitch. For airplanes with placard never-exceed speed of 150 miles per hour or less, the blanket may be lapped at least 1 inch and doped to the frame or the blanket, lapped at least 4 inches at the nose of metal or wood-covered leading edges, doped, and finish with pinked-edge surface tape at least 8 inches wide. In fabricating both the envelope and blanket coverings, the fabric should be cut in lengths sufficient to pass completely around the frame, starting at the trailing edge and returning to the trailing edge.

(6) *Reinforcing tape.* Reinforcing tape of at least the width of the capstrips should be placed under all lacing. In the case of wings with plywood or metal leading-edge covering, the reinforcing tape need be brought only to the front spar on the upper and lower surfaces.

(7) *Use of antitear strips.* On aircraft with never-exceed speed in excess of 250 miles per hour, antitear strips are recommended under reinforcing tape on the upper surface of wings, and the bottom surface of that part of the wing in the slipstream. Where the antitear strip is used on both the top and bottom surfaces, pass it continuously up to and around the leading edges and back to the trailing edge. Where the strip is used only on the top surface, carry it up to and around the leading edge and back on the lower surface as far aft as the front beam. For this purpose the slipstream should be considered as being equal to the propeller diameter plus one extra rib space on each side. Cut antitear strips from the same material as used for covering and wide enough to extend beyond the reinforcing tape on each side so as to engage the lacing cord. Attach the strips by applying dope to that part of the fabric to be covered by the strip and applying dope freely over the strip.

(7) *Lacing*—(i) *Wing lacing.* Both surfaces of fabric covering on wings and control surfaces should be securely fastened to the ribs by lacing cord or any other method originally approved for the aircraft. Care should be taken to insure that all sharp edges against which the lacing cord may bear are protected by tape in order to prevent abrasion of the cord. Separate lengths of lacing cord should be joined by the splice knot shown in figure 3–4. The common square knot, which has a very low slippage resistance, should not be used for this purpose. The utmost care should be exercised to assure uniform tension and security of all stitches. The first or starting stitch should be made with a double loop by the method illustrated in figure 3–6. All subsequent stitches should be made with a single loop and tied off with the standard knot for rib lacing (modified seine type), shown in figure 3–5. The spacing between the starting stitch and the next stitch should be one-half the normal stitch spacing. All tie-off knots should be placed on the middle of the reinforcing tape on the bottom surface, or along the edge of the lower capstrip. The seine knot admits a possibility of improper tightening, resulting in a false (slip) form with greatly reduced efficiency and should not be used for stitch tie-offs. The tie-offs knot for the last stitch should be locked by an additional half-stitch. Where stitching ends, as at the rear beam and at the trailing edge, the last two stitches should be spaced at one-half normal spacing. Under no circumstances should tie-off knots be pulled back through the lacing holes.

(ii) *Double-loop lacing.* The double-loop lacing illustrated in figure 3–7 represents a method for obtaining higher strengths than possible with the standard single lacing. When using the double-loop lacing, the tie-off knot should be made by the method shown in figure 3–8.

(iii) *Fuselage lacing.* Fabric lacing is also necessary in the case of deep fuselages, and on fuselages where former strips and ribs shape the fabric to a curvature. In the latter case the fabric should be laced at intervals to the formers. The attachment of the fabric to fuselages should be so accomplished as to be at least the equivalent in strength and reliability to that used by the manufacturer of the airplane.

(8) *Stitch spacing.* The stitch spacing should not exceed the spacing approved on the original aircraft. In case the spacing cannot be ascertained due to destruction of the covering, acceptable rib-stitch spacing may be found in figure 3–2. The lacing holes should be placed as near to the capstrip as possible in order to minimize the tendency of the cord to tear the fabric. All lacing cord should be lightly waxed with beeswax for protection. In case waxed braided cord is used, this procedure is unnecessary. (See table 3–2 for acceptable lacing cords.)

(9) *Surface tape (finishing tape).* All lacing should be covered with tape of at least the quality and width as was used on the original airplane. This tape should not be applied until the first coat of dope has dried. All inspection openings should be reincorporated into the covering, and the fabric around them and along leading edges reinforced with tape. Where wear or friction is induced by moving parts or fittings, a leather patch should be sewed to a fabric patch and doped in place. Pinked surface tape is sometimes applied over the trailing edges of control surfaces and airfoils. For such application the tape should be at least 3 inches in width and should be notched along both edges at intervals not exceeding 6 inches. (See subparagraph (4) (ii) (*d*) of this paragraph for notch configuration.) If separation of the tape from the trailing edge begins it will tear at a notched section and thereby prevent loosening of the entire strip.

(10) *Special fasteners.* (i) When repairs are made to fabric surfaces attached by special mechanical methods, the original type of fastening should be duplicated.

(ii) When selftapping screws are used for the attachment of fabric to the rib structure, the following procedure should be observed:

(*a*) The holes should be redrilled where found necessary due to wear, distortion, etc., and in such cases a screw one size larger should be used as a replacement.

(*b*) The length of the screw should be sufficient so that at least two threads of the grip (threaded part) extend beyond the rib capstrip.

(*c*) A thin washer, preferably celluloid, should be used under the heads of screws and pinked-edge tape should be doped over each screw head.

(c) *Doping*—(1) *Thinning of dopes.* Dopes are generally supplied at a consistency ready for brush coats. For spraying operations practically all dopes require thinning. Thinning directions are usually listed on the container label. Where thinning operations are not supplied, thin the dope with a thinner made for the type of dope being used, until suitable brushing and or spraying properties are obtained. The amount of thinner to be used will depend on the dope, atmospheric conditions, the spraying equipment, the spraying technique of the operator, and the type of thinner employed. The thinning of dopes influences the drying time and tautening properties of the finish and it is necessary that it be done properly. Determine the amount of thinner necessary by using experimental panels in order to ascertain the conditions which prevail locally at the time of application of the dope.

(2) *Blushing and use of blush-retarding thinner.* (i) Blushing of dopes is very common when doping is accomplished under humid conditions. The condition is caused by the rapid evaporation of thinners and solvents, which lowers the temperature on the surface, causing condensation of moisture and producing the white appearance known as blush. Blushing tendencies are also increased if strong currents of air flow over the surface when applying dopes or immediately thereafter.

(ii) A blushed finish has very little protective or tautening value. Where the relative humidity is such that only a small amount of blushing is encountered in doping, this condition may be eliminated by thining the dope with a blush-retarding thiner and slightly increasing the room temperature. If it is not possible to correct humidity conditions in the dope room, suspend doping operations until more favorable atmospheric conditions prevail. The use of a large amount of blush-retarding thinner is not advisable because of the undesirable drying properties accompanying the use of this material.

(3) *Number of coats.* The total number of coats of dope should not be less than that necessary to result in a taut and well-filled finish job. A guide for finishing fabric-covered aircraft follows:

(i) Two coats of clear dope, brushed on and sanded after the second coat.

(ii) One coat of clear dope, either brushed or sprayed, and sanded.

(iii) Two coats of aluminum pigmented dope, sanded after each coat.

(iv) Three coats of pigmented dope (the color desired), sanded and rubbed to give a smooth glossy finish when completed.

(v) Care should be taken not to sand heavily over the center portion of pinked tape and over spars in order not to damage the rib-stitching cords and fabric.

(4) *Technique.* (i) Apply the first two coats of dope by brush and spread on the surface as uniformly as possible and thoroughly work into the fabric. Exercise care not to work the dope through the fabric so that an excessive film is formed on the reverse side. The first coat should produce a thorough and uniform wetting of the fabric. To do so, work the dope with the warp and the filler threads for three or four brush strokes and stroke away any excess material to avoid piling up or dripping. Apply succeeding brush or spray coats with only sufficient brushing to spread the dope smoothly and evenly.

(ii) When doping fabric over plywood or metal-covered leading edges, care should be taken to insure that an adequate bond is obtained between the fabric and the leading edge. Care should also be taken when using predoped fabric to use a thinned dope in order to obtain a good bond between the fabric and the leading edge.

(5) *Applying surface tape and reinforcing patches.* Apply surface tape and reinforcing patches with the second coat of dope. Apply surface tape over all rib lacing and over all sewed seams as well as at all other points of the structure where tape reinforcements are indicated.

(6) *Installation of drainage grommets.* With the second coat of dope, install drainage grommets on the underside of airfoils at the trailing edge and as close to the rib as practicable. On fuselages, install drainage grommets at the center of the underside in each fuselage bay, located so that the best possible drainage is effected. On seaplanes it is recommended to install special shielded grommets, sometimes called marine grommets, to prevent the entry of spray. Also use this type of grommet on landplanes in that part of the structure which is subject to splash from the landing gear when operating from wet and muddy fields. Plastic-type grommets are doped directly to the covering. Where brass grommets are used, mount them on fabric patches and then dope to the covering. After the doping scheme is completed, open the drain holes by cutting out the fabric with a small-bladed knife. Do not open drainage grommets by punching.

(7) *Use of fungicidal dopes.* (i) Fungicidal dope is normally used as the first coat for fabrics to prevent rotting. While it may be more advisable to purchase dope in which the fungicide has already been incorporated, it is feasible to mix the fungicide with the dope. Specification MIL–D–7850 specifies that the requirements for cellulose acetate butyrate dope incorporate a fungicide for first coat use on aircraft. The fungicide specified in this specification is zinc dimethyldithiocarbonate which forms a suspension with the dope. This material is a fine powder, and if it is mixed with the dope, it should be made into a paste using dope and then diluted to the proper consistency according to the manufacturer's instructions. It is not practicable to mix the powder with a large quantity of dope.

(ii) Copper napthonate is also used as a fungicide and forms a solution with dope. However, this material has a tendency to bleed out especially on light-colored fabric. It is considered satisfactory from a fungicidal standpoint.

(iii) The first coat of fungicidal dope should be applied extremely thin so that the dope can thoroughly saturate both sides of the fabric. Once the fabric is thoroughly saturated subsequent coats can be applied at any satisfactory working consistency.

(8) *Rejuvenation of fabric.* When using this technique of improving the appearance or condition of the doped surface, care should be exercised to establish initially that the fabric strength itself has not deteriorated beyond safe limits. Experience indicates that rejuvenation may at times cause fabric sag rather than tautening.

(9) *Common dope troubles.* (i) In cold weather, dopes become quite viscous. Cold dopes pull and rope under the brush, and if thinned sufficiently to spray, lack body when dry. Prior to use, allow dopes to come to a temperature approximately that of the dope room, 24° C. (75° F.).

(ii) Orange peel and pebble effect result from insufficiently thinned dope or when the spray gun is held too far from the surface being sprayed.

(iii) Runs, sags, laps, streaks, high and low spots are caused by improperly adjusted spraying equipment or improper spraying technique.

(iv) Blisters may be caused by water or oil entering the spray gun. Drain air compressors, air regulators, and air lines daily.

(v) Pin holes may be caused by not allowing sufficient time for drying between coats or after water sanding, or they may be due to insufficiently reduced dope.

(vi) Wet areas on a doped surface indicate that oil, grease, soap, etc., has not been properly removed before doping.

(d) *Repairs to fabric covering.* Repairs to fabric-covered surfaces should be made in a manner that will return the original strength and tautness to the fabric. Sewed repairs and unsewed (doped-on patches or panels) may be made. No fabric or tape should be doped onto a surface which contains aluminum or other color coats. Whenever it is necessary to add fabric reinforcement the old dope should be removed either by softening and scraping or by sanding down to the point where the base coat or clear coat is exposed. Clear dope should be used in doping the fabric to the surface. After reinforcement is made, normal finishing procedures may be followed.

(1) *Repair of tears in fabric.* Tears should be repaired as shown in figure 3–3 by sewing the torn edges together using a baseball stitch and doping a piece of pinked-edge fabric over the tear. If the tear is a straight rip, the sewing is started at one end so that as the seam is made the edges will be drawn tightly together throughout its entire length. If the opening is V-shaped, as is often the case when openings are cut in wings to inspect the internal structure, the sewing should start at the corner or point so that the edges of the cover will be held in place while the seams are being made. The sewing is done with a curved needle and well-waxed thread. Clean the surface to be covered by the patch by rubbing the surface with a rag dipped in dope and wiping dry with a clean rag, or by scraping the surface with a putty knife after it has been softened with fresh dope. Dope solvent or acetone may be used for the same purpose but care should be taken that it does not drop through on the inside of the opposite surface causing the dope to blister. A patch of sufficient size should be cut from airplane cloth to cover the tear and extend at least 1½ inches beyond the tear in all directions. The edges of the patch should either be pinked similar to surface tape or frayed out about one-fourth inch on all edges.

(2) *Sewed patch repair.* When the damage is such that it will not permit sewing the edges together, a sewed-on repair patch may be used if the damage is not longer than 16 inches in any one direction (see fig. 3–3). Cut out the damaged section making a round or oval-shaped opening trimmed to a smooth contour. Clean the area of the old fabric to be doped as indicated in subparagraph (1) of this paragraph. Turn the edges of the patch one-half inch and sew to the edges of the opening. Before sewing, fasten the patch at several points with a few temporary stitches to facilitate sewing the seams. After the sewing is completed, clean the area of the old fabric to be doped as indicated for small repairs and then dope the patch in the regular manner. Apply surface tape over the seams with the second coat of dope. If the opening extends over or closer than 1 inch to a rib or other laced member, the patch should be cut to extend 3 inches beyond the member. After sewing has been completed the patch should be laced to the rib over a new section of reinforcing tape using the methods of paragraph (b) (7) (i) of this section. The old rib lacing and reinforcing tape should not be removed.

(3) *Repair by sewing in repair panel.* When the damaged area exceeds 16 inches in any direction a new panel should be installed.

(i) Remove the surface tape from the ribs adjacent to the damaged area and from the trailing and leading edges of the section being repaired. Leave the old reinforcing tape in place.

(ii) Cut the old fabric along a line approximately 1 inch from the center of the ribs on the sides nearest to the injury, and continue the cuts to completely remove the damaged section. The old fabric should not be removed from the leading and trailing edge unless both upper and lower surfaces are being recovered. Do not remove the reinforcing tape and lacing at the ribs.

(iii) Cut a patch to extend from the trailing edge up to and around the leading edge and back approximately to the front beam. The patch should extend approximately 3 inches beyond the ribs adjacent to the damage.

(iv) Clean the area of the old fabric to be covered by the patch, put the patch in place, stretch taut and pin. After the patch is pinned in place, fold under the trailing and leading edges of the patch one-half inch and sew to the old fabric. Fold the side edges under one-half inch and sew to the old cover. After completion of the sewing, place reinforcing tape over the ribs under moderate tension and lace down using the methods of paragraph (b) (7) (i) of this section. Remove the temporary pinning.

(v) Give the panel a coat of clear dope and allow to dry. Install surface tape with the second coat of dope, over the reinforcing tape and over the edges of the panel. Finish the doping scheme using regular doping procedures.

(vi) This type of repair may be extended to cover both the upper and lower surfaces and to cover several rib bays if necessary. The panel must be laced to all the ribs covered.

(4) *Unsewed (doped on) repairs.* (i) Unsewed (doped on) repairs may be made on all aircraft fabric-covered surfaces provided the never-exceed speed is not greater than 150 miles per hour. A doped patch repair may be used if the damage does not exceed 16 inches in any direction. Cut out the damaged section making a round or oval-shaped opening trimmed to a smooth contour. Clean the edges of the opening which are to be covered by the patch with grease solvent. Sand or wash off the dope from the area around the patch with dope thinner. Support the fabric from underneath while sanding.

(ii) For holes up to 8 inches in size, make the fabric patch of sufficient size to provide a lap of at least 2 inches around the hole. On holes over 8 inches in size, make the overlap of the fabric around the hole at least one-fourth the hole diameter with a maximum limit of lap of 4 inches. If the hole extends over a rib or closer than the required overlap to a rib or other laced member, the patch should be extended at least 3 inches beyond the rib. In this case, after the edges of the patch have been doped in place and the dope has dried, the patch should be laced to the rib over a new section of reinforcing tape in the usual manner. The old rib lacing and reinforcing tape should not be removed. All patches should have pinked edges, or if smooth, finished with pinked-edge surface tape.

(5) *Repair by a doped-in panel.* When the damage exceeds 16 inches in any direction, make the repair by doping in a new panel. This type of repair may be extended to cover both the upper and lower surfaces and to cover several rib bays if necessary. The panel should be laced to all the ribs covered, and doped or sewed as in the blanket method.

(i) Remove the surface tape from the ribs adjacent to the damaged area and from the trailing and leading edges of the section being repaired. Leave the old reinforcing tape and lacing in place. Next cut the fabric along a line approximately 1 inch from the ribs on the sides nearest to the injury, and continue the cuts to completely remove the damaged section. The old fabric should not be removed from the leading and trailing edge unless both upper and lower surfaces are being re-covered.

(ii) (*a*) Cut a patch to run around the trailing edge 1 inch and to extend from the trailing edge up to and around the leading edge and back approximately to the front beam. The patch should extend approximately 3 inches beyond the ribs adjacent to the damage.

(*b*) As an alternative attachment on metal or wood-covered leading edges, the patch may be lapped over the old fabric at least 4 inches at the nose of the leading edge, doped, and finished with at least 8 inches of pinked-edge surface tape.

(iii) Clean the area of the old fabric that is to be covered by the patch and apply a generous coat of dope to this area. Put the new panel in place, pull as taut as possible, and apply a coat of dope to the portion of the panel which overlaps the old fabric. After this coat has dried, apply a second coat of dope to the over-lapped area and let dry.

(iv) Place reinforcing tape over the ribs under moderate tension and lace down in the approved manner.

(v) Give the panel a coat of clear dope and allow to dry. Install surface tape with the second coat of dope over the reinforcing tape and over the edges of the panel. Finish the doping scheme using the regular doping procedure.

(e) *Testing of fabric covering.* Tensile testing of fabric is a practical means for determining whether a fabric covering has deteriorated to a point where recovering is necessary. The testing may be carried out in accordance with the procedures set forth in existing industry or Government specifications such as Federal Specification CCC–T–191a, American Society for Testing Materials D39–39, and others. In all cases the specimens should be tested in the undoped condition. The use of acetone or dope thinner is suggested as a means of removing the dope.

(1) *Strength criteria for aircraft fabric.* (i) Present minimum strength values for new aircraft fabric covering are contained in table 3–1.

(ii) The maximum permissible deterioration for used aircraft fabric based on a large number of tests is 30 percent. Fabric which has less than 70 percent of the original required tensile strength would not be considered airworthy. Table 3–1 contains the minimum tensile strength values for deteriorated fabric as tested in the undoped condition.

(iii) In cases where light aircraft operators use the Grade "A" type fabric, but are only required to use "Intermediate" grade fabric, the Grade "A" material is still considered airworthy, provided it has not deteriorated, as tested in the undoped condition, below 46 pounds, i. e., 70 percent of the originally required tensile strength value for new "Intermediate" fabric.

(f) *Replacement of fabric covering with metal sheet.* (1) Some thought has been given to replacing fabric covering with metal sheet. The following remarks are intended to serve as a guide when such a modification is contemplated.

(2) Fabric may be replaced with metal sheet provided that the increase in weight does not cause the center of gravity travel to exceed its limits, that the gross weight of the aircraft remains within the operating limits and that the original structural integrity of the aircraft is not impaired by the alteration. With regard to the latter it should be noted that rivet holes in primary structural members are permissible for skin attachment only to the extent that the resultant cross-sectional area of the member is not less than the original minimum cross-sectional area. The selection of rivet patterns at skin joints is critical, especially in wings, as is also the effect of increased weight on wing moment of inertia. In view of the complexity of this modification it would be advisable to obtain CAA engineering approval of the alteration prior to its completion.

§ 18.30–4 *Metal aircraft structures (CAA policies which apply to § 18.30)*—(a) *Metal construction*—(1) *Identification and inspection of materials.* Identification and inspection of materials should be conducted in accordance with § 18.30–8.

(2) *Corrosion prevention treatment, cleaners, and paint removers.* Corrosion prevention treatment, cleaning and paint removing should be accomplished in accordance with § 18.30–7.

(3) *Bolts, screws, and fasteners.* Acceptable means of attachment are listed in § 18.30–6.

(4) *Flutter precautions.* When repairing control surfaces, especially on high-performance airplanes, care should be exercised that the repairs do not involve the addition of weight aft of the hinge line. Such procedure may adversely disturb the dynamic and static balance of the surface to a degree which would induce flutter. As a general rule it will be necessary to repair control surfaces in such a manner that the structure is identical to the original so that the weight distribution is not affected in any way.

(5) *Brazing.* (i) Brazing may be used for repairs to primary aircraft structures only if brazing was originally approved for the particular application. Brazing is not suitable for repair of welds in steel structures due to lower strength values of the brazed joint as compared to welded joints. Brazing may be used in the repair of secondary structures.

(ii) Due to the large number of brazing alloys used, it is difficult to be certain that the one used for repairing a brazed joint would not combine with the original brazing alloy to produce a low strength joint.

(iii) In cases where it is necessary to re-apply copper alloy brazing material on a steel surface more than once, and particularly if temperatures over 2,000° F. are reached, there is a possibility that brazing metal may penetrate between the grains in the steel to an extent that may cause cracking.

(iv) Copper brazing of steel is normally done in a special furnace having a reducing atmosphere, and at a temperature so high that field repairs are seldom feasible. If copper brazing is attempted without a controlled atmosphere, the copper will probably not completely wet and fill the joint.

(b) *Welded steel structures*—(1) *General.* Oxyacetylene or electric arc welding may be utilized for repair of aircraft structural elements. Most aircraft structures are fabricated from one of the weldable alloys; however, careful consideration should be given to the alloy being welded since all alloys are not readily weldable. In general, the more responsible an alloy steel is to heat treatment, the less suitable it is for welding, because the greater will be its tendency to become brittle and lose its ductility in the welded area. The following steels are readily weldable: plain carbon, nickel steels of the SAE 2300 series, chrome-nickel alloys of the SAE 3100 series, chrome-molybdenum steels of the SAE 4100 series and low nickel-chrome-molybdenum steel of the SAE 8600 series.

(i) *Preparation for welding.* The elements to be welded should be properly held in place by welding jigs or fixtures which are sufficiently rigid to prevent misalinement due to expanson and contraction of the heated material and which positively and accurately position the pieces to be welded together.

(ii) *Cleaning prior to welding.* The parts to be welded should always be cleaned by wire brushing or other similar methods. When a wire brush is used, care should be taken never to use a brush of dissimilar metal, for example, brass or bronze. The small deposit left by a brass or bronze brush will materially weaken the weld and may cause cracking and subsequent failure of the weld. In case members were metallized, the surface metal may be removed by careful sandblasting followed by a light buffing with emery cloth.

(iii) *Condition of completed weld.* The finished weld should incorporate the following characteristics:

(*a*) The seam should be smooth and of uniform thickness.

(*b*) The weld metal should taper off smoothly into the base metal.

(*c*) No oxide should be formed on the base metal at a distance of more than one-half inch from the weld.

(*d*) The weld should show no signs of blow holes, porosity or projecting globules.

(*e*) The base metal should show no signs of pitting, burning, cracking, or distortion.

(*f*) The depth of penetration should have been sufficient to insure fusion of base metal and filler rod.

(*g*) Welding scale should have been removed by wire brushing or sandblasting.

(iv) *Practices to guard against.* No welds should be filed in an effort to make a smooth appearing job, as such treatment causes a loss in strength. Welds should not be filled with solder, brazing metal, or any other filler. When it is necessary to reweld a joint which was previously welded, all old-weld material should be thoroughly removed before rewelding. Never weld over a weld if it can be avoided because continual reheating may cause the material to lose its strength and to become brittle. Never weld a joint which has been previously brazed.

(v) *Torch size (oxyacetylene welding).* Torch tip size is dependent upon the thickness of the material to be welded. Commonly used sizes proved satisfactory by experience are:

| Thickness of steel in inches | Diameter of hole in tip | Drill size |
|---|---|---|
| 0.015 to 0.031 | 0.020 | 71 |
| 0.031 to 0.065 | .030 | 68 |
| 0.065 to 0.125 | .047 | 63 |
| 0.125 to 0.188 | .052 | 55 |
| 0.188 to 0.250 | .055 | 54 |
| 0.250 to 0.375 | .067 | 51 |

(vi) *Welding rods and electrodes.* Welding rods and electrodes for various applications have special properties suitable for the application intended. Table 4–1 outlines oxy-acetylene welding rod properties, and table 4–2 outlines arc welding electrode properties.

(vii) *Rosette welds.* Rosette welds are generally employed to fuse an inner reinforcing tube (liner) with the outer member. Where a rosette weld is used, the hole should be made in the outside tube only and be of a sufficient size to insure fusion of the inner tube. A hole diameter of approximately one-fourth the tube diameter of the outer tube has been found to serve adequately for this purpose. In cases of tightly fitting sleeves or inner liners, the rosettes may be omitted.

(viii) *Heat-treated members.* Members which depend on heat-treatment for their original physical properties should be welded using a welding rod suitable for producing heat-treated values comparable to those of the original members (see subdivision (vi) of this subparagraph). Such members should be reheat-treated to the manufacturer's specifications after welding.

(ix) *Steel parts not to be welded*—(*a*) *Brace wires and cables.* Airplane parts that depend for their proper functioning on strength properties developed by cold working should not be welded. In this classification are streamlined wires and cables.

(*b*) *Brazed and soldered parts.* Brazed or soldered parts should not be welded, as the brazing mixture or solder will penetrate the hot steel and weaken it.

(*c*) *Alloy steel parts.* Alloy steel parts such as aircraft bolts, turnbuckle ends, axles and other heat-treated alloy steel parts, which have been heat-treated to improve their mechanical properties, should not be welded.

(2) *Repair of tubular members*—(i) *Inspection.* Prior to repairing tubular members, the structure surrounding any visible damage should be carefully examined to insure that no secondary damage remains undetected. Secondary damage may be produced in some structure remote from the location of the primary damage by the transmission of the damaging load along the tube. Damage of this nature usually occurs where the most abrupt change in direction of load travel is experienced. If this damage remains undetected, loads applied in the normal course of operation may cause failure of the part.

(ii) *Location and alinement of welds.* Unless otherwise noted welded steel tubing may be spliced or repaired at any joint along the length of the tube. Particular attention should be paid to proper fit and alinement to avoid eccentricities.

(iii) *Members dented at a cluster.* Dents at a steel tube cluster joint may be repaired by welding a specially formed steel patch plate over the dented area and surrounding tubes, as shown in figure 4–1. To prepare the patch plate, cut a section of steel sheet of the same material and thickness as the heaviest tube damaged. Trim the reinforcing plate so that the fingers extend over the tubes a minimum of 1.5 times the respective tube diameter as shown in the figure. Remove all the existing finish on the damaged cluster joint area to be covered by the reinforcing plate. The reinforcing plate may be formed before any welding is attempted, or it may be cut and tack-welded to one or more of the tubes in the cluster joint, then heated and formed around the joint to produce a smooth contour. Apply sufficient heat to the plate while forming so that there is generally a gap of no more than one-sixteenth inch from the contour of the joint to the plate. In this operation avoid unnecessary heating and exercise care to prevent damage at the apex of the angle formed by any two adjacent fingers of the plate. After the plate is formed and tack-welded to the cluster joint, weld all the plate edges to the cluster joint.

(iv) *Members dented in a bay.* Dented, bent, cracked or otherwise damaged tubular members may be repaired by using a split sleeve reinforcement, after first carefully straightening the damaged member, and in the case of cracks, drilling No. 40 (0.093) stop holes at the ends of the crack.

(*a*) *Repair by welded sleeve.* This repair is outlined in figure 4–2. Select a length of steel tube sleeve having an inside diameter approximately equal to the outside diameter of the damaged tube and of the same material and at least the same wall thickness. Diagonally cut the sleeve reinforcement at a 30° angle on both ends so that the minimum distance of the sleeve from the edge of the crack or dent is not less than $1\frac{1}{2}$ times the diameter of the damaged tube. Cut through the entire length of the reinforcing sleeve and separate the half sections of the sleeve. Clamp the two sleeve sections to the proper positions on the affected areas of the original tube. Weld the reinforcing sleeve along the length of the two sides, and weld both ends of the sleeve to the damaged tube as shown in the figure. The filling of dents or cracks with welding rod in place of reinforcing the member is not acceptable.

(*b*) *Repair by bolted sleeve.* Due to the large percentage of the tube area removed by the bolt holes, bolted sleeve repairs should not be used on welded steel structures without prior approval of the repair by the Civil Aeronautics Administration.

(v) *Welded-patch repair.* Dents or holes in tubing may be repaired by a welded patch of the same material and one gage thicker, as shown in figure 4–3 provided:

(*a*) *Dented tubing.* (1) Dents are not deeper than one-tenth of tube diameter, do not involve more than one-fourth of the tube circumference, and are not longer than tube diameter.

(2) Dents are free from cracks, abrasions and sharp corners.

(3) The dented tubing can be substantially re-formed without cracking before application of the patch.

(*b*) *Punctured tubing.* Holes are not longer than tube diameter and involve not more than one-fourth of tube circumference.

(*c*) *Location of patch.* No part of the patch is permitted in the middle third of the tube. The patch should not overlap a tube joint.

(vi) *Splicing by inner sleeve method.* (*a*) If the damage to a structural tube is such that a partial replacement of the tube is necessary, the inner sleeve splice shown in figure 4–4 is recommended, especially where a smooth tube surface is desired. Diagonally cut out the damaged portion of the tube, and remove the burr from the edges of the cut by filing or similar means. Diagonally cut a replacement steel tube of the same material and diameter and at least the same wall thickness to match the length of the removed portion of the damaged tube. At each end of the replacement tube allow a one-eighth-inch gap from the diagonal cuts to the stubs of the original tube. Select a length of steel tubing of the same material and at least the same wall thickness and of an outside diameter approximately equal to the inside diameter of the damaged tube. This inner sleeve tube material should fit snugly within the original tube, with a maximum diameter difference of one-sixteenth inch. From this inner sleeve tube material cut 2 sections of tubing, each of such a length that the ends of the inner sleeve will be a minimum distance of $1\frac{1}{2}$ tube diameters from the nearest end of the diagonal cut.

(*b*) If the inner sleeve fits very tightly in the replacement tube, chill the sleeve with dry ice or in cold water. If this is insufficient, polish down the diameter of the sleeve with emery cloth. Weld the inner sleeve to the tube stubs through the one-eighth-inch gap between the stubs, completely filling the one-eighth-inch gap forming a weld bead over the gap.

(vii) *Splicing by outer sleeve method.* (*a*) If partial replacement of a tube is necessary, an outer sleeve splice using a replacement tube of the same diameter may be made. However, the outer sleeve splice requires the greatest amount of welding and, therefore, it should be used only where the other splicing methods are not suitable. Information on the replacement by use of the welded outside sleeve method is given in figures 4–5 and 4–6.

(*b*) Squarely cut out the damaged section of the tube. Cut a replacement steel tube of the same material and diameter and at least the same wall thickness to match the length of the removed portion of the damaged tube. This replacement tube must bear against the stubs of the original tube with a total tolerance not to exceed one-thirty-second inch. Select a length of steel tubing of an inside diameter approximately equal to the outside diameter of the damaged tube, of the same material and at least the same wall thickness. This outer sleeve tube material should fit snugly about the original tube with a maximum diameter difference of one-sixteenth inch. From this outer sleeve tube material, cut 2 sections of tubing diagonally or fishmouth, each of such a length that the nearest ends of the outer sleeve are a minimum distance of $1\frac{1}{2}$ tube diameters from the ends of the cut on the original tube. Use a fishmouth-cut sleeve wherever possible. Remove the burr from all the edges of the sleeves, replacement tube, and original tube stubs. Slip the two sleeves over the replacement tube, line up the replacement tube with the original tube stubs, and slip the sleeves out over the center of each joint. Adjust the sleeves to suit the area and to provide maximum reinforcement. Tack-weld the 2 sleeves to the replacement tube in 2 places before welding. Apply a uniform weld around both ends of one of the reinforcing sleeves and allow the weld to cool. Then weld around both ends of the remaining reinforcing tube. Allow one sleeve weld to cool before welding the remaining tube, to prevent undue warping.

(viii) *Splicing using larger diameter replacement tubes.* (*a*) This method of splicing structural tubes shown in figure 4–7 requires the least amount of cutting and welding. However, this splicing method cannot be used where the damaged tube is cut too near the adjacent cluster joints or where bracket mounting provisions make it necessary to maintain the same replacement tube diameter as the original. As an aid in installing the replacement tube, squarely cut the original damaged tube, leaving a minimum short stub equal to $2\frac{1}{2}$ tube diameters on one end and a minimum long stub equal to $4\frac{1}{2}$ tube diameters on the other end.

(*b*) Select a length of steel tube of the same material and at least the same wall thickness, having an inside diameter approximately equal to the outside diameter of the damaged tube. This replacement tube material should fit snugly about the original tube with a maximum diameter difference of one-sixteenth inch. From this replacement tube material, cut a section of tubing diagonally or fishmouth of such a length that each end of the tube is a minimum distance of $1\frac{1}{2}$ tube diameters from the end of the cut on the original tube. Use a fishmouth-cut replacement tube wherever possible. Remove the burr from the edges of the replacement tube and the original tube studs. If a fishmouth cut is used, file out the sharp radius of the cut with a small, round file. Spring the long stub of the original tube from the normal position; slip the replacement tube over the long stub, then back over the short stub. Center the replacement tube between the stubs of the original tube. In several places tack-weld one end of the replacement tube; then weld completely around the end. In order to prevent distortion, allow the weld to cool completely; then weld the remaining end of the replacement tube to the original tube.

(3) *Repairs at built-in fuselage fittings.* Repairs of built-in fuselage fittings may be accomplished in a manner as shown in figure 4–8. Splices should be made in accordance with the methods described in the foregoing sections. The following sections outline the different methods as shown in the figure.

(i) *Tube of larger diameter than original.* A tube (sleeve) of larger diameter than original is used in the method shown in figure 4–9. This necessitates reaming the fitting holes (at longeron) to a larger diameter. The sleeve should extend approximately 6 inches forward (left of fitting) of the joint and 8 inches aft (right of fitting). The forward splice should be a 30° scarf splice. The rear longeron (right) should be cut off approximately 4 inches from the centerline of the joint and a spacer 1 inch long fitted over the longeron. This spacer and longeron should be edge welded. A tapered V-cut approximately 2 inches long should then be made in the aft end of the outer sleeve. The end of the outer sleeve should be swaged to fit the longeron and welded.

(ii) *Tube of same diameter as original.* In this method, shown in figure 4–9, the new section of tube is the same size as the longeron forward (left) of the fitting. The rear end (right) of the tube is cut at 30° and forms the outside sleeve

of a scarf splice. A sleeve is centered over the forward joint as indicated.

(iii) *Simple sleeve.* The longeron is assumed the same size on each side of the fitting in this case, in figure 4–9, and is repaired by a simple sleeve of larger diameter than the longeron.

(iv) *Large difference in longeron diameter each side of fitting.* Figure 4–9 (D) assumes that there is a quarter of an inch difference in the diameter of the longeron on the two sides of the fitting. The section of longeron forward (left) of the fitting is cut at 30° and a section of tubing of the same size as this tube and of such length as to extend well to the rear (right) of the fitting is slipped through it. One end is cut at 30° to fit the 30° scarf at left and the other end fishmouthed as shown. This makes it possible to insert a tube of such diameter as to form an inside sleeve for the tube on the left of the fitting and an outside sleeve for the tube on the right of the fitting.

(4) *Engine mounts*—(i) *General.* All welding on an engine mount should be of the highest quality, since vibration tends to accentuate any minor defect present. Engine mount members should preferably be repaired by using a larger diameter replacement tube telescoped over the stub of the original member and using fishmouth and rosette welds. However, 30° scarf welds in place of the fishmouth welds will be considered acceptable for engine mount repair work.

(ii) *Check of alinement.* Repairs to engine mounts should be governed by accurate means of checking alinement. When tubes are used to replace bent or damaged ones, the original alinement of the structure must be maintained. This can be done by measuring the distance between points of corresponding members that have not been distorted, and by reference to the manufacturer's drawings.

(iii) *Cause for rejection.* If all members are out of alinement, the engine mount should be replaced by one supplied by the manufacturer or one which has been built to conform to the manufacturer's drawings. The method of checking the alinement of the fuselage or nacelle points should be requested from the manufacturer.

(iv) *Engine mount ring damage.* Minor damage such as a crack adjacent to an engine attachment lug may be repaired by rewelding the ring and extending a gusset or a mounting lug past the damaged area. Engine mount rings which have been extensively damaged should not be repaired but should be replaced unless the method of repair is specifically approved by an authorized representative of the Civil Aeronautics Administration.

(5) *Landing gears*—(i) *Round tube construction.* Landing gears made of round tubing may be repaired using standard repairs and splices, as shown in figures 4–2 and 4–8.

(ii) *Streamline tube construction.* Landing gears made of streamlined tubing may be repaired by any one of the methods shown in figures 4–9 and 4–12.

(iii) *Axle assemblies.* (*a*) Representative types of repairable and nonrepairable landing gear axle assemblies are shown in figure 4–13. The types as shown in A, B, and C of this figure are formed from steel tubing and may be repaired by any applicable method shown in figures 4–2 to 4–12 in this manual. However, it will always be necessary to ascertain whether or not the members are heat-treated.

(*b*) The axle assembly as shown in figure 4–13 D is, in general, of a nonrepairable type for the following reasons:

(*1*) The axle stub is usually made from a highly heat-treated nickel alloy steel and carefully machined to close tolerances. These stubs are usually replaceable and should be replaced if damaged.

(*2*) The olco portion of the structure is generally heat-treated after welding and is perfectly machined to assure proper functioning of the shock absorber. These parts would be distorted by welding after machining.

(iv) *Ski pedestals.* Damaged pedestals made of steel tubing may be repaired by using any applicable method shown in figures 4–2 through 4–12.

(6) *Built-up tubular wing or tail surface spars.* Built-up tubular wing or tail surface spars may be repaired by using any of the applicable splices and methods of repair shown in figures 4–2 to 4–12 provided the spars are not heat-treated. In the case of heat-treated spars, the entire spar assembly would have to be reheat-treated to the manufacturer's specifications after completion of the repair. In general, this will be found less practicable than replacing the spar with one furnished by the manufacturer.

(7) *Wing and tail surface brace struts.* In general it will be found advantageous to replace damaged wing brace struts made either from round or streamlined tubing by new members purchased from the original manufacturer. However, there is no objection from an airworthiness point of view to repairing such members in a proper manner. An acceptable method in case streamlined tubing is used will be found in figure 4–10. Similar members made of round tubes may be repaired using a standard splice, as shown in figures 4–2, 4–4, or 4–5.

(i) *Location of splices.* Steel brace struts may be spliced at any point along the length of the strut provided the splice does not overlap any part of an end fitting. The jury strut attachment is not considered an end fitting; therefore, a splice may be made at this point. The repair procedure and workmanship should be such as to minimize distortion due to welding and the necessity for subsequent straightening operations. Every repaired strut should be carefully observed during initial flights to ascertain that the vibration characteristics of the strut and attaching components have not been adversely affected by the repair. The check should cover a wide range of speed and engine power combinations.

(ii) *Fit and alinement.* When making repairs to wing and tail surface brace members, particular attention should be paid to proper fit and alinement to avoid eccentricities.

(8) *Repairs to welded parts.* Repairs to welded assemblies may be made by either of the following methods:

(i) *Replacing welded joints.* Cutting out the welded joint and replacing it with one properly gusseted.

(ii) *Replacing weld deposit.* Chipping out the metal deposited by the weld process and rewelding after properly reinforcing the joint by means of inserts or external gussets.

(c) *Stainless steel structures*—(1) *General.* Structural components made from stainless steel, particularly the "18–8" variety (18 percent chromium, 8 percent nickel), joined by spot welding, should be repaired only at the factory of origin or by a repair station designated by the manufacturer and rated by the Civil Aeronautics Administration to perform this type of work, unless the repair is made using bolted or riveted connections which are specifically approved by an authorized representative of the Civil Aeronautics Administration.

(2) *Secondary structural and nonstructural elements.* Elements such as tip bows or leading and trailing edge tip strips of wing and control surfaces may be repaired by soldering with a 50–50 lead-tin solder or a 60–40 alloy of these metals. For best results a flux of phosphoric acid (syrup) should be used. Since the purpose of a flux is to attack the metal so that the soldering will be effective, any excess flux should be removed by washing the joint. Due to the high heat conductivity of stainless steel, a soldering iron large enough to do the work properly must be used. Leaky spot welded seams in boat hulls, fuel tanks, etc., should be repaired in a similar manner.

(d) *Riveted or bolted steel truss type structures.* Repairs to riveted or bolted steel truss type structures should be made employing the general principles outlined in the following sections on aluminum alloy structures. Methods of repair of vital members should specifically be approved by a representative of the Civil Aeronautics Administration.

(e) *Aluminum alloy structures*—(1) *General.* Extensive repairs to damaged stressed skin on monocoque types of aluminum alloy structures should be made at the factory of origin or by a repair station rated for this type of work. In any event such work should be undertaken only by a certificated mechanic thoroughly experienced in this type of work. The repairs should preferably be made in accordance with specific recommendations of the manufacturer of the aircraft. In many cases repair parts, joints, or reinforcements can be designed and proof of adequate strength shown, without the calculation of the design loads and stresses, by properly considering the material and dimensions of the original parts and the riveted attachments. Examples illustrating the principles of this method as applied to typical repairs are given in this manual or may be found in textbooks on metal structures. An important point to bear in mind making repairs on monocoque structures is that a repaired part must be as strong as the original with respect to all types of loads and general rigidity.

(i) *Use of annealed alloys for structural parts.* The use of annealed 17S or 24S alloys for any structural repair of an aircraft is not considered satisfactory on account of their poor corrosion resisting properties.

(ii) *Hygroscopic materials improperly moisture-proofed.* The use of hygroscopic materials improperly moisture-proofed such as impregnated fabrics, leather and the like, in attempting to effect watertightness of joints and seams is not considered acceptable practice.

(iii) *Drilling oversized holes.* Great care should be exercised to avoid drilling over-size holes or otherwise decreasing the effective tensile area of wing spar capstrips, wing, fuselage, or fin longitudinal stringers, or other highly stressed tensile members. All repairs or reinforcements to such members should be done in accordance with factory recommendations or with the specific approval of a representative of the Civil Aeronautics Administration.

(iv) *Disassembly prior to repairing.* If the parts to be removed are essential to the rigidity of the complete structure, the remaining structure should be adequately supported prior to disassembly, in such a manner as to prevent distortion and permanent damage to the remainder of the structure. Rivets may be removed by using special tools developed for the purpose or by center-punching the heads, drilling not quite through with a drill of the same size as the rivets, and shearing the heads off by a sharp blow with a small cold chisel. Rivet joints adjacent to the damaged parts should be inspected for partial failure (slippage) by removing one or more rivets to see if the holes are elongated or the rivets have started to shear.

(2) *Selection of material for replacement parts.* In selecting the alloy, it is usually satisfactory to use 24S in place of 17S since the former is stronger. Hence, it will not be permissible to replace 24S by 17S unless the deficiency in strength of the latter material has been compensated by an increase in material thickness or the structural strength has been substantiated by tests or analyses. Information on the comparative strength properties of these alloys as well as 14S, R-301, 61S, 75S, etc., is contained in ANC-5, "Strength of Metal Aircraft Elements." The choice of temper depends upon the severity of the subsequent forming operations. Parts having single curvature and straight bend lines with a large bend radius may be advantageously formed from heat-treated material, while a part such as a fuselage frame would have to be formed from soft annealed sheet and heat-treated after forming. Sheet metal parts which are to be left unpainted should be made of clad (aluminum coated) material. All sheet material and finished parts should be free from cracks, scratches, kinks, tool marks, corrosion pits, and other defects which may be factors in subsequent failure.

(3) *Forming sheet metal parts.* Bend lines should preferably be made to lie at an angle to the grain of the metal (preferably 90°). Before bending, all rough edges should be smoothed, burrs removed and relief holes drilled at the ends of bend lines and at corners to prevent cracks from starting. For material in the heat-treated condition, the bend radius should be large. See table 4–3 for recommended bend radii.

(3) *Heat treatment*—(i) *General.* All structural aluminum alloy parts should be heat treated in accordance with the heat treatment instructions issued by the manufacturers of the materials. If the heat treatment produces warping, the parts should be strengthened immediately after quenching. Riveted parts should be heat-treated before riveting, to preclude warping and corrosion. When riveted assemblies are heated in a salt bath, the salt cannot be entirely washed out of the crevices, thus causing corrosion.

(ii) *Quenching in hot water or air.* The quenching of 17S or 24S alloys in water above 100° F., or air at any temperature after heat treatment will not be satisfactory. For clad material, when the use of cold water will result in too great a distortion of the finished part, the use of oil, hot water, water spray or forced air draft is satisfactory, provided the parts will not be subject to severe corrosion in service. Quenching in still air is not satisfactory.

(iii) *Transferring too slowly from heat treatment medium to quench tank.* Transfer of 17S or 24S alloys from the heat treatment medium to the quench tank should be accomplished as quickly as possible. An elapsed time of 10 to 15 seconds will, in many cases, result in noticeably impaired corrosion resistance.

(iv) *Reheating at temperatures above boiling water.* Reheating at temperatures above that of boiling water of 17S or 24S alloys after heat treatment, and the baking of primers at temperatures above that of boiling water, will not be considered acceptable without subsequent complete and correct heat treatment, as such practice tends to impair the original heat treatment.

(4) *Riveting*—(i) *Identification of rivet material.* Identification of rivet material is contained in § 18.30–6.

(ii) *Replacement of aluminum alloy rivets.* All protruding head rivets, (roundhead, flathead, and brazier-head) may be replaced by rivets of the same type or by AN–470 Universal-head rivets. Flushhead rivets should be used to replace flushhead rivets.

(*a*) *Replacement rivet size and strength.* Replacements should be made with rivets of the same size and strength wherever possible. If the rivet hole has become enlarged, deformed, or otherwise damaged, the hole should be drilled or reamed for the next larger size rivet, care being taken, however, that the edge distances and spacings are not less than minimums listed in (*b*) of this subdivision. Rivets may not be replaced by a type of lower strength properties, unless the lower strength is adequately compensated for by an increase in size or a greater number of rivets.

(*b*) *Replacement rivet edge distances and spacings for sheet joints.* Rivet edge distance is defined as the distance from the center of the rivet hole to the nearest edge of the sheet. Rivet spacing is the distance from the center of the rivet hole to the center of the adjacent rivet hole. Edge distances and spacings should not be less than the following:

(*1*) *Single row.* Edge distances not less than 2 times the diameter of the rivet and spacing not less than 3 times the diameter of the rivet.

(*2*) *Double row.* Edge distance and spacing not less than the minimums shown in figure 4–14.

(*3*) *Triple or multiple rows.* Edge distance and spacing not less than the minimums shown in figure 4–14.

(iii) *Use of A17S–T3 aluminum alloy replacement rivets.* It will be considered acceptable to replace all 17S–T3 rivets of three-sixteenths-inch diameter or less, and also all 24S–T4 rivets of five-thirty-seconds-inch diameter or less with A17S–T3 rivets for general repairs, provided the replacement rivets are one-thirty-second-inch greater in diameter than the rivets they replace, and provided the edge distances and spacings are not less than the minimums listed in subdivision (ii) (*b*) of this subparagraph.

(iv) *Driving of rivets.* A17S rivets may be driven in the condition received, but 17S rivets above three-sixteenths inch in diameter, and all 24S rivets should either be kept refrigerated in the "as quenched" condition until driven or be reheat-treated just prior to driving as they would otherwise be too hard for satisfactory riveting. Dimensions for formed flat rivet heads are shown in figure 4–15, together with commonly found rivet imperfections, which should be guarded against.

(v) *Blind-type and hollow rivets.* (*a*) Hollow rivets should not be substituted for solid rivets in load-carrying members without specific approval of the application by a representative of the Civil Aeronautics Administration.

(*b*) Blind rivets may be used in blind locations in accordance with the conditions listed in § 18.30–6, provided the edge distances and spacings are not less than the minimums listed in subdivision (ii) (*b*) of this subparagraph.

(vi) *New and revised rivet patterns.* (*a*) A new or revised rivet pattern should be designed for the strength required in accordance with the specific instructions in subparagraphs (5) (vi) and (viii) (*d*) of this paragraph.

(*b*) A general rule for the diameter of rivets used to join dural sheets is to use a diameter approximately three times the thickness of the sheet, or somewhat larger for thin sheet. Rivets should not be used where they would be placed in tension tending to pull the heads off. A lap joint of thin sheets should be "backed up" by a stiffening section.

(5) *Repair methods*—(i) *Precautions.* (*a*) When adding or replacing rivets adjacent or near to 17S or 24S rivets which have been installed previously, great care should be exercised or the older rivets will be loosened or may fail due to sharp vibrations in the structures caused by the action of the rivet gun and bucking bar. In every case all adjacent rivets should be carefully examined after the repair or alteration is finished to

ascertain that they have not been harmed by operations in adjacent areas.

(b) Rivet holes should be drilled, round, straight, and free from cracks. The snap used in driving the rivets should be cupped slightly flatter than the rivet heads shown in figure 4–15. Rivets should be driven straight and tight, but not overdriven or driven while too hard, since the finished rivet must be free from cracks. Information on special methods of riveting, such as flush riveting, usually may be obtained from manufacturer's service manuals.

(ii) *Splicing of tubes.* (a) Round or streamline tubular members may be repaired by splicing as shown in figure 4–16. Splices in struts should not overlap the fittings.

(b) When solid rivets go completely through hollow tubes, their diameter should be at least one-eighth of the outside diameter of the outer tube. Rivets which are loaded in shear should be hammered only enough to form a small head, and no attempt should be made to form the standard round head. The amount of hammering required to form the standard round head often causes the rivet to buckle inside the tube. Satisfactory rivet heads may be produced in such installations by spinning, if the proper equipment is available. Correct and incorrect examples of this type of rivet application are incorporated in figure 4–16.

(iii) *Repairs to aluminum alloy members.* Repairs to aluminum alloy members should be made with the same material or with suitable material of higher strength. The 75S alloy has greater tensile strength than other commonly used aluminum alloys such as 14S and 24S but it is subject to somewhat greater notch sensitivity. In order to take advantage of its higher strength characteristics, particular attention should be paid in design of parts to avoid notches, small radii, large or rapid changes in cross-sectional area. In fabrication, care should be taken to avoid processing and handling defects, such as machine marks, nicks, dents, burrs, scratches and forming cracks. Cold straightening or forming of 75S–T6 can cause cracking; hence, it may be advisable to limit this processing to minor cold straightening.

(iv) *Wing and tail surface ribs.* Damaged aluminum alloy ribs either of the stamped sheet-metal type or the built-up type employing special sections, square or round tubing, may be repaired by the addition of suitable reinforcement. Acceptable methods of repair are shown in figures 4–17 and 4–18. These examples deal with types of ribs commonly found in small and medium aircraft. Any other method of reinforcement should be specifically approved by a representative of the Civil Aeronautics Administration.

(a) *Trailing and leading edges and tip strips.* Repairs to wing and control surface trailing and leading edges and tip strips should be made by properly executed and reinforced splices. Acceptable methods of trailing edge repairs are shown in figure 4–19.

(v) *Repair of damaged skin*—(a) *Replacement of skin panels.* In case metal skin is damaged extensively, repairs should be made by replacing an entire sheet panel from one structural member to the next. The repair seams should be made to lie along stiffening members, bulkheads, etc., and each seam should be made exactly the same in regard to rivet size, spacing, and rivet pattern as the parallel manufactured seams at the edges of the original sheet. If the two manufactured seams are different, the stronger one should be copied. See figure 4–20 for typical acceptable methods of repairs.

(b) *Patching of small holes.* (1) Small holes in skin panels which do not involve damage to the stiffening members may be patched by covering the hole with a patch plate in the manner shown in figure 4–20.

(2) Flush type patches also can be installed in stressed skin type of construction. An acceptable and easy flush patch can be made by trimming out the damaged area and then installing a conventional patch on the underneath side or back of the sheet being repaired. A plug patch plate of the same size as the opening can then be inserted and riveted to the patch plate installed as above. This will complete an acceptable flush type patch. Other types of flush patches similar to those used for patching plywood, reference figure 2–16, also can be used. The riveting pattern used, however, should follow standard practice so as to maintain satisfactory strength in the sheet. (See subdivision (i) of this subparagraph.)

(3) In general, patches in metal skin are not restricted as to size or shape; however, those of rectangular, circular, square, oval, and rectangular with round ends usually are more desirable as to appearance and ease of installation.

(vi) *Splicing of sheets.* In some cases the method of copying the seams at the edges of a sheet may not be satisfactory; for example, when the sheet has cutouts, or doubler plates at an edge seam, or when other members transmit loads into the sheet. In these cases, the splice should be designed as illustrated in the following example:

Material: Clad 17S sheet, 0.032 inch thickness. Width of sheet (i. e. length at splice) = "W" = 10 inches.

To determine rivet size and pattern for a single-lap joint, similar to figure 4–14:

(a) Use rivet diameter of approximately three times the sheet thickness $3 \times 0.032 = 0.096$ inch. Use one-eighth A17S–T3 rivets (⅛ A17S–T3 would also be satisfactory).

(b) Determine the number of rivets required per inch of width, "W", from table 4–5. Number per inch $= 4.9 \times .75 = 3.7$. Total number of rivets required $= 10 \times 3.7 = 37$ rivets.

(c) Lay out rivet pattern with spacing not less than those shown in figure 4–14. Referring to figure 4–14A, it is seen that a double-row pattern with the minimum spacing will give a total of 40 rivets. However, as only 37 rivets are required, 2 rows of 19 rivets each, equally spaced over the 10 inches will result in a satisfactory splice.

(vii) *Straightening of stringers or intermediate frames*—(a) *Members slightly bent.* Members which are slightly bent may be straightened cold and examined with a magnifying glass for injury to the material. The straightened parts should then be reinforced to an extent depending upon the condition of the material and the magnitude of any remaining kinks or buckles. If any strain cracks are apparent, complete reinforcements should be added by following the manufacturer's recommendations and the attachment of the reinforcements should be made in sound metal beyond the damaged portion.

(b) *Local heating.* Local heating should never be applied to facilitate bending, swaging, flattening, or expanding operations on heat-treated aluminum alloy members, as it is difficult to control the temperatures closely enough to prevent possible damage to the metal and it may impair its corrosion resistance.

(viii) *Splicing of stringers and flanges.* (a) Splices should be made in accordance with the manufacturer's recommendations, which are usually contained in a repair manual.

(b) Typical splices for various shapes of sections are shown in figures 4–21 and 4–23. Splices should be designed to carry both tension and compression and the splice shown in figure 4–22 will be used as an example illustrating the following general principles:

(1) *Statement of principles.* (i) To avoid eccentric loading and consequent buckling in compression, splicing or reinforcing parts should be placed as symmetrically as possible about the centerline of the member and attachment made to as many elements as necessary to prevent bending in any direction.

(ii) To avoid reducing the strength in tension of the original bulb angle, the rivet holes at the ends of the splice are made small (no larger than the original skin attaching rivets), and the second row of holes (those through the bulbed leg) are staggered back from the ends. In general the rivets should be arranged in the splice so that the design tensile load for the member and splice plate can be carried into the splice without failing the member at the outermost rivet holes.

(iii) To avoid concentration of load on the end rivet and consequent tendency toward progressive rivet failure, the splice is tapered off at the ends, in this case by tapering the backing angle and by making it shorter than the splice bar (see fig. 4–22).

The preceding principles are especially important in splicing stringers on the lower surface of stressed skin wings, where high tension stresses may exist. When several adjacent stringers are spliced, the splices should be staggered if possible.

(2) *Size of splicing members.* When the same material is used for the splicing member as for the original member, the net cross section area (i. e., the shaded areas in fig. 4–21) of the spliced member should be greater than the area of the section element which it splices. The area of a section element (or each leg of an angle or channel) is equal to the width multiplied by the thickness. For example, in figure 4–22, the bar, "B," is assumed to splice the upper leg

of the stringer, and the angle, "A," to splice the bulbed leg of the stringer. Since the splice bar, "B," is not as wide as the adjacent leg, and since the rivet diameter is also subtracted from the width, the bar is made twice as thick in order to obtain sufficient net area.

(3) *The diameter of rivets in stringers.* The diameter of rivets in stringers should preferably be between 2 and 3 times the thickness, "t," of the leg, but should not be more than one-fourth the width, "W," of the leg. Thus, one-eighth-inch rivets are chosen in the example, figure 4–22. If this splice were in the lower surface of a wing, the end rivets would be made the same size as the skin attaching rivets, say three thirty-seconds.

(4) *The number of rivets.* (i) The number of rivets required on each side of the cut in a stringer or flange may be determined from standard textbooks on aircraft structures, or may be found from tables 4–4, 4–5, or 4–6. In determining the number of rivets required in the example, figure 4–22, for attaching the splice bar, "B," to the upper leg, the thickness "t" of the element of area being spliced is one-sixteenth inch (use 0.064), the rivet size is one-eighth inch, and table 4–5 shows that 9.9 rivets are required per inch of width. Since the width, "W," is one-half inch, the actual number of rivets required to attach the splice bar to the upper leg, on each side of the cut, is 9.9 (rivets per inch) × 0.5 (inch width) = 4.95; use 5 rivets.

(ii) For the bulbed leg of the stringer, "t" = ⅛ inch (use 0.064), AN–3 bolts are chosen and the number of bolts required per inch of width = 3.3. The width, "W," for this leg, however, is 1 inch, and the actual number of bolts required on each side of the cut is $1 \times 3.3 = 3.3$; use 4 bolts. When both rivets and bolts are used in the same splice, the bolt holes should be accurately reamed to size. It is preferable to use only one type of attachment, but in the above example, the dimension of the legs of the bulb angle indicated rivets for the upper leg and bolts for the bulb leg.

(5) *Splicing of intermediate frames.* The same principles that are used for stringer splicing may be applied to intermediate frames, when the following point is also considered:

(i) Conventional frames of channel or Z section are relatively deep and thin compared to stringers, and usually fail by twisting or by buckling of the free flange. The splice joint should be reinforced against this type of failure by using a splice plate heavier than the frame and by splicing the free flange of the frame with a flange of the splice plate, as illustrated in figure 4–24. Since a frame is likely to be subjected to bending loads, the length of splice plate "L" should be more than twice the width, "W," and the rivets spread out to cover the plate.

(ix) *Repairing cracked members.* Acceptable methods of repairing various types of cracks occurring in service in structural elements from various causes are shown in figures 4–25 to 4–28. The following general procedure should be followed in repairing such defects:

(a) Small holes three thirty-seconds inch (or ⅛ inch) should be drilled at the extreme ends of the cracks to mitigate the possibility of their spreading further.

(b) Reinforcements as shown in these figures should be added to carry the stresses across the damaged portion and to stiffen the joints.

The condition causing such cracks to develop at a particular point is stress concentration at that point in conjunction with repetition of stress (such as produced by vibration of the structure). The stress concentration may be due to the design or to defects such as nicks, scratches, tool marks, and initial stresses or cracks from forming or heat-treating operations. It should be noted that an increase in sheet thickness alone is usually beneficial but does not necessarily remedy the conditions leading to cracking.

(f) *Fittings*—(1) *Steel fittings*—(i) *Inspections for defects.* (a) Fittings should be free from scratches, vise and nibbler marks, and sharp corners. A careful examination of the fitting with a medium power (at least 10 power) magnifying glass will be considered an acceptable inspection.

(b) When repairing aircraft after an accident or in the course of a major overhaul, all highly stressed main fittings should be inspected in accordance with the provisions of § 18.30–8, and, if necessary, corrosion prevention measures taken as recommended in § 18.30–7.

(ii) *Torn, kinked, or cracked fittings.* Torn, kinked, or cracked fittings should be replaced and not repaired.

(iii) *Elongated or worn bolt holes.* Elongated holes in fittings which were designed without bushings should not be reamed oversize but such fittings should be replaced unless the method of repair is approved by a representative of the Civil Aeronautics Administration. Holes should not be filled with welding rod. Acceptable methods of repairing elongated or worn bolt holes in landing gear, stabilizer, interplane or cabane strut ends only, not originally equipped with pin plates, are shown in figure 4–29. (See also figure 4–8 on longeron repair at a fitting.)

(2) *Aluminum and aluminum alloy fittings.* Damaged fittings should be replaced with new parts having the same material specifications or the method of repair should be specifically approved by a representative of the Civil Aeronautics Administration.

(g) *Castings.* Damaged castings should be replaced and not repaired unless the method of repair is specifically approved by a representative of the Civil Aeronautics Administration.

§ 18.30–5 *Control cables and terminals (CAA policies which apply to § 18.30)*—(a) *Control cables and wires.* Control cables and wires should be replaced if injured, distorted, worn, or corroded even though the strands are not broken. However, cable sections may be spliced using the procedures of subparagraph (1) of this paragraph. Cable tension should be checked after installation to insure proper rigging.

(1) *Splicing.* (i) Control cables may be spliced when they become worn, distorted, corroded, or otherwise injured. The cable, thimbles, shackles, turnbuckles, bolts, and other parts should be of the same size, material, and quality as the original parts or of such size that the repaired cable will be of strength equivalent to the original. However, AN–666 through AN–669 standard swaged cable terminals develop the full cable strength and may be substituted for the original terminals wherever practical. If facilities and supplies are limited, repair may sometimes be accomplished, using thimbles, bushings, and turnbuckles in place of original terminals. When this is done, flexible cables 7 x 7 and 7 x 19, having a diameter of three thirty-seconds inch or over, may be woven spliced by means of the 5-tuck method. Flexible cable less than three thirty-seconds inch in diameter and nonflexible carbon steel 19 wire cable (MIL–C–6940) may be wrap-soldered. Directions for fabricating these splices and limitations as to their use are contained in the following paragraphs.

(ii) All splices should be installed so that no portion of the splice comes closer than 2 inches to any fairlead or pulley and the connections should not be located at points where jamming may occur during any portion of the travel of either the loaded cable or the slack cable in the deflected position.

(2) *Substitution of cable.* Substitution of control cable (aircraft cord) for hard or streamlined wires will not be acceptable unless specifically approved by a representative of the Civil Aeronautics Administration.

(3) *Cutting and heating.* Cables should be cut to length only by mechanical means. The use of a torch in any manner is not permitted. Wires and cables should never be subjected to excessive temperature. Soldering bonding braid to control cable will not be considered satisfactory.

(4) *Rust prevention.* If the cables are made from tinned steel, the cable should be coated with rust preventive oil. It is to be noted that corrosion-resistant steel cable does not require this treatment for rust prevention.

(b) *Swaged terminals.* Swaged cable terminals as for instance AN–666 through AN–669 manufactured in accordance with Air Force-Navy Aeronautical Standard Specifications are suitable for use in civil aircraft for loads up to and including the maximum cable loads permitted by the specification. Limits and tolerances for critical dimensions, before and after swaging, are specified on the AN standard cable terminal drawings and also in the literature issued by manufacturers of swaging tools. When such tools are used, it is important that the instructions supplied by the manufacturer including "go" and "no go" after swaging dimensions, be followed in detail in order that defective and inferior swaging will be avoided. Observance of all instructions should result in a swaged terminal developing the full rated strength of the cable.

(1) *Cable slippage in terminal.* Care should be exercised to insure the cable is properly inserted in the band after the swaging operation is completed as instances have been noted of cases where in only one-fourth inch of the cable was

properly swaged in the terminal. Observance of the following precautions should minimize this possibility:

(i) Measure the length of the terminal end of the fitting to determine the proper length of cable to be inserted in the barrel of the fitting.

(ii) Lay off this length at the end of the cable and mark with masking tape. Since the tape will not slip, it will provide a positive marking during the swaging process.

(iii) After swaging, check the tape marker to make certain that the cable did not slip during the swaging operation.

(iv) Check swaged fitting with a "go"-"no go" gage to see that the fitting is properly compressed.

(v) Remove the tape and, using red paint, paint the junction of the swaged fitting and cable.

(vi) At all subsequent service inspections of the swaged fitting, check for a gap in the painted section to see if cable slippage has occurred.

(2) *Ball-and-socket-type terminals.* Ball-and-socket-type swaged terminals and other types that do not positively prevent cable untwisting should not be used for general replacement except where they were utilized on the original installation by the aircraft manufacturer.

(c) *Woven splice terminal.* (1) The 5-tuck woven splice terminals shown in figure 5–1 may be utilized on 7 x 7 flexible and 7 x 19 extra flexible cables of three thirty-seconds inch diameter or greater. This type of terminal will develop only 75 percent of the cable strength and should not be used to replace swaged or other high efficiency terminals unless it is definitely known that the design load for the cable is not greater than 75 percent of the cable minimum breaking strength (see table 5–1).

(2) In some cases it will be necessary to splice one end of the cable on assembly. For this reason, investigate the original installation for pulleys and fair leads that might restrict the passage of the splice. The procedure for the fabrication of a woven splice is as follows: See figure 5–1 for the designation of numbers and letters referred to in this sequence of operations.

(i) Secure the cable around a bushing or thimble by means of a splicing clamp in a vise with the free end to the left of the standing wire and away from the operator. If a thimble is used as the end fitting, turn to point outward approximately 45°.

(ii) Select the free strand (1) nearest the standing length at the end of the fitting and free this strand from the rest of the free ends. Next, insert a marlinspike under the first three strands (A, B, C) of the standing length nearest the separated strand of the free end and separate them momentarily by twisting the marlinspike. Insert the free strand (1) under the three separated strands through the opening created by the marlinspike. Pull the free end taut by means of pliers.

(iii) Unlay a second strand (2) located to the left of the first strand tucked, and insert this second strand under the first two standing strands (A, B). Loosen the third free length (3) located to the left of the first two, and insert it under the first standing strand (A) of the original three (section AA).

(iv) Remove the center or core strand (7) from the free end and insert it under the same standing strands (A, B). Temporarily secure the core strand to the body of the standing cable (see detail B). Loosen the last free strand (6) located just to the right of the first (1) and tuck it under the last two strands (E, F) of the standing cable. Tuck the fifth free end (5) around the fifth standing strand (E). Tuck the fourth free end (4) around the sixth standing strand (F) (see details B and E). Pull all strands snug toward the end fitting with the pliers. This completes the first tuck.

(v) Begin with the first free strand (1) and work in a counterclockwise direction, tucking free strands under every other strand. After the completion of every tuck, pull the strands tight with pliers. Pull toward the end fitting (see detail C). After the completion of the third complete tuck, cut in half the number of wires in each free strand. Make another complete tuck with the wires remaining. At the completion of the fourth tuck, again halve the number of wires in the free strands and make one final tuck with the wires remaining. Cut off all protruding strands and pound the splice with a wooden or rawhide mallet to relieve the strains in the wires. Serve the splice with waxed linen cord (6 ply, type B, Federal Specification V–T–291).

(vi) Start one-fourth inch from the end of the splice and carry the wrapping over the loose end of the cord and along the tapered splice to a point between the second and third tucks. Insert the end of the cord back through the last five wrappings and pull snug. Cut off the end, and if a thimble is used as an end fitting bend down the points. Apply 2 coats of shellac to the cord, allowing 2 hours between coats (see detail D). Carefully inspect the cable strands and splices for local failure. Weakness in a woven splice is made evident by a separation of the strand of serving cord.

(d) *Wrap-soldered splice.* The wrap-soldered splice terminal shown in figure 5–2 may be utilized on flexible cables less than three thirty-seconds inch in diameter and on nonflexible single-strand (19-wire) cable (MIL–C–6940). This type of terminal will develop only 90 percent of the cable strength and should not be used to replace swaged or other high efficiency terminals unless it is definitely known that the design load for the cable is not greater than 90 percent of the cable minimum breaking strength (see table 5–1). The method of making the wrapped and soldered splice is as follows:

(1) The serving or wrapping wire should be of commercial soft-annealed steel wire or commercial soft iron wire, thoroughly and smoothly tinned or galvanized.

(2) The solder should be half tin and half lead conforming to Federal Specification QQ–S–571. The melting point of this solder varies from 320° to 390° F., and the tensile strength is approximately 5,700 pounds per square inch.

(3) Solder flux should be a compound of stearic acid (there should be no mineral acid present) and rosin with a composition of 25 to 50 percent resin. A warming gluepot to keep the flux in fluid state is desirable.

(4) Before the cable is cut the wires are soldered to prevent slipping. The preferred process is to tin and solder the cable thoroughly for 2 or 3 inches by placing in a solder trough, finishing smooth with a soldering tool. The cable may be cut diagonally to conform to the required taper finish.

(5) After being soldered and cut the cable is securely bent around the proper size thimble and clamped, taking care that the cables lie close and flat and that the taper end for finish lies on the outside. If it is necessary to trim the taper at this point in the process, it is preferable that it be done by grinding, but grinding is permissible, provided a steel guard at least 3 inches long and one-thirty-second-inch thick is placed between the taper end and the main cable during the operation, and that the heat generated from the grinding does not melt the solder and loosen the wires.

(6) Serving may be done by hand or machine, but in either case each serving convolution must touch the adjoining one and be pulled tightly against the cable, with spaces for permitting a free flow of solder, and inspection.

(7) Care should be exercised to prevent drawing of the temper of any cable wires by excessive temperature or duration of applied heat. The flux used in this soldering should be stearic acid and resin. The use of sal ammoniac or other compounds having a corrosive effect is not permitted as a flux.

(8) Soldering is accomplished by immersing the terminal alternately in the flux and in the solder bath, repeating the operation until thorough tinning and filling with solder under the serving wire and thimble is obtained. The temperature of the solder bath and place where terminal is withdrawn should not be above 450° F. A soldering iron may be used in the final operation to give a secure and good-appearing terminal. Care should be taken that the solder completely fills the space under the serving wire and thimble. A slightly hollowed cast iron block to support the splice during soldering may help in securing the best results. The use of abrasive wheels or files for removing excess solder is not permissible.

(9) As an alternative process for making terminals for nonflexible cable, the oxyacetylene cutting method and the presoldering method (soldering before wrapping) are permitted, but only on the following conditions:

(i) That the process of cutting securely welds all wires together;

(ii) That the annealing of the cable does not extend more than one cable diameter from the end;

(iii) That no filing be permitted either before or after soldering;

(iv) For protection during the operation of grinding the tapered end of the cable, a steel guard at least 3 inches in length and one-thirty-second-inch thick should be placed between the taper and the main cable;

(v) The heat from grinding should not draw the temper of the cable.

(10) Wrap-soldered splice terminals should not be used ahead of the firewall, or in other fire zones, or in other locations where they might be subjected to high temperature.

(e) *Safetying of turnbuckles.* All turnbuckles should be safetied with safety wire using either the double or single wrap method, or with any appropriate approved special safetying device complying with the requirements of CAA Technical Standard Order No. TSO–C21. For safety wire sizes and materials refer to table 5–2. Safety wire should never be reused. The turnbuckle should be adjusted to the correct cable tension so that no more than three threads are exposed on either side of the turnbuckle barrel. Turnbuckles should never be lubricated.

(1) *Double wrap method.* (i) (a) Of the methods using safety wire for safetying turnbuckles, the method described here is preferred, although either of the other methods described is also satisfactory. This method of double wrap safetying is shown in figure 5–3 (A). Use two separate lengths of the proper wire (see table 5–2). Run one end of one wire through the hole in the barrel of the turnbuckle and bend the ends of the wire toward opposite ends of the turnbuckle. Then pass the second length of the wire into the hole in the barrel and bend the ends along the barrel on the side opposite the first length. Spiral the two wires in opposite directions around the barrel to cross each other twice between the center hole and the ends. Then pass the wires at the end of the turnbuckle in opposite directions through the holes in the turnbuckle eyes or between the jaws of the turnbuckle fork, as applicable, laying one wire along the barrel and wrapping the other at least four times around the shank of the turnbuckle and binding the layed wires in place before cutting the wrapped wire off. Wrap the remaining length of safety wire at least four turns around the shank and cut it off. Repeat the procedure at the opposite end of the turnbuckle.

(b) When a swaged terminal is being safetied, pass the ends of both wires, if possible, through the hole provided in the terminal for this purpose and wrap both ends around the shank as described above. When the hole in the terminal is not large enough to accommodate the ends of both wires, the hole may be enlarged in accordance with note 3 of table 5–2 and the safetying completed as described above. If the hole is not large enough to allow passage of both wires, pass the wire through the hole and loop it over the free end of the other wire, and then wrap both ends around the shank as described.

(ii) Another satisfactory double wrap method similar to subdivision (i) of this subparagraph, except that the spiraling of the wires is omitted, is shown in figure 5–3 (B).

(iii) The wrapping procedures described and shown on AND 10482 may be used in lieu of the other safetying methods shown herein.

(2) *Single wrap method.* The single wrap methods described below and illustrated in figures 5–3 (C) and (D) are acceptable but are not the equal of the double-wrap methods.

(i) Pass a single length of wire through the cable eye or fork or through the hole in the swaged terminal at either end of the turnbuckle assembly. Spiral each of the wire ends in opposite directions around the first half of the turnbuckle barrel so as to cross each other twice. Thread both wire ends through the hole in the middle of the barrel so that the third crossing of the wire ends is in the hole. Again spiral the two wire ends in opposite directions around the remaining half of the turnbuckle crossing them twice. Then pass one wire end through the cable eye or fork or through the hole in the swaged terminal, in the manner described in subparagraph (1) (i) of this paragraph, wrap both wire ends around the shank for at least four turns each, cutting off excess wire. This method is shown in figure 5–3 (C).

(ii) Pass one length of wire through the center hole of the turnbuckle and bend the wire ends toward opposite ends of the turnbuckle. Then pass each wire end through the cable eye or fork, or through the hole in the swaged terminal and wrap each wire end around the shank for at least four turns, cutting off excess wire. This method is shown in figure 5–3 (D). After safetying, no more than three threads of the turnbuckle threaded terminals should be exposed.

§ 18.30–6 *Bolts, screws, and miscellaneous fasteners (CAA policies which apply to § 18.30)*—(a) *Bolts.* Most bolts used in aircraft structures are either general purpose AN bolts, or NAS (National Aircraft Standard) internal wrenching or close-tolerance bolts. In certain cases aircraft manufacturers make up special bolts for a particular application and it is necessary to use them or their equivalent in replacement.

(1) *Identification.* (i) AN-type aircraft bolts can be identified by the code markings on the bolt heads. The markings generally denote the bolt manufacturer, the material of which the bolt is made, and whether the bolt is a standard AN-type or a special purpose bolt.

(ii) AN standard steel bolts are marked with either a raised dash or asterisk, corrosion-resistant steel is indicated by a single raised dash, and AN aluminum alloy bolts are marked with two raised dashes. The strength and dimensional details of AN bolts are specified on the Army-Navy Aeronautical Standard Drawings.

(iii) Special purpose bolts include the high-strength and low-strength types, close-tolerance types, and bolts inspected by magnetic, fluorescent, or equivalent inspection methods.

(iv) Typical markings include "SPEC" (usually highly heat treated), an aircraft manufacturer's part number stamped on the head, or plain heads (low strength). Close-tolerance National Aircraft Standards (NAS) bolts are marked with either a raised or recessed triangle. The material markings for NAS bolts are the same as for AN bolts, except that they may be either raised or recessed. Bolts inspected magnetically (Magnaflux) or by fluorescent means (Zyglo) are identified by means of colored lacquer or a head marking of a distinctive type. Figure 6–1 shows the typical coding used on aircraft bolt heads.

(2) *Grip length.* In general, bolt grip lengths should equal the material thickness. However, bolts of slightly greater grip length may be used provided washers are placed under the nut or the bolt head. In the case of plate nuts, shims may be added under the plate. For proper washers refer to paragraph (e) of this section.

(3) *Locking or safetying of bolts.* All bolts and or nuts, except self-locking nuts, should be suitably locked or safetied. Cotter pins and safety wire should not be reused.

(4) *Bolt fit.* Many bolt holes, in particular those in primary connecting elements, should have close tolerances. Generally, it is permissible to use the first lettered drill size larger than the nominal bolt diameter except where the AN hexagon bolts are used in light-drive fit (reamed) applications and where NAS close-tolerance bolts or AN clevis bolts are used. Bolt holes should be normal to the surface involved to provide full bearing surface for the bolt head and nut and should not be oversize or elongated. In case of oversize or elongated holes, in critical members, advice should be obtained from an Aviation Safety agent or engineer, or the aircraft manufacturer before drilling or reaming the hole to take the next larger bolt, as usually items such as edge distance, clearance, etc., must be considered.

(5) *Torques.* (i) Table 6–1 gives the recommended torque values for both the fine and coarse thread series of nuts. These values should be followed unless other instructions require a specific torque for a given nut. Bolts and nuts should be clean, dry, and thoroughly degreased before installation. Threads should not be oiled. Nuts should be torqued in all important places, such as wing-joint bolts, engine-support bolts, landing-gear bolts, and the like.

(ii) When tightening castellated nuts on bolts, the cotter-pin holes may not line up with the slots in the nuts for the range of recommended values listed in table 6–1. Except in cases of highly stressed engine parts, the nut may be over-tightened to permit lining up the next slot with the cotter pin hole.

(6) *Hex-head bolts (AN–3 through AN–20).* The hex-head aircraft bolt is an all-purpose structural bolt used for general applications involving tension or shear loads. Alloy steel bolts smaller than No. 10–32 and aluminum alloy bolts smaller than ¼-inch diameter should not be used in primary structure. Aluminum alloy bolts and nuts should not be used where they will be repeatedly removed for purpose of maintenance and inspection. Aluminum alloy nuts may be used with cadmium-plated steel bolts loaded in shear on land airplanes, but are not to be used on seaplanes due to the possibility of dissimilar metals corrosion.

(7) *Close-tolerance bolts (AN–173 through AN–186) (hex-head), and (NAS–80 through NAS–86) (100° countersunk).* Close-tolerance bolts are used in high-performance aircraft in applications where the bolted joint is subject to severe load reversals and vibration. The standard AN hex-head bolts may be used for the same applications provided a light-drive fit is accomplished.

(8) *Internal wrenching bolts (MS–20004 through MS–20024 or NAS–495).* These bolts are suitable for use both in tension and shear applications. In steel parts, either the bolt hole should be countersunk to seat the large radius of the shank at the head or, as in aluminum alloys, a special heat-treated washer (NAS–143C) should be used to fit the head and to provide adequate bearing area. A special heat-treated plain washer (NAS–143) is used under the nut. Special high-strength nuts should be used on these bolts. (Refer to paragraph (d) (3) (vii) of this section.) All internal wrenching bolts should be replaced by another internal wrenching bolt. Standard AN hex-head bolts and washers cannot be substituted for them, as they do not have the required strength.

(9) *Drilled-head bolts (AN–73 through AN–81).* The AN drilled-head bolt is similar to the standard hex-bolt, but has a deeper head which is drilled to receive wire for safetying. The AN–3 and the AN–73 series of bolts are interchangeable for all practical purposes from the standpoint of tension and shear strengths.

(b) *Screws.* In general, screws differ from bolts by the following characteristics: Usually lower material strength, a looser thread fit (No. 2), head shapes formed to engage a screwdriver, and the shank threaded along its entire length without a clearly defined grip. However, several types of structural screws are available that differ from the standard structural bolts only in the type of head. The material is equivalent and a definite grip is provided. The AN–525 washerhead screws, the AN–509–100° countersunk structural screws, and the NAS–204 through NAS–235 are such parts. The material markings are the same as those used on AN standard bolts.

(1) *Structural screws (NAS–204 through NAS–235) (AN–509 and AN–525).* This type of screw, when made of alloy steel such as SAE–4130, NE–8630, or equivalent, and heat-treated from 125,000 to 145,000 p. s. i., may be used for structural assembly in shear applications similar to structural bolts.

(2) *Self-tapping screws.* The AN–504 and AN–506 screws are used for attaching minor removable parts such as nameplates and the like. AN–530 and AN–531 are used in blind applications for the temporary attachment of sheet metal for riveting and the permanent assembly of nonstructural assemblies. AN–535 is a plain head self-tapping screw used in the attachment of nameplates or in sealing drain holes in corrosion-proofing tubular structures and is not intended to be removed after installation. Self-tapping screws should never be used to replace standard screws, nuts, bolts, or rivets in the original structure.

(c) *Pins.* The three types of pins used in aircraft structures are: The taper pin, the flathead pin, and the cotter pin. Pins are used in shear applications and for safetying.

(1) Taper pins (AN–385 and AN–386) plain and threaded, are used in joints which carry shear loads and where absence of play is essential. The plain taper pin is drilled and usually safetied with wire. The threaded taper pin is used with a taper-pin washer (AN–975) and shear nut (safetied with cotter pin) or self-locking nut.

(2) The flathead pin (AN–392 through AN–406) commonly called a clevis pin, is usually used in conjunction with tie rod terminals and in secondary controls which are not subject to continuous operation. The pin should be safetied with a cotter pin and is customarily installed with the head up so that if the cotter pin fails or works out, the pin will remain in place.

(3) The AN–380 cotter pin is used for safetying bolts, screws, nuts, other pins, and in various applications where such safetying is necessary. The AN–381 cotter pin is used in locations where nonmagnetic material is required, or in locations where resistance to corrosion is desired.

(d) *Nuts*—(1) *Self-locking nuts.* Self-locking nuts are acceptable for use on certificated aircraft subject to the restrictions on the pertinent "Manufacturers' Recommended Practice Sheets." Self-locking nuts are used on aircraft to provide tight connections which will not shake loose under severe vibration. Two types of self-locking nuts are currently in use, the all-metal type and the fibre or nylon lock type. Self-locking nuts should not be used at joints which subject either the nut or bolt to rotation. They may be used with antifriction bearings and control pulleys provided the inner race of the bearing is clamped to the supporting structure by the nut and bolt. Nuts which are attached to the structure should be attached in a positive manner to eliminate rotation or misalinement when tightening the bolts or screws.

(i) All-metal lock nuts are constructed with either the threads in the locking insert out-of-phase with the load-carrying section or with a saw-cut insert with a pinched-in thread in the locking section. The locking action of the all-metal nut depends upon the resiliency of the metal when the locking section and load-carrying section are engaged by screw threads.

(ii) Fiber or nylon lock nuts are constructed with an unthreaded fiber locking insert held securely in place. The fiber or nylon has a smaller diameter than the nut, and when a bolt or screw is entered, it taps into the insert, producing a locking action. After the nut has been tightened, one full thread of the bolt or screw should extend through the nut. When fiber-type self-locking nuts are reused, care should be exercised that the fiber has not lost its locking friction or become brittle. They should not be reused if they can be run up finger tight. Bolts five-sixteenth-inch diameter and over with cotter-pin holes may be used with self-locking nuts but only if free from burrs around the holes. Bolts with damaged threads and rough ends should never be used. Do not tap the fiber-locking insert.

(iii) (a) Self-locking nut bases are made in a number of forms and materials for riveting and welding to aircraft structure or parts.

(*b*) Certain applications require the installation of self-locking nuts in channels, an arrangement which permits the attachment of many nuts with only a few rivets. These channels are track-like bases with regularly spaced nuts which are either removable or nonremovable. The removable type carries a floating nut which can be snapped in or out of the channel thus making possible the ready removal of damaged nuts. Nuts such as the clinch-type and spline-type which depend on friction for their anchorage are not acceptable for use in aircraft structures.

(iv) Self-locking nuts may be used on aircraft engines and accessories when their use is specified by the engine manufacturer in his bulletins or manuals. Refer to § 18.30–14 for detailed installation instructions.

(2) *Aircraft castle nut (AN–310).* The castle nut is used with drilled-shank AN hex-head bolts, clevis bolts, eye bolts, drilled-head bolts or studs, and is designed to accommodate a cotter pin or lock wire as a means of safetying.

(3) *Miscellaneous aircraft nuts.* (i) The plain nut (AN–315 and AN–335) has limited use on aircraft structures and requires an auxiliary locking device such as a check nut or lock washer.

(ii) Light hex nuts (AN–340 and AN–345) are used in miscellaneous applications and must be locked by an auxiliary device.

(iii) The check nut AN–316 is used as a locking device for plain nuts, screws, threaded rod ends and other devices.

(iv) The castellated shear nut AN–320 is designed for use with clevis bolts and threaded taper pins, which are normally subjected to shearing stress only.

(v) Wing nuts AN–350 are intended for use on hose clamps and battery connections, etc., where the desired tightness is ordinarily obtained by the use of the fingers or hand tools.

(vi) Sheet spring nuts, such as speed nuts, are used with standard and sheet metal self-tapping screws in nonstructural locations. They find various uses in supporting line clamps, conduit clamps, electrical equipment, access doors, and the like, and are available in several types.

(vii) Two commercial types of high-strength internal or external wrenching nuts are available, the internal and external wrenching Elastic Stop Nut and the Unbrako internal and external wrenching nut. Both are of the self-locking type, are heat-treated, and are capable of carrying the high-strength bolt tension load.

(e) *Washers.* The types of washers used in aircraft structure are: Plain washers, lock washers, and special washers.

(1) Plain washers AN–960 and AN–970 are widely used under hex nuts to provide a smooth bearing surface, to act as a shim and to adjust the position of castellated nuts with respect to drilled cotter-pin holes in bolts. Plain washers should be used under lock washers to prevent damage to surfaces. Cadmium-plated steel washers should be used under bolt heads or nuts on aluminum alloy or magnesium structures where corrosion if it occurs will then be between the washer and the steel. The AN–970 steel washer provides a greater bearing area than the plain type and is used in wooden structures under both bolt heads and nuts to prevent local crushing of the surface.

(2) Lock washers AN–935 and AN–936 may be used with machine screws or bolts whenever the self-locking or castellated type of nut is not applicable. They should not be used as fastenings to primary or secondary structures or where subject to frequent removal or corrosive conditions.

(3) Ball-socket and seat-washers AN–930 and AN–955 are used in special applications where the bolt is installed at an angle to the surface, or where perfect alinement with the surface is required at all times. These washers are used together.

(4) Taper-pin washers AN–975 are used with the threaded taper pin.

(5) NAS–143 washers for internal wrenching nuts and bolts are used with NAS internal wrenching bolts. Type "C" is countersunk to seat the bolthead shank radius and a plain-type washer is used under the nut. Both of these washers are heat-treated from 125,000 to 145,000 p. s. i.

(f) *Rivets*—(1) *Standard solid-shank rivets.* (i) The universal-head rivets AN–470 are used in aircraft construction in both interior and exterior locations.

(ii) Roundhead rivets AN–430 and AN–435 are used in the interior of aircraft except where clearance is required for adjacent members.

(iii) Flathead rivets AN–441 and AN–442 are used in the interior of the aircraft where interference of adjacent members does not permit the use of roundhead rivets.

(iv) Brazier-head rivets AN–455 and AN–456 are used on the exterior surfaces of aircraft where flush riveting is not essential.

(v) All protruding-head rivets may be replaced by AN–470 universal-head rivets. This rivet has been adopted as the standard for protruding-head rivets in this country.

(vi) Countersunk-head rivets AN–426 (100°), AN–425 (78 °), and AN–420 (90°) are used on the exterior surfaces of aircraft to provide a smooth aero-dynamic surface, and in other applications where a smooth finish is desired. The 100° countersunk-head has been adopted as the standard in this country.

(vii) Material applications:

(*a*) A–17S–T3 is the most commonly used rivet material utilized in aluminum alloy structures. Its main advantage lies in the fact that it may be used in the condition received without any further treatment.

(*b*) The 17S–T3 and 17S–T31 and 24S–T4 rivets are used in aluminum alloy structures where strength higher than that of the A17S–T3 rivet is needed. (See ANC–5 for differences between the 2 types of 17ST rivets specified here.)

(*c*) The 2S rivet of pure aluminum is used for riveting nonstructural parts fabricated from the softer aluminum alloys, such as 2S, 3S, and 52S.

(*d*) When riveting magnesium alloy structures, 56S rivets are used exclusively due to their corrosion-resistant qualities in combination with the magnesium alloys.

(*e*) Mild steel rivets are used primarily in riveting steel parts. Galvanized rivets should not be used on steel parts subjected to high heat.

(*f*) Corrosion-resistant steel rivets are used primarily in riveting corrosion-resistant steel parts, such as firewalls, exhaust stack bracket attachments and similar structures.

(*g*) Monel rivets are used in special cases for riveting high nickel steel alloys and nickel alloys. They may be used interchangeably with stainless steel rivets as they are more easily driven. However, it is preferable to use stainless steel rivets in stainless steel parts.

(*h*) Copper rivets are used for riveting copper alloys, leather, and other nonmetallic materials. This rivet has only limited usage in aircraft.

(2) *Blind rivets.* Blind rivets MS–20600, MS–20601, MS–20602, MS–20603 may be substituted for the normally required solid rivets in accordance with the blind rivet manufacturer's recommendations. They should not be used where the failure of a few rivets will seriously impair the airworthiness of the aircraft. Design allowables for blind rivets are specified in ANC–5 "Strength of Metal Aircraft Elements."

(3) *Hi-shear rivets.* (i) Hi-shear rivets are sometimes used in connections where the shearing loads are the primary design consideration. Their use is restricted to such connections. It should be noted that hi-shear rivet patterns are not to be used for the installation of control surface hinges and hinge brackets. Also, they should not be painted prior to assembly even where dissimilar metals are being joined, but each end should be touched up with zinc chromate primer to allow the later application of the general airplane finish schedule.

(ii) Hi-shear rivets should be replaced only by the same type rivet. The installation and inspection should be in accordance with procedures recommended by the manufacturer.

(g) *Fasteners (cowl and fairing).* A number of patented fasteners are in use on aircraft. A variety of these fasteners are commercially available and the manufacturer's recommendations concerning the proper use of these types of fasteners should always be considered in other than replacement application.

(h) *Unconventional attachments.* Unconventional or new attachment devices should not be used in the primary structure unless approved by a representative of the Civil Aeronautics Administration.

§ 18.30–7 *Corrosion protection, cleaners, and paint removers (CAA policies which apply to § 18.30).*—(a) *Corrosion protection.* Almost all metals used in aircraft are subject to corrosion. Materials such as steel will rust, and aluminum and magnesium will form corrosion products, unless properly protected. Stainless steel, brasses, and copper alloys normally form a surface film which prevents further surface corrosion; however, under certain conditions, particularly when in contact with dissimilar metals, even these alloys must be protected. Corrosion is promoted by contact of metals with materials that absorb water. For example: wood, sponge rubber, felt, etc., may be sources of serious corrosion unless proper protection is used. Specific aspects of the more common types of corrosion are covered in subparagraphs (1) through (5) of this paragraph.

(1) *Dissimilar metals corrosion.* (i) When two dissimilar metals are in contact and are connected by an electrolyte (water), accelerated corrosion of one of the metals may occur. For this reason metals have been divided into certain groups, based on their susceptibility to this form of corrosion. Unprotected contact between metals of different groups may result in dissimilar metals corrosion; therefore, contact between metals of dissimilar groups should be prevented or the contact surface should be adequately protected.

(ii) Similar metal groups (refers to surface of metal).

Group 1—Magnesium alloys.
Group 2—Zinc, cadmium, lead, tin, steel.
Group 3—Copper and its alloys, nickel and its alloys, chromium and stainless steels.
Group 4—All aluminum alloys.

(iii) Aluminum alloys (group 4) may be further subdivided into the following subgroups:

Subgroup A—2S, 3S, 52S, 61S, 220, 355, 356, all clad alloys, such as Alclad and Pureclad.
Subgroup B—14S, 17S, 24S, 75S, 155.

(iv) Under severe corrosive conditions, the above subgroups should be considered as dissimilar metal groups insofar as corrosion protection is concerned. This is particularly true where a relatively large area of an alloy classified in subgroup B is in contact with a relatively small area of subgroup A, in which case severe corrosion of the subgroup A alloy may be expected.

(2) *Intergranular corrosion.* Intergranular corrosion occurs in certain aluminum alloys which are improperly heat-treated. For example, 24S alloys should be quenched quickly after heat-treatment in order to prevent intergranular corrosion. Since 24S alloy contains metals other than aluminum, particularly copper, severe corrosion may result if this alloy is quenched slowly, and a reduction in strength may result in improperly quenched 24S alloys when subjected to corrosive conditions. This type of corrosion is difficult to detect in its original stage except by microscopic examinations. When well advanced it is characterized by scaling and blistering. Surface protection of slowly quenched 24S alloy will retard intergranular corro-

sion, but diffusion of the base metal into the surface coating will eventually destroy its effectiveness. The only protection which is regarded as being sufficiently adequate for air-quenched 24S is cladding of the aluminum alloy with pure aluminum. It should be noted that in some cases even clad alloys may be susceptible to intergranular corrosion. Other surface protection, such as anodizing, and subsequent coatings, such as zinc chromate primer, heavy greases, etc., may also prevent intergranular corrosion in cases where susceptibility of the alloy to intergranular corrosion is not too great.

(3) *Stress corrosion.* This type of corrosion occurs when certain metals, mostly aluminum and magnesium alloys, are exposed to high stress and corrosive conditions. Stress corrosion has occurred in aluminum when steel bushings were pressed into the aluminum parts with too tight a fit, and were exposed to corrosive conditions. Stress corrosion can also occur in cold-worked metals which are not properly stress relieved.

(4) *Chemical.* (i) Corrosion protection against chemicals used in dusting and spraying operations is covered in detail in Civil Aeronautics Manual 8, Aircraft Airworthiness, Restricted Category. Reference should be made to that document for detailed information.

(ii) In general, corrosion protection measures against chemicals involves cleaning and or surface protection and specific rules can be laid down only for the particular chemicals used. Operators are warned against the use of mercury compounds as their corrosive effects are particularly rapid. Under certain conditions some of the mercury compounds may cause structural failure within an hour.

(5) *Fretting.* Fretting corrosion is a surface phenomenon which may occur when repeated relative motion of small amplitude is allowed to take place between closely fitting components. It is characterized by surface stains, corrosion, pitting and the generation of oxides. Certain aircraft parts have been known to fail by fretting corrosion, as for instance, antifriction bearings, connecting rods, knuckle pins, splined shafts, and clamped or bolted flanges; and close periodic inspections should be made of such parts. Where evidence of fretting corrosion is found, the affected parts should be replaced.

(b) *Corrosion protection measures.* Surfaces which are completely dry cannot corrode. If a metal can be protected from moisture due to rain, condensation, or other causes, corrosion need not be feared. Dirt, surface film, etc., on metal surfaces tend to retain moisture and hence promote corrosion. Water-absorbing materials, such as certain cleaners and calcium chloride, which may occasionally be used as a snow remover on runways are especially dangerous in this regard.

(1) *Anodizing and related processes.* In anodizing, aluminum alloys are placed in an electrolytic bath, causing a thin film of aluminum oxide to form on the surface of the aluminum. This film is resistant to corrosion and affords a good paint base. Other processes which do not provide as good a corrosive protection as anodizing are, However, good paint bases. These processes are:

(i) Alkaline cleaning followed by chromic acid dip.

(ii) Alcoholic phosphoric acid cleaner.

(iii) Alkaline dichromate treatment.

(2) *Plating.* Steels are commonly plated with other metals to prevent corrosion. Plating is accomplished by placing the article in an electrolytic bath and metal from the plating solution is deposited on it. Various metals used in plating vary in the corrosion protection they afford steel. For instance, cadmium and zinc corrode before the steel does, hence slight breaks or cracks through the plating of these metals will not result in rusting of the exposed steel, since the surface metal is corroded and protects the steel. Chromium does not protect steel by this method, as steel will corrode before the chromium does, and thus depends for its protection on the tightness of the plate.

(3) *Parkerizing and bonderizing.* These processes do not appear to be equal in corrosion protection to plating and are not generally acceptable as a substitute for plating; however, both are good paint bases.

(4) *Dichromate treatment for magnesium.* The dichromate treatment consists of boiling magnesium parts in a solution of sodium dichromate, resulting in a coating with little resistance to corrosion but which is a good paint base.

(5) *Chromium pickle treatment for magnesium.* In this process the magnesium parts are placed in a solution of nitric acid and sodium dichromate. This will protect the magnesium during storage and acts as a bond for subsequent organic finishes.

(6) *Galvanic anodizing treatment for magnesium.* This is an electrolytic process used to provide a paint base and corrosion preventive film on magnesium alloys containing manganese.

(7) *Cladding.* Aluminum alloys which are susceptible to corrosion are frequently clad with pure aluminum. Slight pits, scratches, or other defects through the cladding material will not result in corrosion of the core, since the pure aluminum on the edges of the defect will be preferentially corroded, protecting the core.

(8) *Metal spraying.* In this process metallic wire such as aluminum or zinc is fed into a special spray gun. The metal is melted and sprayed on the object to be protected, which must be thoroughly clean to prevent peeling of the sprayed coat. A "metallized" surface has very good resistance to corrosion if properly applied and of sufficient thickness.

(9) *Organic coatings.* Zinc chromate primer, enamels, chlorinated rubber compounds, etc., are organic coatings commonly used on metals to protect them. The finishes should be applied according to the instructions of the manufacturer.

(10) *Dope-proofing.* When doped fabrics are applied over an organic finished metal structure, the dope will have a tendency to loosen the finish on the metal. For this reason, organic coatings on the metal are usually covered with a dope-proof paint, with metal foil, or with cellulose tape to prevent the dope from striking through.

(11) *Tube interiors.* The interiors of structural steel and aluminum tubing should be protected against corrosion. A small amount of water entrapped in a tube can corrode entirely through the tube thickness in a short period of time. For this reason, most structural tubing is flushed with hot linseed oil, paralketone, or other corrosion inhibitor. Hot flushing results in a good coating. The flushing liquid is usually introduced through small holes drilled in the tubing. These holes should be plugged with a screw or by other means to prevent entry of moisture. Air and watertight sealing of the tubing will also give adequate protection against corrosion if the tubing is internally dry before being sealed.

(c) *Corrosion-proofing of landplanes and seaplanes.* In the repair or alteration of aircraft, corrosion-proofing the same or equivalent to that originally applied should be used unless the repair or alteration would result in increased susceptibility to corrosion, in which case additional corrosion protection measures should be employed.

(d) *Corrosion-proofing of landplanes converted to seaplanes.* A special problem is encountered in the conversion of landplanes to seaplanes. In general, landplanes do not receive corrosion proofing to the same extent as do seaplanes manufactured as such. Corrosion-proofing standards for landplanes converted to seaplanes are divided into two classes: necessary minimum precautions and recommended precautions.

(1) *Necessary minimum precautions.* The following procedures are considered the minimum which should be performed in order to safeguard the airworthiness of the converted aircraft and are not in themselves intended to maintain airworthiness for an indefinite period.

(i) Unless already protected, exposed fittings or fittings which can be reached through inspection openings should be covered with two coats of zinc chromate primer, paralketone, non-water-soluble heavy grease, or comparable materials. This applies to items such as wing-root fittings, wing-strut fittings, control-surface hinges, horns, mating edges of fittings and attach bolts, etc.

(ii) Nonstainless control cables should be coated with grease or paralketone or other comparable protective coating if not replaced with corrosion-resistant cables.

(iii) Inspection should be made of all accessible sections of the aircraft structure. Structural parts showing corrosion should be cleaned and refinished if corrosion attack is superficial. If a part is severely corroded, it should be replaced with adequately corrosion-proofed parts.

(2) *Recommended precautions.* The recommended precautions are those which are suggested as a means of maintaining such aircraft in condition for safe operation over extended periods of time.

(i) Provision of additional inspection openings should be made to assist in detecting corrosion. Experience has shown openings to allow inspection of lower and rearward portion of the fuselage to be particularly desirable.

(ii) Additional provision for free drainage and ventilation of all interiors should be made to prevent collection of moisture (scoop-type drain grommets).

(iii) Protection for the interiors of structural steel tubing should be provided. This may be done by air-and-watertight sealing or by flushing with hot linseed oil and plugging openings. Tubing should be inspected for missing sealing screws and the presence of entrapped water. Inspection should also be made for local corrosion around sealing screws, welded clusters and bolted fittings, which may be indicative of entrapped moisture.

(iv) The fabric of fabric-covered aircraft should be slit longitudinally on the bottom of the fuselage and tail structure for access to these sections. The lower structural members should be coated with zinc chromate primer (two coats), followed by dope-proof paint or wrapping with cellophane tape and rejoining the fabric. This precaution is advisable within a few months after start of operation as a seaplane.

(v) Interiors of metal-covered wings and fuselages should be sprayed with an adherent corrosion inhibitor.

(vi) Bags of potassium or sodium dichromate should be placed in the bottom of floats and boat hulls to inhibit corrosion.

(vii) Exterior surfaces of seaplanes should be washed with clear fresh water immediately following extended water operation, or at least once a day when operated in salty or brackish water. Interior surfaces of seaplanes exposed to spray should also be washed, taking care to prevent damage to electrical circuits or other items subject to injury.

(viii) Openings into the wings, fuselage, and control-surface members, such as tail-wheel wells, openings for control cables, etc., should be sealed as completely as possible to prevent entry of water.

(e) *Cleaners, polishes, brighteners, and paint removers.* It is important that aircraft be kept thoroughly clean of deposits of contaminating substances such as oil, grease, dirt, and other foreign materials. The presence of such substances in any appreciable amount constitutes a potential hazard.

(1) *Materials.* To avoid damage to aircraft through the use of harmful cleaning, polishing, brightening, or paint-removing materials, only those compounds which conform to existing government or established industry specifications or which are products that have been specifically recommended by the aircraft manufacturer as being satisfactory for the intended application, should be used. The product manufacturer's recommendations concerning use of his agent should be observed.

(2) *Removal of corrosion deposits from aluminum.* After removing the paint and primers from the surfaces of both bare and clad aluminum alloys, the corroded area should be washed with clean fresh water. Corrosion products such as metal flakes, scale, powder and salt deposits may be removed by using fine emery, wire brush or sandpaper. The loose particles may subsequently be washed off with thinner or mineral spirits. In all cases the minimum treatment to produce a smooth clean surface should be used.

(3) *Surface stains.* To remove surface stain and superficial etching of light metals, use a 5-percent-by-weight water solution of sodium bichromate or potassium dichromate. This solution should be allowed to dry on the surface after which excess chromate crystals must be brushed off and the surface subsequently primed and painted.

(4) *Light duty cleaners.* Removal of dirt and grease from the surfaces of external parts of the aircraft may be accomplished by ordinary washing with water. Let the surface dry before further attempting to clean obstinate spots.

One part aircraft cleaning compound, AAF Specification No. 20015 or Navy Specification No. C-147, with 20 parts water may be used on any aircraft, but it is most effective on fabric covered aircraft where the mixture is applied with a rag or mop, then wiped off with a dry rag. The water mixture may be sprayed on, allowed to remain for 5 to 10 minutes, and then hosed down with water.

(5) *Removal of spilled battery acid.* For the neutralization of spilled battery acid, use sodium bicarbonate (baking soda), or sodium borate (borax) dissolved in water. The alkali salt should be removed completely after neutralization with copious quantities of water to prevent corrosion.

§ 18.30–8 *Identification and inspection of material (CAA policies which apply to § 18.30).*—(a) *Identification of steel stock.* (1) The Society of Automotive Engineers (SAE) and the American Iron and Steel Institute (A. I. S. I.) use a numerical index system to identify the composition of various steels. The numbers assigned, in the combined listing of standard steels issued by these groups, represent the type of steel and make it possible to readily identify the principal elements in the material.

(2) The first digit of the four number designation indicates the type to which the steel belongs. Thus "1" indicates a carbon steel, "2" a nickel steel, "3" a nickel chromium steel, etc. In the case of simple alloy steels, the second digit indicates the approximate percentage of the predominant alloying element. The last two digits usually indicate the mean of the range of carbon content. Thus the symbol "1020" indicates a plain carbon steel lacking a principal alloying element and containing an average of 0.20 percent (0.18 to 0.23) carbon. The symbol "2330" indicates a nickel steel of approximately 3 percent (3.25 to 3.75) nickel and an average of 0.30 percent, (0.28 to 0.33) carbon content. The symbol "4130" indicates a chromium-molybdenum steel of approximately 1 percent (0.80 to 1.10) chromium, 0.20 percent (0.15 to 0.25) molybdenum, and 0.30 percent (0.28 to 0.33) carbon. The basic numbers for the four digit series of the carbon and alloy steels may be found in table 8–1.

(3) Interchangeability of steel tubing: (i) "1025" welded tubing as per Specification MIL–T–5066, and "1025" seamless tubing conforming to Specification MIL–T–5066A, are interchangeable.

(ii) "4130" welded tubing as per Specification MIL–T–6731, and "4130" seamless tubing conforming to Specification MIL–T–6736, are interchangeable.

(iii) NE–8630 welded tubing conforming to Specification MIL–T–6734, and NE–8630 seamless tubing conforming to Specification MIL–T–6732, are interchangeable.

(b) *Identification of aluminum.* To provide a visual means for identifying the various grades of aluminum and aluminum alloys such metals are usually marked with symbols such as Government Specification Number, the temper or condition furnished, or the commercial code marking. Plate and sheet are usually marked with specification numbers or code markings in rows approximately 5 inches apart. Tubes, bars, rods, and extruded shapes are marked with specification numbers or code markings at intervals of 3 to 5 feet along the length of each piece. The commercial code marking consists of a number which identifies the particular composition of the alloy. A letter preceding the number indicates a modification of the alloy. In addition letter suffixes designate the following:

S—Wrought.
O—Annealed, recrystallized (wrought products only).
H—Strain-hardened. Fractions preceding the letter indicate intermediate tempers as 1/2H, 3/4H, etc.
W—Solution heat-treated—unstable temper.
T—Heat-treated and aged to produce stable tempers other than O or H.
RT—Temper resulting from cold working after heat treatment and aging.

(1) *Clad aluminum alloys.*—Clad alloys have surface layers of pure aluminum or corrosion-resistant aluminum alloy bonded to the core material to inhibit corrosion. Presence of such a coating may be determined under a magnifying glass by examination of the edge surface which will show three distinct layers.

(2) *A test for distinguishing heat-treatable and nonheat-treatable aluminum alloys.* If for any reason the identification mark of the alloy is not on the material, it is possible to distinguish between some heat-treatable alloys and some nonheat-treatable alloys by immersing a sample of the material in a 10-percent solution of caustic soda (sodium hydroxide). Those heat-treatable alloys containing several percent of copper (14S, 17S, 24S) will turn black due to the copper content. High copper alloys when clad will not turn black on the surface, but the edges will turn black at the center of the sheet where the core is exposed. If the alloy does not turn black in the caustic soda solution it is not evidence that the alloy is not heat-treatable, as various high strength heat-treatable alloys are not based primarily on the use of copper as an alloying agent. These include among others, 52S, 61S, 75S, R353, and R361 alloys. The composition and heat-treatability of alloys which do not turn black in a caustic

soda solution can be established only by chemical or spectro-analysis.

(c) *Hardness testing.* Hardness testing provides a convenient means for determining within reasonable limits the tensile strength of steel. It has several limitations in that it is not suitable for very soft or very hard steels. In hardness testing the thickness of the specimen being tested and the edge distance should be such that distortion of the metal due to these factors is eliminated. Several readings should be taken and the results averaged. In general, the higher the tensile strength, the greater is its hardness. Common methods of hardness testing are outlined below. These tests are suitable for determining the tensile properties resulting from the heat treatment of steel. Care should be taken to have case hardened, corroded, pitted, decarburized or otherwise nonuniform surfaces removed to a sufficient depth. Also exercise caution not to cold-work and consequently harden the steel during removal of the surface. The relationship between tensile strength and hardness is indicated in table 8–2.

(1) *Brinnell hardness test.* In this test a standard load is applied to a smooth surface of metal through a hardened steel ball 1 centimeter in diameter. The numerical value of Brinnell hardness is equal to the load divided by the surface area of the resulting spherical impression.

(2) *Rockwell hardness test.* In this test a standard minor load is applied to seat a hardened steel ball or a diamond cone in the surface of the metal, followed by the application of a standard major load. The hardness is measured by depth of penetration. Rockwell superficial hardness tests are made using light minor and major loads and a more sensitive system for measuring depth of indentation. It is useful for thinner sections, very small parts, etc.

(3) *Vickers hardness test.* In this test a small pyramidal diamond is pressed into the metal. The hardness number is the ratio of the load to the surface area of indentation.

(4) *Testing of aluminum.* Hardness tests are useful for testing aluminum alloy chiefly as a means of distinguishing between annealed, cold-worked, heat-treated, and heat-treated and aged material. It is of little value in indicating the strength or quality of heat treatment. Typical hardness values for aluminum alloys are shown in table 8–3.

(d) *Inspection of metals*—(1) *Inspection by magnifying glass after welding.* Careful examination of all joints with a medium-power magnifying glass (at least 10 power) after first removing all scale is considered an acceptable method of inspection for repaired structures. The practice of filling steel tubular structures with hot linseed or petroleum base oils, under pressure, in order to coat the inside surface and inhibit corrosion, assists in the detection of weld cracks as the hot oil will seep through cracks invisible to the eye. This practice, though not justifiable in all cases, is suggested where a very large portion of the structure has been rewelded.

(2) *Magnetic particle inspection.* Magnetic particle inspection or Magnaflux (a patented trade name used by the Magnaflux Corp.) can be used only on magnetic materials; i. e., iron and steel. Most stainless or high chromium nickel and manganese alloy steels, being nonmagnetic, cannot be inspected by this method. The method consists essentially of detection of discontinuities (cracks, voids, defects, pits, subsurface holes, etc.) by means of accumulation of magnetic particles on the discontinuities when the part has been magnetized. The magnetic particles are applied either dry as a powder or suspended in light oil. For complete magnetic inspection, both circular and longitudinal magnetization should be employed.

(i) Circular magnetization is produced by transmitting an electric current directly through the article being tested, or through a central conductor placed through the part, in which case defects parallel to the flow of current may be detected. As an example, circular magnetization of a round steel bar would be produced by placing the ends of the steel bar between the heads of the magnetic inspection machine and passing a current through the bars. Magnetic particles, applied either during or after the passage of the current or after the current in magnetically retentive steels would disclose discontinuities parallel to the axis of the bar.

(ii) Longitudinal magnetization is induced in a part by placing the part in a strong magnetic field, such as the center of a coil. Thus longitudinal magnetization of a round steel bar would be produced by placing the ends of the bar between the heads of a magnetic-inspection machine and placing the DC solenoid around the bar. After application of the magnetic particles either during or subsequent to magnetization, discontinuities perpendicular to the axis of the bar would be disclosed.

(iii) Red, black, and sometimes gray particles are used in the wet or dry methods. In the case of wet inspection, a fluorescent magnetic particle may also be used. This process is commercially known as Magnaglo. Articles inspected using this latter medium are illuminated by so-called black light, and the magnetic particles glow by fluorescence causing any defects or indications to be easily visible. The wet inspection procedure provides better control and standardization of the concentration of magnetic particles, easier application to complex shapes, and indications that are easier to interpret. This is due to the difficulty of obtaining efficient distribution of the dry powder during magnetization. The dry procedure is particularly suitable for detecting subsurface defects, such as when heavy welds, forgings, castings, etc., should be tested. The wet continuous process is recommended for most aircraft work.

(iv) The appearance of accumulations of magnetic particles in magnetic inspection does not necessarily mean that a defect exists. Changes in section of the part, particularly where the change in section is very sharp, and also holes drilled through a part, will frequently cause indications. Surface defects are most easily detected, however, since a crack will cause a sharp line of magnetic particles to appear. Subsurface defects are less easily detected, since only a general collection of magnetic particles will be observed. However, since subsurface defects very rarely occur in wrought materials, that is not important in most aircraft applications.

(v) After magnetic inspections, parts should be carefully cleaned and demagnetized.

(3) *Portable magnetic particle inspection.* Portable type magnetic particle inspection equipment such as Sonoflux have been developed for use in the detection of surface or slightly subsurface discontinuities in ferromagnetic aircraft materials and parts. This type equipment gives better results when the wet suspension type of indicator, such as that conforming to Specification MIL–I–6868, is used with the powder supplied by the equipment manufacturer. As in other inspection methods, extreme care should be taken by the user in following the manufacturer's recommendations concerning use of the procedure.

(4) *X-ray or radiographic inspection.* (i) X-ray may be used on either magnetic or nonmagnetic materials for detecting subsurface voids such as open cracks, blow holes, etc. When a photographic film or plate is used to record the X-ray (in a similar manner to exposing a photographic film), the process is known as radiography. When the X-rays are projected through the part onto a fluorescent screen, the process is known as fluoroscopy. The technique used for radiography should be capable of indicating the presence of defects having a dimension parallel to the X-ray beam of 3 percent of the thickness of the part being radiographed for magnesium alloys and 2 percent for all other metals and alloys. Inspection using a fluoroscopic screen is much less sensitive. Consequently, the radiographic method is usually used for inspection and the fluoroscopic method is used for culling.

(ii) Radiographic inspection is extensively used in the aircraft industry for the inspection of all types of castings including sand castings, permanent-mold castings, die castings, etc. X-ray is particularly useful for this application, since it is capable of disclosing defects which exist below the surface and also since the open types of defects which occur in castings (shrinks, blow holes, dross inclusions, etc.) are readily disclosed by X-rays. In the inspection of forged or wrought metals, on the other hand, X-ray inspection is not used so extensively. This is due to the fact that the process of forging or working causes most defects which originally existed in the metal to become tightwalled cracks which are somewhat difficult to disclose by X-rays.

(iii) If doubt exists as to the suitability of the X-ray examination, a laboratory familiar with the X-ray examination of aircraft parts should be consulted.

(5) *Fluorescent penetrant.* (i) In this method of inspection (Zyglo), the article, which may be of metal, plastic material, etc., is first carefully cleaned to permit the fluorescent material to penetrate cracks and defects. It should be noted that cleaning of aluminum may necessitate stripping of any anodizing, since the anodized film, if formed after the defect, could prevent penetration of the fluorescent material and an anodized film tends to hold penetrants which may obscure defect indications. After the article is cleaned, it is either sprayed, painted, or immersed in a bath of fluorescent penetrant. The penetrant is a light oil which has the property of fluorescing or emitting visible light when excited by invisible radiation in the near ultra-violet range (so-called black light). It is important that the penetrant be given sufficient time to penetrate cracks and defects, and for fatigue cracks a minimum of 30 minutes is stipulated by MIL–I–6866. Heat may also be applied to facilitate entry of the penetrant. After the penetrant has had sufficient time to enter any defects, the excess on the surface of the article is washed off by water spray. This washing should be checked by inspection with black light, by which means any penetrant left on the surface may be detected. After washing, a developer is used to bring out the indication. This developer may be in a liquid form or may be a light powder that absorbs the penetrant as it oozes from cracks and defects in the part. The development may also be aided by application of heat to the part. After the indications have been developed, the part is inspected under black light. Any crevices into which the fluorescent material has penetrated will show as luminous areas.

(ii) Indications which appear are usually checked by close inspection with a magnifying glass, by etching with a suitable acid or caustic solution, or it may be necessary to cross-section that part, a procedure which, of course, destroys its usefulness. Usually a skilled operator can determine whether an indication actually shows a defect or whether it is a false indication. Also, the internal extent of the defect can sometimes be estimated with fair accuracy.

(iii) It should be noted that this process of inspection, like all others, has its limitations. If the fluorescent material for any reason is not able to penetrate into a defect, such a defect cannot be detected.

(6) *Dye penetrants.* Several dye penetrant type inspection kits are now available which will reveal the presence of surface cracks or defects and subsurface flaws which extend to the surface of the part being inspected. These penetrant type inspection methods are considered acceptable, providing the part being inspected is thoroughly cleaned, all areas are readily accessible for viewing and the manufacturer's recommendations as to method of application are closely followed.

(i) *Cleaning.* An inspection is initiated by first cleaning the surface to be inspected of dirt, loose scale, oil, and grease. Pre-cleaning may usually be accomplished by vapor degreasing, or with volatile cleaners. The cleaner should be volatile so that it will evaporate from the defects before applying the penetrant dye. Sand blasting is not desirable as a cleaning method since surface indications may be obscured. It is not necessary to remove anodic films from parts to be inspected since the dye readily penetrates such films. Special procedures for removing excess dye should be followed, however.

(ii) *Application of penetrant.* The penetrant is applied by brush, spray, or by dipping and allowed to stand for a minimum of 2 minutes. Dwell time may be extended up to 15 minutes depending upon the temperature of the part and fineness of the defect or when the surface being inspected is ground. Parts being inspected should be dry and heated to at least 70° F., but not over 130° F. Very small indications require increased penetration periods.

(iii) *Removal of dye penetrant.* Surplus penetrant is usually removed by application of a special cleaner or remover, or by washing with plain water and the part is then allowed to dry. Water rinse may also be used in conjunction with the remover, subject to the manufacturer's recommendations.

(iv) *Application of developer.* A light and even coat of developer is applied by spraying, brushing or dipping. When dipping, care should be exercised to avoid excess accumulation. Penetrant which has penetrated into cracks or other openings in the surface of the material will be drawn out by the developer resulting in a bright red indication. Some idea of the size of the defect may be obtained after experience by watching the size and rate of growth of the indication.

(e) *Identification of fabric.* Cotton fabric is used extensively as covering for wing, fuselage, and control surfaces of aircraft. Acceptable grades of fabrics for use on civil aircraft may be found in table 3–1 of § 18.30–3. In general, the fabric can be readily identified by a continuous marking to show the manufacturer's name or trademark and specification number. This marking may be found stamped along the selvage. The specification number for grade "A" fabric is AMS–3806, and for the intermediate grade AMS–3804. The corresponding CAA Technical Standard Order Numbers for these materials are TSO–C–15 and TSO–C–14, respectively. Increasing interest in the use of linen and certain synthetic fabrics in lieu of cotton has been noted. Identity of such materials should always be verified by the user. (See table 3–1.)

(f) *Identification of plastics.* Plastics cover a broad field of organic synthetic resins and may be divided into two main classifications—thermoplastic and thermosetting plastics.

(1) *Thermoplastics.* Thermoplastics may be softened by heat and can be dissolved in various organic solvents. Two kinds of transparent thermoplastic materials are commonly employed in windows, canopies, etc. These materials are known as acrylic plastics and cellulose acetate plastics. These two plastics may be distinguished by the absence of color, the greater transparency, and the greater stiffness of the acrylic, as compared to the slight yellow tint, lower transparency, and greater flexibility of cellulose acetate.

(2) *Thermosetting plastics.* Thermosetting plastics do not soften appreciably under heat but may char and blister at temperatures of 204° to 260° C. (400° to 500° F.). Most of the molded products of synthetic resin composition, such as phenolic, urea-formaldehyde and melamine-formaldehyde resins, belong to the thermosetting group.

§ 18.30–9 *Aircraft equipment* (CAA *policies which apply to § 18.30*)—(a) *General.* Aircraft equipment is usually considered as a part of the airplane and many of the maintenance and repair procedures pertinent to the airplane are equally applicable to the various major items of equipment. However, the following general information should be helpful in maintaining the essential equipment items in an airworthy condition.

(b) *Landing gear equipment*—(1) *Wheels.* Wheels should be inspected at periodic intervals for cracks, corrosion, dents, distortion, and faulty bearings. In split-type wheels, bolt holes which may have become elongated due to some play in the through-bolt should be reconditioned by the use of Rosan inserts or other suitable means. The bolts should also be inspected for wear; if excessive wear is evident, the bolts should be replaced. In bolting the wheel halves together, care should be taken to have the nuts properly tightened. These should be inspected periodically to be sure that they are tight so that there will be no movement between the two halves of the wheel. This movement causes elongation of the bolt holes. If the wear is too great to be corrected as stated above, it may necessitate scrapping of the wheel. Grease-retaining felts in the wheel assembly should be kept in a soft, absorbent condition. If they have become hardened they should be cleaned in gasoline; if this fails to soften them, they should be replaced.

(i) *Corrosion of wheels.* Wheels should be thoroughly cleaned if corroded and then examined for soundness. If bare, corroded spots appear, they should be smoothed up and repainted with a protective coating such as zinc chromate primer and aluminum lacquer or some other equally effective coating to prevent further corrosion. Wheels with severe corrosion which might affect their strength should be replaced.

(ii) *Dented or distorted wheels.* Wheels which wobble excessively due to deformation resulting from a severe side load impact should be replaced. In questionable cases, the local representative of the Civil Aeronautics Administration should be consulted concerning the airworthiness of the wheels. Dents of a minor nature do not affect the serviceability of a wheel.

(iii) *Wheel bearings.* Wheel bearings should be inspected periodically to detect damage caused by maladjustment or foreign material. Damaged or excessively worn parts should be replaced. Bearing cones should be packed with a high melting point grease prior to their installation. When assembling the wheel to the airplane, the axle nut should be tightened just enough to eliminate any drag or wheel side play on the axle.

(2) *Brakes.* The clearance between moving and stationary parts of a brake should be maintained in accordance with

the manufacturer's recommendations. The brake should be disassembled and inspected periodically and the parts examined for wear, cracks, warpage, corrosion, elongated holes, etc. If any of these or other faults are indicated the affected parts should be repaired, reconditioned, or replaced, depending on the seriousness of the difficulty, in accordance with the manufacturer's recommendations. Surface cracks on the friction surfaces of brake drums occur frequently due to high surface temperature. These may be disregarded as seriously affecting the airworthiness until they become cracks of approximately one inch in length. The brake drums or surfaces then should be replaced.

(i) *Hydraulic brakes.* For proper maintenance, the entire hydraulic system from the reservoir to the brakes should be inspected. The fluid in the reservoir should be maintained at the recommended level with the proper brake fluid. Flexible hydraulic hose which has deteriorated due to long periods of service should be replaced. When air is present in the hydraulic system, the system should be bled in accordance with the manufacturer's instructions. Hydraulic piston seal gaskets should be replaced when there is evidence of leakage.

(ii) *Mechanical brakes.* The working parts of mechanically operated brakes should be kept free of dirt and foreign matter and should work freely at all times. Excessive play in the linkage system should be kept to a minimum.

(3) *Tires*—(i) *Inspection.* For maximum safety, it is essential that tires be inspected frequently for cuts, worn spots, bulges on the sidewalls, and foreign bodies imbedded in the treads and any repairs which are necessary should be made.

(ii) *Repair.* It is recommended that repairs be made by either the original tire manufacturer or reliable local tire repair agencies in accordance with procedures outlined in military specification MIL–C–7726 pertaining to repair and recapping of used pneumatic aircraft tires. The specification states that tires should not be repaired if any of the following conditions are found during inspection:

(*a*) Flex breaks or evidence thereof.

(*b*) Bead injuries which extend into more than 3 plies of a tire having 16 or more plies or into 25 percent of the plies on all other tires.

(*c*) Evidence of separation between plies or around bead wire.

(*d*) Injuries requiring inside reinforcement. This includes all casings needing section repairs.

(*e*) Kinked or broken beads.

(iii) *Clearance.* For retractable landing gears there should be ample clearance between the tires and the landing gear wells or adjacent structure, otherwise jamming of the retracted landing gear may result. This clearance and the clearance between the tire and fork or other landing gear members should be checked carefully when tires are retreaded because the growth of the original tire and the use of a heavier tread stock may increase the tire diameter and cross section.

(iv) *Treading*—(*a*) In treading tires, three basic methods of applying new tread stock to a tire are in use which are known as top capping, full capping, and retreading. In top capping, the tread is buffed across the top of the tire and new tread material known as capping stock is applied. The capping stock has an abrupt bevel and when cured onto the remaining tread material of the tire, the line of contact between the old and new rubber may show, enabling a top cap job to be readily detected in such cases. In the full capping process, the buffing is usually carried down on the shoulders to the sidewall ring to receive the new tread material known as camelback. This material is similar to capping stock except that it is wider and the abrupt bevel is replaced by longer, tapering sides. Since the camelback replaces the old tread from one sidewall ring around to the other, the tire has more of a new tire appearance particularly if the sidewalls to the bead are unbroken or unmarred. In retreading (sometimes called remolding), old rubber is rasped from bead to bead and replaced unit new camelback and sidewall material which results in a new tire appearance. These three methods are in accord with Military Specification MIL–C–7726 which is used by many treading agencies having a reputation for reliable, high-grade work. A recent development is the flex-to-flex retread which can be classified as being in between the full cap and retread process. In this method, a very wide camelback is used and new sidewall material is then applied which reconditions or covers the flex area. This new sidewall material does not extend down to the bead as it does in the full retread method.

(*b*) Because of the fact that poorly treaded tires may throw the tread material off in service thereby causing an accident or damaging the aircraft, treading work should be given only to agencies having the equipment, knowledge, and ability to tread aircraft tires satisfactorily.

(*c*) The number of times a tire may be treaded can be determined only by a thorough inspection which would disclose any sidewall bruises, ply separation, broken bead wire, or other defects that indicate the carcass is not sound enough to justify an additional tread. When a carcass has been recapped or retreaded 3 times its airworthiness may be questioned although there have been tires which gave satisfactory performance with more than 3 such treads. The carcass construction, use of rayon or nylon cord, the carcass age and condition, the type of operation involved, etc. should be evaluated collectively before a decision is made as to whether or not a tire should be treated again.

(4) *Tubes.* Punctured tubes may be repaired by the use of cemented or vulcanized patches. The procedure of making such repairs is substantially identical to that used in connection with automobile tires. The size of the patch should be kept to a minimum and the use of an excessive number of patches, particularly in one area, should be avoided as the weight of the material may contribute to excessive wheel vibration due to tube unbalance. The use of vulcanized patches is recommended because they are considerably more reliable. For such work a reputable local tire repair agency should be engaged. Reinstalled tires should be inflated, deflated, and again inflated to insure that the inner tube is not pinched. A pinched tube will chafe against the walls of the carcass and a thin spot will result in the rubber. In time, the tube wall will leak at this point. The pinching generally is due to the sticking of the tube to the carcass wall during the first inflation and the failure of the carcass to push out to properly seat against the flange. The tube is then confined to a smaller space and wrinkling (pinching) of the tube results. Complete deflation followed by inflation allows the tube to properly accommodate itself to the carcass which should now seat itself tightly against the flanges.

(5) *Floats.* In order to maintain floats in an airworthy condition, frequent inspection should be made on account of the rapidity with which corrosion takes place on aluminum alloy metal parts, particularly when the aircraft is operated in salt water. Metal floats and all metal parts on wooden floats should be carefully examined for corrosion and corrective action taken in accordance with the procedures described in § 18.30–7. Damage to metal floats should be repaired in the general manner as outlined in § 18.30–4 (*e*) pertaining to aluminum and aluminum alloy structures. In the case of wooden floats, repairs should be made in accordance with the general procedure outlined in § 18.30–2.

(6) *Skis and ski installations.* It is advisable to examine ski installations frequently to keep them maintained in airworthy condition. If shock cord is used to keep the ski runner in proper trim, an examination should be made to see that the cord has enough elasticity to keep the runner in its required attitude and the condition of the cord should be checked to see that it is not becoming loose or badly frayed. If old weak shock cords are found, they should be replaced. When other means of restraint are provided, they should be examined for excessive wear and binding and replacements should be made when such conditions are found. The points of cable attachment, both on the ski and the airplane structure, should be examined for bent lugs due to excessive loads having been imposed while taxiing over rugged terrain or by trying to break frozen skis loose. If skis which permit attachment to the wheels and tires are used, proper tire pressure should be maintained; under-inflated tires may push off the wheels if appreciable side loads are developed in landing or taxiing.

(i) *Repair of ski runners.* Fractured wooden ski runners usually require replacement. If a split at the rear end of the runner does not exceed 10 percent of the ski length, it may be repaired by attaching one or more wooden cross pieces across the top of the runner using glue and bolts. Bent or torn metal runners may be straightened if minor bending has taken place and minor tears may be repaired in accordance with procedures recommended in § 18.30–4 relative to repairs of metal structures.

(ii) *Ski pedestals*—(*a*) *Tubular pedestals.* Damaged pedestals made of steel tubing may be repaired by using standard tube splices as shown in figures 4–2 and 4–12.

(*b*) *Cast pedestals.* Cast pedestals should not be repaired but should be replaced unless the method of repair is specifically approved by a representative of the Civil Aeronautics Administration.

(*c*) *Sheet metal pedestals.* Damaged pedestals made of aluminum alloy sheet should be repaired in the general manner as outlined in § 18.30–4 (*e*).

(*c*) *Flares.* Parachute flares are made of materials which are subject to decomposition upon aging. Humidity affects the small igniting charge and also the materials of the candle (illuminant). Hence, the percentage of misfires in old flares is likely to be quite high. To assure unfailing performance of flares, periodic inspection of the flare installation should be made. The inspection should include the entire system starting at the release mechanism in the cockpit and ending at the flare. Such inspection should be attempted only by qualified personnel since inadvertent discharge of such pyrotechnics may cause serious damage. Past experience has indicated that all electrically or pistol-operated flares should be returned to the manufacturer for reconditioning within a maximum period of 3 years and that for mechanically operated flares, this should be done within a maximum period of 4 years.

(d) *Life preservers and life rafts*—(1) *General.* Inflatable life preservers and life rafts are subject to general deterioration due to aging. Experience has indicated that such equipment may be in need of replacement at the end of 5 years due to porosity of the rubber-coated material. Wear of such equipment is accelerated when stowed on board aircraft because of vibration which causes chafing of the rubberized fabric. This ultimately results in localized leakage. Leakage is also likely to occur where the fabric is folded because sharp corners are formed. When these corners are in contact with the carrying cases, or with adjacent parts of the rubberized fabric, they tend to wear through due to vibration.

(2) *Inspection procedure for life preservers.* (i) At 3-month intervals, all life preservers should be inspected for airworthiness. The rubberized material should be examined for cuts, tears, and abrasions and the mouth valves and tubing should be checked for leakage, corrosion, and deterioration. The carbon dioxide cylinder should be removed and the discharge mechanism checked by operating the lever to ascertain that the pin operates freely. The gaskets and valve cores of the cylinder container and the pull cord should be checked for deterioration. If no defects are found, the preserver should be inflated by air to a 2-pound pressure and left for 12 hours. If the preserver still has adequate rigidity at the end of that time, it should be deflated and fitted with $CO_2$ cylinders having weights not less than that indicated on them by the manufacturer. All cylinders made in accordance with joint Army-Navy Specification No. JAN–C–601 are so stamped and have a minimum permissible weight stamped on them. The use of such $CO_2$ cylinders is recommended. These cylinders have the five-thirty-second-inch end disc sealed by an electric welding process which is intended to provide a superior seal compared to the older type which makes use of a similar disc surrounded by a thin rubber seal. Inasmuch as the rubber is subject to deterioration, its ability to maintain pressure will likely be affected. Leaky electrically welded seals are very likely to be discovered upon final inspection at the manufacturer's plant. If such a cylinder is up to weight at the end of 3 months, in all probability it will remain so until used whereas the old type with the rubber seal is apt to lose its pressure with age. Having fitted the preserver with an adequately charged cylinder, the preserver should be stamped with the date of inspection as a matter of record and packed into its container.

(ii) It is recommended that the above procedure be repeated every 12-month period, using the $CO_2$ cartridge for inflation. The carbon dioxide permeates the rubberized fabric at a faster rate than air and will indicate if the porosity of the material is excessive.

(3) *Repair of life preservers.* Leaks, as disclosed by immersion in soapy water, should be repaired by the use of patches in accordance with the recommendations of the manufacturer. Corroded metal parts should be cleaned and missing or weakened ties replaced by machine stitching in place as originally done by the manufacturer. Weakened lanyards should also be replaced. Life preservers which do not retain sufficient rigidity after the 12-hour period because of general deterioration and porosity of the fabric are beyond economical repair and should be replaced.

(4) *Inspection procedure for life rafts.* (i) Life rafts should be inspected at 3-month intervals for cuts, tears, or other damage to the rubberized material. If the raft is found to be in good condition, the $CO_2$ bottle(s) should be removed and the raft inflated with air to a pressure of 2 pounds. The air should be introduced at the fitting normally connected to the $CO_2$ bottle(s). After at least 1 hour to allow for the air within the raft to adjust itself to the ambient temperature, the pressure should be checked and adjusted, if necessary, to 2 pounds after which the raft should be left to stand for 24 hours. If, after 24 hours, the pressure is less than 1 pound, the raft should be examined for leakage by using soapy water. In order to eliminate pressure variations due to temperature differences at the time the initial and final readings are taken, the raft should be tested in a room where the temperature is fairly constant. If the pressure drop is satisfactory, the raft should be considered as being in an airworthy condition and returned to service after being fitted with correctly charged $CO_2$ bottles as determined by weighing them. It is suggested that the rafts be marked to indicate the date of inspection and that soapstone be used when folding them preparatory to insertion into the carrying case. Care should be taken to see that all of the raft's required equipment is on board and properly stowed. If the raft lanyard used to prevent the raft from floating away from the airplane is in need of replacement, a lanyard not less than 20 feet long and having a breaking strength of about 75 pounds should be used.

(ii) At 18-month intervals the above procedure should be repeated, using the $CO_2$ bottle(s) for inflation. If a single bottle is used for inflating both compartments, it should be noted whether the inflation is proceeding equally to both compartments. Occasionally the formation of "carbon dioxide snow" may occur in 1 passage of the distributing manifold and divert a larger volume of gas to 1 compartment which may burst if the mattress valve is not open to relieve the pressure. If the pressure is satisfactory, the raft should be returned to service in accordance with the procedure outlined above.

(5) *Repair of life rafts.* When leaks due to tears, abrasions, or punctures are found, repairs should be made in accordance with the recommendations of the manufacturer. Partially torn away supporting patches on the tube should be recemented so as to restore the raft to its airworthy condition. Mildewed or weak lanyards should be replaced, particularly those by which the $CO_2$ bottle is operated. This applies also to the line used to attach the raft to the airplane. All metal parts should be checked for corrosion; cleaned, or repaired if found to be defective. If leaky mattress valves have been found, they should be replaced.

(6) *Rating.* Ratings of military rafts when used in civil aircraft are shown in the following table. Ratings of the 10-, 15-, and 20-man circular rafts built for civil use are stamped on the rafts by the manufacturer.

| Type | Capacity | | | Specification |
|---|---|---|---|---|
| | Pounds | Men | | |
| | Load | Military | Civil | |
| A-3 | 1,500 | 4 | 6 | AF 64–[illegible] |
| A-5 | 2,500 | 6 | 10 | AF 64–[illegible] |
| Mark II | 1,000 | 2 | 3 | BuAer M 3[illegible] |
| Mark IV | 1,500 | 4 | 6 | BuAer M 3[illegible] |
| Mark VII | 2,500 | 7 | 10 | BuAer M 3[illegible] |

NOTE: Rafts more than 5 years old are likely to be unairworthy due to deterioration.

(e) *Parachutes.* With reasonable care, parachutes should last at least 5 years. They should not be carelessly tossed about, left in the airplanes so that they may become wet, or left in open places where they may be tampered with. They should not be placed where they may fall on oily floors or be subject to acid fumes from adjacent battery chargers. When repacking is done as required in Part 43 of the Civil Air Regulations, a careful inspection of the parachute should be made by a qualified parachute techni-

cian (rigger). If repairs or replacement of parts are necessary to maintain the airworthiness of the parachute assembly, such work should be done by the original parachute manufacturer or by qualified parachute technicians certificated in accordance with Part 25 of the Civil Air Regulations, Parachute Technician's Certificates or by agencies qualified in accordance with Part 54 of the Civil Air Regulations, Parachute Loft Certificates and Ratings.

(f) *Safety belts.* (1) The Civil Air Regulations require that when safety belts are to be installed in aircraft after July 1, 1951, such belts must conform to standards established by the Civil Aeronautics Administration. These standards are contained in Technical Standard Order TSO–C22. Safety belts eligible for installation in aircraft may be identified by the marking TSO–C22 on the belt or by a military designation number since military belts comply with the strength requirements of the TSO. Airworthy type certificated safety belts currently in aircraft may be removed for cleaning and reinstalled. However, when a type certificated safety belt is found unairworthy it must be replaced with a TSO–C22 or a new military belt.

(2) The webbing of safety belts, even when mildew proofed, is subject to deterioration due to constant use, cleaning and the effects of aging. The clamping action of the serrations of the commonly used buckle also causes a reduction in strength of the webbing and fraying occurs after long periods of usage. Fraying of belts is an indication of wear and such belts are likely to be unairworthy because they can no longer hold the minimum required tensile load. Differences of opinion as to the airworthiness of a belt can be settled by testing a questionable belt to demonstrate that it will support the required load but such testing usually costs more than a new belt and in addition affects the belt so that it is not as strong after the test as it was before. Airworthy 1-person type certificated belts should be able to withstand a tensile load of 525 pounds and TSO belts should withstand the rated tensile load indicated on the belt label. Most 1-person TSO belts are rated for 1,500 pounds. For 2-person belts the loads should be doubled.

(3) Since type certificated belts will not afford the crash protection provided by a TSO or military belt, such type certificated belts should not be repaired nor should their buckles or end fittings be reused on safety belts. If replacement of webbing or hardware of TSO or military belts is attempted, parts of identical design and material should be used. The stitch pattern should at least be identical to the original and the number of stitches per inch should be equal to the number used in the original belt. There is no objection to having a greater total length of stitching provided one line of stitches is not placed over another line. Lines of stitching should be at least three-sixteenths inch apart. A record should be kept, preferably in the log book, stating the extent to which the belt was repaired and the date. The original identification marking on the belt, conforming either to that required by TSO–C22, to a deviation from this marking, or to the military designation should be retained. Operators of a fleet of airplanes should follow the above suggestions, but keeping of records of renovations in a log book is impractical since the belts are never associated with any one particular airplane for any length of time. Therefore, in addition to retaining the original identification label and attaching it to the renovated belt, some additional simple marking should be used to indicate that the belt had been renovated. The date of renovation should also be shown. The use of the letter "R" followed by the date would be acceptable. This marking could be in the form of an indelibile ink stamping or cloth label stitched to the webbing.

(g) *Fire extinguishers.* Inspection and maintenance of fire extinguishers should be in accordance with the manufacturer's instructions attached to the extinguisher unit. In connection with carbon tetrachloride extinguishers, owners who desire to refill their own units are cautioned not to refill them with commercial carbon tetrachloride inasmuch as it invariably contains a small percentage of water which ultimately causes corrosion of the moving parts of the extinguisher mechanism. Carbon tetrachloride for refilling fire extinguishers is sold in containers identifying the contents as being intended for such usage.

§ 18.30–10 *Windshields and enclosures (CAA policies which apply to § 18.30).* These repairs are applicable to plastic windshields, enclosures, and windows in non-pressurized airplanes. For pressurized airplanes the plastic elements should be replaced or repaired only in accordance with the manufacturer's recommendations.

(a) *Types of plastics.* Two types of plastics are commonly used in transparent enclosures of aircraft. These materials are known as acrylic plastics and cellulose acetate plastics.

(1) *Replacement panels.* Replacement panels should always be of material equivalent to that originally used by the manufacturer of the aircraft. There are many types of transparent plastics on the market. Their properties vary greatly, particularly in regard to expansion characteristics, brittleness under low temperatures, resistance to discoloration when exposed to sunlight, surface checking, etc. These properties have been considered by aircraft manufacturers in selecting materials to be used in their designs and the use of substitutes having different characteristics may result in subsequent difficulties.

(b) *Installation procedures for acrylic plastics.* In installing a replacement panel, the same mounting method used by the manufacturer of the airplane should be followed. While the actual installation will vary from one type of aircraft to another, the following major principles should be considered in installing any replacement panels.

(1) Never force an acrylic plastic panel out of shape to make it fit a frame. If a replacement panel does not fit easily into the mounting, a new replacement should be obtained or the whole panel heated and reformed. When possible, a new panel should be cut and fitted at ordinary room temperature.

(2) In clamping or bolting acrylic plastic panels into their mountings do not place the plastic under excessive compressive stress. It is easy to develop more than 1,000 pounds per square inch on the plastic by drawing up a nut and bolt good and tight. Each nut should be tightened to a firm fit then backed off one full turn.

(3) (i) In bolt installations, spacers, collars, shoulders, or stop-nuts should be used to prevent tightening the bolt excessively. Whenever such devices are used by the airplane manufacturer they should be retained in the replacement installation. It is important that the original number of bolts, complete with washers, spacers, etc., be used.

(ii) When rivets are used, adequate spacers or other satisfactory means to prevent excessive tightening of the frame to the plastic should be provided.

(4) Acrylic plastic panels should be mounted between rubber, cork, or other gaskets to make the installation waterproof, to reduce vibration, and to help to distribute compressive stresses on the plastic.

(5) Acrylic plastics expand and contract approximately three times as much as the metal channels in which they are mounted. Therefore, suitable allowance for dimensional changes with temperature should be made. Clearances of one-eighth-inch minimum should be allowed around the edges of small panels and larger clearances around the edges of large panels.

(6) In installations involving bolts or rivets, the holes through the plastic should be oversize by one-eighth-inch diameter and centered so that the plastic will not bind or crack at the edge of the holes. The use of slotted holes is also recommended.

(7) Panels should be mounted to a sufficient depth in the channel to prevent falling out when it contracts at extremely low temperatures or when the panel is flexed. When the manufacturer's original design permits, panels up to 12 inches long should be mounted to a minimum depth of $1^1/_8$ inches.

(c) *Installation procedure for cellulose acetate plastics.* In general the methods used for installation of cellulose acetate plastics are similar to those used for acrylic plastics. The coefficient of expansion of cellulose acetate exceeds that of acrylic resins. Also, the cellulose acetate plastics are affected by moisture and will change dimensions as they absorb water. Therefore, allowance should be made in mounting this type plastic if wide variations in temperature and humidity are to be encountered. As a general rule an allowance of about one-eighth-inch per foot of panel length should be made for expansion and three-sixteenths-inch per foot for contraction.

(d) *Repair of plastics.* Extensively damaged transparent plastic should be replaced rather than repaired wherever possible since even a carefully patched part is not the equal of a new section,

either optically or structurally. At the first sign of crack development, a hole of one-eighth to three-sixteenths of an inch in diameter should be drilled at the extreme ends of the cracks as shown in figure 10–1. This serves to localize the cracks and to prevent further splitting by distributing the strain over a large area. If the cracks are small, stopping them with drilled holes will usually suffice until replacement or more permanent repair can be made. The following repairs are permissible; however, they should not be located in the line of the pilot's vision in normal flight and landing.

(1) *Surface patch.* If a surface patch is to be installed, trim away the damaged area and round all corners. A piece of plastic of sufficient size to cover the damaged area and extend at least three-fourths of an inch on each side of the crack or hole should be cut and the edges beveled as shown in figure 10–2. If the section to be repaired is curved, the patch should be fitted to the same contour by heating it in an oil bath at a temperature of 248° to 302° F. or it may be heated on a hot plate until soft. Boiling water should not be used for heating. The patch should be coated evenly with plastic solvent adhesive and placed immediately over the hole. A uniform pressure of from 5 to 10 pounds per square inch should be maintained on the patch for a minimum of 3 hours. The patch should be allowed to dry 24 to 36 hours before sanding or polishing is attempted.

(2) *Plug patch.* In using inserted patches to repair holes in plastic structures, the holes should be trimmed to a perfect circle or oval and the edges beveled slightly. The patch should be slightly thicker than the material being repaired and should have similarly beveled edges. Patches should be installed in accordance with figure 10–3. The plug is heated until soft and pressed into the hole without cement, and allowed to cool, making a perfect fit. The plug should be removed, the edges coated with adhesive and then reinserted in the hole. A firm light pressure should be maintained until the cement has set. Sand or file the edges level with the surface, buff and polish.

(e) *Cleaning and polishing transparent plastic.* (1) Plastics have many advantages over glass for aircraft use, but they lack the surface hardness of glass and care must be exercised while servicing the aircraft to avoid scratching or otherwise damaging the surface.

(2) Plastic should be cleaned by washing with plenty of water and mild soap, using a clean, soft, grit-free cloth, sponge, or bare hands. Do not use gasoline, alcohol, benzene, actone, carbon tetrachloride, fire extinguisher or deicing fluids, lacquer thinners, or window cleaning sprays because they will soften the plastic and cause crazing. The plastic should not be rubbed with a dry cloth since this is likely to cause scratches and also build up an electrostatic charge which attracts dust particles to the surface. If after removing dirt and grease, no great amount of scratching is visible, the plastic should be finished with a good grade of commercial wax. The wax should be applied in a thin even coat and brought to a high polish by rubbing lightly with a soft cloth.

(3) If, after removing dirt and grease, the surface is found marred by scratches, hand polish or buff out the scratches. Hand-polishing or buffing should not be attempted until the surface is clean. A soft, open-type cotton or flannel buffing wheel is suggested. Minor scratches may be removed by vigorously rubbing the affected area by hand or with a soft, clean cloth dampened with a mixture of turpentine and chalk or an automobile cleanser applied with a damp cloth. Remove the cleanser and polish with a soft, dry cloth. Acrylic and cellulose acetate plastics are thermoplastic and friction created by buffing or polishing too long in one spot can generate sufficient heat to soften the surface. This will produce visual distortion and should be guarded against.

§ 18.30–11 *Hydraulic systems (CAA policies which apply to § 18.30).* Airplane hydraulic systems should be maintained, serviced, and adjusted in accordance with manufacturer's maintenance manuals and pertinent component maintenance manuals. Certain general principles of maintenance and repair which apply are outlined below.

(a) *Hydraulic lines and fittings.* All lines and fittings should be carefully inspected at regular intervals to insure airworthiness. Metal lines should be checked for leaks, loose anchorages, scratches, kinks, or other damage. Flexible hose lines should be checked for leaks, cuts, abrasions, soft spots, or other deterioration or damage. Fittings and connections should be inspected for leakage, looseness, cracks, burrs, or other damage. Defective elements should be replaced but may sometimes be repaired.

(1) *Replacement of metal lines.* When inspection shows a line to be damaged or defective, the entire line should be replaced. However, if the damaged section is localized, a repair section may be inserted. In replacing lines, always use tubing of the same size and material as the original line. Use the old tubing as a template in bending the new line, unless it is too greatly damaged, in which case a template can be made from soft iron wire. Soft aluminum tubing (2SO, 3SO, or 52SO) under one-fourth inch outside diameter may be bent by hand. For all other tubing, an acceptable tube bending, hand or power, tool should be used. Bending should be done carefully to avoid excessive flattening, kinking, or wrinkling. Minimum bend radii should conform to the values shown in table 11–1. A small amount of flattening in bends is acceptable but should not exceed an amount such that the small diameter of the flattened portion is less than 75 percent of the original outside diameter. When installing the replacement tubing it should line up correctly with the mating part and should not be forced into line by means of the coupling nuts.

(2) *Tube connections.* Most tubing connections are made using flared tube ends, and standard connection fittings: AN–818 nut and AN–819 sleeve. In forming flares, the tube ends must be cut square, filed smooth, have all burrs and sharp edges removed and be thoroughly cleaned. The tubing is then flared using the correct forming tools for the sizes of tubing and type of fitting. A double flare is used on soft aluminum tubing three-eighths inch outside diameter and under, and a single flare on all other tubing. In making the connections hydraulic fluid only should be used as a lubricant. The connection should then be tightened as overtightening will damage the tube or fitting, and may cause failure, and undertightening may cause leakage.

(3) *Repair of metal tube lines.* (i) Minor dents and scratches in tubing may be repaired. Scratches or nicks no deeper than 10 percent of the wall thickness in aluminum alloy tubing only, not in the heel of a bend, may be repaired by burnishing with hand tools. Severe die marks, seams or splits in the tube should not be repaired; such lines should be replaced. Any crack or deformity in a flare is also unacceptable and should be rejected.

(ii) A dent less than 20 percent of the tube diameter is not objectionable unless it is in the heel of a bend. Dents may be removed by drawing a bullet of proper size through the tube by means of a length of cable.

(iii) A severely damaged line may be repaired, if it is not desired to replace the entire line, by cutting out the damaged section and inserting a repair section consisting of a short section of flared tubing, flaring both ends of the undamaged tube remaining, and connecting with standard unions, sleeves, and tube nuts. If the damaged portion is short enough, the insert tubing may be omitted and the repair made with one union and two sets of connection fittings.

(4) *Replacement of flexible lines.* When replacement of flexible hose lines is necessary, use the same type, size and length hose as the replaced line. If the hose is of the swaged-end type, the entire assembly should be obtained in the correct size for replacement. If it is of the collet, or sleeve, quick-attachable-end type, the assembly should be made up in accordance with the manufacturer's directions, using the prescribed tools, so that the replacement assembly is of the same size and length as the replaced line. The hose should be installed without twisting by keeping the white line on hose straight. Use only hydraulic fluid for lubricating threads.

(ii) A hose should never be stretched tight between two fittings as this will result in overstressing and failure at the ends under pressure. The length of hose should be sufficient to provide about 5 to 8 percent slack.

(b) *Hydraulic components.* Hydraulic components such as pumps, actuating cylinders, selector valves, relief valves, etc., should be disassembled only for maintenance and overhaul in properly equipped shops by qualified personnel. Manufacturer's recommended practices and replacement parts should be used in overhauling such components. If proper servicing facilities are not available, hydraulic equipment in need

of repair or overhaul should be replaced by new or overhauled parts and the removed component sent to a qualified agency for overhaul. In making adjustments to such parts as relief valves, pressure regulating valves, etc., the airplane and component manufacturer's instructions should be carefully followed. Hydraulic filter elements should be inspected at frequent intervals and replaced as necessary.

§ 18.30–12 *Electrical systems (CAA policies which apply to § 18.30)*—(a) *General.* All electric equipment, electric assemblies, and wiring installations should be frequently inspected for damage, general condition, and proper functioning to assure the continued satisfactory operation of the electric system. The adjustment, repair, overhaul, and testing of all electric equipment and systems should be accomplished in accordance with the recommendations and procedures set forth in Maintenance Instructions, or manuals published by the the Aircraft and Equipment Manufacturers.

(b) *Inspection and operating checking.* Frequent visual inspections, operating checks of all electric circuits and equipment, and replacement or repair when deficiencies are found are effective in minimizing electrical troubles and hazards in airplanes. A suggested list of items to look for during these inspections and the checks to be performed are itemized below:

Damaged or overheated equipment, connections and wiring or worn wiring insulation.
Excessive resistance at high current carrying connections, as determined by millivolt drop test.
Alinement of electrically driven equipment.
Poor electric bonding.
Cleanliness of equipment and connections.
Proper support of wiring and conduit, and satisfactory attachment to the structure.
Tightness of connections, terminals and ferrules.
Continuity of fuses, operation of circuit breakers.
Condition of electric lamps.
Clearance or insulation of exposed terminals.
Adequacy of safety wire, cotter pins, etc.
Operational check of electrically operated equipment such as motors, inverters, generators, batteries, lights, etc.
Voltage check of electric system operation with portable precision voltmeter.

(1) *Cleaning and preservation.* Frequent cleaning of electric equipment to remove dust, dirt, and grime is recommended. Fine emery cloth may be used to clean terminals and mating surfaces if they appear corroded or dirty. Crocus cloth or very fine sandpaper should be used to polish commutators or slip rings. Emery cloth should not be used on commutators since particles from the cloth may cause shorting and burning.

(i) *Batteries and battery containers.* The drain and venting provisions for the battery or battery containers should be checked frequently and if found corroded the compartment and surrounding structure should be washed with a solution of soda and water to neutralize the battery acid.

(2) *Miscellaneous check items.* Frequent checks should be made for miscellaneous irregularities such as loose terminal connections, poorly soldered or loose swaged terminals, missing safety wire, loose quick-disconnects, broken wire bundle lacing, broken or inadequate wire clamps, and insufficient clearance between exposed current-carrying parts and ground. Replacement or repair should be accomplished as a part of routine maintenance.

(c) *Major adjustments.* Major adjustments of items of equipment such as regulators, generators, contactors, control devices, inverters, and relays should be accomplished outside the airplane on the test stand or test bench where all necessary instruments and test equipment are at hand. The adjustment procedures outlined by the equipment manufacturer should be followed.

(d) *Equipment replacement.* Damaged, wornout, and defective electric equipment should be replaced with identical items or with equipment equivalent to the original in operating characteristics, mechanical strength, and the ability to withstand the environmental conditions encountered in the operation of the airplane.

(e) *Aircraft electric cable installation*—(1) *Types of electric cable.* Aircraft service imposes severe environmental conditions on electric cable. To assure satisfactory service, the cable should be of aircraft quality at least equivalent to that specified in Military Specification MIL–W–5086 (Copper) and MIL–W–7072 (Aluminum).

(2) *Size of electric cable*—(i) *Criteria for selection.* The criteria upon which the selection of electric cable size should be based, when considering an alteration, are current carrying capacity and voltage drop.

(*a*) The selected cable should not carry current continuously or intermittently in excess of the ampere values indicated by curves 1, 2, and 3 on figure 12–1.

(*b*) The voltage drop in the main power cables from the generation sources, or the battery to the bus should not exceed 2 percent (2.0%) of the regulated voltage, when the generator is carrying rated current or the battery is being discharged at the 5-minute rate.

(*c*) The voltage drop in the load circuits, between the bus and the utilization equipment, should not exceed the values shown in the following tabulation:

| Nominal system voltage | Allowable voltage drop | |
|---|---|---|
| | Continuous operation | Intermittent operation |
| 14 | 0.5 | 1 |
| 28 | 1 | 2 |
| 115 | 4 | 8 |
| 200 | 7 | 14 |

(ii) *Electric cable chart.* This chart, figure 12–1, applies to cable carrying direct current and is based on copper conductor cable manufactured in accordance with Specification MIL–W–5086, whose current ratings are given in Specification MIL–W–5088. Curves 1, 2 and 3 thereon intersect the vertical cable size lines at the maximum ampere rating for the specified conditions indicated on the chart.

(*a*) *Examples of how to use the electric cable chart—Figure 12–1—*(1) *Knowing the cable length and ampere load.* Determine the required cable size so as not to exceed one volt drop as follows: Select the cable length from the scale at the left and follow it horizontally across the chart to the right until it intersects the required diagonal ampere line. Then read the cable size on the nearest or preferably the nearest vertical cable size line to the right.

*Example.* Measured cable length 50 feet, continuous current 25 amperes—determine cable size. From the left scale follow horizontal line 50 chart to the right until it intersects the diagonal 25-ampere line. The 25-ampere line is slightly more than midway between the 20- and 30-ampere lines since the scale is logarithmic. The vertical cable size to the right of this intersection is numbered 8, and therefore a No. 8 cable size will be needed. Note also that the point of intersection is above curve 1, indicating that No. 8 cable wire will carry 25 amperes in conduit or bundles without overheating.

(2) *Knowing the cable size and ampere load.* Determine the maximum cable length so as not to exceed one volt drop as follows: Select the cable size from the scale at the bottom of the chart and follow the vertical cable size line until it intersects the required diagonal ampere line. Then read the maximum distance in feet that the cable can be run, by horizontally projecting the point of intersection to the scale at the left.

*Example.* Cable size No. 2, continuous current 150 amperes, determine maximum cable length in feet. From the bottom scale follow the No. 2 vertical cable size line until it intersects the diagonal 150-ampere line. Projecting this point horizontally to the scale at the left it is determined that 38 feet is the maximum distance that the No. 2 cable carrying 150 amperes can be run without exceeding one-volt drop. It should be noted, however, that the point of intersection falls below Curve 1 and if the cable is to be installed in a close fitting conduit or even a large bundle it would be preferable to use a No. 1 or No. 1/0 cable, depending on the known factors of the installation. Naturally the maximum distance that these larger cables can be run without exceeding one-volt drop will also be greater than that previously determined for the No. 2 cable.

(3) *For other than one-volt drop.*

*Examples.* Determine cable size for various voltage drops, measured cable length 100 feet, continuous current 20 amperes; also determine maximum cable lengths in feet, for various voltage drops, using cable size No. 10, continuous current 20 amperes.

(iii) *Resistance.* The resistance of the current return path through the aircraft structure is always considered negligible. However, this is based on the assumption that adequate bonding of the structure or a special electric current return path has been provided which is capable of carrying the required electric current with a negligible voltage drop. The measured resistance from the ground point of a generator or the battery to the ground terminal of any electric device should not exceed 0.005 ohm.

| Voltage drop | Enter chart (feet) | Amperes | Cable size from chart | Check |
|---|---|---|---|---|
| 1 | 100 | 20 | No. 6 | VD = (0.000136) × (100) (20) = 0.872 |
| 0.5 | $\frac{100}{0.5}=200$ | 20 | No. 4 | VD = (0.000271) × (100) (20) = 0.548 |
| 4 | $\frac{100}{4}=25$ | 20 | No. 12 | VD = (0.00188) × (100) (20) = 3.76 |
| 7 | $\frac{100}{7}=14$ | 20 | No. 14 [1] | VD = (0.00269) × (100) (20) = 5.98 |

[1] It should be noted that the No. 14 cable should not be used if a considerable portion of its 100-foot length is to be enclosed in conduit, large bundles, or locations of high ambient temperature, as the intersection of the cable size and current crossfalls below curve 1.
[2] Resistance values from table 12–1.

| Voltage drop | Wire size | Amperes | Maximum length (feet) from chart at voltage drop indicated | Check |
|---|---|---|---|---|
| 1 | No. 10 | 20 | 45 | VD = (0.0011) × (20) (45) = 0.990 |
| 0.5 | | | (45) (0.5) = 22.5 | VD = (0.0011) × (20) (45) = 0.495 |
| 4 | | | (45) (4) = 180 | VD = (0.0011) × (20) (45) = 3.96 |
| 7 | | | (45) (7) = 315 | VD = (0.0011) × (20) (315) = 7.93 |

[1] Resistance values from table 12–1.

(iv) *Aluminum cable.* From table 12–1 and 12–2 it will be noted that the conductor resistance of aluminum cable and that of copper cable two numbers higher are similar. Accordingly, the electric cable chart, figure 12–1, can be used when it is desired to substitute aluminum cable and the proper size can be selected by remembering to reduce the copper cable size by two numbers and by referring to table 12–2. The use of aluminum cable sizes smaller than No. 6 is not recommended.

(3) *Cable terminals.* Cable terminals are attached to the ends of electric cable to facilitate connection of the cable to junction boxes, terminal strips or items of equipment. The tensile strength of the cable to terminal joint should be at least equivalent to the tensile strength of the cable itself, and its resistance should be negligible relative to the normal resistance of the cable run. Terminals are available which were specifically designed for use with the standard sizes of aircraft cable. Haphazard choice of commercial terminals may lead to overheated joints, vibration failures, and corrosion difficulties.

(i) *Solder vs. solderless terminals.* The solderless (crimp-type) terminals have largely replaced the older solder lugs for most applications. Some of the disadvantages of the soldering process are listed as follows:

(*a*) A more skilled operator is required.
(*b*) A corrosive flux may be used, and the terminal joint will rapidly deteriorate.
(*c*) Maintenance is extremely difficult.
(*d*) The cable strands are stiffened by the solder, and become more susceptible to breakage by vibration.
(*e*) The cable insulation may be charred during the soldering process.

(ii) *Solderless terminal joints.* The terminal manufacturer will normally provide a special crimping or swaging tool for joining the solderless terminal to the electric cable. Aluminum cable presents special difficulty in that each individual cable strand is insulated by an oxide coating. The oxide coating must be broken down in the crimping process and some method employed to prevent its reforming. In all cases, the terminal manufacturer's instructions should be carefully followed.

(iii) *Attachment of terminals to studs.* Electrical equipment malfunction has frequently been traced to poor terminal connections at terminal boards. Loose, dirty, or corroded contact surfaces will produce localized heating which may ignite nearby combustible materials, or overheat adjacent cable insulation to the smoking point. Heavy current-carrying connections should be available for periodic inspection to determine their condition.

(4) *Terminal strips.* Cable runs are usually joined at terminal strips. The terminal strip should be fitted with barriers to prevent terminals on adjacent studs from coming in contact with each other. The studs should be anchored against rotation and be long enough to accommodate a maximum of four terminals. When more than 4 terminals are to be connected together, 2 or more adjacent studs should be used, and a small strip-metal bus mounted across the studs. In all cases, the current should be carried by the terminal contact surfaces, and not by the stud itself.

(i) *Terminal strip stud sizes.* If the stud size is too small, it is easily sheared during servicing by applying too much torque on the nut. After a few failures of this sort, the electrician will become overcautious and not tighten the nut sufficiently, and a hazardous loose connection will result. Consequently, it is good practice to limit stud sizes to No. 10 or larger.

(ii) *Terminal strip installation.* Terminal strips should be designed or mounted in such a manner that loose metallic objects cannot fall across the terminals or studs. It is good practice to provide at least one spare stud for future circuit expansion, or in case a stud is broken.

(5) *Connector assemblies.* Connectors (plugs and receptacles) are used to facilitate maintenance when frequent disconnection is required in service. Since the cable is soldered to the connector inserts, the joints should be individually insulated and the cable bundle firmly supported to avoid damage by vibration. Connectors have been particularly vulnerable to corrosion in the past, due to condensation of moisture within the shell. Special connectors with waterproofing features have been developed, and a chemically inert water-proof jelly is sometimes packed in the connector, to combat the corrosion difficulty.

(i) *Connector assembly application.* When two or more connectors are installed adjacent to each other, the design should be such that a plug cannot be inserted in the wrong receptacle. The socket-type insert should be used on that half of the connector which is "hot" after the connector is disconnected.

(6) *Through bolts.* Through bolts are sometimes required to make feeder connections through bulkheads, fuselage skin or firewalls. Such bolts should be mounted in such manner that they are mechanically secure independent of the terminal mounting nuts. Sufficient cross-section should be provided to insure adequate conductivity against overheating, and the contact surface area should be large enough to minimize voltage drop. Particular care should be exercised to avoid dissimilar metals among the terminal mounting hardware.

(7) *Splices in electric cable.* Splicing of electric cable should be kept to a minimum, and avoided entirely in locations subjected to extreme vibrations. Soldered splices are particularly brittle and should not be used. When a mechanical (crimped or swaged) splice is used, it should be covered by insulating tubing which is supported at both ends to prevent any motion which will tend to disconnect the splice. Multiple splices in a cable bundle should be staggered along the cable run.

(8) *Wiring installation practice*—(i) *General.* Electric wiring may be installed in aircraft without special enclosing means (open wiring) or may be confined in conduit or ducts to provide additional mechanical protection. Open wiring offers the advantages of ease of installation, simple maintenance, and reduced weight. However, conduit or ducting (preferably made of an insulating fire-resistant material) should be considered for the following situations.

(*a*) To minimize the possibility of a cable fault which would result in the loss of the electrical system, or render essential electrical equipment inoperative.

(*b*) To protect the cable from detrimental substances such as hydraulic fluid or gasoline.

(*c*) To protect the cable from abrasion or damage by moving aircraft elements, such as aircraft control cables or shifting cargo.

(ii) *Open wiring installation*—(*a*) *Cable bundles.* To simplify maintenance and to minimize the damage that may result from a single fault, cable bundles should be limited as to the number of wires in the run. Shielded cable, ignition cable, and cable which is not protected by a circuit breaker or fuse should be routed separately. The bending radius should not be less than 10 times the outer diameter of the bundle, to avoid excessive stresses on the cable insulation.

(b) *Insulating tubing.* Soft insulating tubing (spaghetti) cannot be considered as mechanical protection against external abrasion of cable, since at best it provides only a delaying action. Conduit or ducting should be employed in such cases.

(c) *Clamping of cable bundles.* Clamps, preferably of non-metallic material, should be used to support the cable bundle along the run. Lacing may be used between clamps, but should not be considered as a substitute for adequate clamping. Adhesive tapes are subject to age deterioration and therefore should not be used as a clamping means.

(d) *Clamp installation.* Clamps should be installed in such manner that the cables do not come in contact with other parts of the aircraft when subjected to vibration. Sufficient slack should be left between the last clamp and the electrical equipment to prevent strain at the cable terminals, or to minimize adverse effects on shock-mounted equipment. Where cables pass through bulkheads or other structural members, a grommet or suitable clamping should be provided to prevent abrasion.

(e) *Separation from flammable fluid lines.* An arcing fault between an electric cable and a metallic flammable fluid line may puncture the line and result in a serious fire. Consequently, every effort should be made to avoid this hazard by physical separation of the cables from lines or equipment containing oil, fuel, hydraulic fluid or alcohol. When separation is impractical the electric cable should be placed above the flammable fluid line and securely clamped to the structure. In no case should the cable be clamped to the flammable fluid line.

(iii) *Conduit installations.* Conduit is available in metallic and non-metallic materials and in both rigid and flexible forms. Primarily its purpose is for mechanical protection of the cable within, although some radio interference shielding may be provided.

(a) *Size of conduit.* When selecting conduit size for a specific cable bundle application, it is common practice to allow for ease in maintenance and possible future circuit expansion by specifying the conduit inner diameter about 25 percent larger than the maximum diameter of the cable bundle. Large conduit sizes should be avoided, since simultaneous damage to many cables is possible and maintenance becomes difficult.

(b) *Conduit fittings.* From the abrasion standpoints, conduit is vulnerable at its ends. Suitable fittings should be applied to conduit ends, in such manner that a smooth surface comes in contact with the cable within. Conduit should be supported by clamps along the conduit run.

(c) *Conduit installation.* Many of the past troubles with conduit can be avoided by proper attention to the following design details:

(1) Conduit should not be located where operating or maintenance personnel would use it as a hand-hold or foot step.

(2) Drain-holes should be provided at the lowest point in a conduit run. Drilling burrs should be carefully removed.

(3) Conduit should be adequately supported to prevent chafing against structure, and to avoid stressing its end fittings.

(iv) *Wiring identification.* To facilitate installation and maintenance, all wiring should be indelibly marked for identification. Any consistent numbering system is considered adequate. The identification marking should be placed at each end of the cable, and also, preferably, at intervals along the length.

(f) *Junction boxes and enclosures*—(1) *Junction box construction.* Junction boxes should be made from a fire-resistant, nonabsorbent material, such as aluminum alloy or an acceptable plastic material. Where fireproofing is necessary, a stainless steel junction box is recommended. A rigid construction will prevent "oil-canning" of the box sides, which may result in internal short circuits. In all cases drain-holes should be provided.

(2) *Internal arrangement.* The junction box should be designed to permit easy access to all installed items of equipment, terminals and cable. Where marginal clearances are unavoidable, an insulating material should be interposed between current carrying parts and any grounded surface. It is not good practice to mount equipment on the covers or doors of junction boxes, since inspection of internal clearance is impossible when the door or cover is in the closed position.

(3) *Junction box installation.* It is desirable to mount junction boxes with their open side facing downward, so that loose metallic objects, such as washers or bolts, will tend to fall out of the junction box, rather than wedge between terminals.

(4) *Junction box wiring.* The original layout of the junction box should take into consideration the necessity for adequate wiring space, and possible future additions. Electric cable inside the box should be laced or clamped in such manner that terminals are not hidden, relay armatures are not fouled, and motion relative to any equipment is prevented. Entrance openings for cable should be protected against chafing by grommets or other means.

(g) *Bonding*—(1) *General.* Bonding is defined as the process of electrically connecting the various metallic parts of the airplane, to achieve one or more of the following:

(i) A low resistance ground path for electrical equipment, thereby eliminating ground wires.

(ii) A reduction in radio interference.

(iii) Less probability of lightning damage to such airplane elements as control hinges.

(iv) Prevention of the buildup of static charges between parts of the airplane, which may be a fire hazard.

(2) *Bonding jumper installations.* Bonding jumpers should be as short as practicable, and installed in such manner that the resistance of each connection does not exceed .003 ohm. Reasonable access for maintenance should be provided. The jumper should not interfere with the operation of movable aircraft elements, such as surface controls, nor should normal movement of these elements result in damage to the bonding jumper.

(i) *Bonding connections.* To assure low-resistance connections, nonconducting finishes, such as paint and anodizing films, should be carefully removed from the attachment surface under the bonding terminal.

(ii) *Corrosion prevention.* Electrolytic action may rapidly corrode a bonding connection, if suitable precautions are not taken. Aluminum alloy jumpers are recommended for most cases, except that copper jumpers are used to bond together parts made of stainless steel, cadmium plated steel, copper, brass or bronze. Where contact between dissimilar metals cannot be avoided the choice of jumper and hardware should be such that corrosion is minimized, and the part likely to corrode would be the jumper or associated hardware. At locations where finishes were removed, a protective finish should be applied to the completed connection to prevent subsequent corrosion.

(iii) *Bonding jumper attachment.* The use of solder to attach bonding jumpers should be avoided for the same reasons outlined previously in reference to electric cable terminals. Tubular members should be bonded by means of clamps to which the jumper is attached. Proper choice of clamp material, to match the tube material, will minimize corrosion.

(3) *Ground return connections.* When bonding jumpers will carry substantial ground return current, it should be determined that the current rating of the jumper is adequate, and that a negligible voltage drop is produced.

(4) *Insulation of electrical equipment from ground.* In some cases, a unit of electrical equipment is connected into a heavy current circuit, perhaps as a control device, or relay. Such equipment should be insulated from the mounting structure, since grounding the frame of the equipment may result in a serious ground fault in the event of internal failure of the equipment. If a ground connection for a control coil must be provided, a separate small-gage wire may be used.

§ 18.29–13 *Instruments (CAA policies which apply to § 18.30)*—(a) *General*—(1) *Instrument installation and maintenance.* (i) Care should be taken with instruments to prevent their accidental damage.

(ii) When instruments do not give proper indications, they should be sent to an approved instrument overhaul and repair station or returned to the manufacturer for servicing.

(2) *Vibration insulation.* Instruments should not be subjected to excessive vibrations. When shock-insulated panels are used, the mountings should be periodically checked for condition and the panels for alinement. When necessary to replace shock mounts, units of the same characteristics should be used. Only flexible connector tubing should be used to join the ends of lines to the instruments. Care should be exercised

to insure that the instrument panel does not contact any parts of the airframe when vibrating normally.

(b) *Pitot-static system*—(1) *System components.* The conventional design of the pitot-system consists of pitot-static tubes or pitot tubes with static pressure parts and vents, lines, tubing, water drains and traps, selector valves, and various pressure actuated indicators or control units such as the altimeter, air-speed and rate of climb indicators, and automatic pilots connected to the system.

(i) *Pitot-static tube.* The tube should have its axis parallel to the longitudinal axis of the aircraft when in cruising flight configuration. All repairs and alterations on the pitot-static system should be made in conformance with the manufacturer's recommendations.

(ii) *Static pressure ports or vents.* All alterations or relocations of the static pressure ports or vents should be made in conformance with the aircraft manufacturer's engineering recommendations. (See paragraph (a) (1) of this section and subparagraph (2) of this paragraph.)

(iii) *Heater not operative.* In the types of tubes where the electric element is not replaceable, it becomes necessary to replace the tube. The voltage at the heater terminals should not be less than 85 percent of the rated system voltage.

(iv) *Clogging of pitot-static tube or static vent drains.* If water or obstructive material has entered the system, all drains should be cleaned. The drains in the pitot-static head should be probed with a fine wire to remove dirt or other obstructions. The bottom static openings act as drains for the head's static chamber and these holes should be checked at regular intervals to preclude malfunctioning of the system.

*Caution:* Make sure all instruments are disconnected during cleaning procedures.

(v) *Relocation of pitot-static tube.* If relocation of the pitot-static tube is necessary it should be done in accordance with the manufacturer's recommendations and with due consideration of the following:

(a) Freedom of aerodynamic disturbances caused by the aircraft.

(b) Location protected from accidental damage.

(c) Alinement with the longitudinal axis of the aircraft when in cruising flight configuration.

(2) *Pitot-static lines*—(i) *Poor drainage of lines.* If drainage is poor, check the line diameter. If this tubing diameter is less than three-eighths inch outside diameter, it should be replaced with this size tubing to overcome the difficulty, as water will not drain freely in smaller size lines.

(ii) *Replacing the lines.* If necessary to replace lines, the following installation practices should be observed:

(a) Attach lines to airframe at regular intervals by means of suitable clamps.

(b) Do not clamp lines at end fittings.

(c) Maintain slope of lines toward drains so that proper drainage will be effected.

(d) Use thread lubricant on fittings, preventing excess lubricant from entering lines.

(e) Check the lines for leaks.

(iii) *Leak testing static lines.* The static line openings should be connected into a common line to which a manometer or a reliable pressure gage and a suction source is connected. Apply suction equivalent to 1,000 feet altitude (1.05 inches of mercury or 14.24 inches of water) and hold. After 1 minute, the leakage should not exceed the equivalent of 150 feet of altitude (approximately 2.18 inches of water).

*Caution:* Do not apply positive pressure to the static lines. Remove all stops on static vents after tests have been completed.

(iv) *Leak testing pitot lines.* Seal drain holes, and connect pitot pressure openings to a tee to which a source of pressure and a manometer or reliable airspeed indicator is connected. Apply pressure to cause airspeed to indicate 150 miles per hour and hold it at this point (0.82 inches of mercury or 11.18 inches of water positive pressure). After 1 minute, the leakage should not exceed the equivalent of 10 miles per hour.

*Warning:* Do not apply suction to pitot lines.

(v) *Maintenance of lines.* Inspection of the lines should be made periodically. Water accumulation can be removed by opening the drain caps on valves. If the installation is not properly self-drained, disconnect the lines from the instruments and carefully "blow" the lines with clean dry air.

(c) *Magnetic direction indicator (compass)*—(1) *Correction for errors in magnetic direction indicator*—(i) *Swinging the indicator (ground).* When the magnetic direction indicator does not yield satisfactory directional indications, it can be calibrated by the "ground swinging" technique as follows:

(a) Remove aircraft to location free from influence of steel structures, underground pipes and cables, reinforced concrete, or other aircraft.

(b) Place the aircraft in level flying position.

(c) Remove compensating magnets from chambers or reset the fixed compensating magnets to neutral positions, whichever is applicable, before swinging.

(d) Check indicator for fluid level and cleanliness. If fluid is required, it should be added before compensation.

(e) Check the pivot friction of indicator by deflecting the card with a small magnet. The card should rotate freely in a horizontal plane.

(f) If radio is used in aircraft, there should be corrections noted for "Radio On" and "Radio Off" conditions.

(g) Aline the aircraft with the North magnetic heading and compensate with compensating magnets. Repeat for the East magnetic heading. Then place on South and West magnetic headings and remove half of indicated error by adjusting compensators. Engine(s) should be running.

(h) Turn the aircraft on successive 30° headings through 360°. Placard should be marked to indicate correction at each 30° heading showing "Radio On" and "Radio Off" corrections.

(ii) *Indicator cannot be properly compensated.* The pilot's indicator should have deviation of less than 10° at any heading. When this maximum is exceeded, a new location for the indicator should be considered, unless the condition causing the error can be removed permanently.

(iii) *Erratic indications of magnetic indicator.* If severe deviations are encountered, they may be due to iron or steel items being carried in the aircraft, and located too close to the magnetic direction indicator. Caution must be taken to properly locate articles of this nature away from the vicinity of the indicator.

§ 18.30–14 *Engines and fuel systems (CAA policies which apply to § 18.30)*—(a) *Engines.* In repairing or overhauling aircraft engines, all repair agencies should be guided by the recommendations and procedures set forth in the respective instruction books, manuals, or service bulletins for the installation, inspection, and maintenance of aircraft engines, published by the aircraft engine manufacturers for each type of engine. Since many details concerning the repair and overhaul of engines differ decidedly for different types and models of engines, no attempt has been made to include such details in this manual. The overhaul period for aircraft engines used in general service operations should be determined from the manufacturer's recommendations with due consideration given to the condition of each engine involved.

(1) *Magnetic, fluorescent penetrant, X-ray, supersonic, and hydrostatic inspections.* All rotating, reciprocating and other highly stressed parts of all aircraft engines should be subjected to critical inspection at the time of overhaul. This inspection should be supplemented by any of the following procedures whenever recommended in the pertinent engine manufacturer's overhaul or instruction manuals or by CAA directives:

(i) Wet or dry magnetic dust inspection of magnetic materials;

(ii) Wet or dry penetrant inspection of nonmagnetic materials;

(iii) X-ray or supersonic inspection of any material;

(iv) Hydrostatic inspection of bulky parts and assemblies, such as cylinder heads and cylinders.

A copy of the report of the findings of any of these inspections should be appended to the original repair and alteration form in the case of a major repair. Refer to § 18.30–8 (d) (1) through (6) for process details.

(2) *Rebuilt engines.* A rebuilt engine is defined as a used engine which has been completely disassembled, inspected, repaired as necessary, reassembled, tested, and approved in the same manner and to the same tolerance and limits as a new engine. Component parts of such engines may be either used parts or new parts. The used parts may be either the parts from the same engine or from other service engines, but they must con-

form to production drawing tolerances and limits to which new parts must conform. In addition, all parts, either new or used, meeting approved oversize and undersize dimensions acceptable for new engines, are also eligible.

(3) *Crankshafts.* Crankshafts should be carefully inspected for misalinement and if bent beyond the manufacturer's permissible limit for service use, should not be repaired, but should be replaced. Worn journals may be repaired by regrinding in accordance with the manufacturer's instructions. If the original fillets are altered at any time, their radii should not be reduced and their surfaces should be polished free of all tool marks. No attempt should be made to straighten crankshafts damaged in service without consulting the engine manufacturer for appropriate instructions. In no case should an attempt be made to straighten a nitrided crankshaft.

(4) *Replacement parts in certificated engines.* Only engine parts which are approved by the Civil Aeronautics Administration should be used in making replacements in certificated aircraft engines. This applies also to engine component parts such as magnetos, spark plugs, etc.

(i) Engine parts obtained from war surplus or military stocks are eligible for use providing they are found to meet the prescribed inspection limits; are otherwise in serviceable condition, and were originally acceptable under the military procurement agency's standards.

(ii) Parts for obsolete engines for which new parts are no longer obtainable from the original manufacturer or his successor manufacturer, are sometimes fabricated locally. When it becomes necessary to do this, physical tests and careful measurements of the old part may provide adequate technical information. However, this procedure is usually regarded as a major change which requires engine testing and is not recommended except as a last alternative. Oftentimes, CAA engineering data is available in Washington for obsolete engines and it may be useful in providing information for the foregong purpose.

(5) *Cylinder hold-down nuts and cap screws.* Great care is required in tightening cylinder hold-down nuts or cap screws. They must be tightened to close torque limits to prevent improper prestressing and to insure even loading on the cylinder flange. The installation of baffles, brackets, clips, and other extraneous parts under these nuts and cap screws is not considered good practice and should be discouraged. If these baffles, brackets, etc., are not properly fabricated or made of suitable material, they will cause loosening of the nuts or cap screws even though the nuts or cap screws were properly tightened and locked at installation. Either improper prestressing or loosening of any one of these nuts or cap screws will introduce the danger of progressive stud failure with the possible loss of the engine cylinder in flight. Never install parts made from aluminum alloy or other soft metals under cylinder hold-down nuts or cap screws.

(6) *Run-in time.* After an aircraft engine has been overhauled, it should be run-in in accordance with the pertinent aircraft engine manufacturer's instructions. If no special test stand, test club, and other equipment are available, the engine may be run-in on the aircraft and the aircraft should be headed into the wind during the run-in on the ground so that the maximum cooling effect will be obtained. Proper cooling during run-in cannot be overemphasized. The manufacturer's recommendations concerning engine temperatures and other criteria should be carefully observed.

(7) *Re-use of safetying devices.* Cotter pins and safety wire should never be used a second time. Flat steel-type wrist-pin retainers and thin lock washers likewise should be replaced, but special coil spring or plug-type retainers need not be replaced at overhaul if the manufacturer's recommendations permit re-use.

(8) *Self-locking nuts for aircraft engines and accessories.* Self-locking nuts may be used on aircraft engines provided the following criteria are met:

(i) Where their use is specified by the engine manufacturer in his assembly drawing, parts list, and bills of material which are approved by the Civil Aeronautics Administration.

(ii) When the nuts will not fall inside of engine should they loosen and come off.

(iii) When there is at least one full thread protruding beyond the nut.

(iv) If cotter pin or locking-wiring holes are in the bolt or stud, the edges of these holes should be well-rounded to preclude damage to the lock nut.

(v) The effectiveness of the self-locking feature should be checked and found to be satisfactory prior to its re-use.

(vi) Engine accessories should be attached to the engine by means of the types of nuts furnished with the engine. On many engines, however, self-locking nuts are furnished for such use by the engine manufacturer for all accessories except the heaviest, such as starters and generators.

(vii) On many engines, the cylinder baffles, rocker box covers, drive covers and pads, and accessory and supercharger housings, are fastened with fiber insert locknuts which are limited to a maximum temperature of 250° F. inasmuch as above this temperature the fiber will usually char and consequently lose its locking characteristic. On locations such as the exhaust-pipe attachment to the cylinder, a locknut which has good locking features at elevated temperatures will give invaluable service. In a few instances, fiber insert locknuts have been approved for use on cylinder hold-down studs. This practice is not generally recommended since especially tight stud fits to the crankcase must be provided, and extremely good cooling must prevail so that low temperatures exist at this location on the specific engines for which such use is approved.

(viii) It is necessary that all proposed applications of new types of locknuts or new applications of currently used self-locking nuts must be investigated adequately since most engines require some specially designed nuts. Such specially designed nuts are usually required for one or more of the following reasons:

(*a*) To provide heat resistance;

(*b*) To provide adequate clearance for installation and removal;

(*c*) To provide for the required degrees of tightening, or, locking ability which sometimes require a stronger, specially heat-treated material, a heavier cross-section, or a special locking means;

(*d*) To provide ample bearing area under the nut to reduce unit loading on softer metals;

(*e*) To prevent loosening of studs when nuts are removed. Information concerning approved self-locking nuts and their use on specific engines is usually found in engine manufacturer's manuals or bulletins. If the desired information is not available, it is suggested that the engine manufacturer be contacted.

(9) *Designating converted engines.* When engine type of model conversions are accomplished (see § 18.1-1 (b) (2)), the engine nameplate should be altered or replaced to include the new official model designation and any other necessary information shown on the pertinent CAA engine specification.

(i) For current engines, information concerning engine modernizing, engine model conversions, and new properly marked nameplates should be obtained from the engine manufacturer.

(ii) For military surplus engines or old engines for which new nameplates can no longer be secured, the new model designation symbols should be marked either in the same title block adjacent to the old symbols, or on a plain thin steel plate attached beside the existing plate by at least two of the mounting screws. For engines which were never provided with separate designation plates and have, instead, an integral stamping boss on the crankcase, the new designation symbols should be added thereto, or a stamped thin steel plate may be fabricated and attached thereto. The superseded model designations should be obliterated or enclosed with parentheses. When metal stamps are used, care should be exercised to avoid damage to the engine.

(iii) In some instances, suffix letters should be added to the engine model number on the nameplate to designate certain alterations or conversions. Such additions should be made when the alteration or conversion is not of sufficient importance to warrant model designation changes. Examples of these letter additions are:

(*a*) Suffix letter "C" on P & W Military R-2000-7 and -11 engines denoting the plain main bearing type main crankcases as indicated on Specification 5E-5;

(*b*) Suffix letters "A," "E," "L," "M," or "P" on Warner Super Scarab Series 50 engines as indicated on Specification E-104;

(*c*) Suffix letter "D" on Continental E185 series engines denoting incorporation of a dampered crankshaft as indicated on Specification E-246.

(iv) Examples of model designation changes are:

(*a*) Pratt and Whitney R-985-AN-1 engine converted to R-985-AN-14B may be redesignated R-985-AN-(1) 14B if it is desired to preserve its former designation. Usually, though, there is no specific reason to preserve prior identities of converted engines.

(*b*) A Continental A-65-8 engine converted to an A-75 engine with flange-type crankshaft should be redesignated an A-75-8F engine. Continental Service Bulletin No. M47-16 discusses the manufacturer's recommended procedures for handling conversions of Continental engines.

(*c*) A Wright R-1820-71 engine, when installed in certificated aircraft, should be redesignated with its civil model designation 702C9GC1 and Type Certificate No. 219. Similarly, a Lycoming O-235-2 engine nameplate should be redesignated O-235-B and Type Certificate No. 2-9.

(*d*) An R-1830-65 engine, when converted to an R-1830-90D engine, may be designated R-1830-90D and the "65" obliterated.

(*e*) Some model conversions merely require the addition of the symbols M1 or M2, etc., to the existing designation, e.g., R-2000-7M1 as indicated on Specification 5E-5.

(10) *Welding in the repair of engines*—(i) *General.* In general, welding of highly stressed engine parts is not recommended. However, under the conditions given below, welding may be accomplished if it can be reasonably expected that the welded repair will not adversely affect the airworthiness of the engine:

(*a*) When the weld is externally situated and can be inspected easily;

(*b*) When the part has been cracked or broken as the result of unusual loads not encountered in normal operation;

(*c*) When a new replacement part of obsolete-type engine is not available;

(*d*) When the welder's experience and equipment employed will insure a first quality weld in the type of material to be repaired and will insure restoration of the original heat treat in heat-treated parts. Also refer to § 18.30-4 (b) for information on process details.

(ii) *Welding of minor parts.* Many minor parts not subjected to high stresses may be safely repaired by welding. Mounting lugs, cowl lugs on cylinders, covers, etc., are in this category. The welded part should be suitably stress-relieved after welding.

(11) *Metallizing.* Metallizing should not be done on any internal part of an aircraft engine except when it is proved conclusively to the Civil Aeronautics Administration that the metallized part will not adversely affect the airworthiness of the engine. Metallizing the finned surfaces of steel cylinder barrels with aluminum may be accomplished since many engines are originally manufactured in this manner.

(12) *Plating*—(i) *General.* Plating may be restored on an engine part when accomplished in accordance with the manufacturer's instructions.

(ii) *Plating of highly stressed parts.* In general, chromium plating should not be applied to highly stressed engine parts. Certain applications of this nature have been found to be satisfactory. However, the processes to be used should be approved in all details by the Civil Aeronautics Administration. Porous chromium-plated cylinder walls have been found to be satisfactory for practically all types of engines. Dense or smooth chromium plating without roughened surfaces, on the other hand, has not been found to be generally satisfactory. For cylinder bore chromium plating, CAA engineering approval of the process used is required. Information with respect to what agencies are approved for this work may be obtained from the CAA. Dense chromium plating of the crankpin and main journals of some small engine crankshafts has been found to be satisfactory except where the particular crankshaft is already marginal in strength. Refer to § 18.30-7 (b) (2) for further information on plating.

(iii) *Plating of minor parts.* Plating, including chromium plating, may be utilized to restore worn low-stressed engine parts, such as accessory drive shafts and splines, propeller shaft ends, and the seating surfaces of roller- and ball-type bearing races.

(13) *Corrosion prevention.* The application of corrosion preventive measures for temporary and dead storage, preservation, pickling, etc., should be accomplished in accordance with instructions issued by the pertinent engine manufacturer. The use of strong solutions which contain strong caustic compounds and of all solutions, polishers, cleaners, abrasives, etc., which might possibly promote corrosive action, should be avoided. Refer to § 18.30-7 for further details.

(14) *Engine accessories.* Engine accessories should be overhauled and repaired in accordance with the recommendations of the engine manufacturer and the accessory manufacturer.

(b) *Fuel systems*—(1) *Fuel tanks.* Welded or riveted fuel tanks that are made of commercially pure aluminum, 3S, 52S, or similar alloys, may be repaired by welding. Tanks made from heat-treatable aluminum alloys are generally assembled by riveting. In case it is necessary to rivet a new piece in place, the patch should be of the same material as the tank, and a sealing compound that is insoluble in gasoline should be used in the seams. If aromatic fuels are used, special sealing compounds which are resistant to aromatic fuels should be employed.

(i) *Removal of flux after welding.* It is especially important, after repair by welding, to completely remove all flux in order to avoid possible corrosion. Therefore, promptly upon completion of welding, the tank should be washed both inside and outside with liberal quantities of hot water, and drained. Next, immerse it in either 5 percent nitric or 5 percent sulfuric acid, or fill the tank with this solution (in which case also wash the outside with the same solution). Permit this acid to remain in contact with the weld about 1 hour and then rinse thoroughly with clean fresh water. The efficiency of the cleaning operation may be tested by applying some acidified 5 percent silver nitrate solution to a small quantity of the rinse water that has been used to last wash the weld. If a heavy white precipitate is formed, the cleansing has been insufficient and the washing should be repeated.

(2) *Fuel tank caps, vents, and overflow lines.* Fuel tank caps should be inspected as to the integrity of the gasket, and vents should be inspected to ascertain that they are clear. Overflow lines should be inspected to ascertain that the integrity of the material and connections are satisfactory. Care should also be taken to ascertain that the vent exit is in proper position.

(3) *Fuel lines.* Aluminum or aluminum alloy tubing should not be annealed after forming or at overhaul period as is required practice with copper tubing. Fuel lines should be thoroughly inspected for integrity of end fittings, for bends or kinks beyond recommended bend radii, for foreign material within the lines, and for integrity of the material which could be affected by abrasion, acid, heat, or swelling in the case of rubber impregnated lines. Too sharp bends or kinks, evidence of excessive heat, abrasion, or a change in the material are causes for replacement.

(4) *Fuel strainers and sediment bowls.* The adjusting nut located at the bottom of the bowl of the fuel strainer should be positively safetied in position. This nut should be tightened only with the fingers. If leakage still occurs, do not tighten with pliers but replace the cork gasket between the glass bowl and the screen. The screens of all strainers should be periodically inspected for foreign material or rupture. Screens should only be replaced by those recommended by the manufacturer as the mesh size affects the fuel flow through them. Sediment bowls should be given frequent inspections for water or solid material.

§ 18.30-15 *Propellers (CAA policies which apply to § 18.30)*—(a) *Inspection of propellers*—(1) *General.* The propeller is easily accessible for visual inspection and should always be checked before a flight to determine that no damage has occurred. Propellers should be inspected periodically as recommended or required by maintenance manuals, service bulletins, and airworthiness directives.

(2) *Wood or composition propellers and blades.* Due to the nature of the wood itself, it is necessary that wood propellers and blades be inspected frequently to assure continued airworthiness. They should be inspected for such defects as cracks, bruises, scars, warp, evidence of glue failure and separated laminations, sections broken off, and defects in the finish. Composition blades must be handled with the same consideration as wood blades.

(i) The fixed-pitch propeller should be removed from the engine at engine overhaul periods. Whenever the propeller is removed, it should be visually inspected on the rear surface for any indication of cracks. When any indications are found, the metal hub should be disassembled from the propeller. The bolts should be inspected for wear and cracks at the head and threads and, if cracked or worn, should be replaced with new AN

bolts. The propeller should be inspected for elongated bolt holes, enlarged hub bore, and checks or cracks inside of bore or anywhere on the propeller. Propellers found with any of these defects should not be used until repaired. If no defects are found, the propeller may be reinstalled on the engine. It should first be touched up with varnish at all places where the finish is worn thin, scratched, or nicked. Track and balance the propeller, and coat the hub bore and bolt holes with some moisture preventive such as asphalt varnish. In case the hub flange is integral with the crankshaft of the engine, final track should be made after the propeller is installed on the engine. In all cases where a separate metal hub is used, final balance and track should be accomplished with the hub installed in the propeller.

(ii) On new fixed-pitch propeller installations the hub bolts should always be inspected for tightness after the first flight and after the first 25 hours of flying. Thereafter, the bolts should be inspected and checked for tightness at least every 50 hours. No definite time interval can be specified, since bolt tightness is affected by changes in the wood caused by the moisture content in the air where the airplane is flown and stored. During wet weather, some moisture is apt to enter the propeller wood through the drilled holes in the hub. The wood swells but, since expansion is limited by the bolts extending between the two flanges, some of the wood fibres are crushed. Later, when the propeller dries out during dry weather or due to heat from the engine, a certain amount of propeller hub shrinkage takes place and the wood no longer completely fills the space between the two hub flanges. Accordingly, the hub bolts become loose.

(iii) In-flight tip failures may be avoided by frequent inspections of the metal cap and leading edge strip, and the surrounding areas. Inspect for such defects as looseness or slipping, separation of soldered joints, loose screws, loose rivets, breaks, cracks, eroded sections, and corrosion. Inspect for separation between metal leading edge and cap, which would indicate the cap is moving outward in the direction of centrifugal force. This condition is often accompanied by discoloration and loose rivets. Inspect tip for cracks by grasping with hand and slightly twisting about the longitudinal blade center line and by slightly bending the tip backward and forward. If leading edge and cap have separated, carefully inspect for cracks at this point. Cracks usually start at the leading edge of the blade. A fine line appearing in the fabric or plastic will indicate a crack in the wood. In all doubtful cases, have the propeller inspected by an authorized propeller repair station or factory service department.

(iv) The wood close to the metal sleeve of wood blades should be examined frequently for cracks extending outward on the blade. These cracks sometimes occur at the threaded ends of the lag screws, and may be an indication of internal cracking of the wood. Blades having such cracks should be returned to the manufacturer. Tightness of the lag screws, which attach the metal sleeve to the wood blade, should be inspected according to the manufacturer's instructions. The shank areas of composition blades next to the metal sleeve should be inspected and protected as for wood blades.

(3) *Metal propellers and blades.* Metal propellers and blades are generally susceptible to fatigue failure resulting from concentration of stresses at the bottoms of sharp nicks, cuts, and scratches. It is especially necessary, therefore, to frequently and carefully inspect them for such injuries. Propeller manufacturers have published service bulletins and instructions which prescribe the manner in which these inspections should be accomplished.

(4) *Lubrication.* Controllable pitch propellers should be carefully inspected frequently to determine if all parts are being lubricated properly. It is especially recommended that all lubrication be accomplished at the periods, and in the manner specified by the propeller manufacturer.

(b) *Repair of propellers*—(1) *General.* Propellers should be repaired in accordance with the best accepted practices and latest techniques. Manufacturer's recommendation should in all cases be followed. The Air Agency Certificate number, or name of agency making any repairs, especially on metal tipping, should be stamped or otherwise marked on the repaired propeller. It is recommended that a decalcomania giving both the repair agency's name and Air Agency Certificate number be used for this purpose. It is necessary to mark the name of the manufacturer and model designation on the repaired propeller in the event the original markings were removed during the repair or refinishing operations.

(2) *Wood or composition propellers and blades.* Wood propellers and blades requiring repair should be carefully examined to be sure that they can be restored to their original airworthy condition. Doubtful cases should be referred to the manufacturer, and the proposed repair should be referred subsequently to a representative of the Civil Aeronautics Administration for approval. Propellers damaged to the following extent are considered unairworthy, and should be scrapped immediately because repair is either impossible or uneconomical:

A crack or deep cut across the grain of the wood.
Split blades.
Separated laminations, except the outside laminations of fixed-pitch propellers.
More screw or rivet holes, including holes filled with dowels, than used to attach the metal leading edge strip and tip.
An appreciable warp.
An appreciable portion of wood missing.
A crack, cut, or damage to the metal shank or sleeve of blades.
Broken lag screws which attach the metal sleeve to the blade.
Oversize shaft hole in fixed-pitch propellers.
Cracks between the shaft hole and bolt holes.
Cracked internal laminations.
Excessively elongated bolt holes.

(i) Repairs to dents, cuts, scars, scratches, nicks, and small cracks parallel to the grain of the wood are classified under § 18.1–1 as minor repairs. Small cracks parallel to the grain should be filled with glue thoroughly worked into all portions of the cracks, dried, and then sanded smooth and flush with the surface of the propeller. This also applies to small cuts. Dents or scars which have rough surfaces or shapes that will hold a filler and will not induce failure may be filled with a mixture of glue and clean, fine, sawdust thoroughly worked and packed into the defect, dried and then sanded smooth and flush with the surface of the propeller. It is very important that all loose or foreign matter be removed from the place to be filled so that a good bond of the glue to the wood is obtained.

(ii) Major repairs as defined in § 18.1–1, include inlay work, replacement of outside lamination of fixed-pitch propellers, repair of elongated bolt holes in fixed-pitch propellers, replacement of tip fabric, repair and replacement of metal tip and leading edge strip, and replacement of all or part of plastic covering. The propeller manufacturer's instructions should be followed in all cases.

(iii) Inlays shown in figure 15-6 of this manual may be used. Inlays should be of the same wood as the propeller blade; i. e., a yellow birch propeller should be inlaid with yellow birch not with white birch, and as near the same specific gravity as possible. Repair joints should conform with figure 15-6 for taper of 10:1 from deepest point to feather edge or end of inlay. Measurements are taken along a straight line parallel to the grain or general slope of the surface on thrust and camber face. This rule applies also to the edge repairs. The grain of inlays should extend in the same direction as the grain of the propeller laminations. Inlays should be made with a fishmouth, scarf, or butt joint. The permanency of the joint is in the order named, the fishmouth being preferable. Dovetail-type inlays should not be used. The number of inlays should not exceed 1 large, 2 medium, or 4 small widely separated inlays per blade. A trailing and a leading edge inlay should not overlap more than 25 percent, as shown in figure 15-6. On blades with normal sections from the midsection to the tip, a cross-grain cut, up to 20 percent of the chord in length and one-eighth of the section thickness at the deepest point of damage may be repaired. On blades with thin sections, this depth should not exceed one-twentieth of the section thickness.

(iv) Inlays in the sides of the hubs of fixed-pitch propellers should not exceed in depth a value greater than 5 percent of the difference between the hub and bore diameters. In the portion of the blade where it fairs into the hub, allowable depths for inlays are dependent upon the general proportions. Where the width and thickness are both very large in proportion to the hub and blade, maximum inlay depths of $7\frac{1}{2}$ percent of the section thickness at the center of the inlay are permissible. Where the width and thickness are excessively small, maximum inlay depths of $2\frac{1}{2}$ percent of the section thickness at the center of the inlay are permissible; for propellers over 50 horsepower, cuts $2\frac{1}{2}$ percent deep may be filled with glue and sawdust, while for propellers under 50 horsepower, cuts 5 percent deep may be filled with glue and sawdust.

(v) Narrow slivers up to one-eighth inch wide broken from the trailing edge at the wider portions of the blade may be repaired by sandpapering a new trailing edge, removing the least material possible, and fairing in a new trailing edge of smooth contour. Both blades should be narrowed by the same amount. Near the hub or tip an inlay should be used and should not exceed, at its greatest depth, 5 percent of the chord.

(vi) In order to replace the wood worn away at the end of the metal tipping, enough of the metal should be removed to make the minimum repair taper 10:1 each way from the deepest point. Due to the convex leading edge of the average propeller, this taper usually works out 8:1. Repairs under the metal tipping should not exceed $7\frac{1}{2}$ percent of the chord for butt or scarf joints, and 10 percent for fish-mouth joints, with three-fourths inch maximum depth for any repair.

(vii) The scarfing of wood tips onto a propeller blade to replace a damaged tip is not considered an acceptable repair. The success of this type of repair is fully dependent upon the strength and quality of the glue joint. Since it is difficult to apply pressure evenly over the glue area and since no satisfactory means are available for testing the strength of such joints, it is quite possible for defective glue joints to occur and remain undetected until failure occurs.

(viii) Whenever the glue joint of an outside lamination of fixed-pitch propellers is open, the propeller may be repaired by removing the loose lamination and gluing on a new lamination of kiln dried wood of the same kind as the original lamination. It is not usually economical to attempt to repair separations between other laminations. Outside laminations, which have been crushed at the hub due to excessive drawing up of hub bolts, may be repaired by planing and sanding one hub face smooth, removing a lamination on the other hub face and replacing it with a new lamination, thus building the hub thickness up to the original thickness. It is permissible to replace both outer laminations if necessary and feasible.

(ix) It is permissible to repair elongated bolt holes by the insertion of a steel bushing around each bolt, as illustrated in figure 15-7 method (C). The bushing should be machined with an inside diameter to fit the bolt snugly and an outside diameter approximately one-fourth inch larger than the bolt size. The bushing should be approximately one-half inch long. The face of the hub should be drilled with a hole concentric with the bolt hole and only to a sufficient depth to accommodate the bushing so that it does not protrude above the surface of the wood hub. The bushing should not be driven into the hub but should fit the hole in the hub with a clearance not exceeding .005 inch after moisture-proofing. The bushing hole should be protected from moisture by two coats of aluminum paint, varnish, glue, or other moisture-resistant coating.

(x) Small cracks, dents, scratches, and cuts in the plastic of plastic covered wood propellers and blades may be repaired by using special repair cement supplied by the manufacturer. Instructions accompany the cements. Polishes and cleaners are available for preserving the gloss finish of varnished or plastic covered propellers and blades.

(xi) Because of the nature of the material, all repairs to composition blades will be of a major nature, and damaged blades should be returned to the manufacturer for repair. However, where repairs to the metal cap and leading edge strip only are necessary, the methods and procedures discussed in the following sections may be followed.

(xii) Fabric used to strengthen the tips of wood blades should be replaced when it becomes loose or worn through. Launder the fabric (mercerized cotton airplane cloth) to remove all sizing. Cut a piece of fabric to approximate size required to cover both faces of outer portion of blade. The fabric should cover the same portion that the original fabric covered. Apply glue to the wood where the fabric is to be put on. Use a rather thick solution of the glue. Use resorcinol glue when the temperature of the workroom can be kept above 21° C. (70° F.). Put the fabric on glued surface, starting at the leading edge of the thrust face, and work toward the trailing edge. Fold the fabric around the trailing edge over the camber face, and toward the leading edge. Make a joint on the leading edge where it will be covered by the metal tipping. As the fabric is put on, smooth it out over the wood so as to prevent air bubbles or uneven glue underneath. Fabric must be perfectly flat on the blade. Trim excess fabric off with small scissors. Under no circumstances shall fabric be cut or scored with a knife. Allow the glue under the fabric to dry about 6 hours, then brush 2 coats of nitrate dope on the fabric, allowing one-half hour for drying time, and then sand the fabric lightly and brush a coat of pigmented dope over it. Lightly sand the uncovered portion of the wood and apply 2 coats of a good grade of moisture-resistant varnish, allowing 12 to 16 hours drying time between coats.

(xiii) Tipping should be replaced when it cannot be properly repaired. Cracks in the narrow necks of metal between pairs of lobes of the tipping are to be expected and are not defects. All other cracks are defects that should be repaired, or eliminated by new tipping. If the propeller does not require fabric, apply two coats of varnish to the wood to be covered by the metal tipping. If new fabric has been applied, puncture it with a pointed tool at each screw and rivet hole. Apply varnish, white lead, aluminum paint, etc., to all holes, allowing the wood to absorb as much as it can. With a soft lead pencil, draw guide centerlines on the propeller extending about 4 inches from the centers of old screw and rivet holes. This procedure is followed to insure use of the original screw and rivet holes in the propeller. New holes should not be drilled. A number of wood propeller tip failures have occurred which have been attributed to the practice of drilling new rivet and or screw holes in the wood tips when replacing the metal tipping. To avoid continued occurrence of these failures, it is strongly recommended that the manufacturer's procedure be closely adhered to, and any procedure which involves drilling of new holes in the wood tip and plugging of old holes with dowels should be discontinued immediately.

(xiv) Obtain new tips and leading-edge strips, cut to size and formed to the approximate shape of the leading edge of the propeller. These pieces are usually supplied without holes so that the holes can be drilled in them to line up with the old screw and rivet holes in the propeller as below. If such material cut to shape is not available, the old tipping can be hammered out flat and used as a pattern to lay off a new tip. For this purpose use a piece of sheet metal of the same material and thickness as the old tip. Remove the burr from the cut edges of this piece.

(xv) Lay the cutout flat metal strip over the leading edge. Proceed to bend this metal down over the leading edge of the propeller, being careful that the metal extends an equal width on thrust and camber faces. This can be done by following the impressions of the old tipping lines. Numerous waves will occur in the metal, but these will be eliminated as the work progresses. Obtain several pieces of strong rubber tape, 4 feet long, one-half inch wide, and one-sixteenth inch thick. While forming the metal, hold it in place on the propeller by wrapping the rubber tape around the blade. Start at the tip and work inboard, being careful not to cover the pencil lines placed on the propeller, which show the location of the rivet holes. While the metal is held in place, tap the leading edge with a rawhide or rubber mallet, using moderate force to make sure the metal is seated against the wood along the nose of the leading edge. Smooth the metal by hammering it with the mallet, backing up the opposite side of the blade with a laminated hardwood bucking block having an iron weight built in the center and a piece of leather fastened to the end on which the propeller bears. The block should measure about 2 by 4 inches. Start at the end of the blade and work toward the hub, moving the bucking block so that it is always immediately under the section being hammered. Continue to do this until the metal is well shaped to the profile of the propeller. Check to see that the metal has not moved from its original position. If this has happened, remove the rubber tape, reset the metal, and rewrap the rubber tape, thus forming the metal to the leading edge.

(xvi) With a centerpunch and a hammer, proceed to locate the old screw and rivet holes, using the pencil marks on the blade as a guide. Punch the metal approximately one-fourth inch from the edge. After all holes have been located, remove the metal from the propeller. Drill screw and rivet holes in the metal with a one-eighth-inch drill. File off burrs on the inside of the metal. Run

the drill through the original rivet holes in the propeller in order to clean them out. Cut or saw slots in the metal at the original positions. (Refer to old tipping metal for locations of the slots.) Place the metal leading edges on the blades they were formed to fit, and hold them in place with rubber tape. With a centerpunch as large as or slightly larger than the diameter of the screw and rivet heads, proceed to punch metal into the original countersunk holes in the wood so that the screw and rivet heads may be entered to the correct depth (not more than one-thirty-second inch below the surface of the metal). Use screws and rivets of the appropriate material. The screws should be one size larger than were originally in the propeller, and the rivets should be the solid flat, countersunk-head type. Insert screws and rivets in their respective holes. Install rivets with their heads on the thrust face of the propeller. After the rivets are tapped in place, cut off the excess length of the rivet, leaving one-eighth inch for heading. End cutters built up with solder to accurately measure this distance are very useful. When an assistant backs up the rivets with a steel bar 18 inches long and pointed to fit the rivet head, hammer the rivets either by hand or with a pneumatic hammer. Drive the screws, either by hand or with an electric screw driver.

(xvii) Cut the metal of the cap-tip on the camber face of the propeller to the shape of the propeller tip. Bevel the edges by hand with a file. Trim off flat side of metal cap so that it extends about three-sixteenths-inch all around the tip of the propeller. Form a hardwood block to the shape of thrust face of the propeller tip. Put metal tipping in place and clamp this block to the underside of the tip with a C-clamp. Turn this three-sixteenths-inch of metal up and over the camber face of the tip. Tighten and complete the lap joint. Mount the propeller blade solidly, with the thrust face up, on a stand supporting the blade at several points along its radius. With a hammer and a flatfaced tool, proceed to smooth the metal, starting at the nose of the leading edge and working toward the edge of the metal, until all wrinkles and high spots are removed. At the edge, use a caulking tool and, in the same manner, press the metal edge tightly against the wood. Turn the propeller over and repeat this operation on the camber face. Make sure that the thin tip is supported at all times when hammering. Apply solder over rivet and screwheads and over the metal seam of the tip of the propeller. Use 50–50 solder in wire form. Use muriatic acid as a flux when soldering brass. Use stainless steel soldering flux when soldering stainless steel tipping. File excess solder off and check the propeller balance while doing so. Polish the metal with a fine emery cloth or an abrasive drum driven by a flexible shaft. Vent the tipping by drilling three holes, No. 60 drill (.030), three-sixteenths inch deep in the tip end. Vent holes should be parallel to the longitudinal axis of the blade.

(xviii) After repairing a blade, it is usually necessary to refinish it. Refinishing may be classified as a minor repair. In some cases it may be necessary to completely remove the old finish. The finish, where necessary, should be renewed in accordance with the recommendations of the propeller manufacturer, or with a material which has satisfactory adhesion and high moisture resistant properties. Refinishing of plastic covered blades requires special techniques. Some manufacturers make this information available through service bulletins. Care must be exercised when revarnishing or repainting wood blades that the balance of the entire propeller is not disturbed. Coating one blade heavier than the other will produce unbalance, and cause a noticeable vibration during flight.

(xix) It is always necessary to check the balance of the propeller after any repairs or refinishing. Final balance should be accomplished on a rigid knife-edge balancing stand or on a suspension type balancer. Balancing must be done in a room free from air currents. There should be no persistent tendency to rotate from any position on the balance stand, or to tilt on the suspension balancer. Horizontal unbalance may be corrected by the application of finish or solder to the light blade. The light blade may be coated with a high grade of primer allowing for a finishing coat. After allowing each coat to dry 48 hours, the balance should be checked. Then, as may be necessary, either the required amount of finish should be removed by carefully sandpapering or an additional coat applied. The balance should be rechecked and sandpapered or additional finish applied as may be required to effect final balancing. Vertical unbalance in fixed-pitch propellers may be corrected by applying putty to the light side of the wood hub at a point on the circumference approximately 90° from the longitudinal centerline of the blades. The putty should be weighed and a brass plate weighing slightly more than the putty should be cut. The thickness of the plate should be from one-sixteenth to one-eighth inch depending on the final area, which must be sufficient for the required number of flathead attaching screws. The plate may be made to fit on the hub face or to fit the shape of the light side of the wood hub, and drilled and countersunk for the required number of screws. The plate should be attached and all of the screws tightened. After the plate is finally attached to the propeller, the screws should be secured to the plate by soldering the screw heads. The balance should be checked. All edges of the plate may be beveled to reduce its weight as necessary. The drilling of holes in the propeller and the insertion of lead or other material to assist in balancing will not be permitted.

(3 *Metal propellers and blades.* Metal propellers should never be operated with sharp edged dents, cuts, scars, scratches, nicks, or pits anywhere on the surface of a blade unless the manufacturer's instructions specifically permit it. Damaged blades with model numbers which are on the manufacturer's lists of blades that cannot be repaired should be rejected.

(i) Due to the critical effects of surface injuries and their repair on the fatigue life of steel blades, all repairs will be of a major nature. Because of the specialized tooling and equipment necessary to repair them, it is recommended that they be returned to the manufacturer for repair. Where equipment is available, the manufacturer's instructions should be followed.

(ii) For aluminum alloy propellers and blades, treatment of dents, cuts, scars, scratches, nicks, leading edge pitting, etc., may be classified as minor repairs provided their removal or treatment does not materially affect the strength, weight, or performance of the blade. These damages should be removed or otherwise treated as outlined below unless contrary to manufacturer's instructions or recommendations. More than one injury is not sufficient cause alone for rejection of a blade. A reasonable number of repairs per blade may be made and not necessarily result in a dangerous condition, unless their location with respect to each other is such as to form a continuous line of repair that would materially weaken the blade. Suitable sandpaper or fine cut files may be used for removing the necessary amount of metal. In each case, the area involved will be smoothly finished with No. 00 sandpaper or crocus cloth and each blade from which any appreciable amount of metal has been removed will be properly balanced before it is used. Suspected cracks and all repairs should be etched as discussed in paragraph (c) (4) (i) and (ii) of this section. To avoid removal of an excess amount of metal, local etching should be accomplished at intervals during the process of removing suspected cracks. Upon completion of the repair, the entire blade should be carefully inspected by etching or anodizing. All effects of the etching process should be removed with fine emery paper. Blades identified by the manufacturer as being coldworked (shotblasted or coldrolled) may require peening after repairing. All repairing and peening on this type of blade should be accomplished in accordance with the manufacturer's instructions. However, it is not permissible in any case to peen down the edges of any injury wherein the operation will lap metal over the injury.

(iii) Nicks, scars, cuts, etc., occurring on the lading edge of aluminum alloy blades should be smoothly rounded out as shown in figure 15–2 (view B). Blades that have the leading edges pitted from normal wear in service may be reworked by removing sufficient material to eliminate the pitting. In this case, the metal should be removed by starting well back from the edge, as shown in figure 15–3, and working forward over the edge in such a way that the contour will remain substantially the same, avoiding abrupt changes in contour or blunt edges. Trailing edges of blades may be treated in substantially the same manner. On the thrust and camber faces of blades the metal around any dents, cuts, scars, scratches, nicks, longitudinal surface cracks, and pits should be removed to form shallow saucer shaped depressions as shown in figure 15–2 (view C). Care should be exercised to remove the deepest point of the injury and also remove any raised metal around the edges of the injury as shown in figure 15–2 (view A). For repaired blades the permissible reductions in width and thickness from minimum original dimensions allowed by the blade drawing and blade manufacturing specification are shown in figure 15–4 for locations on the blade from the shank to 90 percent of the blade radius. Beyond the 90-percent blade radius point, the blade width and thickness may be modified as required.

(iv) Major repairs to aluminum alloy propellers and blades include shortening due to damaged tips, repairs to deep dents, cuts, scars, nicks, etc., and straightening of bent blades (see § 18.1–3 (c)). The propeller manufacturer's instructions should be followed in all cases. Any repair on leading and trailing edges of the blades which results in a finished depression more than one-fourth-inch deep (chordwise of the blade) and 1 inch long will be a major repair, and should be submitted to a certificated repair station. Any repair on the thrust and camber faces of the blades which results in a finished depression more than one-eighth inch in depth at its deepest point, three-eighths inch in width overall, and one inch in length overall, will be a major repair, and should be submitted to a certificated repair station. When the removal or treatment of defects on the tip necessitates shortening a blade, each blade used with it should be likewise shortened. Such sets of blades should be kept together (see figure 15–5 for acceptable methods). The shortened blades should be marked to correspond with the manufacturer's system of model designation to indicate propeller diameter. If, in making the repair, it is necessary to reduce the propeller diameter below the minimum diameter limit shown on the pertinent airplane specification, the repair should be submitted to a representative of the Civil Aeronautics Administration for approval. In such cases it may be necessary to investigate the performance characteristics of the airplane with the reduced diameter propeller installed. Bent blades may be repaired only by the manufacturer or certificated repair agencies holding the appropriate ratings. The extent of a bend in face alinement should be carefully checked by means of a protractor similar to the one illustrated in figure 15–1. Only bends not exceeding 20° at 0.15-inch blade thickness to 0 degrees at 1.1-inch blade thickness may be cold-straightened. Blades with bends in excess of this amount require heat treatment.

(v) The following tolerances are those listed in the blade manufacturing specification for aluminum alloy blades and govern the width and thickness of new blades. These tolerances are to be used with the pertinent blade drawing to determine the minimum original blade dimensions to which the reductions of figure 15–4 may be applied. When repairs reduce the width or thickness of the blade below these limits, the blade should be rejected. The face alinement, or track, of the propeller should fall within the limits recommended by the manufacturer for new propellers.

| | | Manufacturing tolerance (inch) |
|---|---|---|
| Basic diameter less than 10 feet 6 inches: | | |
| Blade width | from shank to 24-inch station | ±3/64 |
| | to tip | ±1/32 |
| Blade thickness | | ±0.025 |
| Basic diameter 10 feet 6 inches to less than 14 feet 0 inches: | | |
| Blade width | from shank to 24-inch station | ±3/64 |
| | from 36-inch station to tip | ±1/32 |
| Blade thickness | from shank to 24-inch station | ±0.030 |
| | from 30-inch station to tip | ±0.025 |
| Basic diameter 14 feet 0 inches and over: | | |
| Blade width | from shank to 30-inch station | ±3/32 |
| | from 36-inch station to tip | ±1/16 |
| Blade thickness | from shank to 30-inch station | ±0.040 |
| | from 36-inch station to tip | ±0.035 |

(vi) No repairs are permitted to the shanks (roots, or hub ends) of aluminum alloy adjustable pitch blades. The shanks must be within drawing tolerances.

(vii) (*a*) Upon completion of repairs, horizontal and vertical balance should be checked and any unbalance should be corrected as recommended by the manufacturer. A coaxial hole is drilled in the butt end of certain aluminum alloy detachable blades for the application of lead to obtain static horizontal balance. The size of this hole should not be increased by the repair agency.

(*b*) To effect vertical balance, only the manufacturer is permitted to drill and apply lead to an eccentric hole. The outside of this hole should be no closer than one-fourth inch to the nearest external blade surface. As an alternate to drilling the two holes mentioned above, the manufacturer may have drilled a single eccentric hole having a diameter and depth conforming to the eccentric hole dimensions, given in the table below, for the application of lead. The outer edge of this hole should not be closer than 1 inch to the nearest external blade surface. The ends of all balancing holes should be finished with a full sized drill having a spherical end to eliminate sharp corners. The sharp edges of all holes should be removed by a one-thirty-second-inch chamfer. The following table is included for inspectional information only as no drilling is to be done by anyone other than the manufacturer:

SIZE AND LOCATION OF BALANCING HOLES

| Blank size | Maximum diameter hole | Maximum permissible hole depth | Maximum permissible hole depth (measured from bottom of countersunk diameter) |
|---|---|---|---|
| | *Inch* | *Inches* | *Inches* |
| 00 | 7/16 | 3/4 | 5/8 |
| 0 | 7/16 | 3/4 | 5/8 |
| 1 | 7/16 | 3/4 | 5/8 |
| 1½ | 1/2 | 4/5 | 4/5 |
| 2 | 5/8 | 7/8 | 5/8 |
| 3 | 31/32 | 1 1/8 | 6/8 |

(4) *Steel hubs and hub parts.* Repairs to steel hubs and parts are of a major nature, and should be accomplished only on the manufacturer's recommendations. Welding of hubs, hub parts, or control parts is not permissible. Remachining is permissible only when covered by manufacturer's service bulletins.

(i) When the propeller bolt holes in a hub or crankshaft flange for fixed propellers become damaged or oversized, it is permissible to make repairs by method (A) or (B) in figure 15–7, or by use of aircraft standard bolts one-sixteenth inch larger than the original bolts. The repairs should be made in accordance with the recommendations of the propeller metal hub manufacturer who is usually the engine manufacturer. Obtain from the engine or propeller hub manufacturer, suitable flange bushings with threaded or smooth bores, as illustrated in method (A) or (B) of figure 15–7. Drill the flange and insert the bushings as recommended by the engine manufacturer. Drill the rear face of the propeller to accomodate the bushings, and protect the holes with two coats of aluminum paint or other high moisture-resistant coating. Use bolts of the same size as those originally used. Any of the following combinations may be used: Safety bolt and castellated nut, safety bolt (drilled head) and threaded bushing, or undrilled bolt and self-locking nut. Where it is desirable to use oversize bolts, obtain suitable aircraft standard bolts one-sixteenth inch larger than the original bolts. Enlarge the crankshaft propeller flange holes and the propeller hub holes sufficiently to accomodate the new bolts without more than 0.005 inch clearance. Such reboring will be permitted only once. Further repairs of bolt holes may be made in accordance with method (A) or (B) of figure 15–7.

NOTE. Method (A) or (B) is preferred over the over-size bolt method, because a propeller hub flange redrilled in accordance with this latter method will always require the redrilling of all new propellers subsequently used with the redrilled flange.

(5) *Control systems.* Components used to control the operation of certificated propellers should be inspected, repaired, assembled and tested in accordance with the manufacturer's recommended practice. It is recommended that all necessary replacement parts be those made under the control of the propeller manufacturer. It is recommended that only those repairs which are covered by manufacturer's recommendations be made.

(6) *De-icing systems.* Components used in propeller de-icing systems should be inspected, repaired, assembled, and tested in accordance with the manufacturer's recommended practice. It is recommended that all necessary replacement parts be those made under the control of the propeller manufacturer. It is recommended that only those repairs which are covered by manufacturer's recommendations be made.

(c) *Overhaul of propellers*—(1) *General.* Periodic overhaul of controllable pitch propellers is classified as a major repair in § 18.1–1, and includes the following operations:

Assembly and disassembly.

Replacement of worn parts.

Magnetic particle inspection, fluorescent penetrant inspection, anodizing, acid etching.

De-plating, and re-plating.

(2) *Hub and hub parts.* (i) Propellers submitted for overhaul should be disassembled, and all hub parts should be

cleaned in accordance with the manufacturer's recommendations. An inspection of the parts should be made to determine that the critical dimensions are within the manufacturer's specified tolerances. Particular care should be taken to check the 90° relation between shaft bore and blade socket centerline and track of the blade sockets, as these are the dimensions which are most likely to be affected by accidents. Any hub which is sprung should be rejected. Worn or damaged parts should be replaced. Stress raisers such as cuts, nicks, or tool marks should be carefully stoned out or the part rejected. Splines and cone seats should be carefully inspected for signs of wear. Splines should be checked with a single key "no-go" gage made to plus 0.002 inch of the base drawing dimensions for spline land width. If the gage enters more than 20 percent of the spline area, the hub should be rejected. Cones and cone seats may show discoloration, pitting, and corrosion. Generally, corrosion and discolored spots may be removed by light lapping. Pitting is not grounds for rejection if 75 percent of the bearing area is not affected and the pitted areas are well dispersed about the cone bearing area. After cleaning, steel hubs and parts should be minutely inspected for cracks by the wet or dry magnetic particle method at every major overhaul period. It is not necessary to remove the plating or special external finish for this inspection unless so specified in the manufacturer's recommended practice. A brief statement recording the inspection and its findings should be included in the aircraft record entry. A similar entry should be made in the repair records of the repair base. In the case of an air carrier, this is considered the equivalent of the record entry. Any crack is cause for rejection.

(ii) Steel hubs which adapt fixed-pitch propellers to 0 taper crankshafts are susceptible to cracks along the keyway which often extend into the flange lightening holes. These hubs should be carefully inspected by the magnetic particle method at engine overhaul periods. Any crack is cause for rejection.

(3) *Plating for hubs and parts.* Plated hubs and parts from which the plating has been removed should be replated after they have been satisfactorily inspected. All replating must be of the same material as the original plating, and should be done in accordance with the manufacturer's recommendations. Chrome or nickel plating is not an acceptable substitute for cadmium or zinc plating. The use of zinc chromate primer on the external surfaces followed by a coating of aluminum lacquer in lieu of cadmium plating is considered acceptable where recommended by the manufacturer. However, this type of finish will require replacement more frequently than cadmium plating.

(4) *Aluminum propellers and blades.* Aluminum propellers and blades should be carefully inspected for cracks and material defects by either etching or anodizing. Etching is accomplished by immersing as much of the blade as possible in a warm 20 percent caustic soda solution and cleaning with a warm 20 percent nitric acid solution, with a warm water rinse between the caustic bath and the acid bath, and also a warm water rinse following the acid bath. All effects of the etching should be removed by polishing. The caustic and acid solutions should be maintained at a temperature of from 160° F. to 180° F. Some blades incorporate parts made of steel and other materials, and the caustic soda and the nitric acid must not be allowed to come in contact with these parts. The blade surfaces are then examined with a magnifying glass of at least three-power. A crack will appear as a distinct black line. The fluorescent penetrant method is recommended as a supplement to the caustic etch for the inspection of the shanks (roots or hub ends) of adjustable pitch blades.

(i) Suspected cracks or defects should be repeatedly locally etched until their nature is determined. With a No. 00 sandpaper, or fine crocus cloth, clean and smooth off the area containing the apparent crack. Apply a small quantity of caustic solution to the suspected area with a swab or brush. After the area is well darkened, thoroughly wipe it off with a clean (dampened) cloth. Too much water may entirely remove the solution from a crack and spoil the test. If a crack extending into the metal exists, it will appear as a dark line or mark, and by using a magnifying glass, small bubbles may be seen forming in the line or mark. Immediately upon completion of the final checks, all traces of the caustic solution will be removed by the nitric acid solution. Wash the blade thoroughly with clean (fresh) water.

(ii) The chromic acid anodizing process is superior to caustic etching for the detection of cracks and flaws and should therefore be used, whenever it is available, for general inspection of blades for material defects and for final checking of repairs performed during overhaul. The blades should be immersed in the anodizing bath as far as possible, but all parts not made of aluminum alloy must either be kept out of the chromic acid bath or be separated from the blade by nonconductive wedges or hooks. The anodizing treatment should be followed by a rinse in clear, cold, running water for 3 to 5 minutes, and the blades should then be dried as quickly as possible, preferably with an air blast. The dried blades should stand for at least 15 minutes before examination. Flaws (cold shuts or inclusions) will appear as fine black lines. Cracks will appear as brown stains caused by chromic acid bleeding out onto the surface. The blades may be sealed for improved corrosion resistance by immersing them in hot water (180° F. to 212° F.) for one-half hour. In no case should the blades be treated with hot water before the examination for cracks, since heating expands any cracks and allows the chromic acid to be washed away. A transverse (chordwise) crack or flaw of any size is cause for rejection. An excessive number of longitudinal flaws is cause for rejection. Any unusual condition or appearance revealed by caustic etching or anodizing should be referred to the manufacturer.

(5) *Assembly.* Assembly of the propeller hub and blades should be accomplished in accordance with the manufacturer's recommendations. Clevis pins, bolts, and nuts which show wear or distortion should be replaced. Cotter pins and safety wire should never be used a second time. The use of self-locking nuts is permissible only where originally used or approved by the manufacturer.

(d) *Assembly of propeller to engine*—(1) *Fixed-pitch propellers.* Loose hub bolts and bolts installed through the lightening holes in the integral hub flange of certain engine crankshafts cause the majority of the serious difficulties experienced with fixed-pitch propellers. Either of the conditions, if uncorrected, will ultimately cause the loss of the propeller.

(i) Loose hub bolts cause elongated bolt holes and damage to the hub bolts. When not corrected, the bolts break off or friction causes enough heat to affect the glue and char the wood. After successive running, checks start at the bolt holes. These checks are caused, or at least accentuated, by shrinkage of the wood due to the excessive heat generated. If allowed to progress, the propeller usually flies apart or catches fire.

(ii) On some engines equipped with a crankshaft having an integral propeller hub flange, the outer edge of the lightening holes is at the same radius as the corresponding edge of the propeller hub bolt holes. When inserting the bolts through the propeller, care must be exercised so that the bolts are inserted through the proper holes in the flange. Cases have been reported where the bolts were inserted through the larger lightening holes and, accordingly the bolt nuts bore only on the outer edges of the lightening holes. In such cases, continued running of the propeller may cause the bolt heads or nuts to slip off the flange and though the large openings in the flange, resulting in the subsequent loss of the propeller.

(iii) Both of the conditions discussed above are very easy to detect, and should be corrected immediately by a certificated mechanic or certificated repair station. In case the hub flange is integral with the crankshaft, first ascertain that the bolts are properly installed. Then make the inspection for bolt tightness in the same manner as for any other propeller hub. Use an open end wrench to determine hub bolt tightness and if the nuts can be turned, remove the cotter keys and draw up the nuts to the desired setting. Hub bolts should be tightened, preferably with a torque wrench, to the recommended values which usually range from 15 to 23 foot-pounds. If no torque wrench is available, an ordinary socket wrench may be used. This socket wrench should have a 1-foot extension lever and the wrench pulled up with the recommended force 12 inches away from the center of the bolt which is being tightened. The tightening is best accomplished by tightening each bolt a little at a time, being sure to tighten alternate bolts which are diametrically opposite. Care should be taken not to overtighten the hub bolts, thereby damaging the wood underneath the hub flanges. The practice of overtightening bolts to draw a propeller into track should definitely be avoided. Safetying of the nuts should be accomplished by means of cotter keys of the proper size, or heavy safety wire twisted between each nut. A continuous length of single safety wire should never be used as wire failure will result in all nuts becoming unsafetied.

(e) *Alterations to propellers*—(1) *General.* All alterations to propellers should be made in accordance with the manufacturer's recommendations.

(2) *Alterations to wood detachable blade and fixed-pitch propellers.* It has been found that the service life of wood blades and propellers covered with plastic greatly exceeds the service life of those finished with varnish. It is permissible to strip the varnish from any propeller or blade and apply the plastic covering even though the propeller or blade, when new, had not been approved for this process. The nature of the process classifies it as a major alteration. Only those manufacturers and certificated repair stations who have received specific approval for the plastic covering process are eligible to reprocess in the same manner any propeller or blade. Any propeller or blade thus altered should carry some means of identification to indicate the change. It is permissible for a manufacturer to obtain approval for, and to assign new model numbers to propellers and blades of his own design and manufacture thus reprocessed. It is recommended that certificated repair stations and manufacturers reprocessing propellers and blades not of their own design and manufacture apply some symbol to the model or serial number. This symbol or means of identification must be approved by the Administrator. It has also been found in some cases advantageous to replace the topping fabric with a thin plastic covering. This is also classified as a major alteration, and must be performed by only those manufacturers and certificated repair stations who have received specific approval for the process.

(f) *Precautions*—(1) *General.* Many persons have been fatally injured by walking into whirling propellers. Painting a warning stripe on the propeller serves to reduce chances of such injuries. Approximately 4 inches of the propeller tips should be covered on both sides with an orange-yellow nonreflecting paint or lacquer. The drain holes in the metal tipping of wood blades should be opened up after the tips have been painted.

(2) *Wood propellers.* Wood propellers are especially susceptible to damage from improper handling. When moving an airplane, special care should be exercised to avoid bumping the propeller. The practice of pushing or pulling on a propeller blade to move an airplane should be avoided; it is extremely easy to impose forces on a blade in excess of those for which the blade is designed. It is continually necessary to ascertain that the glue joints are in good condition and that the finish on the entire propeller will protect the propeller from absorbing moisture. Two-bladed wood propellers should always be left or stored, whether on or off of an airplane, in a horizontal position to prevent unbalance from moisture absorption. A good precaution is to cover the propeller with a well fitting waterproof cover when not in use. It is very important to protect the shank section of wood blades from moisture changes to prevent swelling and subsequent loosening in the metal sleeve. In the case of varnished blades, it is advisable to occasionally apply varnish around the shank at the junction of wood and metal. In the case of the plastic covered blade, repair cement may be applied around the same joint.

(3) *Composition propellers.* In certain cases where the blade has been manufactured from laminated planks of composition material, longitudinal cracks or splitting between laminations have been observed after several hundred hours of operation. These cracks dare not progress beyond definite limits as covered by the manufacturer's service bulletin.

§ 18.30–16 *Weight and balance control (CAA policies which apply to § 18.30)*—(a) *General.* (1) The purpose of the following is to explain various items concerned with aircraft weight and balance. It covers computation of actual weight and balance, and its relation to aircraft operation within its approved limitations.

(2) The removal or addition of equipment results in changes to the center of gravity and empty weight of the aircraft, and the permissible useful load is affected accordingly. Obviously the effects of these changes should be investigated in all cases otherwise the flight characteristics of the airplane may be adversely affected.

(3) Information on which to base the record of weight and balance changes to the aircraft may be obtained from the pertinent aircraft specification, the prescribed aircraft operating limitations, and the latest approved Form ACA–337.

(4) Reference should be made to §§ 18.1–1 and 18.1–4 (a) (1), for information on specific cases wherein weight and balance checks need not be made. Since rotor wing aircraft are in general more critical with respect to control with changes in c. g. positions, the procedures and instructions in the particular model maintenance or flight manual should be followed.

(5) Terminology: The following terminology is used in the practical application of weight and balance control.

(i) *Maximum weight.* The maximum weight is the maximum authorized weight of the aircraft and its contents as listed in the specifications.

(ii) *Empty weight.* The empty weight of an aircraft includes all operating equipment that has a fixed location and is actually installed in the aircraft. It includes the weight of the airframe, powerplant, required equipment, optional and special equipment, fixed ballast, full engine coolant, hydraulic fluid, and the fuel and oil as explained in paragraph (b) (6) and (7) of this section. Additional information regarding fluids which may be contained in the aircraft systems and which must be included in the empty weight will be indicated in the pertinent aircraft specifications whenever deemed necessary.

(iii) *Useful load.* The useful load is the empty weight subtracted from the maximum weight of the aircraft. This load consists of the pilot, crew if applicable, maximum oil, fuel, passengers, and baggage unless otherwise noted.

(iv) *Weight check.* A weight check consists of checking the sum of the weights of all items of useful load against the authorized useful load (maximum weight less empty weight) of the aircraft.

(v) *Datum.* The datum is an imaginary vertical plane or line from which all horizontal measurements are taken for balance purposes with the aircraft in level flight attitude. The datum is indicated on most aircraft specifications. On some of the older aircraft where the datum is not indicated, any convenient datum may be selected. However, once the datum is located all moment arms and the location of the permissible c. g. range must be taken with reference to it. Examples of typical locations of the datum are shown in figure 16–1.

(vi) *Arm (or moment arm).* The arm is the horizontal distance in inches from the datum to the center of gravity of an item. The algebraic sign is plus (+) if measured aft of the datum and minus (−) if measured forward of the datum. Examples of plus and minus arms are shown in figure 16–2.

(vii) *Moment.* Moment is the product of a weight multiplied by its arm. The moment of an item about the datum is obtained by multiplying the weight of the item by its horizontal distance from the datum. A typical moment calculation is given in figure 16–3.

(viii) *Center of gravity.* The center of gravity is a point about which the nose-heavy and tail-heavy moments are exactly equal in magnitude. If the aircraft were suspended therefrom it would have no tendency to pitch in either direction (nose up or down). The weight of the aircraft (or any object) may be assumed to be concentrated at its center of gravity.

(ix) *Empty weight center of gravity.* The empty weight c. g. is the center of gravity of an aircraft in its empty weight condition, and is an essential part of the weight and balance record. Formulas for determining the center of gravity for tail and nose-wheel type aircraft are given in figure 16–4. Typical examples to determine the empty weight and c. g. for the tail-wheel and nose-wheel type aircraft are determined by computation in figures 16–5 and 16–6.

(x) *Empty weight center of gravity range.* The empty weight center of gravity range is determined so that when the empty weight c. g. falls within this range the specification operating c. g. limits will not be exceeded under standard specification loading arrangements. In cases where it is possible to load an airplane in a manner not covered in the aircraft specification (i. e., extra tanks, extra seats, etc.), complete calculations should be accomplished, as outlined in paragraph (c) (5) (vi) of this section.

The empty weight c. g. range, when applicable, is listed on the aircraft specifications.

(xi) *Operating center of gravity range.* The operating c. g. range is the distance between the forward and rearward center of gravity limits indicated on the pertinent aircraft specification. These limits were determined as the most forward and most rearward loaded c. g. positions at which the aircraft meets the requirements of the Civil Air Regulations. The limits are indicated on the specification in either percent of MAC or inches from the datum. The c. g. of the loaded airplane must be within these limits at all times as illustrated in figure 16–7.

(xii) *Mean aerodynamic chord (MAC).* The MAC is the mean chord of the wing. For weight and balance purposes it is used to locate the c. g. range of the aircraft. The location and dimensions of the MAC will be found in the Aircraft Specification, Flight Manual, or the Aircraft Weight and Balance Record.

(xiii) *Weighing point.* If the c. g. location is determined by weighing, it is necessary to obtain horizontal measurements between the points on the scales at which the airplane's weight is concentrated. If usual weighing practice is followed, a vertical line passing through the centerline of the axle will locate the point on the scale at which the weight is concentrated. This point is called the Weighing Point. Other structural locations, capable of supporting the aircraft, such as jack pads on the main spar, may also be used. These points should be clearly indicated on the weight and balance record when used in lieu of the usual points. Typical locations of the weighing points are shown in figure 16–8.

(xiv) *Minimum fuel.* Minimum fuel for balance purposes is one-twelfth gallon per maximum-except-takeoff horsepower (METO), and is the maximum amount of fuel which should be used in weight and balance computations when low fuel might adversely affect the most critical balance conditions. To determine the weight of fuel in pounds divide the METO horsepower by 2.

(xv) *Full oil.* Full oil is the quantity of oil shown in the aircraft specifications as oil capacity. Full oil should always be used as the quantity of oil when making the loaded weight and balance computations.

(xvi) *Tare.* Tare is the weight of chocks, blocks, stands, etc., used when weighing aircraft, and is included in the scale readings. Tare is deducted from the scale reading to obtain the actual aircraft weight.

(b) *Weighing procedure.* The following procedure should be followed when weighing an aircraft:

(1) The aircraft should be weighed inside a closed building to prevent error in scale reading due to wind.

(2) Excessive dirt, grease, moisture, etc., should be removed from the aircraft before weighing.

(3) If the center of gravity is to be determined, the aircraft should be placed in a level flight attitude.

(4) All items of equipment to be installed in the aircraft and included in the certificated empty weight should be in place for weighing. These items of equipment should be a part of the current weight and balance record. (See paragraph (c) (5) of this section.)

(5) Scales should be properly calibrated, zeroed, and used in accordance with the scale manufacturer's instructions. The scales, and suitable supports for the aircraft if necessary, are usually placed under the wheels of a land plane, the keel of a seaplane float, or the skis of a ski plane. Other structural locations capable of supporting the aircraft such as jack pads on the main spar also may be used. These points should be clearly indicated in the weight and balance data.

(6) Unless otherwise noted in the aircraft specification, the fuel system should be drained until the quantity indicator reads zero or empty with the aircraft in level flight attitude. The amount of fuel remaining in the tank, lines, and engine is termed residual fuel and it should be included in the empty weight. In special cases the aircraft may be weighed with full fuel in the fuel tanks provided a definite means of determining the exact weight of the fuel is available.

(7) Unless otherwise noted in the aircraft specification, the oil system should be completely drained with all drain cocks open. Under these conditions, the amount of oil remaining in the oil tank, lines, and engine is termed, "residual oil" and it should be included in the empty weight. When weighed with full oil, actual empty weight equals the actual recorded weight less the weight of the oil in the oil tank (oil capacity in gallons × 7.5 pounds). All reports should indicate whether weights include full oil or oil drained (see figure 16–9).

(8) Brakes should not be set while taking scale reading.

(9) Tare should be noted when the aircraft is removed from the scales.

(c) *Weight and balance computations.* It is often necessary, after completing an extensive repair or alteration, to establish by computation that the authorized weight or c. g. limits as shown on the aircraft specifications are not exceeded. The following information explains the significance of algebraic signs used in balance computations, outlines the loading conditions to check, and deals with equipment changes. The aircraft specifications contain the following information relating to the subject:

C. G. range.
Empty weight c. g. range when applicable.
MAC (Mean Aerodynamic Chord).
Leveling means.
Datum.
Maximum weights.
Number of seats and arm.
Maximum baggage and arm.
Fuel capacity and arm.
Oil capacity and arm.
Equipment items and arm.

(1) *Unit weights for weight and balance purposes.*

| | |
|---|---|
| Gasoline | 6 pounds per U. S. gal. |
| Lubricating oil | 7.5 pounds per U. S. gal. |
| Crew and passengers | 170 pounds per person. |

(2) *Algebraic signs.* (i) Care should be exercised to insure retention of the proper algebraic sign (+ or −) throughout all balance computations and to always visualize the aircraft (for the sake of uniformity in these computations) with the nose to the left. In this position any arm to the left (forward) of the datum is minus and any arm to the right (rearward) of the datum is plus. Any item of weight added to the aircraft either side of the datum is a plus weight. Any weight item removed is a minus weight. When multiplying weight by arms, the answer is plus if the signs are alike and minus if the signs are unlike.

(ii) The following combinations are possible:

Items added forward of the datum—
(+) weight × (−) arm = (−) moment.
Items added to the rear of the datum—
(+) weight × (+) arm = (+) moment.
Items removed forward of the datum—
(−) weight × (−) arm = (+) moment.
Items removed rear of the datum—
(−) weight × (+) arm = (−) moment.

(iii) The total weight of the airplane is equal to the weight of the empty airplane plus the weight of the items added, minus the weight of the items removed.

(iv) The total moment is equal to the moment of the empty airplane combined with the individual moments of the items added or removed. In combining moments, plus moments are added and minus moments are subtracted.

(3) *Weight and balance extreme conditions.* The weight and balance extreme conditions represent the maximum forward and rearward c. g. positions for the aircraft. Information showing that the c. g. of the aircraft (usually in the fully loaded condition) falls between the extreme conditions should be included in the weight and balance data. The extreme conditions may be determined either by weighing or computation.

(i) *Forward weight and balance check.* When a forward weight and balance check is made, it should be established that neither the maximum weight nor the forward c. g. limit listed in the aircraft specifications are exceeded. In making this check, the following information should be obtained:

(*a*) The weight, arm, and moment of the aircraft empty.

(*b*) The maximum weights, arms, and moments of the items of useful load which are located ahead of the forward c. g. limit.

(*c*) The minimum weights, arms, and moments of the items of useful load which are located aft of the forward c. g. limit.

A typical example of the computations necessary to make this check using the above data is shown in figure 16–10.

(ii) *Rearward weight and balance check.* When a rearward weight and balance check is made, it should be established that neither the maximum weight nor the rearward c. g. limit listed in the aircraft specification are exceeded. In making this check, the following information should be obtained:

(*a*) The weight, arm, and moment of the aircraft empty.

(*b*) The maximum weights, arms, and moments of the items of useful load which are located aft of the rearward c. g. limit.

(*c*) The minimum weights, arms, and moments of the items of useful load which are located ahead of the rearward c. g. limit.

A typical example of the computation necessary to make this check using the above data is shown in figure 16–11.

(4) *Loading conditions and/or placards.* (i) If the following items have not been covered in the weight and balance extreme condition checks, or are not covered by suitable placards in the aircraft, additional computations should be made. These computations should indicate the permissible distribution of fuel, passengers, and baggage which may be carried in the aircraft at any one time without exceeding either the maximum weight or the c. g. range. The conditions to check are:

(*a*) With free fuel, determine the number of passengers and baggage permissible.

(*b*) With maximum passengers, determine the fuel and baggage permissible.

(ii) Examples of the computations for the above items are given in figures 16–12, 16–13, and 16–14, respectively. The above cases are mainly applicable to the lighter-type personal aircraft. In the case of the larger-type transport aircraft, a variety of loading conditions is possible and it is usually necessary to have changes in the loading schedule approved separately by the CAA.

(5) *Equipment list.* (i) A list of the equipment included in the certificated empty weight may be found in either the approved airplane operating manual or the weight and balance data. All required, optional, and special equipment installed in the aircraft at time of weighing and/or subsequent equipment changes should be entered in the aircraft operating limitations.

(ii) Required equipment items are items so listed in the pertinent aircraft specification.

(iii) Optional equipment items are so listed in the pertinent aircraft specification and may be installed in the aircraft at the option of the owner.

(iv) Special equipment is any item not corresponding exactly to the descriptive information in the aircraft specification. This includes such items as flares, instruments, ash trays, radios, navigation lights, carpets, etc.

(v) Required and optional equipment may be shown on the equipment list by making reference to the pertinent item number listed in the applicable specification only when they are identical to that number item with reference to description, weight, and arm given in the specification. All special equipment items should be shown by making reference to the item by name, make, model, weight, and arm. When the arm for such an item is not available, it should be obtained by actual measurement.

(vi) Equipment changes: The owner should see that a continuous record for each aircraft is kept, listing all changes affecting the weight, c. g. location, and equipment changes in order that a computed weight and c. g. location may be established at any time. An entry should be made on the equipment list indicating the items added, removed, or relocated, and the date accomplished. The identification of the repair agency should be included. Examples of items so affected are the installation of extra fuel tanks, seats, or baggage compartments. Figure 16–15 illustrates the effect on balance when equipment items are added within the acceptable c. g. limits and fore and aft of the established c. g. limits. Moment computations for typical equipment changes are given in figure 16–16 and are also included in the sample weight and balance sheet in figure 16–18.

(6) *Sample weight and balance reports.* Suggested methods of tabulating the various data and computations for determining the c. g., both in the empty weight condition and the fully loaded condition, are given in figures 16–17 and 16–18, respectively. The data presented in figure 16–17 have previously been computed in figure 16–5 and represent a suggested means of recording this information. The data presented in figure 16–18 have previously been computed in figures 16–10 and 16–11 for the extreme loading conditions, and figure 16–16 for equipment change, and represent a suggested means of recording this information.

(d) *Installation of ballast.* (1) Ballast is sometimes permanently installed for c. g. balance purposes resulting from the installation or removal of equipment items and should not be used to correct a nose-up or nose-down tendency of an aircraft. It is usually located as far aft or as far forward as possible in order to bring the c. g. position within acceptable limits with a minimum of weight increase. Permanent ballast is often in the form of lead plate wrapped around and/or bolted to the fuselage primary structure (tail-post, longerons, or bulkhead members). Permanent ballast invariably constitutes a concentrated load; accordingly, the strength of the local structure and the attachment of the ballast thereto should be investigated for the design loading conditions pertinent to the particular aircraft. Permanent ballast should be placarded: "Permanent ballast, do not remove." It is not desirable to install permanent ballast by pouring melted lead into the tail-post or longerons, due to difficulties that may be encountered in subsequent welding repair operations. It should be noted that the installation of permanent ballast results in an increase of aircraft empty weight.

(2) When disposable ballast is carried, the local strength of the compartment in which the ballast is carried, and the effect of the ballast on the aircraft balance and weight should be investigated.

(e) *Loading schedule.* (1) The loading schedule should be kept with the aircraft and usually forms a part of the airplane flight manual. It includes instructions on the proper load distribution, such as filling of fuel and oil tanks, passenger seating, restrictions of passenger movement, distribution of cargo, etc.

(2) Other means of determining safe loading conditions, such as the use of a graphical index, load adjuster, etc., are acceptable and may be used in lieu of the information in paragraph (c) (4) of this section.

(3) A separate loading condition should be computed when the aircraft is to be loaded in other than the specified conditions shown in the loading schedule.

§ 18.30–17 *Procedures and guiding comments covering typical major alterations and modifications (CAA policies which apply to § 18.30).*—(a) *The installation of an engine of a type other than that covered by a type certificate or otherwise approved by the Administrator.* (1) It is generally understood that the purpose of most changes involving the installation of an engine of a type other than that covered by the original approval is to permit full advantage to be taken of improvements in engine performance which do not involve a material increase in engine weight. This is of direct benefit to the operator of the airplane, as it increases safety of operation and or performance by improving takeoff, climb, single-engine performance, true cruising speeds at altitude, engine reliability, and engine life between overhauls, with few (if any) changes in the aircraft structure. It should be carefully noted that these benefits will be difficult to obtain if the changes made require or involve an increase in the originally approved airplane gross weight or placard speeds. If the changes result in an increase in placard speeds, it will be necesary in any event to reinvestigate the structure for compliance with flutter prevention measures. Before making a change in engine it is always advisable for an owner to contact the manufacturer of the make of airplane involved to learn if the proposed change has ever been approved by the Administrator. If there is a record of approval, it is often a relatively simple matter to revise the airplane to conform with the manufacturer's approved data.

(2) The general procedure to be followed, when the rated power of the engine to be installed exceeds that originally used for design purposes or exceeds the rated power of the engine being replaced, is described in the following paragraphs. It consists, briefly, in substantiating the strength of the engine mount and adjacent structure for the takeoff (1 minute) power and for the local increase in weight, if any, and in limiting the engine output and indicated speeds for subsequent posting in the aircraft. The engine placard limits differentiate between the power permitted for continuous operation (maximum, except takeoff), and that which has been approved for takeoff only (takeoff, 1 minute). The following procedure applies to modifications of existing designs but the principles will also apply to new designs under consideration.

(3) To expedite handling and to reduce the usual exchange of correspondence to a minimum, the applicant for approval of the change should always supply a complete description of the proposed engine replacement. When an individual airplane is being modified it should be identified in the correspondence as to name of manufacturer, model

designation, manufacturer's serial number and identification mark. In addition, a new or revised airplane model designation should be selected to distinguish it from the original model. The current status of the engine to be used should be determined prior to the completion of any extensive changes. CAA field inspection personnel are supplied with this information and they will assist in the determination of the status of the engine in question. Copies of the approved engine specification can be obtained from CAA Office of Aviation Information, Department of Commerce, Washington 25, D. C.

(4) The data submitted should include a comparison of the weights of the original and proposed engine installations. Appendix I of the "Repair and Alteration Manual" will be found useful in rechecking the balance. The aircraft specification includes the approved center of gravity range.

(5) Changes in engine mount structure and the local effects of an increase in engine weight must, of course, be investigated. The extent of such investigation will depend largely upon the amount of increased power the applicant desires to use in takeoff (1 minute) and the remaining operations.

(6) (i) *Airspeed placard limits.* (*a*) There are some certificated airplanes in service which do not display the placard speeds specified in the current requirements. These airplane models were approved prior to the application of the 1934 edition of Aeronautics Bulletin No. 7–A in which the requirements for airspeed placards first appeared in the airplane regulations. In these cases when the rated power of the engine being installed exceeds that of the engine installation originally approved, the following airspeed limits should be displayed:

Level flight or climb: $V_L$
Glide or dive: 1.2 $V_L$ is the actual indicated high speed in level flight obtainable with the power of the engine originally used.

(*b*) If the applicant for approval wishes to raise these placard limits, there are no objections to his investigation of the case. The current requirements will serve as a guide for determining which components of the airplane and pertinent loading conditions or design criteria involve a consideration of design airspeeds. For cases in which airspeed placard limits were determined as part of the original approval, the use of an engine with rated power in excess of that originally used for design purposes will not require changes of the original airspeed placard limits. However, as previously mentioned, an attempt to increase these placard speeds will represent a revision of the basic structural design data and as such will usually require an appreciable amount of reinvestigation for purposes of determining whether the airplane structure can withstand the airloads incident to the increased performance. As a rule only the airplane manufacturer or an experienced engineer can efficiently make the necessary investigations. The Administrator does not initiate such studies.

(ii) *Engine placard limits.* (*a*) The airplanes discussed above in most instances do not display the engine placard limits specified in the current requirements. In these cases when the rated power of the engine being installed exceeds that of the engine installation being replaced the following engine operation limits should be displayed:

Maximum, except takeoff horsepower, not to exceed the output of the originally approved engine installation which is being replaced.
Takeoff (1 minute) horsepower, limited by:

Approved takeoff rating of engine.
Status of propeller used.
Strength of engine mount structure.
Fuel flow capacity.
Engine cooling requirements.

(*b*) For cases in which engine placard limits were determined as part of the original approval of the airplane, the use of an engine with rated power different from that of the engine being replaced will require the display of new placard limits corresponding with the maximum permissible output determined by the following:

Maximum, except takeoff horsepower, limited by:

Approved rating of engine.
Status of propeller used.
Strength of engine mount structure.
Fuel flow capacity tests. (There are a few supercharged installations for which the maximum, except takeoff, rating is greater than the takeoff rating. Therefore, the maximum, except takeoff power, is used in determining the fuel flow required.)
Full power longitudinal stability characteristics with rearmost center of gravity.
Engine cooling tests.
Design power used in original analysis.

Takeoff (1 minute) horsepower, limited by items listed above.

(iii) *Inspection and flight tests.* (*a*) Following receipt and approval by the Administrator of file data satisfactorily accounting for the change in engine as discussed in the foregoing paragraphs, the usual inspection and a recheck of certain flight tests will be authorized. The extent of the flight tests will depend upon the nature of the replacement with respect to the original approval.

(*b*) It will be of interest to designers to note that provision for future increases in engine power and airplane performance can easily be made in the original design by the following methods:

(*1*) Assume a power loading of 12 pounds per horsepower in determining the maneuvering load factors.

(2) Design the engine mount, adjacent structure, and powerplant installation for the maximum power which might possibly be used in the future.

(3) Assume a design level speed ($V_L$) considered high enough for all future operations. In this connection it should be noted that speed placards refer to "indicated" airspeeds and that the corresponding actual airspeed may therefore exceed the placard speed at altitudes above sea level.

(*b*) *The conversion of an approved type landplane or seaplane to approved skiplane status.* There are two distinct steps involved in obtaining the Administrator's aproval of an airplane equipped with skis. These are as follows:

Approval of the ski model.
Approval of the airplane equipped with approved skis.

It should be noted that the approval of a ski and the approval of a ski installation are two separate cases. The Administrator's approval of a ski for a specified static load for quantity production under a type certificate does not imply approval of the ski installed on any certificated airplane. It means only that the ski itself is satisfactory. This is true also in the case of a single set of skis where no type certificate is involved.

(1) *Approval of the ski model.* The strength of all skis must be substantiated before they may be used on certificated aircraft, whether or not the designer or manufacturer desires to obtain a type certificate for the skis.

(2) *Approval of an airplane equipped with approved skis.* Certain airplane models are already approved with certain specific approved skis installed. The owner of a certificated airplane of some such model wishing to install skis, need only install skis of the model with which airplanes of his model are approved and his airplane will be approved with the skis installed, upon the satisfactory completion of an inspection of the installation by a CAA representative. Should changes in the landing gear be necessary to accommodate the skis, the owner, of course, must make the changes in accordance with the change data approved by the Administrator. If the airplane is of a model which has not been approved with the installation of skis of the particular approved model it is desired to install, the procedure hereinafter outlined should be followed:

(i) Technical data showing any changes in the landing gear should be submitted to the Administrator for approval. This is not often necessary, as skis are usually designed to attach to the axles in place of the wheels.

(ii) Upon approval of the change data, if any, the installation must pass a satisfactory inspection by a representative of the Administrator.

(iii) During this inspection, the representative will obtain the weight of the ski installation and the weight of the wheel installation which has been replaced.

(iv) Upon completion of a satisfactory inspection, the representative will witness takeoffs and landings, and other demonstrations if deemed necessary, of the airplane equipped with skis. The characteristics of the airplane equipped with skis must be acceptable to the Administrator's representative.

(v) If the airplane inspected and tested is a standard airplane of a certain model and the skis installed are approved under a type certificate and manufactured under a production certificate or if the skis are manufactured under an approved type certificate, all airplanes of this model will be considered eligible for approval when equipped with skis of the model installed on the airplane inspected. The aircraft specification will identify the approval accordingly.

(vi) If the skis installed are not approved under an approved type certificate or were not manufactured under a production certificate, each airplane so

equipped must undergo the tests above in order to be eligible for approval. The notes on the pertinent aircraft specification will list this distinction.

(c) *Increase in gross weight.* An increase in gross weight will naturally require that the structure be able to withstand greater loads in flying and landing. There is usually involved, therefore, a study of the original design data and the preparation of a partial strength analysis, preferably by the manufacturer of the airplane. Likewise, the flying characteristics will be affected, so flight tests are usually required. Increases in weight are often accompanied by changes in weight distribution, the effects of which are covered in § 18.1–2 (d). Increases in gross weight for specific industrial purposes, such as crop dusting, may be permitted, provided that the requirements of Part 8 (restricted category) of this subchapter (i. e. the Civil Air Regulations) have been complied with.

(d) *Change in weight distribution.* (1) Any change in the location of items having considerable weight or the addition of new items (equipment, etc.) may have serious effects on the flight behavior of an airplane. When any changes in weight distribution are made, it is the repair agency's responsibility to determine by computation or reweighing, whether or not the approved limits, which appear on the airplane specification in the case of later models, will be exceeded. If they are, approval cannot be granted unless the structure is substantiated for the new limits and it is shown that the new limits are in compliance with all flight requirements as proved by means of a flight test.

(2) It is of the greatest importance to realize that flight characteristics not only become worse gradually with rearward displacement of the center of gravity, but that a condition sometimes exists or will finally be reached where a small change in weight will have very large effects. For this reason, care should be taken not to install items to the rear of the rearward c. g. limit for which the aircraft was originally approved. Removal of items forward of the forward c. g. limit for which the aircraft was originally approved will have a similar effect. Increasing the weight forward of the wing will tend to disturb the balancing in flight and might make the landing conditions dangerous. Naturally, the effects of weight changes will be greater near the nose and the tail. Reasonably small changes within the portion covered by the wing are not usually serious from a balance or stability standpoint. For details regarding weight and balance procedure, see § 18.00–16.

(e) *Installation of new items.* In addition to the effects on weight and weight distribution discussed in this section there is a danger that a piece of new equipment, if improperly installed will cause local loads which might seriously damage the airplane structure. It should be remembered that in flight maneuvers and in landing, it is possible to develop inertia forces such that an item will impose a load of several times its own weight on the supporting structure. For instance, a 35-pound storage battery supported by a fuselage cross tube will have the effect of weight of an applied load of over 100 pounds on the cross tube during a hard landing. If the cross tube was not originally designed for this load, it will probably fail or bend. The greatest danger arises when such a partial failure occurs in landing, without being noticed, as the structure might then fail completely during some subsequent flight.

(f) *Alterations or modifications of control surfaces and systems.* (1) Any change in the size of control surfaces affects the loading conditions for the airplane structure and therefore requires additional strength analyses, static tests, or both. Flight tests are usually required also. One should be particularly warned against making minor changes on control surfaces, since the original design often just meets certain requirements for flutter prevention. No balancing weights should be removed or added without consulting the manufacturer and finally obtaining an Aviation Safety agent's approval. The importance of retaining the proper balance and rigidity of airplane control surfaces during repair and maintenance work cannot be underestimated. In order to preclude the occurrence of flutter in a control surface, a degree of static and or dynamic balance is established for each model of aircraft. Failure to check and retain the original or maximum allowable degree of balance may allow serious hazards to safe flight to exist in an airplane.

(2) The development of new materials and construction techniques has made possible lighter control surfaces, for a given area, on many postwar airplanes than were used on some older airplanes. The effect of using these lighter surfaces, insofar as flutter is concerned, is to make the surface more sensitive to weight changes. Repair can cause a greater change in weight distribution, or center of gravity, than would be the case with the heavier surfaces. Since control surfaces are, in some models, only balanced to the degree necessary to obtain flutter-free operation up to the maximum speed for which the airplane is designed in the original, undamaged condition, repairs to these lighter surfaces should be carefully considered from the standpoint of how they affect the balance of the surface. This is true whether or not it has a balance weight. Therefore, any structural repairs to control surfaces should be performed with due consideration of the effect of such rework on the balance of the surface: the repair work should be done in a manner so that the original or maximum allowable static unbalance is not exceeded; or counter-balance forward of the hinge line should be added, when possible, to retain the original or maximum allowable static unbalance. When the static unbalance cannot be brought within the limits and in the manner prescribed by the manufacturer, the control surface must be discarded.

(3) Special attention is called to the indiscriminate application of extra coats of dope or paint to a control surface. In some instances, the application of extra coats of dope or paint has resulted in unsatisfactory control surface balance conditions. Proper maintenance of control surface balance conditions may require removal of dope or paint down to the base coat prior to application of new finish coatings.

(4) In line with proper maintenance for the prevention of flutter, the "water-tightness" of the original control surface should be retained. Instances of flutter have occurred due to the high unbalance of a control surface arising from trapped water or ice within the surface. Therefore, either the original "water-tightness" or water drainage provisions should be checked and retained during maintenance work.

(5) In addition to improperly balanced surfaces, improperly maintained trim tab systems can contribute greatly to the possibility of flutter occurrence. Trim tabs, in most cases, are not balanced and flutter is prevented by providing a rigid trim tab mechanism. In order to keep the weight of the main surface aft of the hinge line as light as possible, trim tabs and their actuating mechanisms are built as lightly as possible. This fact together with the vibratory nature of airflow at the tab can create a mechanism which is highly susceptible to wear and deformation. In service use, therefore, the tab rigidity may be decreased to an unsafe value.

(6) In maintaining trim tabs and their actuating mechanism, only a minor amount of wear can be tolerated, in comparison to the rest of the airplane. The maximum free-play that is acceptable is 2½° of the chord, measured at the trailing edge. For example, a tab which has a chord of four inches at one point along its span, would have a permissible free-play of 4" x 0.025 or 0.100" (total motion up and down) measured at that location on the trailing edge. Any slack in excess of this amount should be eliminated by overhauling the system.

(g) *Fairing and cowling modifications.* (1) Although changes in fairing can usually be made without impairing the airworthiness of the aircraft, it has been found that certain airplanes are very sensitive to slight changes in body lines, windshield designs, and fillets. Obviously, any change in engine cowling affects the cooling and thereby introduces possibilities of malfunctioning or failure of the engine.

(2) Low wing airplanes are usually supplied with wing-fuselage fillets which prevent tail buffeting. Any alteration of such fillets may be dangerous. The manufacturer should be consulted regarding such changes.

(h) *Appliance installations.* The aircraft and appliance manufacturer's instructions for installation of equipment should be closely followed. In particular, the recoil from flares should be provided for and, in the case of position lights, where certain angular limits are required, the light manufacturer's mounting instructions should be followed.

(i) *Batteries.* Batteries should be installed in accordance with the instructions contained in §§ 3.682 through 3.684, 4a.571, and 4b.621 of the Civil Air Regulations. It should be noted that dry batteries are not considered satisfactory for the operation of position lights.

(j) *Powerplant changes.* (1) The powerplant installation on a certificated aircraft has been thoroughly checked in accordance with rules based on a study of accident and service records covering several years of operation of all types of aircraft. These records show that many accidents are due to improper installation in small details concerning the fuel or oil system, cowling, manifolding, and items of a like nature. It is, therefore, unwise to make any changes without careful consideration.

(2) When changes appear to be necessary in the powerplant installation, the manufacturer of the aircraft should be consulted. If the manufacturer has no data concerning such a change, an Aviation Safety agent should be consulted to determine if the airworthiness of the airplane will be adversely affected by making the change.

(k) *Propeller changes.* With reference to propeller changes, the pertinent aircraft specification states the type of propeller which is approved. A large diameter propeller should not be used without investigation, because it may result in unsatisfactory ground clearance and resultant damage to the tips. Furthermore, a change to a propeller of appreciably different diameter, either larger or smaller, or different pitch, might in some cases result in unsafe performance.

## APPENDIX A—FORMS

NOTE: Forms to which reference has been made throughout this part (Civil Aeronautics Manual 18) have been filed with the Federal Register Division as part of the original document.

## APPENDIX B—TABLES

Tables to which reference has been made throughout this part (Civil Aeronautics Manual 18) are presented in Appendix B. These tables complement the various sections of CAM 18.30 and the numbers assigned to them have been developed and codified to each section of CAM 18.30. For instance, the first table relating to CAM 18.30-2 is numbered 2-1. This number (2-1) picks up the section number within CAM 18.30 and then by appending a dash followed by sequential numbering 1, 2, 3, etc., indicates which table within the section is being referenced. For example, table 2-1 is the first table within section 2 of CAM 18.30.

TABLE 2-1—SELECTION AND PROPERTIES OF AIRCRAFT WOOD

| 1 Species of wood | 2 Strength properties as compared to spruce | 3 Maximum permissible grain deviation (slope of grain) | 4 Remarks |
|---|---|---|---|
| Spruce (Picea) sitka (P. Sitchensis) red (P. Rubra) white (P. Glauca). | 100 percent | 1:15 | Excellent for all uses. Considered as standard for this table. |
| Douglas fir (Pseudotsuga Taxifolia). | Exceeds spruce | 1:15 | May be used as substitute for spruce in same sizes or in slightly reduced sizes providing reductions are substantiated. Difficult to work with hand tools. Some tendency to split and splinter during fabrication and considerable more care in manufacture is necessary. Large solid pieces should be avoided due to inspection difficulties. Gluing satisfactory. |
| Noble fir (Abies Nobilis). | Slightly exceeds spruce except 8 percent deficient in shear. | | Satisfactory characteristics with respect to workability, warping, and splitting. May be used as direct substitute for spruce in same sizes providing shear does not become critical. Hardness somewhat less than spruce. Gluing satisfactory. |
| Western hemlock (Tsuga Heterophylla). | Slightly exceeds spruce | 1:15 | Less uniform in texture than spruce. May be used as direct substitute for spruce. Upland growth superior to lowland growth. Gluing satisfactory. |
| Pine, northern white (Pinus Strobus). | Properties between 85 percent and 9 percent those of spruce. | 1:15 | Excellent working qualities and uniform in properties but somewhat low in hardness and shock-resisting capacity. Cannot be used as substitute for spruce without increase in sizes to compensate for lesser strength. Gluing satisfactory. |
| White cedar, Port Oxford (Chamaecyparis Lawsoniana). | Exceeds spruce | 1:15 | May be used as substitute for spruce in same sizes or in slightly reduced sizes providing reductions are substantiated. Easy to work with hand tools. Gluing difficult but satisfactory joints can be obtained if suitable precautions are taken. |
| Poplar, yellow (Liriodendron Tulipifera). | Slightly less than spruce except in compression (crushing) and shear. | 1:15 | Excellent working qualities. Should not be used as a direct substitute for spruce without carefully accounting for slightly reduced strength properties. Somewhat low in shock-resisting capacity. Gluing satisfactory. |

NOTES (Table 2-1.)

1. *Defects permitted.*—(a) *Cross grain.* Spiral grain, diagonal grain, or a combination of the two is acceptable providing the grain does not diverge from the longitudinal axis of the material more than specified in column 3. A check of all four faces of the board is necessary to determine the amount of divergence. The direction of free flowing ink will frequently assist in determining grain direction.

(b) *Wavy, curly, and interlocked grain.* Acceptable if local irregularities do not exceed limitations specified for spiral and diagonal grain.

(c) *Hard knots.* Sound hard knots up to $\frac{3}{8}$ inch in maximum diameter are acceptable providing: (1) they are not in highly stressed portions of I-beams, along the edges of rectangular or beveled unrouted beams or along the edges of flanges of box beams (except in lowly stressed portions where they do not cause grain divergence at the edges of the board or in the flat face of a beam more than specified in column 3, and (3) they are in the center third of the beam and are not closer than 20 inches to any other knot or other defect (pertains to $\frac{3}{8}$-inch knots—smaller knots may be proportionately closer). Knots greater than $\frac{1}{4}$ inch should be used with caution.

(d) *Pin knot clusters.* Small clusters acceptable providing they produce only a small effect on grain direction.

(e) *Pitch pockets.* Acceptable in center portion of a beam providing they are not less than 14 inches apart when they lie in the same growth ring and do not exceed 1 inch in length by $\frac{1}{8}$ inch width by $\frac{1}{8}$ inch depth and providing they are not along the edges projecting portions of I-beams, along the edges of rectangular or beveled unrouted beams or along the edges of the flanges of box beams.

(f) *Mineral streaks.* Acceptable providing careful inspection fails to reveal any decay.

2. *Defects not permitted.*—(a) *Cross grain.* Not acceptable unless within limitations noted in 1 (a).

(b) *Wavy, curly, and interlocked grain.* Not acceptable unless within limitations noted in 1 (b).

(c) *Hard knots.* Not acceptable unless within limitations noted in 1 (c).

(d) *Pin knot clusters.* Not acceptable if they produce large effect on grain direction.

(e) *Spike knots.* These are knots running completely through the depth of a beam perpendicular to the annual rings and appear most frequently in quarter-sawed lumber. Wood containing this defect should be rejected.

(f) *Pitch pockets.* Not acceptable unless within limitations noted in 1 (e).

(g) *Mineral streaks.* Not acceptable if accompanied by decay (see 1 (f)).

(h) *Checks, shakes, and splits.* Checks are longitudinal cracks extending, in general, across the annual rings. Shakes are longitudinal cracks usually between two annual rings. Splits are longitudinal cracks induced by artificially induced stress. Wood containing these defects should be rejected.

(i) *Compression wood.* This defect is very detrimental to strength and is difficult to recognize readily. It is characterized by high specific gravity, has the appearance of an excessive growth of summer wood, and in most species shows but little contrast in color between spring wood and summer wood. In doubtful cases the material should be rejected or samples should be subjected to a toughness machine test to establish the quality of the wood. All material containing compression wood should be rejected.

(j) *Compression failures.* This defect is caused from the wood being overstressed in compression due to natural forces during the growth of the tree, felling trees on rough or irregular ground or rough handling of logs or lumber. Compression failures are characterized by a buckling of the fibers that appear as streaks on the surface of the piece substantially at right angles to the grain, and vary from pronounced failures to very fine hair lines that require close inspection to detect. Wood containing obvious failures should be rejected. In doubtful cases the wood should be rejected or further inspection in the form of microscopic examination or toughness tests made, the latter means being the more reliable.

(k) *Decay.* All stains and discolorations should be examined carefully to determine whether or not they are harmless or preliminary or advanced decay. All pieces should be free from rot, dote, red heart, purple heart, and all other forms of decay.

TABLE 2-2—COLD-SETTING SYNTHETIC-RESIN GLUES[1]

[1] Columns (1) and (2) may be used for determining the maximum thickness of plywood adaptable for curved applications.

TABLE 3-1—TEXTILE FABRIC USED IN AIRCRAFT COVERING

| Material | Specification | Minimum tensile strength (lbs. per inch) | Minimum tearing strength (lbs. per inch) | Maximum thread count (threads per inch) | Typical camber percent | General remarks |
|---|---|---|---|---|---|---|
| Airplane cloth, grade A (cotton) "AA". | Specification AMS 3806, Amendment 1, dated Oct. 1, 1951. | 80 pounds per inch warp and fill. | 5 pounds per inch warp and fill. | 84 pounds per inch. | 2 to 3 | Impregnation and coating required with nitrate dope conforming to AMS 3711. Fabric must pass AMS 3806 tests for mildew resistance, accelerated aging, and flammability. |
| Do | MIL-C-5646 | do | do | do | do | Approved by AMS. |
| Airplane cloth, intermediate grade (cotton). | MIL-C-7250 | do | do | do | do | Approved by AMS. |
| Airplane cloth, intermediate grade (cotton). | MIL-C-8802 | do | do | do | do | Approved by MIL-C-5646 and AMS 3806. |
| Airplane cloth, Egyptian cotton. | Specification AMS 3804, Amendment 1, dated Oct. 1, 1951. | 65 pounds per inch warp and fill. | 4 pounds warp and 5 pounds fill. | 80 pounds per inch. | 2 to 3 | Impregnation and coating required with nitrate dope conforming to AMS 3711. Fabric must pass AMS 3804 tests for mildew resistance, accelerated aging, and flammability. |
| Airplane cloth, mercerized cotton. | Specification AMS 3805, Amendment 1, dated Oct. 1, 1951. | 50 pounds per inch warp and fill. | 3 pound warp and 4½ lbs. | 80 pounds per inch. | 1½ to 2½ | Impregnation and coating required with nitrate dope conforming to AMS 3711. Fabric must pass AMS 3805 tests for mildew resistance, accelerated aging, and flammability. |
| Glider fabric, cotton. | A. A. F. No. 1028. | 85 pounds per inch warp and fill. | 4 pound warp and 5 lbs. | 80 pounds per inch. | 2½ to 3½ | Approved by AMS 3804 Amendment A. |
| Aircraft linen | British DTD 43 | | | | | Fabric material must be used with nitrate dope conforming to TS-C-87. |

TABLE 3-2—MISCELLANEOUS TEXTILE MATERIALS

| Materials | Specification | Yarn size | Minimum tensile strength | Yards per pound | Use and remarks |
|---|---|---|---|---|---|
| Reinforcing tape, cotton. | MIL-T-5661 | | 150 pounds per one-half-inch width. | | Used as reinforcing tape on fabric and under rib lacing cord. Strength of other widths apport in proportion. |
| Lacing cord, pre-waxed braided cotton. | MIL-C-7649 | | 80 pounds double. | 310 minimum. | Lacing fabric to structures. Unless already waxed, must be lightly waxed before using. |
| Lacing cord, special cotton. | U. S. Army No. 6-27 | 20/3/3/3 | 85 pounds double. | | Do. |
| Lacing cord, braided cotton. | MIL-C-5648 | | 80 pounds single. | 170 minimum. | Do. |
| Lacing cord, flax, linen and hemp. | MIL-T-7779 | 9 ply | 50 pounds single. | 620 minimum. | Do. |
| | | 11 ply | 70 pounds single. | 510 minimum. | Do. |
| Lacing cord thread, high-tenacity cotton. | MIL-T-5690 | Ticket No. 10. | 6.2 pounds single. | 480 minimum. | Do. |
| Machine thread cotton. | Federal V-T-276b. | 20/4 ply | 5 pounds single. | 5,000 normal. | Use for all machine sewing. |
| Hand sewing thread cotton. | V-T-276b Type III B. | 8/4 ply | 14 pounds single. | 1,650 normal. | Use for all hand sewing. Use fully waxed thread. |
| Surface tape cotton (made from AN-C-120). | MIL-T-5083 | | 80 lbs/in. | | Use over seams, leading edges, trailing edges, outer edges and ribs, pinked, scalloped or straight edges. |
| Surface tape cotton. | Same as fabric used. | | Same as fabric used. | | Alternate to MIL-T-5083. |

TABLE 4-1—OXYACETYLENE WELDING ROD PROPERTIES

| Base material | Welding rod specification | Welding rod composition—percent |
|---|---|---|
| Plain carbon steel and low alloy steel such as SAE 4130 (not heat-treated after welding). | AAF No. 10286-D, Type II, Grade 1-61 or Navy 46R4b, Class 1, Type C. | Carbon 0.06 maximum. Manganese 0.25 maximum. Phosphorus 0.04 maximum. Sulphur 0.05 maximum. Silicon[1] 0.08 maximum. |
| Plain carbon steel and alloy steel (heat-treated after welding). | AAF No. 10286-D, Type II, Grade 2-G or Navy 46R4b, Class 1, Type B. | Carbon 0.10-0.20. Manganese 1.00-1.20. Phosphorus 0.04 maximum. Sulphur 0.05 maximum. Silicon 0.20-0.30. |

[1] Silicon content not a requirement of Specification AAF No. 10286-D.

TABLE 4-2—ARC WELDING ELECTRODE PROPERTIES

| Base material | Electrode specification | Use |
|---|---|---|
| Low carbon steel and alloy steel (not heat-treated after welding). | MIL-E-6843 | DC or AC current, shallow penetration (light sections). |
| Low carbon steel and alloy steel (not heat-treated after welding). | MIL-E-6843 | DC reverse polarity, deep penetration (heavy sections). |
| Alloy steel (heat-treated after welding). | MIL-E-6843 | DC or AC current, shallow penetration (light sections). |
| Alloy steel (heat-treated after welding). | MIL-E-6843 | DC reverse polarity, deep penetration (heavy sections). |

TABLE 4-3—RECOMMENDED BEND RADII FOR 90° BENDS IN TERMS OF ALUMINUM AND ALUMINUM ALLOY SHEET THICKNESS, (t)

| Alloy and temper | Approximate thickness inch 0.016 1/64 | 0.032 1/32 | 0.064 1/16 | 0.128 1/8 | 0.182 3/16 | 0.258 1/4 |
|---|---|---|---|---|---|---|
| 24S-O | 0 | 0 | 0 | 0 | 0-1t | 0-1t |
| 24S-T3[1] | 1½-3t | 2½-4t | 3½-5t | 4½-6t | 4½-6t | 5½-7t |
| 24S-T36[1] | 2½-4t | 3½-5t | 3½-5t | 4½-6t | 5½-7t | 6½-10t |
| 24S-O | 0 | 0 | 0 | 0 | 0-1t | 0-1t |
| 52S-H32 | 0 | 0 | 0 | 0-1t | 0-1t | ½t-1½t |
| 52S-H34 | 0 | 0 | 0-1t | ½t-1½t | 1½-2t | 1½t-2½t |
| 52S-H36 | 0-1t | ½t-1½t | 1½-2t | 1½-3t | 2½-4t | 2½-4t |
| 52S-H38 | 1½-1½t | 1½-2t | 1½-3t | 2½-4t | 3½-5t | 4½-6t |
| 61S-O | 0 | 0 | 0 | 0 | 0-1t | 0-1t |
| 61S-T4 | 0-1t | 0-1t | 1½-1½t | 1½-2t | 1½-3t | 2½-4t |
| 61S-T6 | 0-1t | ½t-1½t | 1½-2t | 1½-3t | 2½-4t | 2½-4t |
| 75S-O | 0 | 0 | 0 | 0-1t | 0-1t | 0-1t |
| 75S-T6[1] | 2½-4t | 3½-5t | 3½-5t | 4½-6t | 5½-7t | 6½-10t |

[1] Alclad sheet can be bent over slightly smaller radii than the corresponding tempers of the uncoated alloy.
[2] Immediately after quenching, this alloy can be formed over appreciably smaller radii.

TABLE 4-4—NUMBER OF RIVETS REQUIRED FOR SPLICES (SINGLE-LAP JOINT) IN BARE 14S-T6, 24S-T3, 24S-T36 AND 75S-T6 SHEET, CLAD 14S-T6, 24S-T3, 24S-T36, AND 75S-T6 SHEET, 24S-T4 AND 75S-T6 PLATE, BAR, ROD, TUBE, AND EXTRUSIONS, 14S-T6 EXTRUSIONS

| Thickness "t" in inches | No. of A17S-T3 protruding head rivets required per inch of width "W" 3/32 | 1/8 | 5/32 | 3/16 | 1/4 | No. of bolts AN-3 |
|---|---|---|---|---|---|---|
| 0.016 | 6.5 | 4.9 | | | | |
| .020 | 6.9 | 4.9 | 3.9 | | | |
| .025 | 8.8 | 4.9 | 3.9 | | | |
| .032 | 11.1 | 6.2 | 3.9 | 3.3 | | |
| .036 | 12.5 | 7.0 | 4.5 | 3.3 | 2.4 | |
| .040 | 13.8 | 7.7 | 5.0 | 3.5 | 2.4 | 3.3 |
| .051 | | 9.8 | 6.4 | 4.5 | 2.5 | 3.3 |
| .064 | | 12.3 | 8.1 | 5.6 | 3.1 | 3.3 |
| .081 | | | 10.2 | 7.1 | 3.9 | 3.3 |
| .091 | | | 11.4 | 7.9 | 4.4 | 3.3 |
| .102 | | | 12.8 | 8.9 | 4.9 | 3.4 |
| .128 | | | | 11.2 | 6.2 | 4.2 |

NOTES:

a. For stringers in the upper surface of a wing, or in a fuselage, 80 percent of the number of rivets shown in the table may be used.

b. For intermediate frames, 60 percent of the number shown may be used.

c. For single lap sheet joints, 75 percent of the number shown may be used.

ENGINEERING NOTES: The above table was computed as follows:

1. The load per inch of width of material was calculated by assuming a strip one inch wide in tension.

2. Number of rivets required was calculated for A17ST rivets, based on a rivet allowable shear stress equal to 40 percent of the sheet allowable tensile stress, and a sheet allowable bearing stress equal to 160 percent of the sheet allowable tensile stress, using nominal hole diameters for rivets.

3. Combinations of sheet thickness and rivet size above the heavy line are critical in (i. e., will fail by) bearing on the sheet; those below are critical in shearing of the rivets.

4. The number of AN-3 bolts required below the heavy line was calculated based on a sheet allowable tensile stress of 70,000 psi and a bolt allowable single shear load of 2,126 pounds.

TABLE 4-5—NUMBER OF LEVER-PROTRUDING-HEAD RIVETS REQUIRED FOR SPLICES (SINGLE-LAP JOINT) IN 24S-T3 ALCLAD SHEET, CLAD 24S-T3 SHEET, BARE 24S-T3 SHEET, AND 24S-T4 PLATE

| Thickness "t" in inches | No. of A17S-T3 protruding head rivets required per inch of width "W" 3/32 | 1/8 | 5/32 | 3/16 | 1/4 | No. of bolts AN-3 |
|---|---|---|---|---|---|---|

| .051 | | 7.9 | 5.1 | 5.6 | 2.4 | 3.3 |
| .064 | | 9.9 | 6.5 | 4.5 | 2.5 | 3.3 |
| .081 | | 12.5 | 8.1 | 5.7 | 3.1 | 3.3 |
| .091 | | | 9.1 | 6.4 | 3.5 | 3.3 |
| .102 | | | 10.3 | 7.1 | 3.9 | 3.3 |
| .128 | | | 12.9 | 8.9 | 4.9 | 3.3 |

NOTES:

a. For stringers in the upper surface of a wing, or in a fuselage, 80 percent of the number of rivets shown in the table may be used.

b. For intermediate frames, 60 percent of the number shown may be used.

c. For single lap sheet joints, 75 percent of the number shown may be used.

ENGINEERING NOTES: The above table was computed as follows:

1. The load per inch of width of material was calculated by assuming a strip one inch wide in tension.

2. Number of rivets required was calculated for A17ST rivets, based on a rivet allowable shear stress equal to 50 percent of the sheet allowable tensile stress, and a sheet allowable bearing stress equal to 160 percent of the sheet allowable tensile stress, using nominal hole diameters for rivets.

3. Combinations of sheet thickness and rivet size above the heavy line are critical in (i. e., will fail by) bearing on the sheet; those below are critical in shearing of the rivets.

4. The number of AN-3 bolts required below the heavy line was calculated based on a sheet allowable tensile stress of 55,000 psi and a bolt allowable single shear load of 2,126 pounds.

TABLE 4-6—NUMBER OF RIVETS REQUIRED FOR SPLICES (SINGLE-LAP JOINT) IN 52S-H34 SHEET

| Thickness "t" in inches | No. of A17S-T3 protruding head rivets required per inch of width "W" 3/32 | 1/8 | 5/32 | 3/16 | 1/4 | No. of bolts AN-3 |
|---|---|---|---|---|---|---|
| 0.016 | 6.3 | 4.7 | | | | |
| 0.020 | 6.4 | 4.7 | 3.8 | | | |
| 0.025 | 6.4 | 4.7 | 3.8 | | | |
| 0.032 | 6.3 | 4.7 | 3.8 | 3.2 | | |
| 0.036 | 7.1 | 4.7 | 3.8 | 3.2 | 2.4 | |
| 0.040 | 7.9 | 4.7 | 3.8 | 3.2 | 2.4 | |
| 0.051 | 10.1 | 5.6 | 3.8 | 3.2 | 2.4 | |
| 0.064 | 12.7 | 7.0 | 4.6 | 3 | 2.4 | |
| 0.081 | | 8.9 | 5.8 | 4.0 | 2.5 | 3.2 |
| 0.091 | | 10.0 | 6.5 | 4.5 | 2.8 | 3.2 |
| 0.102 | | 11.2 | 7.3 | 5.1 | 3.1 | 3.2 |
| 0.128 | | | 9.2 | 6.4 | 3.9 | 3.2 |

a. For stringers in the upper surface of a wing, or in a fuselage, 80 percent of the number of rivets shown in the table may be used.

b. For intermediate frames, 60 percent of the number shown may be used.

c. For single lap sheet joints, 75 percent of the number shown may be used.

ENGINEERING NOTES. The above table was computed as follows:

1. The load per inch of width of material was calculated by assuming a strip one inch wide in tension.

2. Number of rivets required was calculated for A17ST rivets, based on a rivet allowable shear stress equal to 70 percent of the sheet allowable tensile stress, and a sheet allowable bearing stress equal to 165 percent of the sheet allowable tensile stress, using nominal hole diameters for rivets.

3. Combinations of sheet thickness and rivet size above the heavy line are critical in (i. e., will fail by) bearing on the sheet; those below are critical in shearing of the rivets.

TABLE 4-7—AIRCRAFT CABLE

| Cable size | Flexible 7 x 7 MIL-C-1511 carbon steel | Flexible 7 x 19 MIL-C-5424 carbon steel | Nonflexible MIL-C-6940 carbon steel | Material (see footnote 2) |
|---|---|---|---|---|
| 1/16 | | | 165 | Copper, brass. |
| 3/32 | 480 | | 280 | Copper, brass. |
| 1/8 | | 480 | 500 | Stainless steel, Monel, and "K" Monel. |
| 5/32 | | 720 | 780 | Monel and "K" Monel. |
| 3/16 | 1,080 | 1,100 | 1,120 | Stainless steel, Monel, or "K" Monel. |
| 7/32 | 1,500 | 1,500 | 1,500 | Stainless steel, Monel, or "K" Monel. |
| 1/4 | 2,000 | 1,980 | 2,000 | Stainless steel, Monel, or "K" Monel. |
| 9/32 | 2,800 | 2,400 | 2,500 | Stainless steel, Monel, or "K" Monel. |
| 5/16 | 4,200 | 3,300 | 4,000 | Stainless steel, Monel, or "K" Monel. |
| 3/8 | 5,400 | 5,200 | 6,000 | Stainless steel, Monel, or "K" Monel. |
| 7/16 | 7,000 | 6,600 | 8,200 | Stainless steel, Monel, or "K" Monel. |
| 1/2 | 8,900 | 8,400 | | Stainless steel, Monel, or "K" Monel. |
| 9/16 | 9,800 | 8,800 | 12,000 | Stainless steel, Monel, or "K" Monel. |
| 5/8 | 12,000 | | | Stainless steel, Monel, or "K" Monel. |
| 3/4 | 14,400 | 12,000 | | Stainless steel, Monel, or "K" Monel. |

NOTES:

1. The swaged and unswaged turnbuckle assemblies are covered by AN Standard Drawings.

2. Galvanized or tinned steel, or soft iron wires are also acceptable.

3. The safety wire holes in 5/8-inch diameter and larger turnbuckle terminals for swaging may be drilled sufficiently to accommodate the double 0.051-inch diameter copper or brass wires when used.

TABLE 4-8—RECOMMENDED NUT TORQUE[1]

(Caution: These torque values are for plated steel nuts and calculated threads)

| Type nut | Torque, inch-pounds AN-315 and AN-316 nuts | Shear load per bolt AN-173 and AN-174 nuts | Torque, p. s. i. in bolts AN-173 thru AN-186 bolts | Torque, p. s. i. in bolts AN-187 thru AN-320 nuts |
|---|---|---|---|---|
| **FINE THREAD SERIES** | | | | |
| 8-32 | 12-15 | 790 | 20 | 12 |
| 10-32 | 20-25 | 1,215 | 30 | 25 |
| 1/4-28 | 50-70 | 2,000 | 100 | 60 |
| 5/16-24 | 100-150 | 3,025 | 200 | 140 |
| 3/8-24 | 160-240 | 4,450 | 350 | 240 |
| 7/16-20 | 450-500 | 6,150 | 800 | 500 |
| 1/2-20 | 600-700 | 8,300 | 1,100 | 650 |
| 9/16-18 | 1,000-1,200 | 10,950 | 1,900 | 950 |
| 5/8-18 | 1,500-1,800 | 13,950 | 2,800 | 1,400 |
| 3/4-16 | 2,500-3,000 | 20,550 | 5,000 | 2,600 |
| 7/8-14 | 4,000-4,500 | 28,450 | 8,000 | 4,000 |
| 1-14 | 5,500-6,500 | 38,000 | 12,000 | 6,000 |
| 1 1/8-12 | 7,500-9,000 | 48,000 | 17,000 | 9,000 |
| 1 1/4-12 | 9,000-11,000 | 60,000 | 23,000 | 13,000 |
| **COARSE THREAD SERIES** | | | | |
| 8-32 | 12-15 | 790 | 20 | 12 |
| 10-24 | 20-25 | 1,215 | 30 | 20 |
| 1/4-20 | 50-70 | 2,000 | 100 | 40 |
| 5/16-18 | 100-150 | 3,025 | 200 | 100 |
| 3/8-16 | 160-240 | 4,450 | 350 | 175 |
| 7/16-14 | 450-500 | 6,150 | 800 | 350 |
| 1/2-13 | 600-700 | 8,300 | 1,100 | 500 |
| 9/16-12 | 1,000-1,200 | 10,950 | 1,900 | 750 |
| 5/8-11 | 1,500-1,800 | 13,950 | 2,800 | 1,000 |
| 3/4-10 | 2,500-3,000 | 20,550 | 5,000 | 1,800 |
| 7/8-9 | 4,000-4,500 | 28,450 | 8,000 | 2,800 |
| 1-8 | 5,500-6,500 | 38,000 | 12,000 | 4,000 |
| 1 1/8-7 | 7,500-9,000 | 48,000 | 17,000 | 6,000 |
| 1 1/4-7 | 9,000-11,000 | 60,000 | 23,000 | 8,000 |

[1] Torque values are for steel nuts and calculated threads.

Note: The above torque loads may be used for all cadmium plated steel nuts of the fine or coarse thread series which have approximately equal number of threads and equal face bearing areas.

TABLE 8-1—NUMERICAL SYSTEM FOR STEEL IDENTIFICATION

| Type of steel | Numerals and digits |
|---|---|
| Carbon steel | 1xxx |
| Plain carbon steels | 10xx |
| Free cutting steels | 11xx |
| Manganese steels (manganese 1.60 to 1.90 percent) | 13xx |
| Nickel steels | 2xxx |
| 3.50 percent nickel | 23xx |
| 5.00 percent nickel | 25xx |
| Nickel chromium steels | 3xxx |
| 0.70 percent nickel, 0.70 percent chromium | 30xx |
| 1.25 percent nickel, 0.60 percent chromium | 31xx |
| 1.75 percent nickel, 1.00 percent chromium | 32xx |
| 3.50 percent nickel, 1.50 percent chromium | 33xx |
| Corrosion and heat resisting | 30xxx |
| Molybdenum steels | 40xx |
| Chromium molybdenum steels | 41xx |
| Nickel chromium molybdenum steels | 43xx |
| Nickel molybdenum steels | |
| 1.75 percent nickel, 0.25 percent molybdenum | 46xx |
| 3.50 percent nickel, 0.25 percent molybdenum | 48xx |
| Chromium steels | 5xxx |
| Low chromium | 51xx |
| Medium chromium | 52xxx |
| Corrosion and heat resisting | 51xxx |
| Chromium vanadium steels | 6xxx |
| 1.00 percent chromium | 61xx |
| National emergency steels | 8xxx |
| Silicon manganese steels | 9xxx |
| 2.00 percent silicon | 92xx |

TABLE 8-2—HARDNESS VALUES FOR STEEL

| Rockwell Hardness | | Vickers Hardness | Brinell Hardness | | Tensile Strength |
|---|---|---|---|---|---|
| C-scale Hardness Number 150 kg. Load Diamond Penetrator | B-scale Hardness Number 100 kg. Load 1/16" Diameter Ball | Diamond Pyramid Hardness Number | Tungsten Carbide Ball | Steel Ball | 1,000 lb. per sq. in. |
| 67 | 97.3 | 326 | 311 | 317 | 162 |
| 66 | 96.7 | 315 | 302 | 306 | 157 |

[1] Vickers hardness values obtained with following loads:

| Kilograms |
|---|
| 10 |
| 30 |
| 50 |
| 120 |

[2] Brinell hardness values obtained with 3,000 kg. load and 10 mm. ball, except values in italics which were obtained with 1,500 kg. load and 10 mm. ball. Readings in this table are not to be used for steel of less than approximately 0.3 mm. thickness.

Note 1: Hardness conversion numbers are approximate, and may not be exact for any given material. Separate conversions may be necessary for austenitic stainless steels, and for austenitic manganese steels. Rockwell C readings below 20 are not recommended for conversion, because values are unreliable. However, these values are sufficiently accurate to indicate that it is out of the hardness range.

Note 2: This table is reprinted from Metals Handbook, 1948 edition, with the permission of the American Society for Metals.

TABLE 12-1—COPPER ELECTRIC CABLE CURRENT CARRYING CAPACITY

Cable [illegible] MIL W [illegible]

| Size B. & S. gage | Single cable in free air—maximum amperes | Cables grouped in [illegible] formation—maximum amperes | Cables grouped or bundled—maximum amperes |
|---|---|---|---|

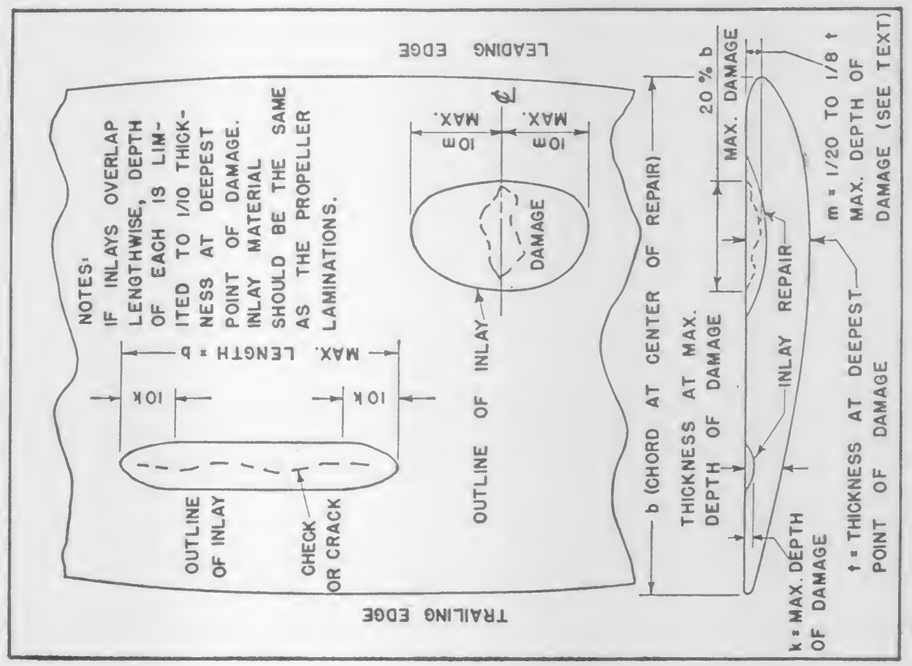

FIGURE 15-6—Propeller repair by addition of small inlay. (See continuations.)

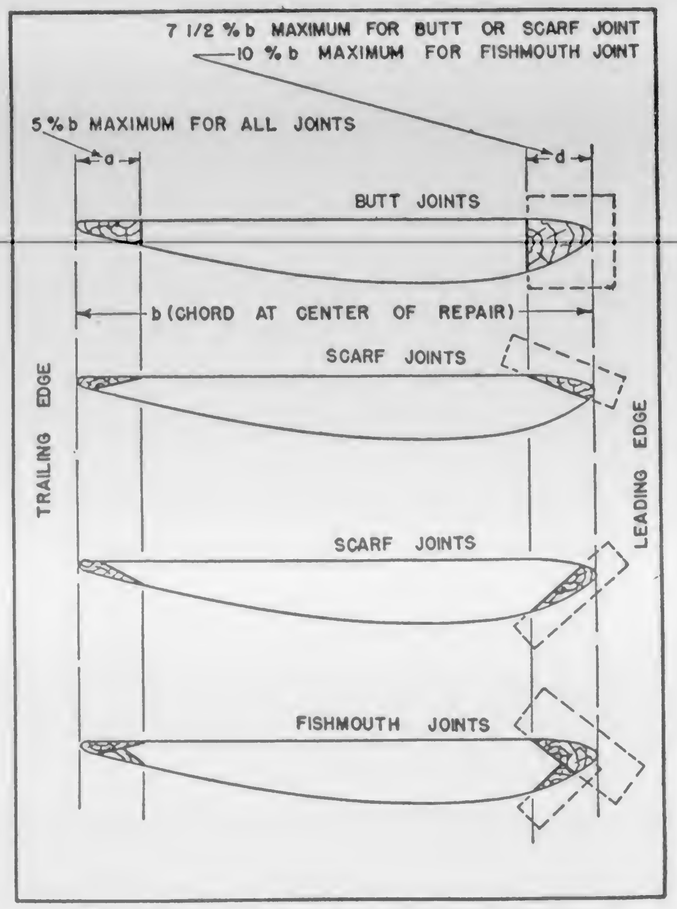

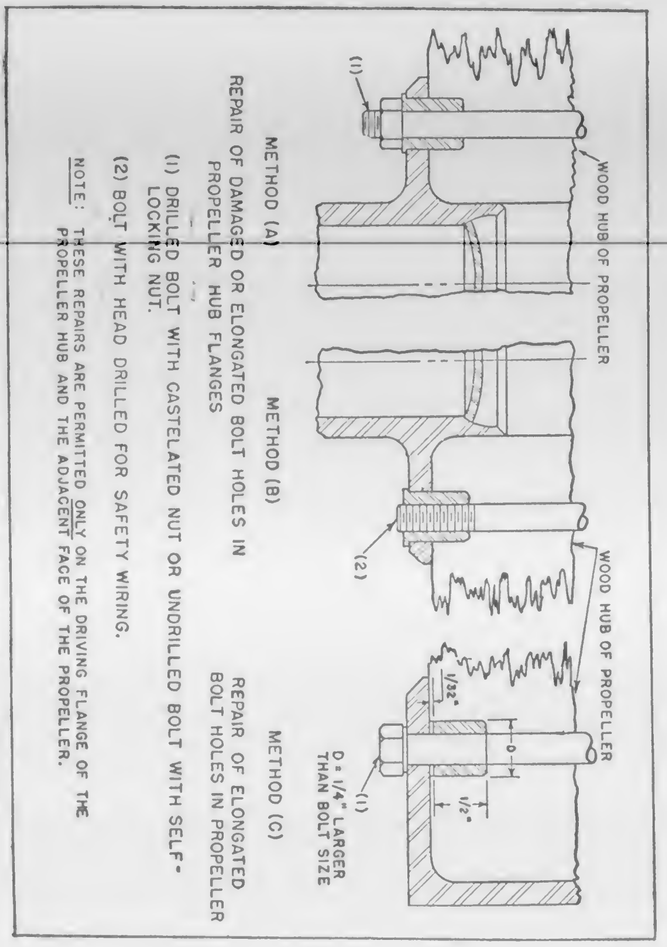

FIGURE 15-6 (continued)—Propeller repair by addition of small inlay.

METHOD (A)

REPAIR OF DAMAGED OR ELONGATED BOLT HOLES IN PROPELLER HUB FLANGES

(1) DRILLED BOLT WITH CASTELATED NUT OR UNDRILLED BOLT WITH SELF-LOCKING NUT.

(2) BOLT WITH HEAD DRILLED FOR SAFETY WIRING.

NOTE: THESE REPAIRS ARE PERMITTED ONLY ON THE DRIVING FLANGE OF THE PROPELLER HUB AND THE ADJACENT FACE OF THE PROPELLER.

METHOD (B)

METHOD (C)

REPAIR OF ELONGATED BOLT HOLES IN PROPELLER

FIGURE 15-7—Repair of fixed pitch hub and propeller with elongated or damaged bolt holes.

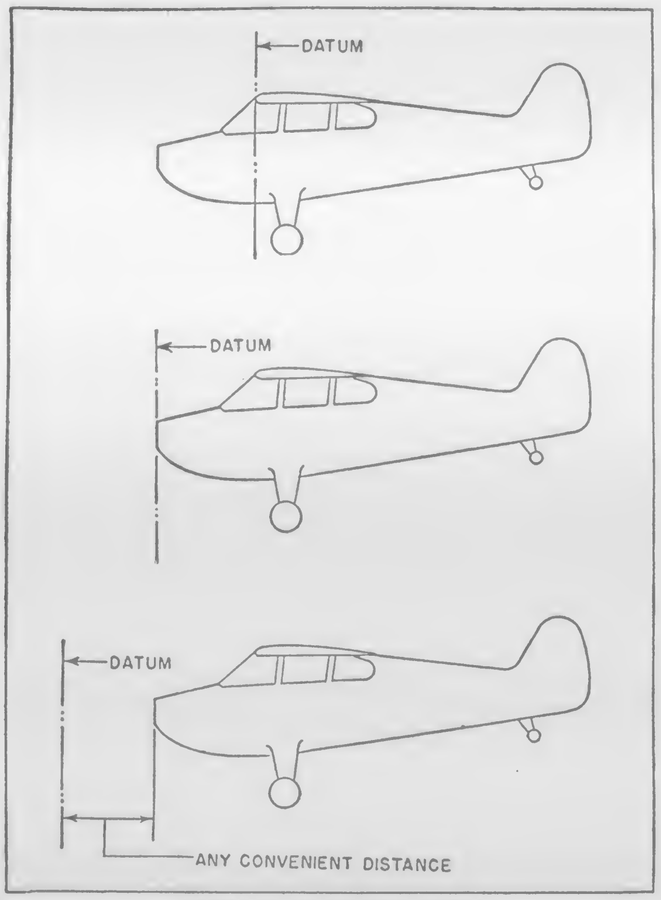

FIGURE 16-1—Typical datum locations.

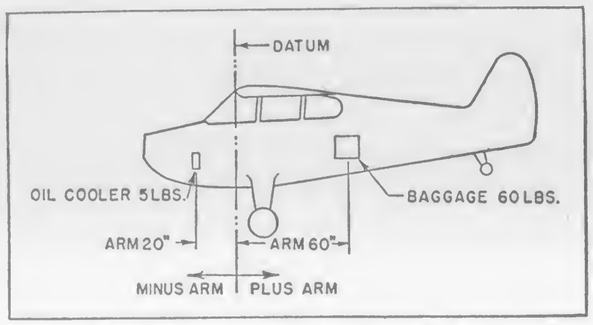

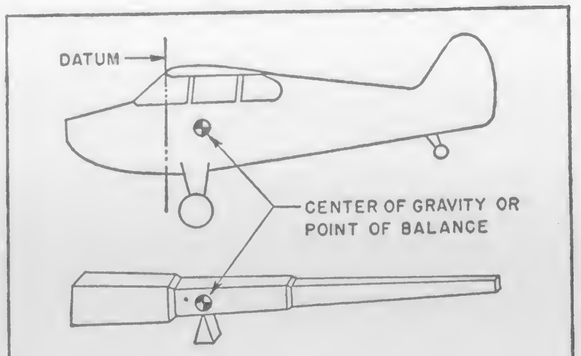

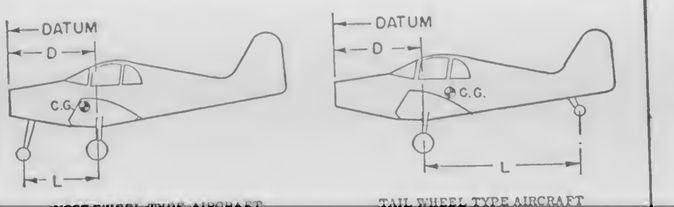

FIGURE 16-2—Illustration of arm (or moment arm).

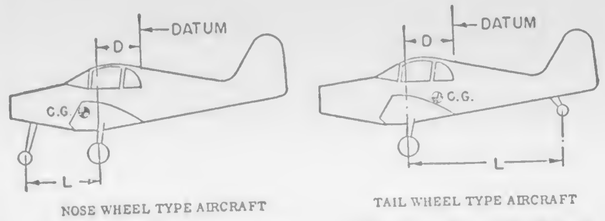
The entire aircraft weight may be considered to be concentrated at the center of gravity. Therefore, the moment of the aircraft about the datum is the weight of the aircraft times the horizontal distance between the C.G. and the datum.

Example: If the weight of this airplane is 2000 lbs. and the arm from the datum to the center of gravity is 16 inches, the moment of the aircraft about the datum is 2000 x 16 or 32,000 in. lbs.

FIGURE 16-3—Example of moment computation.

NOSE WHEEL TYPE AIRCRAFT



DATUM LOCATED FORWARD OF THE MAIN WHEELS

$C.G. = D - \left(\frac{F \times L}{W}\right)$

TAIL WHEEL TYPE AIRCRAFT

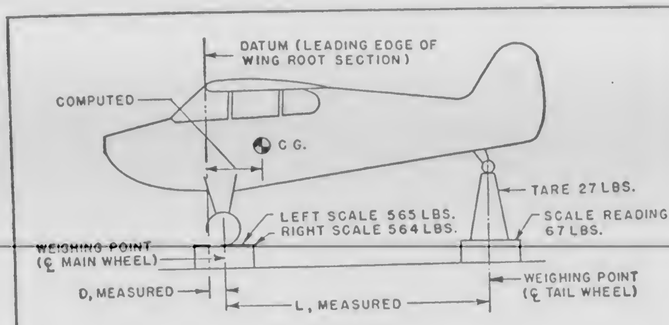
DATUM LOCATED FORWARD OF THE MAIN WHEELS

$C.G. = D + \left(\frac{R \times L}{W}\right)$

NOSE WHEEL TYPE AIRCRAFT

DATUM LOCATED AFT OF THE MAIN WHEELS

$C.G. = -\left(D + \frac{F \times L}{W}\right)$



TAIL WHEEL TYPE AIRCRAFT

DATUM LOCATED AFT OF THE MAIN WHEELS

$C.G. = -D + \left(\frac{R \times L}{W}\right)$

CG = Distance from datum to center of gravity of the aircraft.
W = The weight of the aircraft at the time of weighing.
D = The horizontal distance measured from the datum to the main wheel weighing point.
L = The horizontal distance measured from the main wheel weighing point to the nose or tail weighing point.
F = The weight at the nose weighing point.
R = The weight at the tail weighing point.

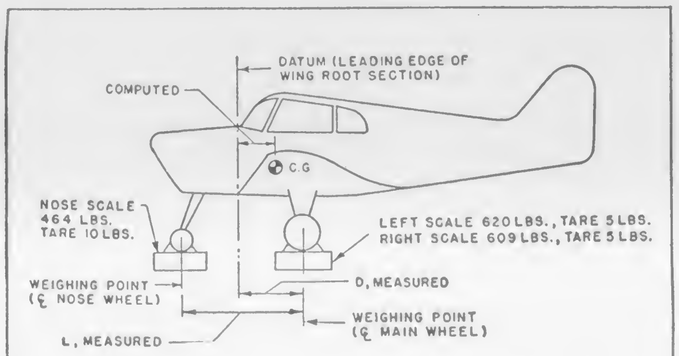
FIGURE 16-4—Empty weight center-of-gravity formulas.

TO FIND: EMPTY WEIGHT AND EMPTY WEIGHT CENTER OF GRAVITY

Datum is the leading edge of the wing (from aircraft specification)
(D) Actual measured horizontal distance from the main wheel weighing point ℄ main wheel) to the Datum-------3"
(L) Actual measured horizontal distance from the rear wheel weighing point (℄ rear wheel) to the main wheel weighing point----------222"

SOLVING: EMPTY WEIGHT

| Weighing Point | Scale Reading # | Tare # | Net Weight # |
|---|---|---|---|
| Right | 564 | 0 | 564 |
| Left | 565 | 0 | 565 |
| Rear | 67 | 27 | 40 |
| Empty Weight (W) | | | 1169 |



SOLVING: EMPTY WEIGHT CENTER OF GRAVITY

Formula: $C.G. = D + \frac{R \times L}{W} = 3'' + \frac{40 \times 222}{1169} = 3'' + 7.6'' = 10.6''$

Reference for formula Fig. 16-4

This case is shown properly entered on a sample weight and balance report form, Figure 16-17

FIGURE 16-5—Empty weight and empty weight center-of-gravity—tail-wheel type aircraft.

TO FIND: EMPTY WEIGHT AND EMPTY WEIGHT CENTER OF GRAVITY

Datum is the leading edge of the wing (from aircraft specification)
(D) Actual measured horizontal distance from the main wheel weight point (℄ main wheel) to the Datum-------34.0"
(L) Actual measured horizontal distance from the front wheel weighing point (℄ front wheel) to the main wheel weighing point---------67.8"

SOLVING: EMPTY WEIGHT

| Weighing Point | Scale Reading # | Tare # | Net Weight |
|---|---|---|---|
| Right | 609 | 5 | 604 |
| Left | 620 | 5 | 615 |
| Front | 464 | 10 | 454 |
| Empty Weight (W) | | | 1673 |

SOLVING: EMPTY WEIGHT CENTER OF GRAVITY

Formula: $C.G. = D - \frac{F \times L}{W} = 34'' - \frac{454 \times 67.8}{1673} = 34'' - 18.3'' = 15.7''$

Reference for formula Fig. 16-4

FIGURE 16-6—Empty weight and empty weight center-of-gravity—nose-wheel type aircraft.

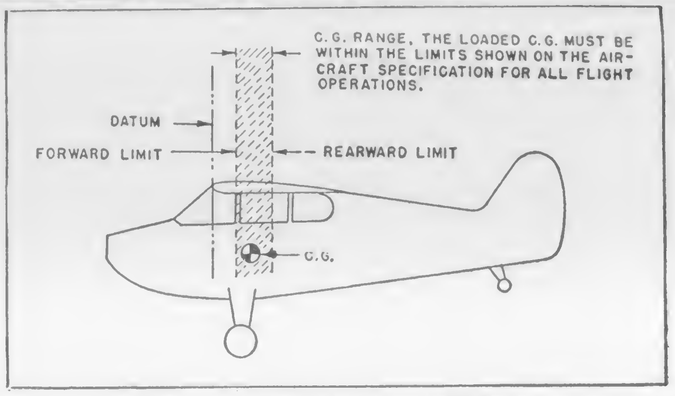


FIGURE 16-7—Operating center-of-gravity range.

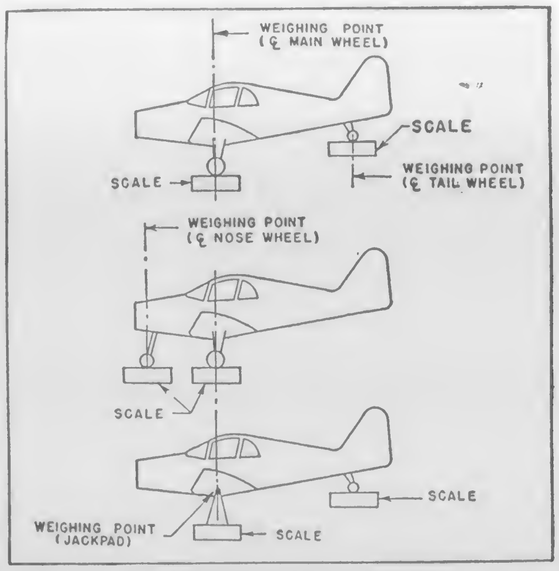

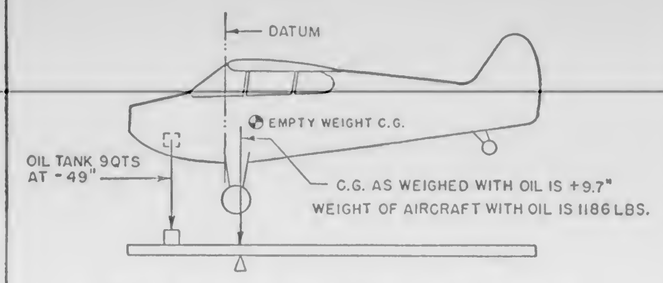

FIGURE 16-8—Weighing point centerline.

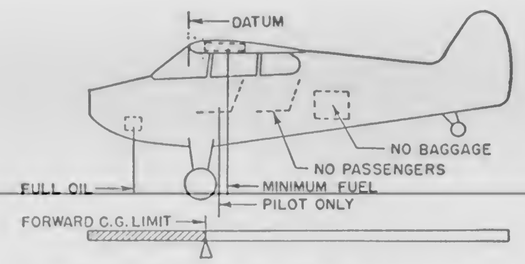
EMPTY WEIGHT AND EMPTY WEIGHT CENTER OF GRAVITY
(when aircraft is weighed with oil)

GIVEN:

| | |
|---|---|
| Aircraft as weighed with full oil | 1186 lbs. |
| Center of gravity | 9.7" |
| Full oil capacity 9 qts. | 17 lbs. |



SOLVING:

| | Weight # x | Arm" | Moment "# |
|---|---|---|---|
| Aircraft as weighed | + 1186 | + 9.7 | + 11504 |
| Less oil | - 17 | -49.0 | + 833 |
| Total | + 1169(A) | | + 12337(B) |

Empty Weight (A) = 1169 pounds.

Empty Weight Center of Gravity $\frac{B}{A} = \frac{12337}{1169} = +10.6"$

FIGURE 16-9—Empty weight and empty weight center-of-gravity when aircraft is weighed with oil.

TO CHECK: MOST FORWARD WEIGHT AND BALANCE EXTREME.

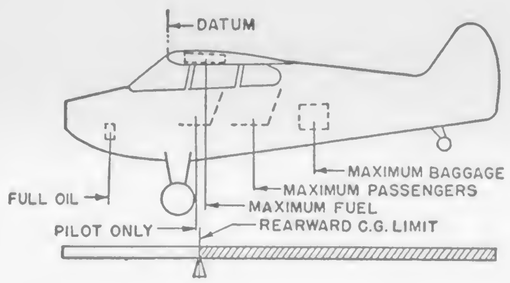
GIVEN:

| | |
|---|---|
| Actual empty weight of the airplane | 1169# |
| Empty weight center of gravity | +10.6" |
| *Maximum weight | 2100# |
| *Forward C.G. limit | + 8.5" |
| *Oil, capacity 9 qts. | 17# at - 49 |
| *Pilot in farthest forward seat equipped with controls (unless otherwise placarded) | 170# at + 16" |
| *Since the fuel tank is located to the rear of the forward C.G. limit, minimum fuel should be included. $\frac{\text{METO HP}}{12} = \frac{165}{12} = 13.75$ gal. x 6# | 83# at + 22" |

*Information should be obtained from the aircraft specification.

Note: Any items or passengers must be used if they are located ahead of the forward C.G. limit.
Full fuel must be used if the tank is located ahead of the forward C.G. limit.

CHECK OF FORWARD WEIGHT AND BALANCE EXTREME



| | Weight (#) | x Arm (") | Moment ("#) |
|---|---|---|---|
| Aircraft Empty | + 1169 | + 10.6 | + 12391 |
| Oil | + 17 | - 49 | - 833 |
| Pilot | + 170 | + 16 | + 2720 |
| Fuel | + 83 | + 22 | + 1826 |
| Total | + 1439 (TW) | | + 16104 (TM) |

Divide the TM (Total Moment) by the TW (Total Weight) to obtain the forward weight and balance extreme.
$\frac{TM}{TW} = \frac{16104}{1439} = +11.2"$

Since the forward C.G. limit and the maximum weight are not exceeded, the forward weight and balance extreme condition is satisfactory.

FIGURE 16-10—Example of check of most forward weight and balance extreme.

TO CHECK: MOST REARWARD WEIGHT AND BALANCE EXTREME.

GIVEN:

| | |
|---|---|
| Actual empty weight of the airplane | 1169# |
| Empty weight center of gravity | 10.6" |
| *Maximum weight | 2100# |
| *Rearward C.G. limit | 21.9" |
| *Oil capacity 9 qts. | 17# at - 49" |
| *Baggage, placarded do not exceed 100 lbs. | 100# at + 75.5" |
| *Two passengers in rear seats, 170 x 2 | 340# at + 48" |
| *Pilot in most rearward seat equipped with controls (unless otherwise placarded) | 170# at + 16" |
| *Since the fuel tank is located aft of the rearward C.G. limit full fuel must be used | 240# at + 22" |

* Information should be obtained from the aircraft specification.

Note: If fuel tanks are located ahead of the rearward C.G. limit minimum fuel should be used.

CHECK OF REARWARD WEIGHT AND BALANCE EXTREME

| | Weight (#) | x Arm (") | = Moment ("#) |
|---|---|---|---|
| Aircraft empty | + 1169 | + 10.6 | + 12391 |
| Oil | + 17 | - 49 | - 833 |
| Pilot (1) | + 170 | + 16 | + 2720 |
| Passengers (2) | + 340 | + 48 | + 16320 |
| Fuel (40 gals.) | + 240 | + 22 | + 5280 |
| Baggage | + 100 | + 75.5 | + 7550 |
| Total | + 2036 (TW) | | + 43428 (TM) |

Divide the TM (Total Moment) by the TW (Total Weight) to obtain the rearward weight and balance extreme.
$\frac{TM}{TW} = \frac{43428}{2036} = +21.3"$
Since the rearward C.G. limit and the maximum weight are not exceeded, the rearward weight and balance extreme condition is satisfactory.

FIGURE 16-11—Example of check of most rearward weight and balance extreme.

EXAMPLE OF THE DETERMINATION OF THE NUMBER OF PASSENGERS AND BAGGAGE PERMISSIBLE WITH FULL FUEL

GIVEN:

| | |
|---|---|
| Actual empty weight of the aircraft | 1169# |
| Empty weight center of gravity | 10.6" |
| Maximum weight | 2100# |
| Datum is leading edge of the wing | |
| Forward center of gravity limit | 8.5" |
| Rearward center of gravity limit | 21.9" |
| Oil capacity, 9 qts.; show full capacity | 17# at -49" |
| Baggage, maximum | 100# at +75.5" |
| Two passengers in rear seat, 170# x 2 | 340# at +48" |
| Pilot in most rearward seat equipped with controls (unless otherwise placarded) | 170# at +16" |
| Full fuel, 40 gals. x 6# | 240# at +22" |

| | Weight(#) | x Arm(") | = Moment("#) |
|---|---|---|---|
| Aircraft empty | + 1169 | + 10.6 | + 12391 |
| Oil | + 17 | - 49 | - 833 |
| Full fuel | + 240 | + 22 | + 5280 |
| Passengers, 2 rear | + 340 * | + 48 | + 16320 |
| Pilot | + 170 | + 16 | + 2720 |
| Baggage | + 100 | + 75.5 | + 7550 |
| Total | + 2036 (TW) | | + 43428 (TM) |

Divide the TM (total moment) by the TW (total weight) to obtain the loaded center of gravity.

$\frac{TM}{TW} = \frac{43428}{2036} = +21.3"$

The above computations show that with full fuel, 100 pounds of baggage and two passengers in the rear seat may be carried in this aircraft without exceeding either the maximum weight or the approved C.G. range.

This condition may be entered in the loading schedule as follows:

| GALLONS OF FUEL | NUMBER OF PASSENGERS | POUNDS OF BAGGAGE |
|---|---|---|
| Full | 2 Rear | 100 |

* Only two passengers are listed to prevent the maximum weight of 2100 lbs. from being exceeded.

FIGURE 16-12—Loading conditions: Determination of the number of passengers and baggage permissible with full fuel.

EXAMPLE OF THE DETERMINATION OF THE POUNDS OF FUEL AND BAGGAGE PERMISSIBLE WITH MAXIMUM PASSENGERS

| | Weight (#) | x Arm (") | = Moment ("#) |
|---|---|---|---|
| Aircraft empty | + 1169 | + 10.6 | + 12391 |
| Oil | + 17 | - 49 | - 833 |
| Pilot | + 170 | + 16 | + 2720 |
| Passenger, 1 front | + 170 | + 16 | + 2720 |
| Passengers, 2 rear | + 340 | + 48 | + 16320 |
| Fuel (39 gals.) | + 234 | + 22 | + 5148 |
| Baggage | --- | --- | --- |
| Total | + 2100 | | + 38466 |

Divide the TM (total moment) by the TW (total weight) to obtain the loaded center of gravity.

$\frac{TM}{TW} = \frac{38466}{2100} = +18.3''$

The above computations show that with the maximum number of passengers, 39 gallons of fuel and zero pounds of baggage may be carried in this aircraft without exceeding either the maximum weight or the approved C.G. range.

This condition may be entered in the loading schedule as follows:

| GALLONS OF FUEL | NUMBER OF PASSENGERS | POUNDS OF BAGGAGE |
|---|---|---|
| * FULL | * 2 rear | * 100 |
| 39 | 1(F) 2(R) | None |

* Conditions as entered from Figure 16-12
(F) Front seat
(R) Rear seat

FIGURE 16-13—Loading conditions: Determination of the fuel and baggage permissible with maximum passengers.

EXAMPLE OF THE DETERMINATION OF THE FUEL AND THE NUMBER AND LOCATION OF PASSENGERS PERMISSIBLE WITH MAXIMUM BAGGAGE

| | Weight (#) | x Arm (") | = Moment ("#) |
|---|---|---|---|
| Aircraft empty | + 1169 | + 10.6 | + 12391 |
| Oil | + 17 | - 49 | - 833 |
| Pilot | + 170 | + 16 | + 2720 |
| Passenger (1) rear | + 170 | + 48 | + 8160 |
| Passenger (1) front | + 170 | + 16 | + 2720 |
| Fuel (40 gals.) | + 240 | + 22 | + 5280 |
| Baggage | + 100 | + 75.5 | + 7550 |
| Total | + 2036 | | + 37988 |

Divide the TM (total moment) by the TW (total weight) to obtain the loaded center of gravity.

$\frac{TM}{TW} = \frac{37988}{2036} = +18.7$

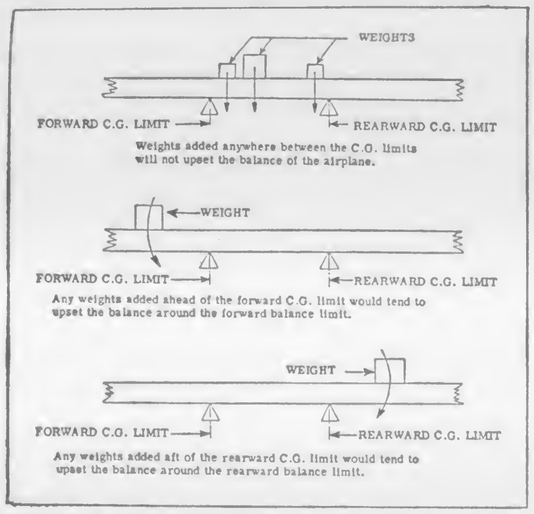
The above computations show that with maximum baggage, full fuel and 2 passengers (1 in the front seat and 1 in the rear seat) may be carried in this aircraft without exceeding either the maximum weight or the approved C.G. range.

This condition may be entered in the loading schedule as follows:

| GALLONS OF FUEL | NUMBER OF PASSENGERS | POUNDS OF BAGGAGE |
|---|---|---|
| * Full | * 2 Rear | *100 |
| ** 39 | *1(F) 2(R) | **None |
| Full | 1(F) 1(R) | Full |

*Conditions as entered from Figure 16-12
**Conditions as entered from Figure 16-13
(F) Front seat
(R) Rear seat

FIGURE 16-14—Loading conditions: Determination of the fuel and the number and location of passenger permissible with maximum baggage.



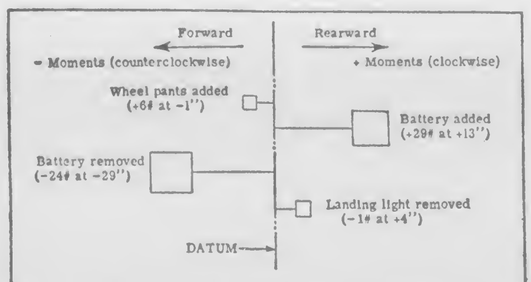


FIGURE 16-15—Effects of the addition of equipment items on balance.

| | Weight (#) | x Arm (") | = Moment ("#) |
|---|---|---|---|
| ADDED | | | |
| Item 204 wheel pants | + 6 | - 1 | - 6 |
| Item 302b Battery | + 29 | +13 | +377 |
| REMOVED | | | |
| Item 302a Battery | - 24 | -29 | +696 |
| Item 303 Landing light | - 1 | + 4 | - 4 |

This condition is shown properly entered on a sample weight and balance report on Figure 16-18 under Equipment Change.

FIGURE 16-16—Example of moment and weight changes resulting from equipment changes.

MAKE MA-700 MODEL A SERIAL # 0000 REGISTRATION # N1234
DATUM IS leading edge of wing.

COMPUTE AS FOLLOWS IF AIRCRAFT WEIGHED

1. Leveling means level top longeron between front and rear seats.
2. Main wheel weighing point is located (_____"FORWARD)(+ 3 " AFT) of datum.
3. Actual measured distance from the main weight point centerline to the tail (or nose) point centerline 222 ".
4. Oil over and above "ZERO" tank reading = (a. — Gals.)(b. — Lbs.)(c. — In.)

ACTUAL EMPTY WEIGHT

## Chapter II—Civil Aeronautics Administration, Department of Commerce

[Amdt. 21]

PART 600—DESIGNATION OF CIVIL AIRWAYS

ALTERATIONS

The civil airway alterations appearing hereinafter have been coordinated with the civil operators involved, the Army, the Navy, and the Air Force, through the Air Coordinating Committee, Airspace Subcommittee, and are adopted to become effective when indicated in order to promote safety of the flying public. Compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedure Act would be impracticable and contrary to public interest and therefore is not required. Part 600 is amended as follows:

1. Section 600.281 is amended to read:

§ 600.281 *Red civil airway No. 81 (Lansing, Mich., to Detroit, Mich.).* From the Lansing, Mich., radio range station to the intersection of the southeast course of the Lansing, Mich., radio range and the west course of the Detroit, Mich., radio range.

2. Section 600.630 *Blue civil airway No. 30 (Brownsville, Tex., to Pueblo, Colo.),* is amended by substituting the words: "excluding the portion which lies more than 3 miles southeast of the southwest course of the Corpus Christi, Tex., radio range;" for the words: "excluding the portion which lies more than 2 miles southeast of the southwest course of the Corpus Christi, Tex., radio range;"

3. Section 600.645 *Blue civil airway No. 45 (Greenfield, Mass., to Lebanon, N. H.),* is corrected by substituting the words "and the southwest course of the Concord, N. H., radio range" for the words: "and the southeast course of the Concord, N. H., radio range"

(Sec. 205, 52 Stat. 984, as amended; 49 U. S. C. 425. Interprets or applies sec. 302, 52 Stat. 985, as amended; 49 U. S. C. 452)

This amendment shall become effective 0001 e. s. t. November 24, 1953.

[SEAL] F. B. LEE,
*Administrator of Civil Aeronautics.*

[F. R. Doc. 53-9800; Filed, Nov. 20, 1953; 8:45 a. m.]

[Amdt. 21]

PART 601—DESIGNATION OF CONTROL AREAS, CONTROL ZONES, AND REPORTING POINTS

ALTERATIONS

The control area and reporting point alterations appearing hereinafter have been coordinated with the civil operators involved, the Army, the Navy, and the Air Force, through the Air Coordinating Committee, Airspace Subcommittee, and are adopted to become effective when indicated in order to promote safety of the flying public. Compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedure Act would be impracticable and contrary to public interest and therefore is not required. Part 601 is amended as follows:

1. Section 601.281 is amended by changing the caption to read: § 601.281 *Red civil airway No. 81 control areas (Lansing, Mich., to Detroit, Mich.).*

2. Section 601.1029 is amended to read:

§ 601.1029 *Control area extension (Corpus Christi, Tex.).* All that airspace lying in the north quadrant of the Corpus Christi, Tex., radio range within a 58-mile radius of the range station bounded on the southwest by Blue civil airway No. 30 and on the southeast by Green civil airway No. 6 including the airspace within 6 miles either side of the northeast course of the Refugio, Tex., radio range extending from the radio range station to a point 32 miles northeast and the airspace within 6 miles either side of the northwest course of the Beeville, Tex., radio range extending from the radio range station to a point 25 miles northwest.

3. Section 601.1229 *Control area extension (Tampa, Fla.),* is revoked.

4. Section 601.1229 is added to read:

§ 601.1229 *Control area extension (Atterbury, Ind.).* That airspace bounded on the south by Lat. 39°10'00", on the west by Long. 86°00'00" and on the east and northeast by VOR civil airway No. 51, excluding the portion which overlaps Atterbury danger area (D-65).

5. Section 601.4016 *Green civil airway No. 6 (Laredo, Tex., to Norfolk, Va.),* is amended after "Mobile, Ala., radio range station;" by adding the following reporting point: "the intersection of the northeast course of the Mobile, Ala., radio range and the northwest course of the Pensacola, Fla., radio range;"

6. Section 601.4281 is amended by changing the caption to read: § 601.4281 *Red civil airway No. 81 (Lansing, Mich., to Detroit, Mich.).*

7. Section 601.4628 is amended to read:

§ 601.4628 *Blue civil airway No. 28 (Charleston, S. C., to Bulls Gap, Tenn.).* The intersection of the northwest course of the Spartanburg, S. C., radio range and a line bearing 57° True from the Asheville, N. C. (Hendersonville), nondirectional radio beacon.

8. Section 601.4639 is amended to read:

§ 601.4639 *Blue civil airway No. 39 (Savannah, Ga., to Elmira, N. Y.).* The Paynesville, W. Va., nondirectional radio beacon; the intersection of the southeast course of the Pittsburgh, Pa., radio range and the northeast course of the Morgantown, W. Va., radio range.

9. Section 601.7001 *Domestic VOR reporting points* is amended by deleting the following reporting point:

Fairville intersection: the intersection of the Rochester, N. Y., omnirange 087° True and the Elmira, N. Y., omnirange 004° True radials.

(Sec. 205, 52 Stat. 984, as amended; 49 U. S. C. 425. Interprets or applies sec. 601, 52 Stat. 1007, as amended; 49 U. S. C. 551)

This amendment shall become effective 0001 e. s. t. November 24, 1953.

# NOTICES

## DEPARTMENT OF THE TREASURY

### Foreign Assets Control

IMPORTATION OF CERTAIN MERCHANDISE DIRECTLY FROM HONG KONG, JAPAN, TAIWAN, THE REPUBLIC OF KOREA, AND THE FEDERAL REPUBLIC OF GERMANY

AVAILABLE CERTIFICATIONS BY SPECIFIED FOREIGN GOVERNMENTS

Notice is hereby given that certificates of origin issued by the governments hereinafter listed under procedures agreed upon between the specified certifying agencies of those governments and the Foreign Assets Control are available with respect to the importation into the United States, directly or on a through bill of lading, from the respective countries of the following commodities:

From Hong Kong (certificates issued by the Hong Kong Department of Commerce and Industry):
- Bean curd (Aug. 15, 1953).
- Bean thread (Apr. 23, 1953).
- Confectionery (Aug. 15, 1953).
- Cotton dolls (June 18, 1953).
- Cotton pincushions (June 18, 1953).
- Cotton waste (Jan. 9, 1953).
- Cotton wearing apparel (Jan. 12, 1953).
- Footwear, embroidered (Sept. 29, 1953).
- Hardwood furniture (Jan. 9, 1953).
- Ivory manufactures (Jan. 9, 1953).
- Joss candles (Oct. 27, 1953).
- Linen manufactures, embroidered (Sept. 29, 1953).
- Needlework tapestries (June 18, 1953).
- Oysters and oyster sauce (Aug. 15, 1953).
- Plums, preserved (Jan. 9, 1953).
- Rice sticks (Aug. 15, 1953).
- Salt fish in oil (Jan. 9, 1953).
- Seagrass mats and squares (made from Formosan seagrass) (Oct. 27, 1953).
- Shrimp noodles (Oct. 27, 1953).
- Shrimp sauce and paste (Aug. 15, 1953).
- Shrimp slices, dried (Oct. 27, 1953).
- Silk manufactures (Jan. 9, 1953).
- Sugar, slab and white rock (Sept. 29, 1953).
- Tea, Formosan (June 18, 1953).
- Tungsten ore and concentrates (Jan. 9, 1953).
- Waste-paper baskets, folding, silk and rayon (Sept. 29, 1953).
- Water chestnuts (Jan. 9, 1953).

From Japan (certificates issued by the Japanese Ministry of International Trade and Industry):
- Abalone, canned or dried (Aug. 25, 1953).
- Bamboo, split (Aug. 25, 1953).
- Bamboo, sprouts, canned (May 5, 1953).
- Bamboo, sprouts, dried shredded (Aug. 25, 1953).
- Bamboo, sprouts, raw (Aug. 25, 1953).
- Braids, straw (Aug. 25, 1953).
- Cuttlefish, dried (Aug. 25, 1953).
- Fish (sea bream), canned prepared (Aug. 25, 1953).
- Floor coverings, grass and straw (Aug. 25, 1953).
- Floor coverings, seagrass mats and squares (Aug. 25, 1953).
- Ginko nuts, in the shells, canned or otherwise prepared (Aug. 25, 1953).
- Ginger (Jul. 30, 1953).
- Hog bristles (Jan. 29, 1953).
- Iriko (Oct. 6, 1953).
- Lotus root, canned (Aug. 25, 1953).
- Menthol (Aug. 25, 1953).
- Mushrooms, canned baked (Aug. 25, 1953).
- Mushrooms, dried (Aug. 25, 1953).
- Mushrooms, prepared (Aug. 25, 1953).
- Oysters, dried (Aug. 25, 1953).
- Quail, frozen (Aug. 25, 1953).
- Red beans (Oct. 6, 1953).
- Sardines, dried (Aug. 25, 1953).
- Scallions, pickled (Aug. 25, 1953).
- Scallops, dried (Aug. 25, 1953).
- Seaweed, dried (Aug. 25, 1953).
- Shark fins (July 30, 1953).
- Soy bean sauce (May 5, 1953).
- Walnuts (July 30, 1953).

From Taiwan (Formosa) certificates issued by the Ministry of Economic Affairs of the Republic of China):
- Bamboo shoots, canned (June 10, 1953).
- Bamboo, split (June 10, 1953).
- Duck eggs, salted or preserved (Apr. 15, 1953).
- Ginger root, candied or otherwise preserved (June 10, 1953).
- Hog bristles, black, not to exceed four inches in length (June 10, 1953).
- Millet wine (Kaoliang) (Oct. 20, 1953).
- Olives, preserved (June 10, 1953).
- Plums, preserved (June 10, 1953).
- Prunes, preserved (June 10, 1953).
- Rice wine (Shaohsing) (Oct. 20, 1953).
- Seagrass squares (Feb. 5, 1953).
- Soy bean sauce (Nov. 9, 1953).
- Water chestnuts (Feb. 5, 1953).

From Republic of Korea (certificates issued by the Ministry of Commerce and Industry of the Republic of Korea):
- Hog bristles (Mar. 12, 1953).

From Federal Republic of Germany (Certificates issued by the Federal Ministry of Economics or the Federal Agency for Commodity Trade):
- Hog bristles, dyed (Sept. 21, 1953).

The date in parentheses following each type of merchandise set forth above is the date on which certification first became available for the merchandise specified.

It is contemplated that from time to time additions will be made to the list of certifiable commodities. Notices with respect to such commodities will be published in the FEDERAL REGISTER.

[SEAL] ELTING ARNOLD,
*Acting Director,*
*Foreign Assets Control.*

[F. R. Doc. 53-9869; Filed, Nov. 20, 1953; 8:56 a. m.]

### Office of the Secretary

[Treasury Department Order 180]

COMMISSIONER OF NARCOTICS

DELEGATION OF AUTHORITY WITH RESPECT TO FINAL APPROVAL OF COMPROMISES

By virtue of the authority vested in me by Reorganization Plan No. 26 of 1950, it is ordered as follows:

1. There are transferred to the Commissioner of Narcotics all the functions of the Secretary of the Treasury, the Under Secretary of the Treasury, or any Assistant Secretary of the Treasury under section 3761 (a) of the Internal Revenue Code with respect to the compromise of any criminal case arising under chapter 23 or part V or VI of subchapter A of chapter 27 of the Internal Revenue Code, except where the criminal liability relates only to delinquency in registration or delinquency in payment of tax.

2. In any case in which a general offer is made in compromise of civil or criminal liability compromisable by the Commissioner of Internal Revenue and of criminal liability compromisable by the Commissioner of Narcotics, they may jointly exercise the authority of the Secretary, the Under Secretary, or any Assistant Secretary under section 3761 (a) of the Internal Revenue Code.

3. Treasury Department Order No. 150-25, dated June 1, 1953, is modified accordingly.

Dated: November 17, 1953.

[SEAL] H. CHAPMAN ROSE,
*Acting Secretary of the Treasury.*

## DEPARTMENT OF THE INTERIOR

### Bureau of Reclamation

BEAR RIVER PROJECT, UTAH

ORDER OF REVOCATION

AUGUST 14, 1952.

Pursuant to the authority delegated by Departmental Order No. 2515 of April 7, 1949 (14 F. R. 1937), I hereby revoke Departmental Order of August 31, 1948, insofar as said order affects the following described lands; provided however that such revocation shall not affect the withdrawal of any other lands by said order or affect any other orders withdrawing or reserving the lands hereinafter described:

SALT LAKE BASE AND MERIDIAN, UTAH
T. 12N., R. 9W.,
Sec. 1, all.

The above area aggregates 636.92 acres.

G. W. LINEWEAVER,
*Assistant Commissioner.*

NOVEMBER 17, 1953.

I concur. The records of the Bureau of Land Management will be noted accordingly.

The soil is a sandy clay loam and fairly free of surface rock. The topography is gently sloping. Adjoining land is now cultivated to small grains by dry-farm methods.

This order shall not otherwise become effective to change the status of the described lands until 10:00 a. m. on the 35th day after the date of this order. At that time the said lands shall become subject to application, petition, location and selection under the applicable public-land laws, subject to valid existing rights, the provisions of existing withdrawals, the requirements of applicable laws, and the 91-day preference right filing period for veterans and others entitled to preference under the act of September 27, 1944 (58 Stat. 747; 43 U. S. C. 279–284), as amended.

Information showing the periods during which, and the conditions under which, veterans and others may file applications for these lands may be obtained on request from the Manager of the Land and Survey Office, Salt Lake City, Utah.

WILLIAM PINCUS,
*Assistant Director,*
*Bureau of Land Management.*

### Office of the Secretary

FORT BELKNAP INDIAN COMMUNITY, MONTANA

ADOPTION OF FEDERAL INDIAN LIQUOR LAWS ON RESERVATION

Pursuant to the act of August 15, 1953 (Public Law 277—83d Cong., 1st Sess.), I certify that the following ordinance relating to the application of the Federal Indian liquor laws on the Fort Belknap Reservation was duly adopted by the Fort Belknap Indian Community of Montana which has jurisdiction over the area of Indian country included in the resolution:

Whereas Public Law 277, 83d Congress, approved August 15, 1953 provides that sections 1154, 1156, 3113, 3488 and 3618 of title 18, United States Code, commonly referred to as the Federal Indian liquor laws, shall not apply to any act or transaction within any area of Indian country provided such act or transaction is in conformity with both the laws of the State in which such act or transaction occurs and with an ordinance duly adopted by the tribe having jurisdiction over such area of Indian country, certified by the Secretary of the Interior, and published in the FEDERAL REGISTER.

Therefore, be it resolved that the introduction or possession of intoxicating beverages shall be lawful within the Indian country under the jurisdiction of the Fort Belknap Indian Community: *Provided*, That such introduction or possession is in conformity with the laws of Montana.

Be it further resolved that any tribal laws, resolutions or ordinances heretofore enacted which prohibits the introduction or possession of intoxicating beverages are hereby repealed.

ORME LEWIS,
*Assistant Secretary of the Interior.*

NOVEMBER 17, 1953.

[F. R. Doc. 53-9805; Filed, Nov. 20, 1953; 8:56 a. m.]

CHEYENNE RIVER SIOUX TRIBE OF SOUTH DAKOTA

ADOPTION OF FEDERAL INDIAN LIQUOR LAWS ON RESERVATION

Pursuant to the act of August 15, 1953 (Public Law 277, 83d Cong., 1st Sess.), I certify that the resolution designated as Resolution No. 99–53 was duly adopted by the Cheyenne River Sioux Tribe of South Dakota which has jurisdiction over the area of Indian country included in the resolution.

ORME LEWIS,
*Assistant Secretary of the Interior.*

NOVEMBER 17, 1953.

[Resolution No. 99–53]

Whereas, Public Law 277, repealing what is commonly known as the Indian Liquor Law, provides in part that the provisions of sections 1154, 1156, 3113, 3488 and 3618 of Title 18, United States Code, shall not apply within any area that is not Indian country, nor to any act or transaction within any area of Indian country provided such act or transaction is in conformity both with the laws of the State in which the act or transaction occurs and with an ordinance duly adopted by the tribe having jurisdiction over such area of Indian country, certified by the Secretary of the Interior, and published in the FEDERAL REGISTER;

Now, therefore, be it resolved, by the Cheyenne River Sioux Tribal Council, this 27th day of August, 1953, that from and after this date the sale, trade, transport or manufacture of intoxicating liquor and non-intoxicating beer or wine on the Cheyenne River Sioux Reservation shall be controlled by the provisions of the attached ordinances, subject to certification by the Secretary of the Interior, and publication in the FEDERAL REGISTER as provided by the said Public Law 277, and

Be it further resolved, that Section XXVIII—Liquor Violation—of Ordinance No. 9, Chapter V of the Code of Offenses of the Cheyenne River Sioux Tribal Court is hereby repealed, and

Be it further resolved, that in lieu of the said Section XXVIII, hereby repealed, there shall be inserted in the Code of Offenses, also numbered XXVIII, the following section:

SEC. XXVIII. *Drunken driving.* Any person who shall operate a motor vehicle while under the influence of intoxicating liquor shall be deemed guilty of an offense, and upon conviction thereof shall be sentenced to labor for a period not to exceed 60 days or to a fine not to exceed $100.00, or to both such imprisonment or fine, with costs, and upon any subsequent conviction of such offense shall, in addition to such imprisonment or fine, or both, be prohibited from operating a motor vehicle for a period of one year.

and,

Be it further resolved, that a supplemental section, numbered LIII, shall be added to the said Ordinance No. 9, Chapter V, of the Code of Offenses, to read as follows:

SEC. LIII. *Sale of intoxicating liquor to minors.* Any person, not covered by the provisions of the attached ordinances, who shall sell or give to any person under 21 years of age any intoxicating liquor, shall be deemed guilty of an offense, and upon conviction thereof shall be sentenced to labor for a period not to exceed 60 days, or to a fine not to exceed $100.00, or to both such imprisonment or fine, with costs.

*Certificate of Secretary.* I, Alice Bowker, the duly elected, qualified and acting secretary of the Cheyenne River Sioux Tribal Council, do hereby certify that the above resolution was duly adopted by the Cheyenne River Sioux Tribal Council, which is composed of 15 members of whom 14, constituting a quorum, were present at a meeting duly noticed, called, convened, and held at Cheyenne Agency, South Dakota, August 25, 26 and 27, 1953, by a vote of 11 for 0 against and 3 not voting.

ALICE BOWKER,
*Secretary,*
*Cheyenne River Sioux Tribal Council.*

[Ordinance No. ----]

CHAPTER XI—INTOXICATING LIQUORS

SECTION I. Any person, firm, company, association or corporation desiring to engage in the possession, sale, trade, transport or manufacture of intoxicating liquors on the Cheyenne River Sioux Reservation shall comply with the rules and regulations set forth in this ordinance.

SEC. II. *Granting of licenses.* Any person, firm, company, association or corporation authorized to sell, trade, transport or manufacture intoxicating liquors in the communities on the Reservation, or other designated place, shall make application in writing for a permit and present same to the Cheyenne River Sioux Tribal Council for approval.

SEC. III. *Payment of license fees.* Any person, firm, company, association or corporation authorized to sell, trade, transport or manufacture intoxicating liquor within the territorial limits of the Reservation on restricted or tribally owned or controlled land shall pay to the Tribal Treasurer in annual payments on January 1 of each calendar year, the following prescribed fees:

(a) For operating a plant distilling intoxicating liquors—two thousand dollars;

(b) For operating a wholesale liquor store—fifteen hundred dollars;

(c) For operating a package liquor store—one hundred dollars;

(d) For on sale dealers—one hundred and fifty dollars;

(e) For solicitors—twenty-five dollars.

(f) For transportation companies—twenty-five dollars;

(g) For clubs as on sale dealers—two hundred dollars;

(h) For dealers in high point beer, being on sale dealers under part (d) hereof.

SEC. IV. *Restrictions as to eligibility of licenses.* The granting of licenses under this ordinance shall be subject to the following restriction:

(a) No license under part (d) of section 3 hereof shall be granted where the applicant's place of business is within one hundred yards, measured by the regular and usual path of travel, of any door or exit of any school or church;

(b) No license shall be granted to operate on the campus of any educational institution, or within two hundred yards of the outside boundary thereof;

(c) No more than one license of any or different classes shall be issued to any one person except that:

1. Both an on sale and a package dealer's license may be granted to a club or a person operating a hotel, the respective business operated under such licenses to be conducted in disconnected rooms on the licensee's premises;

2. Three licenses under part (c) of section 3 hereof may be issued to the same person, the business under each to be operated in a separate town or community;

(d) Any licensee under parts (a), (b), (c), or (d) of section 3 hereof must be:

1. A resident of the Cheyenne River Reservation for more than one year next prior to application for such license;

2. A person of good moral character, never convicted of a felony;

3. The owner or actual lessee of the premises where the applicant intends to conduct business;

4. The sole owner of the business to be operated under the license.

SEC. V. *Period covered by license.* The period covered by licenses under section 3 hereof shall be from twelve o'clock noon on the thirty-first day of December to twelve o'clock noon on the thirty-first day of next December and the full fee shall be charged for any license for any part of such period.

SEC. VI. *License required.* It shall be unlawful for any person, firm, association or corporation to engage in, pursue, or transact any business in liquor traffic within the territorial limits of the Reservation on restricted or tribally owned or controlled land without first having a license therefor as herein provided. The Tribal Council shall not approve an application for such license unless the applicant agrees in writing to comply with the provisions of this ordinance.

SEC. VII. *Complying with laws and regulations.* Any person, firm, company, association or corporation licensed and operating a business within the territorial limits of the Reservation under the provisions of this ordinance shall comply with all laws and regulations as provided by the Code of Offenses of the Cheyenne River Sioux Tribal Court: *Provided*, That any person, firm, company, association or corporation proved to be charging excessive rates, or failing to comply with all the provisions of this ordinance, or otherwise indulging in practices detrimental to the economic and/or moral welfare of the tribe or its members shall have its license revoked.

SEC. VIII. *Transfer of license.* In the event a licensee under this ordinance transfers the ownership of his place of business to another person, firm, company, association or corporation, he may also transfer his license without additional cost to the parties concerned: *Provided*, That notice of intention of such transfer shall be filed with the Tribal Council not less than thirty days before the effective date of the transfer, and that record of such transfer shall be made with the Tribal Treasurer.

SEC. IX. *Restrictions on general conduct of business in intoxicating liquors.* Conduct of business authorized under this ordinance by licensees shall be subject to the following restrictions:

(a) No licensee under part (d) of section 3 of this ordinance shall make delivery of intoxicating liquor outside of his place of business.

(b) No licensee shall sell any intoxicating liquor:

1. To any person under the age of twenty-one year;

2. To any person who is intoxicated at the time, or who is known to the seller to be an habitual drunkard;

3. To any person to whom the seller has been requested in writing not to make such sale, where such request is by the Tribal Council, any police or peace officer, or the husband, wife, mother, father, brother, sister, or child of the person;

4. To any spendthrift, insane, or feeble-minded person.

5. To any person who is known to be the object of charity, or is known to be supported by any charitable association or institution.

(c) No licensee of any class shall sell, serve, or allow to be consumed on the premises covered by the license, intoxicating liquor other than in the hours permitted by his license;

(d) No licensee under parts (d), (g), and (h) of section 3 hereof shall sell, serve, or allow to be consumed on the premises covered by the license, intoxicating liquor between the hour of two o'clock a. m. and the hour of seven o'clock a. m. of any day, and no licensee under part (c) of section 3 hereof shall sell intoxicating liquor between the hour of ten o'clock p. m. and the hour of seven o'clock a. m. of the following day except on Saturday when no intoxicating liquor shall be sold under such license between the hour of twelve o'clock midnight and the hour of seven o'clock a. m. of the following day, and no licensee of any class shall sell intoxicating liquor on Sunday, Memorial Day, or on any general or special election day, until after the close of the polls on such election day;

(e) No licensee under part (d) of section 3 hereof shall be permitted to serve intoxicating liquor except on the premises authorized by his license. The view through the windows of such premises shall be completely unobstructed either by curtains, advertising, window glazing, or any other obstruction whatsoever, and no intoxicating liquor shall be served in any booth wherein all the occupants are not within full view of the bartender, or other person in charge of the establishment, and observable from all points in the said room, and that no license shall allow any game of skill or chance or dancing or athletic contest, or other form of amusement or recreation on said premises, or permit any slot machine or other like devices in or about the licensed premises;

(f) No on sale licensee shall permit any person less than twenty-one years old on the premises where the business under the license is authorized, except when such person is in the company of his parent or guardian;

(g) No licensee of any class shall permit any intoxicated person to enter the premises where the business under the license is authorized or to become intoxicated thereon or therein;

(h) No licensee under parts (d), (g), and (h) of section 3 hereof shall be permitted to serve patrons who are not seated, nor will patrons be permitted to move drinks from one part of the room to another, and it shall be the responsibility of the bartender, or person in charge of the establishment, to assure compliance with this provision.

SEC. X. *Sale of used containers prohibited.* No person shall buy or sell any package which has previously contained intoxicating liquor sold under the provisions of this ordinance, or refill any such package: *Provided, however*, That this section shall not apply to beer containers.

SEC. XI. *High point beer.* A license under part (h) of section 3 hereof is authorized to operate as both a package dealer and an on sale dealer in high point beer, and in no other intoxicating liquor.

SEC. XII. *Scope of ordinance.* The provisions of this ordinance, unless the context otherwise clearly requires, shall be construed to relate only to intoxicating liquor, and not to non-intoxicating beer or wine.

SEC. XIII. *Definitions.* Terms used in this ordinance, unless the context otherwise plainly requires, shall mean:

(a) "Intoxicating liquor", any liquid, either commonly used, or reasonably adapted to use, for beverage purposes, and containing in excess of three and two-tenths per centum of alcohol by weight;

(b) "Reservation", any restricted Indian land, whether tribally or individually owned, contained within the original boundaries of the Cheyenne River Reservation as defined and described by the Act of March 2, 1889.

(c) "High point beer", any beer having an alcoholic content in excess of three and two-tenths per centum by weight, and not in excess of six per centum by weight;

(d) "Distiller", any person who owns, or who himself or through others, directly or indirectly, operates or aids in operating any distillery or other establishment for the production, rectifying, blending or bottling of intoxicating liquor other than high point beer;

(e) "Sale", the transfer, for a consideration, of title to any alcoholic beverage;

(f) "Package", the bottle or immediate container of any alcoholic beverage;

(g) "Off sale", the sale of any alcoholic beverage for consumption off the premises where sold;

(h) "On sale", the sale of any alcoholic beverage for consumption only upon the premises where sold;

(i) "Wholesaler", any person who sells alcoholic beverages to retailers for resale;

(j) "Retailer", any person who sells alcoholic beverages for other than resale;

(k) "Hotel", any building wherein is regularly and continuously conducted a hotel business, with its lobby or office on the ground floor, with an adequate staff for the conduct of its business, and which maintains for the accommodation of patrons at least ten rooms, and which maintains as an integral part thereof, or attached thereto, a dining room or cafe, with appropriate facilities for seating at least twenty persons at one time;

(l) "Club", any organization duly licensed by the Tribal Council for civic, fraternal, or business purposes, or for intellectual improvement, or for promotion of sports, which club has more than twenty-five members and has for more than one year owned or leased a building or portion thereof adequate for the accommodation of its members and whose affairs and management are conducted by a board of directors or similar body chosen by its members and none of whose members, officers, agents, or employees, directly or indirectly, received any profit from sale of beverages other than a reasonable salary;

(m) "Transportation company", any common carrier or operator of a private vehicle transporting or accepting for transportation any intoxicating liquor, but not including transportation by carriers in interstate commerce where the shipment originates outside of the reservation and is destined to a point outside of the reservation;

(n) "Solicitor", any person employed by a licensed wholesaler within or without the reservation, or by any distiller or manufacturer within or without the reservation, who solicits orders of intoxicating liquor from wholesale or retail dealers within the reservation;

SEC. XIV. *Licensee whose license has been revoked; ineligible for one year.* Any licensee under this ordinance, whose license is

revoked under section 7 hereof, shall not for a year thereafter be granted any license under this ordinance. When within such year application for a license is made by any member of the family of any such former licensee, or any of his employees or former employees, the license may be granted only upon affirmative and satisfactory proof that such former licensee will have no interest whatsoever in the business.

SEC. XV. *Conformity to state laws and regulations.* In any matters relating to the sale, trade, transport or manufacture of intoxicating liquor on the reservation that are not covered by this ordinance, the laws and regulations of the State of South Dakota governing such sale, trade, transport and manufacture of intoxicating liquor shall be applicable on the reservation: *Provided, however,* That the Tribal Council shall maintain jurisdiction and administration.

[Ordinance No. ----]

XII—NON-INTOXICATING LIQUOR

SECTION I. Any person, firm, company, association or corporation desiring to engage in the possession, sale, trade, transport or manufacture of non-intoxicating beer or wine on the Cheyenne River Sioux Reservation shall comply with the rules and regulations set forth in this ordinance.

SEC. II. *Granting of licenses.* Any person, firm, company, association, or corporation authorized to sell, trade, transport, or manufacture non-intoxicating beer or wine in the communities on the Reservation, or other designated place, shall make application in writing for a permit and present same to the Cheyenne River Sioux Tribal Council for approval.

SEC. III. *Payment of license fees.* Any person, firm, company, association, of corporation authorized to sell, trade, transport or manufacture non-intoxicating beer or wine within the territorial limits of the Reservation on restricted or tribal owned and controlled land shall pay to the Tribal Treasurer in annual payment on January 1 of each calendar year, the following prescribed fees:

(a) For manufacturers—one hundred and twenty-five dollars;

(b) For wholesalers—one hundred dollars;

(c) For package dealers — twenty-five dollars;

(d) For retail dealers, being both package dealers and on sale dealers, forty dollars;

(e) For operating a concession, such as at a rodeo, fair, 4th of July celebration, etc., a fee of not less than $50.00 in addition to the regular fee of $40.00 for retail dealers under part (d) hereof: *Provided*, That concessions at such public gatherings may be operated upon a percentage basis at the option of the Tribal Council, or its authorized representative.

SEC. IV. *Restrictions on eligibility of licensees.* The granting of licenses under this ordinance shall be subject to the following restrictions.

(a) Any individual applicant for a license must be a resident of the Cheyenne River Reservation for more than a year next prior to application for such license;

(b) Any applicant for a license must be the owner or actual lessee of premises where the business is to be conducted, and the sole owner of the business to be operated under such license;

(c) Such premises must conform to all the laws, health and fire regulations applicable thereto, and be a safe and proper place.

SEC. V. *Period covered by license.* The period covered by license shall not exceed one year and shall expire at midnight on the next thirty-first of December following the date on which it becomes effective, and the full fee shall be charged for any license for a portion of such period.

SEC. VI. *Restrictions on general conduct of business in non-intoxicating beer or wine.* Conduct of business under this ordinance shall be subject to the following restrictions.

(a) No licensee shall manufacture, bottle, transport, or sell any non-intoxicating beer or wine except from the premises specifically designated or described in his license;

(b) No non-intoxicating beer or wine shall be sold by any dealer licensed under parts (a) and (b) of section 2 hereof in a package or bulk container of less than seventy-two fluid ounces;

(c) No licensee shall sell or give to any person who is less than eighteen years old, non-intoxicating beer or wine;

(d) No licensee under parts (c) and (d) of section 2 hereof shall sell, serve, or allow to be consumed on the premises covered by the license, any non-intoxicating beer or wine between the hours of two o'clock a. m. and seven o'clock a. m. of any day, or on any general or special election day until after the close of the polls on such election day.

SEC. VII. *Scope of ordinance.* The provisions of this ordinance, unless the context otherwise clearly requires, shall be construed to relate only to non-intoxicating beer or wine, and not to intoxicating liquor.

SEC. VIII. *Definitions.* Terms used in this ordinance, unless the context otherwise plainly requires, shall mean:

(a) "Non-intoxicating beer", any liquid either commonly used, or reasonably adapted to use, for beverage purposes, and which is produced wholly or in part from brewing of any grain or grains, malt or malt substitutes, and which contains any alcohol whatsoever, but not more than three and two-tenths per centum by weight;

(b) "Non-intoxicating wine," any liquid other than beer, either commonly used, or reasonably adapted to use, for beverage purposes, and containing alcohol by weight to the extent of more than one-half of one per centum and not more than three and two-tenths per centum;

(c) "Reservation," any restricted Indian land, whether tribally or individually owned, contained within the original boundaries of the Cheyenne River Sioux Reservation as defined and described by the Act of March 2, 1889;

(d) "Manufacturer," any person who owns, or who himself or through others, directly or indirectly, operates or aids in operating any establishment for the brewing, production, bottling, or blending of non-intoxicating beer or wine, or high point beer;

(e) "Sale," the transfer, for a consideration, of title to any alcoholic beverage;

(f) "Package," the bottle or immediate container of any alcoholic beverage;

(g) "Bulk container," any package, or any container, within which container are one or more packages;

(h) "Off sale," the sale of any alcoholic beverage, for consumption off the premises where sold;

(i) "On sale," the sale of any alcoholic beverage for consumption only on the premises where sold;

(j) "Wholesaler," any person who sells alcoholic beverage to retailers for resale;

(k) "Retailer," any person who sells alcoholic beverages for other than resale;

(l) "Package dealer," any person other than a distiller, manufacturer, or wholesaler, who sells, or keeps for sale, any alcoholic beverage for consumption off the premises where sold;

(m) "On sale dealer," any person who sells, or keeps for sale, any alcoholic beverage for consumption on the premises where sold;

SEC. IX. *License required.* It shall be unlawful for any person, firm, company, association or corporation to engage in, pursue, or transact any business in non-intoxicating beer or wine within the territorial limits of the Reservation on restricted or tribally owned or controlled land without first having obtained a license therefor as herein provided. The Tribal Council shall not approve an application for such license unless the applicant agrees in writing to comply with the provisions of this ordinance.

SEC. X. *Complying with laws and regulations.* Any person, firm, company, association or corporation licensed and operating a business within the territorial limits of the Reservation under the provisions of this ordinance shall comply with all laws and regulations as provided by the Code of Offenses of the Cheyenne River Sioux Tribal Court: *Provided*, That any person, firm, company, association or corporation proved to be charging excessive rates, or failing to comply with all the provisions of this ordinance, or otherwise indulging in practices detrimental to the economic and/or moral welfare of the tribe or its members shall have its license revoked.

SEC. XI. *Transfer of license.* In the event a licensee under this ordinance transfers the ownership of his place of business to another persons, firm, company, association or corporation, he may also transfer his license without additional cost to the parties concerned: *Provided*, That notice of intention of such transfer shall be filed with the Tribal Council not less than thirty days before the effective date of the transfer, and that record of such transfer shall be made with the Tribal Treasurer.

SEC. XII. *Licensee whose license has been revoked; ineligible for one year.* Any licensee under this ordinance, whose license is revoked under section 10 hereof, shall not for a year thereafter be granted any license under this ordinance. When within such year application for a license is made by any member of the family of any such former licensee, or any of his employees or former employees, the license may be granted only upon affirmative and satisfactory proof that such former licensee will have no interest whatsoever in the business.

SEC. XIII. *Conformity to state laws and regulations.* In any matters relating to the sale, trade, transport or manufacture of non-intoxicating beer or wine on the Reservation that are not covered by this ordinance, the laws and regulations of the State of South Dakota governing such sale, trade, transport, and manufacture of non-intoxicating beer or wine shall be applicable on the reservation: *Provided, however,* That the Tribal Council shall maintain jurisdiction and administration.

The following special learner certificates were issued to the school-operated industries listed below:

Oak Park Academy, Nevada, Iowa, effective 9-1-53 to 8-31-54; print shop—compositor, pressman and related skilled and semi-skilled occupations; 5 learners; 350 hours at 60 cents per hour, 325 hours at 65 cents per hour, 325 hours at 70 cents per hour; broom shop—broom maker (winder) stitcher, sorter, and related skilled and semiskilled occupations; 8 learners; 150 hours at 60 cents per hour, 125 hours at 65 cents per hour, 125 hours at 70 cents per hour.

The following special learner certificates were issued in Puerto Rico to the companies hereinafter named. The effective and expiration dates, the number of learners, the learner occupations, the length of the learning period and the learner wage rates are indicated, respectively.

Garrou, Inc., Cidra P. R., effective 11-2-53 to 5-1-54; 12 learners. Knitting, 240 hours at 30 cents an hour, 240 hours at 35 cents an hour; examining and inspecting, 240 hours at 30 cents an hour; looping, 480 hours at 30 cents an hour, 480 hours at 35 cents an hour; seaming, 480 hours at 30 cents an hour, 480 hours at 35 cents an hour; mending, 480 hours at 30 cents an hour, 480 hours at 35 cents an hour (full-fashioned hosiery).

Maremont Manufacturing Corp., Bayamon, P. R., effective 11-2-53 to 5-1-54; 30 learners. All factory production operations involved in the manufacture of leaf springs, 160 hours at 32 cents an hour, 160 hours at 40 cents an hour, 160 hours at 47 cents an hour (leaf springs for motor vehicles).

Each certificate has been issued upon the employer's representation that employment of learners at subminimum rates is necessary in order to prevent curtailment of opportunities for employment, and that experienced workers for the learner occupations are not available. The certificates may be cancelled in the manner provided in the regulations and as indicated in the certificates. Any person aggrieved by the issuance of any of these certificates may seek a review or reconsideration thereof within

fifteen days after publication of this notice in the FEDERAL REGISTER, pursuant to the provisions of Part 522.

Signed at Washington, D. C., this 9th day of November 1953.

MILTON BROOKE,
*Authorized Representative of the Administrator.*

## DEPARTMENT OF AGRICULTURE

### Commodity Credit Corporation

SALES OF CERTAIN COMMODITIES AT FIXED PRICES

NOVEMBER 1953 DOMESTIC AND EXPORT PRICE LISTS

Pursuant to the Pricing Policy of Commodity Credit Corporation issued March 22, 1950, as amended January 9, 1953 (15 F. R. 1593, 18 F. R. 176), and subject to the conditions stated therein, the following commodities are available for sale in the quantities and at the prices stated:

NOVEMBER 1953 EXPORT PRICE LIST

| Commodity and approximate quantity available (subject to prior sale) | Export price list |
|---|---|
| Cottonseed oil, refined, 801,000,000 pounds.[1] | Bid basis f. o. b. tank cars or tank wagons at points of storage locations. Available New Orleans PMA Commodity office. |
| Cottonseed oil, crude, 25,000,000 pounds.[1] | Bid basis f. o. b. tank cars or tank wagons at producer's mills. Available New Orleans PMA Commodity office. |
| Linseed oil, raw, 143,000,000 pounds.[1] | Bid basis f. o. b. tank cars at points of storage locations. Available Chicago, Dallas, New Orleans, Portland, and Minneapolis PMA Commodity offices. |
| Olive oil, edible, 202,825 gallons [1] | Bid basis in 50/55 gallon drums f. o. b. points of storage locations. Available Portland PMA Commodity office. |
| Peanuts, shelled, bagged (for crushing), approximately 10,000 short tons. | Bid basis, f. a. s. vessel at specified ports, subject to terms and conditions of USDA Announcement FO-28/55. Peanuts may be 1953 crop peanuts acquired by calling loans, as well as CCC stocks from previous crops. (These peanuts are also available as farmer's stock for export on bid basis, f. o. b. points of storage locations subject to the terms and conditions of USDA Announcements CCC Peanut Forms 34 and 40.) Additional quantities of peanuts for export will be announced as available under separate announcements. Available Fats and Oils Branch, Production and Marketing Administration, USDA, Washington 25, D. C., and New Orleans PMA Commodity office. |
| Corn, bulk, 50,000,000 bushels [1] | Market price on date of sale at point of delivery, provided delivery takes place with 15 days unless otherwise agreed upon. |

[1] These same lots also are available at domestic sales prices announced today.

NOVEMBER 1953 DOMESTIC PRICE LIST

| Commodity and approximate quantity available (subject to prior sale) | Domestic sales price |
|---|---|
| Nonfat dry milk solids, in carload lots only, 340,000,000 pounds, spray; 75,000,000 pounds, roller. | Spray process, U. S. Extra Grade, 17 cents per pound; roller process, U. S. Extra Grade, 15 cents per pound. Prices apply "in store" at location of stocks in any State. ("In store" means at the processor's plant or in storage at warehouse, but with any prepaid storage and outhandling charges for the benefit of the buyer.) |
| Salted creamery butter (in carload lots only), 260,000,000 pounds. | U. S. Grade A and higher: All States except those listed below, 68.75 cents per pound. New York, New Jersey, Pennsylvania, New England, and other States bordering the Atlantic Ocean and Gulf of Mexico, 69.50 cents per pound. California, Oregon, and Washington: 69.75 cents per pound. U. S. Grade B: 2 cents per pound less than Grade A prices. Prices apply "in store" at location of stocks in those States where butter is stored. ("In store" means at the processor's plant or warehouse but with any prepaid storage and outhandling charges for the benefit of the buyer.) |
| Cheddar cheese, cheddar and twin styles (standard moisture basis, in carload lots only, 260,000,000 pounds. | U. S. Grade A and higher: All States except those listed below: 39 cents per lb. New York, New Jersey, Pennsylvania, New England, and other States bordering the Atlantic and Pacific Oceans and Gulf of Mexico: 40 cents per pound. U. S. Grade B: 1 cent per pound less than Grade A prices. Prices apply "in store" at location of stocks in those States where cheese is stored. All prices are subject to usual adjustment for moisture content. ("In store" means at the processor's plant or warehouse but with any prepaid storage and outhandling charges for the benefit of the buyer.) |
| Cottonseed oil, refined, 801,000,000 pounds.[1] | Market price but not less than the minimum crude price, with appropriate adjustments for refining, location and quality f. o. b. tankcars or tank wagons at points of storage locations. Available New Orleans PMA Commodity office. Prices will not be reduced during period ending June 30, 1954. |
| Cottonseed Oil, Crude 25,000,000 pounds.[1] | Market price but not less than 14 cents per pound, prime, Valley basis, f. o. b. tank cars or tank wagons at producer's mills subject to premiums or discounts comparable to Bulletin 3 of the 1953 crop cottonseed price support program. Available New Orleans PMA Commodity office. Price will not be reduced during period ending June 30, 1954. |
| Linseed oil, raw, 143,000,000 pounds.[1] | Market price on date of sale, but not less than equivalent of the price support for the seed. Price will not be reduced during period ending May 31, 1954. Available Chicago, Dallas, New Orleans, Portland, and Minneapolis PMA Commodity offices. |
| Olive oil, edible, 202,825 gallons [1] | Market price or $2.95 per gallon in 55-gallon drums, whichever is higher, f. o. b. points of storage locations. Available Portland PMA Commodity office. |
| Peanuts—Farmer's stock: Virginia type, bagged, 1951 crop, 8,000 tons, 1952 crop, 9,000 tons. Spanish: 1952 crop, 3,000 tons. Runners: 1952 crop, 19,000 tons. | Bid basis, f. o. b. points of storage locations, subject to the terms and conditions of Announcement CCC Peanut Form 40. In addition, farmer's stock peanuts from CCC Stocks including any 1953 crop peanuts acquired by calling loans, may be offered under separate announcement for domestic crushing subject to the terms and conditions of CCC Peanut Form 34. Available New Orleans PMA Commodity office. |
| Dry edible beans | On all beans, for areas other than those shown below, adjust price upward or downward by an amount equal to the price support program differential between areas. Where no price support differential occurs, the prices listed apply. For other grades of all beans, adjust by market differentials. Prices listed below, on all beans, are at point of production. Amount of paid-in freight to be added, as applicable. |
| Large lima, bagged, 1952 crop, 371,838 hundredweight. Baby lima, bagged 1950 and 1951 crops, 69,718 hundredweight. | $12.65 per 100 pounds for U. S. No. 1 basis, California points of production. Available Portland PMA Commodity office. |
| Seeds | The market price but not less than: $7.10 per hundredweight for U. S. Extra No. 1; $7 per hundredweight for U. S. No. 1; $6.75 per hundredweight for U. S. No. 2. All prices f. o. b. California points of production. Available Portland PMA Commodity office. |
| Common and Willamette Vetch seed, bagged, 149,360 hundredweight. | On all seeds except ladino: Offers will not be accepted for less than the minimum carlot weight as prescribed by railroad carrier's regulation at point of storage. However, if quantity available at any location is less than carlot, offers will be accepted for the entire lot. |
| | $6 per 100 pounds, f. o. b. point of production, plus any paid-in freight as applicable basis current freight rate at time of sale. Available Dallas, Portland and New Orleans PMA Commodity offices. |

[2] These same lots also are available at export sales prices announced today.

| Commodity and approximate quantity available (subject to prior sale) | Domestic sales price |
|---|---|
| Tall Fescue seed (certified), bagged, 55,295 hundredweight. | $20.75 per 100 pounds, f. o. b. area of production, plus any paid-in freight as applicable basis current freight rate at time of sale. Price will not be reduced during period ending June 30, 1954. Available Portland and Minneapolis PMA Commodity offices. |
| Oats, bulk (for feed only), 900,000 bushels. | Market price for feed, basis in store. Available Portland, Minneapolis, Kansas City, Minneapolis, and New Orleans PMA Commodity offices. |
| Corn, bulk, 50,000,000 bushels [1] | At point of production basis in store, the market price but not less than the applicable 1953 county loan rate for No. 3 yellow plus (1) 17 cents per bushel if received by truck, or (2) 13 cents per bushel if received by rail or barge. At other locations, the foregoing plus average paid-in freight. Examples of minimum prices per bushel: Chicago, No. 3 yellow, $1.91; St. Louis, No. 3 yellow, $1.96; Minneapolis, No. 3 yellow, $1.82; Omaha, No. 3 yellow, $1.81; Kansas City, No. 3 yellow, $1.80. For other classes, grades and quality. |
| Grain sorghums, bulk (for feed only), 1,800 hundredweight. | Market price for feed, basis in store. Available Minneapolis, Dallas and Kansas City PMA Commodity offices. |
| Rye, bulk (for feed only), 123,000 bushels. | Market price for feed, basis in store. Available Minneapolis PMA Commodity office. |
| Flaxseed, bulk (for crushing only), 1,192,000 bushels. | Loan basis in export lots in Minneapolis area, basis in store, at the market price. Available Minneapolis PMA Commodity office. |
| Soybeans, bulk (for crushing only), 1,192,000 bushels. | Market price. Available Chicago, Minneapolis, Kansas City, New Orleans, and Dallas PMA Commodity offices. |
| Cottonseed (meal and pellets, bulk (1953 production), 15,000 short tons. | Market price as determined by CCC, but not less than $47.50 per short ton Valley basis with differentials for quality and by area as provided for in § 81.917 of Part Cottonseed Bulletin 3, Revision 1, as amended. Price will not be reduced during period ending December 31, 1954. Information concerning quantity and locations can be secured from the New Orleans PMA Commodity office. |
| Wool, shorn and pulled grease (including some scoured), 97,500,000 pounds. | Sales of wool will be made at prices reflecting the higher of the market price or 103 percent of the price support appraised value per pound plus an allowance for sales commission on wool, Boston basis, adjusted for net freight on wool stored outside the Boston storage area. Sales will be made ex-warehouse where the wool is stored. Available Boston PMA Commodity office. |

The above prices will not be applicable to sales made in connection with drought relief programs carried out in disaster areas.

[1] These same lots also are available at export sales prices announced today.

(Sec. 407, 63 Stat. 1051.)

Issued: November 17, 1953.

## Production and Marketing Administration

PEANUTS

NOTICE OF REDELEGATION OF FINAL AUTHORITY BY NEW MEXICO STATE PRODUCTION AND MARKETING ADMINISTRATION COMMITTEE

Section 729.530 of the Marketing Quota Regulations for the 1954 Crop of Peanuts (18 F. R. 6372), issued pursuant to the marketing quota provisions of the Agricultural Adjustment Act of 1938, as amended (7 U. S. C. 1301-1376), provides that any authority delegated to the State Production and Marketing Administration Committee by the regulations may be redelegated by the State committee. In accordance with section 3 (a) (1) of the Administrative Procedure Act (5 U. S. C. 1002 (a)), which requires delegations of final authority to be published in the FEDERAL REGISTER, there are set out herein the redelegations of final authority which have been made by the New Mexico State Production and Marketing Administration Committee by authority vested in such committee by the Secretary of Agriculture in the regulations referred to above. Shown below are the sections of the reg-

ulations in which such authority appears and the person to whom the authority has been redelegated:

NEW MEXICO

Sections 729.517 (b) (5), 729.518, 729.519, 729.522 (a), 729.524 (c), 729.527 (a), and 729.528—Donald W. Vance and W. C. Hutchins, Jr., Administrative Assistants of the State PMA Office.

(Sec. 375, 52 Stat. 66, as amended; 7 U. S. C. 1375. Interpret or apply secs. 301, 358, 359, 361-368, 373, 374; 52 Stat. 38, 62, 65, as amended, 55 Stat. 88, as amended; 66 Stat. 27; 7 U. S. C. 1301, 1358, 1359, 1361-1368, 1373, 1374)

Issued at Washington, D. C., this 17th day of November 1953.

[SEAL] HOWARD H. GORDON,
*Administrator, Production and Marketing Administration.*

## SECURITIES AND EXCHANGE COMMISSION

[File No. 70-3145]

ATTLEBORO STEAM AND ELECTRIC CO. ET AL.

ORDER AUTHORIZING ISSUE AND SALE OF SHORT-TERM UNSECURED PROMISSORY NOTES TO BANKS AND TO PARENT COMPANY

NOVEMBER 17, 1953.

In the matter of Attleboro Steam and Electric Company, Haverhill Electric Company, The Lowell Electric Light Corporation, Weymouth Light and Power Company, Worcester County Electric Company, New England Electric System, File No. 70-3145.

New England Electric System ("NEES"), a registered holding company, and its above named subsidiary companies, hereinafter individually referred to as "Attleboro," "Haverhill", "Lowell", "Weymouth", and "Worcester" and collectively referred to as "the borrowing companies", having filed a joint application-declaration with this Commission pursuant to sections 6 (a), 7, 9 (a), 10 and 12 (f) of the Public Utility Holding Company Act of 1935 ("the act") and Rules U-23, U-42 (b) (2), U-43 (a), U-45 (b) (1) and U-50 (a) (2) and (3) promulgated thereunder with respect to the following proposed transactions:

Lowell and Worcester propose to issue to banks, from time to time but not later than December 31, 1953, unsecured promissory notes in the respective amounts of $200,000 and $3,500,000. Attleboro, Haverhill and Weymouth propose to issue to NEES, from time to time but not later than December 31, 1953, unsecured promissory notes in the respective amounts of $75,000, $100,000 and $150,000.

Each of such notes to be issued to NEES will mature on April 1, 1954, and each of the notes to be issued to banks will mature six months after the issue date thereof. Such notes will bear interest at the prime rate of interest at the time of the issuance thereof. It is stated that said prime interest rate at the present time is 3¼ percent.

According to the application-declaration, the proceeds derived from the proposed additional notes will be used for the payment of note indebtedness and construction and other purposes.

Each of the borrowing companies has stipulated that if any permanent financing is done prior to the maturity date of its then outstanding unsecured promissory notes, the proceeds derived therefrom will be applied in reduction of, or in total payment of, notes then outstanding, and the amount of then authorized but unissued promissory notes will be reduced by the amount, if any, by which such permanent financing exceeds the amount of the then outstanding unsecured promissory notes. At the present time Worcester has pending before the Commission an application-declaration (identified by File No. 70-3135) in which it seeks authority to issue 75,000 shares of $100 par value cumulative preferred stock (See Holding Company Act Release No. 12177). Worcester has stipulated that if said sale of preferred stock is approved by the Commission and the proceeds therefrom are available prior to November 30, 1953, Worcester will relinquish all right to issue the $3,500,000 of notes proposed in the instant application-declaration.

The application-declaration states that incidental services in connection with the proposed note issues will be performed at cost by New England Power Service Company, an affiliated service company, such cost being estimated not to exceed $100 for NEES and each borrowing company, or an aggregate of $600.

The application-declaration further states that no State commission and no Federal commission, other than this Commission, has jurisdiction over the proposed transactions.

NEES and the borrowing companies request that the Commission's order herein become effective forthwith upon issuance.

Due notice having been given of the filing of the application-declaration, and a hearing not having been requested or ordered by the Commission; and the Commission finding that the applicable provisions of the act and the rules promulgated thereunder are satisfied and that no adverse findings are necessary; and deeming it appropriate in the public interest and in the interest of investors and consumers that said application-declaration be granted and permitted to become effective forthwith, without the imposition of terms and conditions other than those prescribed in Rule U-24:

*It is ordered*, Pursuant to Rule U-23 and the applicable provisions of the act, that said application-declaration be granted and permitted to become effective forthwith, subject to the terms and conditions prescribed in Rule U-24.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
*Secretary.*

[F. R. Doc. 53-9815; Filed, Nov. 20, 1953; 8:48 a. m.]

[File No. 70-3146]

DELAWARE POWER & LIGHT CO.

ORDER AUTHORIZING ISSUANCE AND SALE OF SHARES OF COMMON STOCK

NOVEMBER 17, 1953.

Delaware Power & Light Company ("Delaware"), a registered holding company and a public utility operating company, having filed a declaration with this Commission pursuant to section 7 of the Public Utility Holding Company Act of 1935 ("act") and rules thereunder with respect to the following proposed transactions:

Delaware proposes to issue and sell 232,520 shares of its Common Stock, par value $13.50 per share, and in addition to sell such shares, but not in excess of 23,252 shares, as may be purchased for the purpose of stabilizing the price of the common stock. The 232,520 shares of common stock will be offered to stockholders in accordance with their preemptive rights and upon the basis of one share for each seven shares. Transferable warrants evidencing the right to subscribe will be issued to common stockholders of record as of the close of business on November 25, 1953. Subject to such rights of the stockholders, the stock will also be offered to employees of Delaware and its subsidiaries in an amount not exceeding 150 shares per employee. The balance, if any, of the stock not subscribed for by holders of warrants and employees will be sold to underwriters.

The Board of Directors of Delaware will, not later than 12:00 o'clock noon on November 23, 1953, determine the offering price of the stock to stockholders and to employees, which price will be specified in the bids submitted by underwriters as the price to be paid the company for any unsubscribed stock. Immediately following determination by the Board of Directors of such offering price, notice of the price will be given to prospective bidders and will be publicly announced by the company. Bids for the unsubscribed stock will specify the compensation to be paid the underwriters.

Delaware proposes that, for the purpose of stabilizing the price of its common stock, it may purchase up to 23,252 shares of its common stock on the New York Stock Exchange, the Philadelphia-Baltimore Stock Exchange, in the over-the-counter market, or otherwise. Such stabilization, if commenced, will be terminated not later than the time fixed for the acceptance of a bid for the purchase of the unsubscribed stock. Shares acquired by Delaware as a result of such stabilization will be included as part of the unsubscribed stock which will be sold to the underwriters.

Delaware requests that the period between the publication of the invitation for bids which it expects will take place on November 18, 1953, and the time of opening of bids be shortened to seven days in order that bids for the stock may be opened on November 25, 1953.

The net proceeds from the proposed sale of common stock will be used to finance a portion of the construction program of Delaware and its two subsidiaries which, it is contemplated, will require expenditure of approximately $30,000,000 in 1953 and 1954.

The issuance of the warrants and the issuance and sale of the 232,520 shares of common stock was approved by the Public Service Commission of Delaware by order dated October 15, 1953. Delaware requests that the Commission's orders entered herein become effective upon the issuance thereof.

Due notice having been given of the filing of the declaration, and a hearing not having been requested of or ordered by the Commission; and the Commission finding that the applicable provisions of the act and rules promulgated thereunder are satisfied and that no adverse findings are necessary, and deeming it appropriate in the public interest and the interest of investors and consumers that said declaration be permitted to become effective forthwith, all subject to the terms and conditions specified below:

*It is ordered*, Pursuant to the applicable provisions of the act and the rules thereunder, that said declaration be, and the same hereby is, permitted to become effective forthwith, and that for the purposes of this proceeding the ten-day period for the invitation of bids, as prescribed by Rule U-50, be, and the same hereby is, shortened to a period of not less than seven days, all subject, however, to the provisions of Rule U-24 and to the following terms and conditions:

(1) That the proposed issue and sale of said stock shall not be consummated until the results of competitive bidding shall have been made a matter of record in this proceeding and a further order entered by this Commission on the basis of the record so supplemented, which order may contain such terms and conditions, if any, as may then be deemed appropriate, jurisdiction being reserved for this purpose; and

(2) That jurisdiction be reserved with respect to the payment of all fees and expenses in connection with the proposed transactions, including fees and expenses of counsel for the successful bidders.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[File No. 70-3148]

NARRAGANSETT ELECTRIC CO. AND NEW ENGLAND ELECTRIC SYSTEM

NOTICE OF PROPOSED ISSUANCE AND SALE OF COMMON STOCK BY SUBSIDIARY TO PARENT COMPANY

NOVEMBER 17, 1953.

Notice is hereby given that New England Electric System ("NEES"), a registered holding company, and The Narragansett Electric Company ("Narragansett"), a wholly-owned subsidiary of NEES, have filed a joint application, pursuant to the Public Utility Holding Company Act of 1935 ("the act"), designating sections 6 (b), 9 and 10 of the act and Rule U-42 (b) (2) promulgated thereunder as applicable to their proposed transactions, which are summarized as follows:

Under a contract dated October 27, 1953, Narragansett proposes to issue and sell to NEES, prior to April 1, 1954, 100,000 additional shares of $50 par value common stock at the price of $50 per share. It is indicated that such sale is proposed in order to provide Narragansett with new money required to finance, in part, its 1954 construction program. The proceeds derived from the sale of the common stock will be applied by Narragansett to the payment of its then outstanding short-term note indebtedness and any balance will be used for construction or to reimburse its treasury therefor.

The issue and sale of the common stock is subject to the jurisdiction of the Public Utility Administrator, Department of Business Regulation of the State of Rhode Island in which state Narragansett is organized and doing business.

The expenses to be incurred in connection with said transactions are estimated at $12,500 for Narragansett and $300 for NEES.

Applicants request that the Commission's order be made effective upon issuance.

Notice is further given that any interested person may, not later than December 2, 1953 at 5:30 p. m., e. s. t., request the Commission in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request and the issues of fact or law, if any, raised by the said joint application which he desires to controvert, or may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C. At any time after said date, said application, as filed or as amended, may be granted as provided in Rule U-23 of the rules and regulations promulgated under the act, or the Commission may exempt such transactions as provided in Rule U-20 (a) and Rule U-100 thereof.

By the Commission.

[File No. 70-3149]

NARRAGANSETT ELECTRIC CO.

NOTICE OF FILING REGARDING SALE OF PREFERRED STOCK AT COMPETITIVE BIDDING

NOVEMBER 17, 1953.

Notice is hereby given that an application-declaration has been filed with this Commission, pursuant to the Public Utility Holding Company Act of 1935 ("the act"), by the Narragansett Electric Company ("Narragansett"), a subsidiary of New England Electric System ("NEES"), a registered holding company. The applicant-declarant has designated sections 6 (a) (2), 6 (b) and 7 (c) of the act and Rules U-42 (b) (2) and U-50 thereunder as applicable to the proposed transactions which are summarized as follows:

Narragansett proposes to issue and sell 150,000 shares of a new series of Preferred Stock of the par value of $50 per share. Such sale will be pursuant to the competitive bidding requirements of Rule U-50. The dividend rate (which shall be expressed in a multiple of 0.08 of 1 percent and not in excess of 6 percent) and the price, exclusive of accrued dividends, to be paid to Narragansett (which shall be not less than $100 and shall not exceed $102.75 per share) will be determined by competitive bidding. Bids will be received up to 12 noon on a date, not less than ten days nor more than thirty days after the date of the invitation for bids, which the company shall fix by giving notice at least forty-two hours in advance to each prospective bidder.

The proceeds from the proposed sale of preferred stock (exclusive of accrued dividends and the expenses of issuance) are to be applied to the payment of short-term note indebtedness presently outstanding in the aggregate of $6,250,000 and, according to the application-declaration may be outstanding in the aggregate amount of $7,450,000 at the time the preferred stock is sold, and the balance, if any, of the proceeds will be used to pay for capitalizable expenditures or to reimburse the treasury therefor.

According to Narragansett, the proposed issue and sale of preferred stock is subject to the jurisdiction of the Public Utility Administrator, Department of Business Regulation of the State of Rhode Island. Copies of the order of that State Commission are to be supplied by amendment.

The estimated fees submitted in respect of filing fees, taxes, services of New England Power Service Company, an affiliated service company, printing, independent public accountants, counsel for Narragansett and mailing and miscellaneous charges aggregate $60,000. Legal fees and expenses of underwriters' counsel are to be supplied by amendment.

It is requested that the Commission's orders entered herein become effective upon the issuance thereof.

Notice is further given that any interested person may, not later than December 2, 1953, at 5:30 p. m., e. s. t., request the Commission in writing that a hearing be held on such matter, stating the nature of his interest, the reason or reasons for such request and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C. At any time after said date, the application-declaration, as filed or as amended, may be granted and permitted to become effective as provided in Rule U-23 of the rules and regulations promulgated under the act, or the Commission may exempt such transactions as provided in Rules U-20 and U-100 thereof.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[File No. 70-3152]

NORTH CONTINENT UTILITIES CORP.

NOTICE OF PROPOSED LIQUIDATION AND DISSOLUTION OF REGISTERED HOLDING COMPANY AND PAYMENT OF LIQUIDATING DIVIDEND AND ORDER MAKING EFFECTIVE DECLARATION REGARDING PROXY MATERIAL

NOVEMBER 17, 1953.

Notice is hereby given that an application-declaration has been filed with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("act") by North Continent Utilities Corporation ("North Continent"), a registered holding company. Applicant-declarant has designated sections 11, 12 (c) and 12 (e) of the act and Rules U-23, U-24, U-46 and U-62 promulgated thereunder as applicable to the proposed transactions.

Notice is further given that any interested person may, not later than December 10, 1953, at 5:30 p. m., e. s. t., request the Commission in writing that a hearing be held on such matter, stating the reasons for such request, the nature of his interest and the issues of fact or law raised by said declaration which he desires to controvert, or may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C. At any time after December 10, 1953, said declaration, as filed or as amended, may be granted as provided in Rule U-23 of the rules and regulations promulgated under the act, or the Commission may exempt such transactions as provided in Rules U-20 (a) and U-100 thereof.

All interested persons are referred to said application-declaration which is on file in the office of this Commission for a statement of the transactions therein proposed, which are summarized as follows:

The Commission has heretofore directed North Continent in proceedings under section 11 (b) of the act to liquidate and dissolve (North Continent Utilities Corporation, File Nos. 54-74 and 59-69), and North Continent now has one remaining subsidiary, Great Northern Gas Company, Ltd., an Ontario corporation.

Pursuant to prior authorization of the Commission under Rule U-44 (c), North Continent, under date of October 20, 1953, entered into a contract with Alberta Consolidated Gas Utilities Limited, whereby the latter agreed to purchase North Continent's entire interest in Great Northern Gas Company, Limited, at a price of $533,639, plus an amount equal to interest on certain notes and advances from August 1, 1953, to the closing date. The closing date is expected to occur within approximately two weeks from the date hereof. After consummation of said sale, North Continent will have as its sole asset approximately $659,000 in cash. Pursuant to section 275 of the General Corporation Law of Delaware, the Board of Directors has adopted a resolution to the effect that it is advisable and to the best interests of the Corporation to dissolve the Corporation, and has called a special meeting of stockholders to be held on December 15, 1953, to vote on the question of dissolution. Proposed proxy solicitation material for said meeting has been filed, and it is proposed to mail the same immediately after the Commission enters its order so authorizing.

The Board of Directors has also tentatively approved a Plan of Liquidation and Dissolution, said Plan providing in substance for (1) an initial liquidating dividend of $8.50 per share, payable immediately to all holders of capital stock of the corporation upon surrender of their respective certificates for cancellation, and (2) a further liquidating dividend or dividends until all available assets shall have been distributed to stockholders. The application-declaration states that at the present time it is impossible to state definitely in what amounts, or at what times, such further liquidating dividend or dividends may be distributed and that after payment of the initial liquidating dividend of $8.50 per share the corporation will have on hand approximately $110,000, which (together with such further assets as may accrue to the corporation in connection with expiration of rights of holders of old securities of the corporation under the Supplemental Plan of 1950) is considered by the Board of Directors to be an ample reserve for all present or future liabilities, including taxes for the current year, any possible deficiency assessments of taxes for prior years, fees and expenses in connection with the aforementioned sale of Great Northern Gas Company, Limited, and fees and expenses of all types which may be incurred in completing the dissolution program. As and when it can be determined definitely that the aforesaid items will not exhaust the entire reserved amount, the balance will be available to be paid out in a further liquidating dividend or dividends.

Fees and expenses in connection with the foregoing transactions are estimated at $27,000, including legal fees of $15,000 to Dallstream, Schiff, Stern & Hardin, counsel for North Continent.

Applicant-declarant requests that the application-declaration be granted and permitted to become effective forthwith upon issuance.

Applicant-declarant further requests that an order be entered permitting use of the proxy solicitation material promptly after filing thereof, and in advance of the entry of any final order with respect to the other transactions herein described; and

It appearing to the Commission that such request may appropriately be granted:

*It is ordered*, That the declaration regarding the proxy solicitation material, filed pursuant to Rule U-62, be, and hereby is permitted to become effective forthwith.

By the Commission.

## INTERSTATE COMMERCE COMMISSION

[4th Sec. Application 28654]

IRON AND STEEL BILLETS, BLOOMS OR SLABS FROM CHICAGO GROUP AND STERLING (ROCK FALLS), ILL., TO BATON ROUGE, LA.

APPLICATION FOR RELIEF

NOVEMBER 18, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: F. C. Kratzmeir, Agent, for carriers parties to Agent R. G. Raasch's tariff I. C. C. No. 776, pursuant to fourth-section order No. 16101.

Commodities involved: Iron and steel billets, blooms or slabs, carloads.

From: Chicago, Ill., and points grouped therewith, and Sterling (Rock Falls), Ill.

To: Baton Rouge, La.

Grounds for relief: Competition with rail carriers, circuitous routes, and operation through higher-rated territory.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

[SEAL] GEORGE W. LAIRD, *Secretary.*

[4th Sec. Application 28655]

COTTON FROM SOUTH ATLANTIC PORTS TO ALABAMA, GEORGIA, NORTH CAROLINA AND SOUTH CAROLINA

APPLICATION FOR RELIEF

NOVEMBER 18, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for carriers parties to schedule listed below.

Commodities involved: Cotton, carloads.

From: Wilmington, N. C., Savannah and Port Wentworth, Ga. (applicable on traffic imported from Egypt, Peru or India).

To: Points in Alabama, Georgia, North Carolina and South Carolina.

Grounds for relief: Competition with rail carriers, circuitous routes, and competition with motor carriers.

Schedules filed containing proposed rates: C. A. Spaninger, Agent, I. C. C. No. 1369, supp. 19.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

Law 150, 83d Cong.; 67 Stat. 208), the headnote for Subchapter B and Part 51 of Title 9, Code of Federal Regulations are amended to read as set forth above and the text of Part 51 is hereby amended to read as follows:

Sec.
51.1 Definitions.
51.2 Payment to owners for cattle destroyed.
51.3 Record of tests.
51.4 Appraisals.
51.5 Report of appraisals.
51.6 Time limit for slaughter.
51.7 Report of salvage proceeds.
51.8 Claims for indemnity.
51.9 Claims not allowed.
51.10 Part 53 of this chapter not applicable.

AUTHORITY: §§ 51.1 to 51.10 issued under sec. 3, 23 Stat. 32, as amended, sec. 2, 32 Stat. 792, 33 Stat. 730, 45 Stat. 59, sec. 11, 58 Stat. 734; 21 U. S. C. 114, 111, 114a.

§ 51.1 *Definitions.* For the purposes of this part, the following terms shall be construed, respectively, to mean:

(a) "Department": The United States Department of Agriculture.

(b) "Bureau": The Bureau of Animal Industry of the Department.

(c) "Chief of Bureau": The Chief of the Bureau or any other officer or employee of the Bureau to whom authority has heretofore lawfully been delegated, or may hereafter lawfully be delegated, to act in his stead.

(d) "Veterinarian in Charge": The veterinary inspector who is assigned by the Chief of Bureau to supervise and perform official work at an official station and who reports directly to the Chief of Bureau, and in whose jurisdiction particular cattle are tested and appraised.

(e) "Bureau Representative": Any inspector or other person employed by the Bureau who is authorized by the Chief of Bureau to do any work or perform any duty in connection with the control and eradication of brucellosis, tuberculosis, and paratuberculosis of animals.

(f) "State": A State, the District of Columbia, or a Territory or possession of the United States; or a political subdivision thereof; which has executed a cooperative agreement with the Bureau for the control and eradication of brucellosis, tuberculosis, or paratuberculosis.

(g) "Accredited Veterinarian": A veterinarian recommended by a State, approved by a Veterinarian in Charge, and accredited by the Bureau.

(h) "Mortgage": Any mortgage, lien or other security or beneficial interest held by any person other than the one claiming indemnity.

(i) "Person": Any individual, corporation, company, association, firm, partnership, society, or joint stock company, or any organized group of any of the foregoing.

(j) "Owner": Any person who has a beneficial interest in cattle whether or not they are subject to a mortgage.

(k) "Brucellosis": The disease commonly known as "Bang's Disease."

(l) "Destroyed": Condemned under State authority and destroyed by slaughter or by death otherwise.

§ 51.2 *Payment to owners for cattle destroyed.* Owners of cattle which are destroyed because of brucellosis, tuberculosis, or paratuberculosis may be paid an indemnity by the Department for each animal so destroyed not to exceed one-third of the difference between the appraised value of the animal and the salvage value thereof, ascertained in accordance with the provisions of §§ 51.4 and 51.7: *Provided, however,* That no such payment for cattle destroyed be-

FEDERAL REGISTER

Published daily, except Sundays, Mondays, and days following official Federal holidays, by the Federal Register Division, National Archives and Records Service, General Services Administration, pursuant to the authority contained in the Federal Register Act, approved July 26, 1935 (49 Stat. 500, as amended; 44 U. S. C., ch. 8B), under regulations prescribed by the Administrative Committee of the Federal Register, approved by the President. Distribution is made only by the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

The regulatory material appearing herein is keyed to the Code of Federal Regulations, which is published, under 50 titles, pursuant to section 11 of the Federal Register Act, as amended August 5, 1953.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $1.50 per month or $15.00 per year, payable in advance. The charge for individual copies (minimum 15¢) varies in proportion to the size of the issue. Remit check or money order, made payable to the Superintendent of Documents, directly to the Government Printing Office, Washington 25, D. C.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

cause they reacted to a test for brucellosis shall exceed $9.00 for any grade animal or $18.00 for any purebred animal, and no such payment for any other cattle shall exceed $25 for any grade animal or $50 for any purebred animal: *And provided further*, That no such payment shall exceed the amount paid or to be paid by the State where the animal was condemned.

§ 51.3 *Record of tests.* When any cattle in a herd are classified by a Bureau or State representative as reactors to a test for brucellosis, tuberculosis, or paratuberculosis, a complete test record shall be made by such representative for such herd, including the reactor tag number of each reacting animal and the registration name and number of each reacting purebred animal. In the case of any herd having any reactor to a brucellosis test, the record shall be shown on TE Form 33–A or acceptable form furnished by the State. TE Form 20–B or acceptable form furnished by the State shall be used for the record of any herd having any reactor to a tuberculosis or paratuberculosis test. A copy of the applicable test record shall be given to the owner of any such herd, and one copy of each such record shall be furnished to the appropriate Veterinarian in Charge.

§ 51.4 *Appraisals.* Cattle to be destroyed because of brucellosis, tuberculosis, or paratuberculosis shall be appraised by a Bureau or State representative. When thus appraised, due consideration shall be given to their breeding value as well as to their dairy or meat value. Cattle presented for appraisal as purebred shall be accompanied by their registration papers at the time of the appraisal or they shall be appraised as grade cattle: *Provided, however*, That if registration papers are temporarily not available, or if the cattle are less than three years old and unregistered, the appropriate Veterinarian in Charge may grant a reasonable time for the presentation of their registration papers to the appraiser or to the Veterinarian in Charge. The one receiving the papers shall be responsible for their verification. The Bureau may decline to accept any appraisal that appears to it to be unreasonable or out of proportion to the market value of cattle of a like quality. Appraisals shall not exceed any limit that may be set by the laws or regulations of the State in which the cattle are condemned.

§ 51.5 *Report of appraisals.* Appraisals made in accordance with § 51.4 shall be recorded by the appraiser on TE Form 23 which shall also show the reactor tag number of each reacting animal and whether the animal is purebred or grade. At the time of appraisal, the TE Form 23 shall be signed by the appraiser, and by the owner certifying his acceptance of the appraisal. The original of the TE Form 23 and as many copies thereof as may be required for the Bureau, the State and the owner of the cattle shall be sent to the appropriate Veterinarian in Charge.

§ 51.6 *Time limit for slaughter.* Payment of indemnity will be made under this part for cattle destroyed because of brucellosis, tuberculosis, or paratuberculosis only if the animals are slaughtered or die otherwise within 15 days after the date of appraisal, except that the appropriate Veterinarian in Charge, for reasons satisfactory to him, may extend the period to 30 days and the Chief of Bureau, for reasons satisfactory to him may extend it beyond 30 days.

§ 51.7 *Report of salvage proceeds.* A report of the salvage derived from the sale of each animal on which a claim for indemnity may be made under the provisions of this part shall be made on TE Form 24, or acceptable form furnished by the purchaser or selling agent, which shall be signed by the purchaser or his agent or by the selling agent handling the cattle. If the cattle are sold by the pound, the TE Form 24 shall show the weight, price per pound, gross receipts, expenses if any, and net proceeds. If the cattle are not sold on a per pound basis, the net purchase price of each animal must be stated on the TE Form 24 and an explanation showing how the amount was arrived at must be submitted. In the event the cattle are not disposed of through regular slaughterers or through selling agents, the owner shall furnish, in lieu of TE Form 24, an affidavit showing the amount of salvage obtained by him and shall certify that such amount is all that he has received or will receive as salvage for said cattle. In an emergency, a certificate executed by the appropriate Veterinarian in Charge will be acceptable in lieu of the owner's affidavit. The salvage shall be considered to be the net amount received for an animal after deducting freight, trucking, yardage, commissions, slaughtering charges, and similar costs. No charges for holding cattle on the farm pending slaughter or for trucking by the owner shall be so deducted or otherwise paid by the Department. The original of TE Form 24 or acceptable form furnished by the purchaser or selling agent, or the affidavit of the owner or certificate of the appropriate Veterinarian in Charge, furnished in lieu thereof, shall be furnished to the Veterinarian in Charge if it is not already in his possession. Additional copies may be furnished to the State officials, if required.

§ 51.8 *Claims for indemnity.* Claims for indemnity for cattle destroyed because of brucellosis, tuberculosis, or paratuberculosis, shall be presented on TE Form 23 on which the owner of the cattle shall certify that the animals covered thereby, are, or are not, subject to any mortgage as defined in this part. If the owner states there is a mortgage, TE Form 25 shall be signed by the owner and by each person holding a mortgage on the animals, consenting to the payment of any indemnity allowed to the person specified thereon. Payment will be made only if the TE Form 23 has been approved by a proper State official and if payment of the claim has been recommended by the appropriate Veterinarian in Charge. The Veterinarian in Charge shall record on the TE Form 23 the salvage value of the cattle destroyed and the amount of Federal and State indemnity payments that appear to be due to the owner of the cattle, and shall furnish a copy of the Form to the owner. The Veterinarian in Charge shall then forward TE Form 23 to the appropriate official for further action on the claim.

§ 51.9 *Claims not allowed.* Claims for compensation for cattle destroyed because of brucellosis, tuberculosis, or paratuberculosis shall not be allowed if any of the following circumstances exist:

(a) If the claimant has failed to comply with any of the requirements of this part.

(b) If the cattle are classified as affected with tuberculosis or paratuberculosis on the basis of a test, unless the existence of the disease in the cattle was determined as the result of a tuberculin or johnin test applied by a Bureau, State or accredited veterinarian; or if the cattle are classified as affected with brucellosis, unless the existence of the disease in the cattle was determined as the result of an agglutination test applied by such a veterinarian, or by a nonveterinary technician under the supervision of a Bureau or State veterinarian.

(c) If the existence of any such disease in the cattle was determined as the result of a tuberculin, johnin, or agglutination test applied by an accredited veterinarian and specific instructions for the administration of such test had not previously been issued to such veterinarian in writing by the proper Bureau and State authorities.

(d) If the cattle were classified as tuberculous or paratuberculous unless they reacted to the tuberculin or johnin test or revealed lesions of either disease upon autopsy.

(e) If, at the time of test or condemnation, the cattle belonged to or were upon the premises of any person to whom they had been sold, shipped, or delivered for slaughter.

(f) If, at the time of the condemnation of the cattle for brucellosis, tuberculosis or paratuberculosis, the cattle were not in a State in which cooperative eradication work was being conducted with with respect to such disease.

(g) If the claim is not to be paid in cooperation with, and supplementary to, payments to be made by the State in which said cattle were condemned.

(h) If any part of the claimant's herd has not been tested under Bureau and State supervision for the eradication of the particular disease for which the animals covered by the indemnity claim were condemned.

(i) If the premises occupied by the cattle which were destroyed and all infected or exposed materials on such premises have not been properly cleaned and disinfected, with a disinfectant permitted by the Bureau, in accordance with recommendations of the proper State or Bureau official.

(j) If the cattle were steers, unless they were work oxen, or if they were bulls and were not purebred.

(k) If the cattle were destroyed as reactors to tests for tuberculosis or paratuberculosis, unless they were marked for identification by branding the letter "T" on the left jaw, not less than 2 nor more than 3 inches high, and unless a metal tag bearing a serial number and the inscription "U. S. B. A. I. Reactor," or a similar State reactor tag, was suitably attached to the left ear of each animal.

(l) If the cattle were destroyed because of brucellosis, unless they were marked for identification by branding the letter "B" on the left jaw, not less than 2 nor more than 3 inches high, and unless a metal tag bearing a serial number and inscription "U. S. B. A. I. Reactor, B. D.," or a similar State reactor tag, was suitably attached to the left ear of each animal.

(m) If the cattle reacted positively to the agglutination blood test for brucellosis and, at any time after they became 8 months old, they had been vaccinated with any vaccine made from or through the agency of Brucella microorganisms; or if they reacted positively to such test and they had been vaccinated with such a vaccine when they were 8 months old or less, unless 18 months had elapsed between the date of vaccination and the date of reaction.

(n) If the cattle were calves under 6 months of age which reacted only to the agglutination blood test for brucellosis.

(o) If there is substantial evidence that the owner or his agent has in any way been responsible for any attempt unlawfully or improperly to obtain indemnity funds for such cattle.

§ 51.10 *Part 53 of this chapter not applicable.* No claim for indemnity for cattle destroyed because of brucellosis, tuberculosis, or paratuberculosis shall hereafter be paid or allowed under the regulations contained in Part 53 of this chapter, but all such claims shall be presented and paid pursuant to and in compliance with the regulations contained in this part.

This order revises BAI Order 375, as amended on April 27, 1949 (14 F. R. 2164), and September 21, 1953 (18 F. R. 5661). Forms previously used for reporting tests and appraisals and preparing claims for the payment of Federal indemnities have been revised and reporting procedures have been simplified, and the foregoing regulations provide for the use of the new forms and procedures. This does not materially alter current practices in this regard.

The regulations also require that consent to payment of indemnities to the claimant be obtained from mortgagees and other persons having interests in the cattle for which the indemnities are to be paid. The regulations relieve restrictions with respect to presentation of registration papers in connection with the appraisal of purebred cattle. The regulations define terms previously used but not defined as well as other terms and make various other changes for clarity and consistency.

The foregoing regulations relate to the payment of public grants or benefits and are excepted from the requirements relating to public rule-making procedure and delay in effective date, under section 4 of the Administrative Procedure Act (5 U. S. C. 1003).

*Effective date.* The foregoing regulations shall be effective on and after December 14, 1953: *Provided, however,* That claims for cattle tested prior to said date shall be governed by the regulations in effect immediately prior to this order.

NOTE: The reporting and record-keeping requirements of the foregoing regulations have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

Done at Washington, D. C., this 18th day of November 1953.

[SEAL] TRUE D. MORSE,
*Acting Secretary of Agriculture.*

## TITLE 14—CIVIL AVIATION

### Chapter II—Civil Aeronautics Administration, Department of Commerce

[Amdt. 66]

PART 608—DANGER AREAS

ALTERATIONS

The danger area alterations appearing hereinafter have been coordinated with the civil operators involved, the Army, the Navy, and the Air Force, through the Air Coordinating Committee, Airspace Subcommittee, and are adopted to become effective when indicated in order to promote safety of the flying public. Since a military function of the United States is involved, compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedure Act is not required.

Part 608 is amended as follows:

1. In § 608.49, the Scenic, South Dakota, area (D-190), published on July 16, 1949, in 14 F. R. 4295, amended on October 29, 1949, in 14 F. R. 6596, and on May 10, 1951, in 16 F. R. 4311, is further amended by changing the "Designated Altitudes" column to read: "Surface to unlimited".

2. In § 608.51, the Corpus Christi, Texas, area (D-227), published on July 16, 1949, in 14 F. R. 4295, and amended on February 21, 1952, in 17 F. R. 1612, is further amended by changing the "Description by Geographical Coordinates" column to read: "Beginning at lat. 27°49'20" N., long. 97°00'00" W.; southerly, 3 nautical miles from and parallel to the shoreline to lat. 26°15'00" N., long. 97°07'20" W.; due W. to long. 97°26'00" W.; NNW. to lat. 26°30'30" N., long. 97°31'30" W.; ENE. to lat. 26°31'30" N., long. 97°27'30" W.; counterclockwise along the arc of a circle 3 miles in radius, centered at Port Mansfield Airport (lat. 26°33'35" N., long. 97°25'40" W.), to lat. 26°33'45" N., long. 97°28'30" W.; WSW. to lat. 26°33'00" N., long. 97°32'20" W.; NNW. to lat. 27°17'30" N., long. 97°48'30" W.; WSW to the E. edge of Amber Civil Airway No. 4 at lat. 27°16'30" N., long. 97°51'15" W.; northerly along the E. edge of Amber Civil Airway No. 4 to lat. 27°29'00" N., long. 97°55'15" W.; ENE. to lat. 27°30'00" N., long. 97°52'00" W.; counterclockwise along the arc of a circle 2 miles in radius, centered at lat. 27°31'30" N., long. 97°52'45" W., to lat. 27°32'40" N., long. 97°51'00" W.; NNW. to lat. 27°33'12" N., long. 97°51'40" W.; NE. to lat. 27°42'18" N., long. 97°33'30" W.; counterclockwise along the arc of a circle 3 miles in radius, centered at Cuddihy Field (lat. 27°43'15" N., long. 97°30'30" W.), to lat. 27°40'30" N., long. 97°29'40" W.; NE. to lat. 27°47'00" N., long. 97°20'00" W.; ENE. to lat. 27°49'30" N., long. 97°07'30" W.; counterclockwise along the arc of a circle 3 miles in radius, centered at Port Aransas Airport (lat. 27°49'45" N., long. 97°04'30" W.), to lat. 27°49'30" N., long. 97°01'30" W.; easterly to lat. 27°49'20" N., long. 97°00'00" W., point of beginning."

(Sec. 205, 52 Stat. 984, as amended; 49 U. S. C. 425. Interpret or apply sec. 601, 52 Stat. 1007, as amended; 49 U. S. C. 551)

This amendment shall become effective on November 24, 1953.

[SEAL] S. A. KEMP,
*Acting Administrator of Civil Aeronautics.*

[F. R. Doc. 53-9859; Filed, Nov. 23, 1953; 8:45 a. m.]

## TITLE 15—COMMERCE AND FOREIGN TRADE

### Chapter III—Bureau of Foreign and Domestic Commerce, Department of Commerce

Subchapter C—Bureau of Foreign Commerce

[6th Gen. Rev. of Export Regs., Amdt. 73]

PART 373—LICENSING POLICIES AND RELATED SPECIAL PROVISIONS

NICKEL AND MANUFACTURES

Section 373.71 *Supplement 1: Time schedules for submission of applications for licenses to export certain Positive List commodities* is amended by deleting therefrom the following entries and their related submission dates for the second, third and fourth quarters, 1953:

| Dept. of Commerce Schedule B No. | Commodity |
|---|---|
| 6[illegible] | Nickel and manufactures: Nickel and nickel alloy welding rods, electrode-coated wire |
| 6[illegible] | Nickel powders and flakes, including nickel electrolytic form |
| 6[illegible] | Nickel catalysts and nickel slings |
| 6[illegible] | Nickel and nickel alloys, and semifabricated forms, except scrap |
| 6[illegible] | Nickel thermo-couples, nickel thermocouple and nickel-bearing metal |
| 5[illegible] | Nickel-electric electric resistance wire (nichrome) |

This amendment shall become effective as of November 20, 1953.

(Sec. 3, 63 Stat. 7; 65 Stat. 43; 67 Stat. 62; 50 U. S. C. App. Sup. 2023. E. O. 9630, Sept. 27, 1945; 10 F. R. 12245, 3 CFR, 1945 Supp.; E. O. 10161, Jan. 3, 1948, 13 F. R. 59, 3 CFR, 1948 Supp.)

KARL L. ANDERSON,
*Acting Director,*
*Bureau of Foreign Commerce.*

[F. R. Doc. 53-9852; Filed, Nov. 20, 1953; 1:14 p. m.]

## TITLE 19—CUSTOMS DUTIES

### Chapter I—Bureau of Customs, Department of the Treasury

[T. D. 53378]

PART 22—DRAWBACK

INTERNAL REVENUE CERTIFICATES AND EXTRACTS FROM SUCH CERTIFICATES; COLLECTIONS STATEMENT OF DRAWBACK DUE

In view of the transfer of certain functions of the Internal Revenue Service to field officers, certificates on internal-revenue Form 646 are now issued by Assistant Regional Commissioners of Internal Revenue, Alcohol and Tobacco Tax and certificates on customs Form 4539 are handled by such field officers. To conform to these changes, the Customs regulations are amended as follows:

1. Section 22.25 is amended by revising the headnote to read "*Internal-revenue certificates and extracts from such certificates.*", by substituting "Assistant Regional Commissioner of Internal Revenue, Alcohol and Tobacco Tax," for "Commissioner of Internal Revenue (Alcohol Tax Unit)" in the first sentence of paragraph (a), by revising the second sentence of paragraph (a) to read as follows: "The Assistant Regional Commissioner of Internal Revenue, Alcohol and Tobacco Tax, will assign to each certificate a serial number, preceded by an abbreviation of the name of the city in which the regional headquarters office is located."

And by substituting "Internal Revenue Service" for "Bureau of Internal Revenue" in the second sentence of paragraph (c).

2. Section 22.26 is amended by substituting "appropriate Assistant Regional Commissioner of Internal Revenue, Alcohol and Tobacco Tax," for "Commissioner of Internal Revenue (Alcohol Tax Unit), Washington, D. C.," in the second sentence of paragraph (b), by substituting "such Assistant Regional Commissioner" for "the Commissioner of Internal Revenue" in the last sentence of paragraph (b), by substituting "Internal Revenue Service" for "Bureau of Internal Revenue" in the first sentence of paragraph (c), and by revising the second sentence of paragraph (c) to read as follows: "The certificate on customs Form 4539, together with a written request for payment of the amount found due, signed by the claimant and addressed to the appropriate Assistant Regional Commissioner of Internal Revenue, Alcohol and Tobacco Tax, shall be transmitted to that officer by the collector."

(Sec. 624, 46 Stat. 759; 19 U. S. C. 1624. Interprets or applies sec. 313, 45 Stat. 693, as amended; 19 U. S. C. 1313)

[SEAL] D. B. STRUBINGER,
*Acting Commissioner of Customs.*

Approved: November 17, 1953.

H. CHAPMAN ROSE,
*Acting Secretary of the Treasury.*

## TITLE 32—NATIONAL DEFENSE

### Chapter VII—Department of the Air Force

Subchapter F—Reserve Forces

PART 861—OFFICERS RESERVE MOBILIZATION AND TRAINING

1. Section 861.1001 is changed to read as follows:

§ 861.1001 *General.* (a) Sections 861.1001 to 861.1009 establish procedures for the assignment or designation of Air Force Reserve officers below the grade of brigadier general and airmen to specific mobilization positions.

(b) The total mobilization positions to be filled by Air Force Reserve personnel will be established by Headquarters USAF for each major air command, based on mobilization requirements, the training capacity of the commands, and the availability of qualified Reservists. Mobilization positions will be filled by mobilization assignees and mobilization designees. The number of persons holding mobilization assignments to mobilization positions will also be limited by the funds available for inactive duty training pay. All remaining mobilization positions may be filled by mobilization designees.

(c) Each major air command at its discretion, and within command mobilization plans, will individually determine which mobilization assignment positions are appropriate for the assignment of Ready or Standby Reservists. Those positions designated as Ready Reserve should constitute the anticipated individual augmentation requirements under limited emergency conditions short of full mobilization. All other positions will be designated as Standby.

(d) Persons assigned to designated Ready Reserve mobilization assignment positions will be members of the Ready Reserve and must comply with § 861.1003.

(e) Persons assigned to Standby Reserve mobilization assignment positions may be members of the Ready or Standby Reserve and must comply with § 861.1003 (a) (1) and (2). In no case will assignment to a position designated as Standby Reserve be denied to an otherwise qualified person who must be a Ready Reservist by operation of law (those persons who are not eligible for Standby status).

2. Paragraph (b) of § 861.1002 is changed as follows:

§ 861.1002 *Definitions.*

* * * * *

(b) *Mobilization assignee.* An Air Force Reserve officer or airman not on extended active duty who requires regular and frequent training to attain or retain proficiency in his mobilization position. Such persons may be members of the Ready or Standby Reserve, are eligible for inactive duty training pay, and are authorized active duty training.

* * * * *

3. Paragraph (a) of § 861.1003 is changed as follows:

§ 861.1003 *Mobilization assignment—*(a) *Eligibility.* (1) A mobilization assignment may be given to a member of the Air Force Reserve not on extended active duty who volunteers for such assignment: *Provided,* That:

(i) He is qualified in accordance with §§ 861.1 to 861.13 and holds the Availability Classification Code necessary for assignment to this program element or accurate award of the appropriate code.

(ii) The person submits in writing his willingness to accept such assignment.

(2) In addition persons who are applying for a Ready Reserve mobilization assignment and are Standby Reservists or Ready Reservists who are eligible to elect Standby status must accomplish a signed statement accepting or retaining Ready Reserve status for a period of two to five years. The period selected will be contingent upon the desires of the person.

* * * * *

4. Paragraph (a) of § 861.1004 is changed as follows:

§ 861.1004 *Mobilization designation—*(a) *Eligibility.* (1) A mobilization designation may be given to a member of the Air Force Reserve not on extended active duty who is qualified in accordance with §§ 861.1 to 861.13 and who volunteers for such assignment.

(2) A mobilization designation may be given to a qualified person who is either unwilling to accept a mobilization assignment, or for whom an assignee vacancy does not exist.

(3) Such persons must meet the criteria for assignment to the Mobilization Designation Reserve Section of Training Category D, as established in §§ 861.1 to 861.13, and must signify, in writing, willingness to accept such assignment.

* * * * *

5. Paragraphs (c), (d) and (h) of § 861.1009 are changed as follows:

§ 861.1009 *Training.*

* * * * *

(c) *Training requirements for mobilization assignees.* Twelve paid inactive duty training periods and a minimum of twelve nonpaid inactive duty training periods will be made available annually, and persons will be encouraged to participate in such training to the maximum in order to attain the individual proficiency which is desired.

(1) Mobilization assignees will be required to participate in a minimum of five inactive duty training periods each fiscal quarter.

(2) Mobilization assignees will be required to perform a normal fifteen-day active duty tour each fiscal year. Any special tour or tour for school training of fifteen or more days is acceptable in place of this requirement.

(3) Tours of active duty during a quarter may be credited toward the training period requirement for that quarter on the basis of one day of active duty equal to one training period.

(4) Mobilization assignees who fail to accomplish the minimum number of training periods a quarter or the fiscal year active duty training requirement, will be relieved of assignment.

(d) *Active duty training of mobilization assignees.* Active duty training of mobilization assignees normally will be accomplished with the unit or activity of assignment or active duty training may be accomplished with the unit or activity to which attached for training. In exceptional instances only, where it is considered that better training can be afforded the person, an assignee may accomplish such training with other Regular Air Force, Reserve Training Category A, or Air National Guard of the United States units or activities not further distant from the place where he is currently residing than his unit or activity of assignment.

* * * * *

(h) *Waivers of training requirements for mobilization designees.* Minimum participation requirements may be waived for mobilization designees whose civilian occupations are so directly allied with the duty Air Force Specialty Codes of the mobilization positions for which they have been designated that proficiency is considered to be retained by virtue of the civilian occupation. Individual applications for waivers will be submitted by military letter, through channels, for approval action to the major air command of assignment or to the Continental Air Command numbered air force for persons under the jurisdiction of Continental Air Command. Such letters will include a complete description of the person's civilian occupation. Waivers which are approved will be effective until there is a change in the person's Reserve assignment, duty Air Force Specialty Code, or civilian occupation.

(AFR 45-3A) (Sec. 251, 66 Stat. 495; 50 U. S. C. 1002. Interpret or apply secs. 101–259, 601–603, 66 Stat. 481–498, 501; 50 U. S. C. 901–1010, 1091–1093)

[SEAL] K. E. THIEBAUD,

# TITLE 16—COMMERCIAL PRACTICES

## Chapter I—Federal Trade Commission

[File No. 21-257]

### PART 107—VEGETABLE IVORY BUTTON INDUSTRY

RESCISSION OF PART

In the matter of Trade Practice Rules for the Vegetable Ivory Button Industry; File No. 21-257.

Whereas, on March 14, 1936, the Commission promulgated trade practice rules for the Vegetable Ivory Button Industry, codified in the Code of Federal Regulations (16 CFR Part 107); and,

Whereas, in 1952 a survey of said industry disclosed the fact that there remains only one domestic manufacturer of vegetable ivory buttons; and,

Whereas, there is no longer any use or practicality for the continuance of such trade practice rules in the industry; and,

Whereas, the Commission, after considering the present status of the industry, is of the opinion that the continued existence of the rules is not in the public interest:

*It is ordered*, That the said rules be and the same are hereby rescinded.

Issued: November 18, 1953.

By the Commission.

[SEAL] ALEX. AKERMAN, Jr.,
*Secretary.*

# TITLE 43—PUBLIC LANDS: INTERIOR

## Chapter I—Bureau of Land Management, Department of the Interior

Appendix—Public Land Orders

[Public Land Order 927]

### ALASKA

REVOKING EXECUTIVE ORDER NO. 4570 OF JANUARY 24, 1927

By virtue of the authority vested in the President by section 1 of the act of June 25, 1910 (36 Stat. 847; 43 U. S. C. 141), and otherwise, and pursuant to Executive Order No. 10355 of May 26, 1952, it is ordered as follows:

Executive Order No. 4570 of January 24, 1927 withdrawing the following-described public lands in Alaska for use of the Bureau of Fisheries, Department of Commerce, is hereby revoked:

Beginning at corner No. 3 of U. S. Survey No. 1572 and extending thence in an easterly direction on the meander line of the Naknek River to corner No. 4 of U. S. Survey No. 543; thence south one-quarter mile; thence in a westerly direction to a point one-quarter of a mile south of the point of beginning; thence north to the point of beginning. The tract described contains approximately 160 acres.

At 10:00 a. m. on the 35th day after the date of this order, the public lands released by this order shall, subject to valid existing rights and the provisions of existing withdrawals, be opened to settlement under the homestead laws and the homesite act of May 26, 1934 (48 Stat. 809; 48 U. S. C. 461) only, and to those forms of appropriation only by qualified veterans of World War II for whose services recognition is granted by the act of September 27, 1944 (58 Stat. 747; 43 U. S. C. 279–284) as amended, and by other qualified persons entitled to preference under the said act. Commencing at 10:00 a. m. on the 126th day after the date of this order, any of such lands not settled upon by veterans or other persons entitled to credit for service shall become subject to settlement and other forms of appropriation by the public generally in accordance with the appropriate laws and regulations.

Applications for these lands, which shall be filed in the Land Office, Anchorage, Alaska, shall be acted upon in accordance with the regulations contained in § 295.8 of Title 43 of the Code of Federal Regulations to the extent that such regulations are applicable. Applications under the homesite or homestead laws shall be governed by the regulations contained in Parts 64 to 66, inclusive, of Title 43 of the Code of Federal Regulations.

Inquiries concerning the lands shall be addressed to the Manager, Land Office, Anchorage, Alaska.

ORME LEWIS,
*Assistant Secretary of the Interior.*

NOVEMBER 18, 1953.

[F. R. Doc. 53-9854; Filed, Nov. [illegible] 1953; 8:46 a. m.]

# TITLE 46—SHIPPING

## Chapter II—Federal Maritime Board, Maritime Administration, Department of Commerce

Subchapter B—Regulations Affecting Maritime Carriers and Related Activities

[Gen. Order 61, Revised, Amdt. 2]

### PART 221—DOCUMENTATION, TRANSFER OR CHARTER OF VESSELS

CITIZENSHIP OATHS BY OWNERS OR MORTGAGEES OF VESSELS OF THE UNITED STATES

General Order 61, Revised, as amended (§ 221.11 *Citizenship Oaths by owners or mortgagees of vessels of the United States as required by section 40 of the Shipping Act, 1916, as amended*), published in the FEDERAL REGISTER (17 F R. 295, 16 F. R. 12997), is amended by adding a new paragraph at the bottom thereof to read:

(d) Corporation not authorized to issue capital stock but in which the voting power is exercised by its members may strike out the following words in Form MA-4557:

that the title to a majority of the stock or seventy-five (75) per centum of the stock of said corporation is vested in citizens of the United States of America free from any trust or fiduciary obligation in favor of any person not a citizen of the United States of America, and that such proportion of the voting power of said corporation is vested in citizens of the United States

provided a clause in substantially the following form is substituted in lieu thereof, attached to and made a part of said oath:

Said corporation is not authorized to issue stock, the ownership and control of said corporation being vested in the members of said corporation who have the exclusive voting power. The persons exercising the duties of managing directors of the corporation are called [illegible], and are the persons referred to herein as managing directors. The majority of the voting power (or) seventy-five (75) per centum of the voting power of said corporation is vested in citizens of the United States of America free from any trust or fiduciary obligation in favor of any person not a citizen of the United States of America,

and in connection therewith, when appropriate, Form MA-4557A may be amended by striking out the word "stock" wherever the same appears, and by changing the phrase "outstanding stock of the company" to read "voting power of the company."

(Sec. 4, 40 Stat. 1027, as amended; 46 U. S. C. 1114)

*Effective date.* This order shall be effective on the date of publication in the FEDERAL REGISTER.

Dated: November 17, 1953.

[SEAL] LOUIS S. ROTHSCHILD,
*Maritime Administrator.*

# TITLE 49—TRANSPORTATION

## Chapter I—Interstate Commerce Commission

Subchapter B—Carriers by Motor Vehicle

[Ex Parte MC 43]

### PART 207—LEASE AND INTERCHANGE OF VEHICLES

INTERCHANGE OF EQUIPMENT

At a general session of the Interstate Commerce Commission, held at its office in Washington, D. C., on the 16th day of November A. D. 1953.

Upon consideration of the record in the above-entitled proceeding and of two petitions of Heavy Haulers, Machinery Movers and Erectors Section of Local Cartage National Conference, filed March 24, 1953, and September 18, 1953, and good cause appearing therefor:

*It is ordered*, That § 207.5 (c) of the rules and regulations prescribed by order of May 8, 1951, in the above-entitled proceeding, as amended by order of May 18, 1953, be further amended so that it will read as follows:

§ 207.5 *Interchange of equipment.*

* * *

(c) *Driver of interchanged equipment.* Except as provided in subparagraph (1) of this paragraph, each carrier must assign its own driver to operate the equipment that is proposed to be operated from and to the point or points of interchange and over the routes or within the territory authorized in the participating carriers' respective certificates of public convenience and necessity.

(1) Authorized common carriers, holding certificates of public convenience and necessity from this Commission authorizing the transportation, in interstate or foreign commerce, over irregular routes, of articles or commodities which, because of their size, weight, or shape, require the use of special equipment, may perform a through movement of such articles or commodities on such special equipment, without change of drivers at the point of interchange; and that, until July 1, 1954, such drivers may make the inspection required by paragraph (e) of this section and regulations on behalf of any carrier party to the through movement.

*It is further ordered*, That the said petitions, to the extent relief is not granted in this order, be, and they are hereby, denied.

*And it is further ordered*, That this order shall be effective as of the date hereof.

Notice of this order shall be given to the general public by depositing a copy thereof in the office of the Secretary of the Commission at Washington, D. C., and by filing a copy with the Director, Division of the Federal Register.

(49 Stat. 546, as amended, 49 U. S. C. 304)

By the Commission.

[SEAL] GEORGE W. LAIRD,
*Secretary.*

[F. R. Doc. 53-9867; Filed, Nov. 23, 1953; 8:49 a. m.]

# PROPOSED RULE MAKING

## DEPARTMENT OF AGRICULTURE

### Production and Marketing Administration

[7 CFR Part 26]

GRAIN STANDARDS

FEES AND CHARGES

Notice is hereby given in accordance with section 4 (a) of the Administrative Procedure Act (5 U. S. C. 1003 (a)) that consideration is being given to amending § 26.74 of the regulations of the Secretary of Agriculture (7 CFR 26.74) issued pursuant to the authority of section 8 of the United States Grain Standards Act, as amended (7 U. S. C. 84), to read:

§ 26.74 *Fees and charges.* The fee in an appeal or a dispute shall be fixed as follows:

(a) For bulk or sacked grain in carload lots, $5.00 per car;

(b) For bulk or sacked grain in trucks and trailers, $3.00 per truck or trailer lot;

(c) For bulk or sacked grain in boats, barges, or other vessels, $1.50 per thousand bushels or fraction thereof, with a minimum of $3.00 per lot;

(d) For a submitted sample or package of grain, $2.00 per sample or package;

(e) For all lots of grain other than those referred to in paragraphs (a), (b), (c), and (d) of this section, $1.50 per thousand bushels or fraction thereof, with a minimum fee of $3.00 per lot.

Charges may be made for telegrams, express, parcel post, registry fees, travel expenses, and other items paid or incurred by the Department on account of an appeal or a dispute and for oral hearings, as will reimburse the Department, all such additional items to be determined by the Administrator. Unless otherwise stated in the findings in any appeal, the fee as prescribed by this section, and no further charges, shall be deemed to be fixed and assessed.

The effect of the proposed amendment would be to change the fee per carload from $3.00 to $5.00; the fee per truck lot from $1.00 to $3.00; the fee for cargo grain from $1.00 to $1.50 per thousand bushels or fraction thereof; the fee for a submitted sample from $1.00 to $2.00; and the fee for all other lots of grain from $1.00 to $1.50 per thousand bushels or fraction thereof. The current fees have been in effect since August 1, 1949. The purpose of the amendment would be to bring the respective fees and charges more nearly into line with the increased cost of rendering the service.

Any person who wishes to submit written data, views, or arguments concerning the proposed amendment may do so by filing them with the Director of the Grain Branch, Production and Marketing Administration, United States Department of Agriculture, Washington 25, D. C., within 30 days after the date of publication of this notice in the FEDERAL REGISTER.

Done at Washington, D. C., this 18th day of November 1953.

[SEAL] ROY W. LENNARTSON,
*Assistant Administrator, Production and Marketing Administration.*

[F. R. Doc. 53-9875; Filed, Nov. 23, 1953; 8:51 a. m.]

## CIVIL AERONAUTICS BOARD

[14 CFR Parts 40, 61]

[Draft Release No. 53-24]

HELICOPTER OPERATIONS

PROPOSED ISSUANCE OF AIR CARRIER OPERATING CERTIFICATES

Pursuant to the authority delegated by the Civil Aeronautics Board to the Bureau of Safety Regulation, notice is hereby given that the Bureau will propose to the Board the adoption of a Special Civil Air Regulation which will authorize the Administrator to issue air carrier operating certificates to air carriers applicable to helicopter operations in accordance with the certification and operating standards of Parts 40 and 61, as in effect on December 31, 1953, subject to such omissions and modifications as the Administrator may find necessary.

Interested persons may participate in the making of the proposed rule by submitting such written data, views, or arguments, as they may desire. Communications should be submitted in du-

plicate to the Civil Aeronautics Board, attention Bureau of Safety Regulation, Washington 25, D. C. In order to insure their consideration by the Board before taking further action on the proposed rule, communications must be received by December 10, 1953. Copies of such communications will be available after December 14, 1953, for examination by interested persons at the Docket Section of the Board, Room 5412, Department of Commerce Building, Washington, D. C.

Parts 40 and 61 of the Civil Air Regulations currently prescribe the certification and operation rules for scheduled air carriers. These parts apply primarily to air carriers operating airplanes, but also apply to the certification and operation of helicopters by air carriers. However, Special Civil Air Regulation SR–369 authorizes the Administrator to issue an air carrier operating certificate or amendments thereto, under conditions which do not fully meet the requirements of Parts 40 and 61 to an air carrier holding a temporary certificate of public convenience and necessity issued by the Board. Because all scheduled helicopter air carrier operations are currently being conducted under temporary certificates of public convenience and necessity and, since Parts 40 and 61 were not designed particularly for such operations, the Administrator has used SR–369 as a basis for regulating helicopter air carrier operations.

Part 61 will be rescinded on January 1, 1954, and revised Part 40 will become effective on that date. Revised Part 40 provides certification and operation rules for scheduled domestic air carriers using airplanes, the scope of which was previously covered by Parts 40 and 61. Revised Part 40 is not applicable, however, to the operation of other aircraft such as helicopters.

At present, the Bureau is in the process of formulating rules governing air carrier helicopter operations. In view of this and the fact that revised Part 40 does not provide an adequate regulatory basis, it is proposed that the authority contained in SR–369 be enlarged in scope and continued in effect until the new part covering helicopter operations is promulgated. Since it appears that air carriers other than those holding temporary certificates of public convenience and necessity are considering initiation of helicopter operations, this proposed regulation would provide authority for the Administrator to issue air carrier operating certificates and to permit deviations from Parts 40 and 61 for helicopter operations for all air carriers. Since presently effective Parts 40 and 61 will be rescinded on January 1, 1954, this proposal incorporates by reference Parts 40 and 61 as in effect on December 31, 1953

Accordingly, notice is hereby given that it is proposed to promulgate a Special Civil Air Regulation to provide in substance as follows:

An air carrier operating certificate, or amendments thereto, may be issued by the Administrator to an air carrier for the purpose of engaging in helicopter operations in accordance with the certification requirements of Part 40 of the Civil Air Regulations. Such helicopter operations shall be conducted in accordance with the operation requirements of Part 61 of the Civil Air Regulations provided that if the Administrator finds that any of the requirements of Parts 40 and 61 can be omitted or modified without adversely affecting safety, the Administrator may approve such omissions or modification and they shall be listed in the air carrier operations specifications. The Administrator shall promptly notify the Board of the omissions or modifications approved by him and the reasons therefor.

All references herein to Parts 40 and 61 are to those parts as in effect on December 31, 1953.

It is proposed that this Special Civil Air Regulation supersede Special Civil Air Regulation SR–369 and be effective for a period of two years.

This Special Civil Air Regulation is proposed under the authority of Title VI of the Civil Aeronautics Act of 1938, as amended. The proposal may be changed in the light of comments received in response to this notice of proposed rule making.

(Sec. 205 (a), 52 Stat 984, 49 U S C 425 (a). Interpret or apply secs. 601–610, 52 Stat. 1007–1012, as amended; 49 U. S. C. 551–560)

Dated: November 18, 1953, at Washington, D. C.

By the Bureau of Safety Regulation.

[SEAL] JOHN M. CHAMBERLAIN, *Director.*

[F R Doc 53-9879; Filed, Nov. 23, 1953; 8:52 a. m.]

## FEDERAL TRADE COMMISSION

### [ 16 CFR Part 203 ]

[File No. 286]

COSMETIC AND TOILET PREPARATIONS INDUSTRY

NOTICE OF HEARING

Opportunity is hereby extended by the Federal Trade Commission to any and all persons, partnerships, corporations, organizations, and other parties, including farm labor, and consumer groups, affected by or having an interest in the proposed trade practice rules for the cosmetic and toilet preparations industry (which constitute a proposed revision of §§ 203.6, 203.11, 203.14, 203.16 and 203.18 (Group I Rules 6, 11, 14, 16 and 18) for such industry as promulgated by the Commission on November 29, 1951), to present to the Commission their views concerning said proposed rules, including such pertinent information suggestions, or objections as they may desire to submit, and to be heard in the premises. For this purpose they may obtain copies of the proposed rules upon request to the Commission. Such views, information, suggestions, or objections may be submitted by letter, memorandum, brief, or other communication, to be filed with the Commission not later than December 11, 1953. Opportunity to be heard orally will be afforded at the hearing beginning at 10:00 a. m., e s t, December 11, 1953, in the room designated "Star Light Roof," Waldorf-Astoria Hotel, Park and Lexington Avenues, 49th to 50th Streets, New York City, to any such persons, partnerships, corporations, organizations, or other parties, who desire to appear and be heard. After due consideration of all matters presented in writing or orally, the Commission will proceed to final action on the proposed rules.

The industry to which the proposed rules apply is engaged in the business of manufacturing, importing, selling or distributing cosmetics, toilet preparations, and devices or accessories sold in combination therewith.

Issued: November 20, 1953.

By direction of the Commission

[SEAL] ALEX. AKERMAN, Jr., *Secretary*

[F. R Doc. 53-9894; Filed, Nov. 24, 1953; 8:53 a. m.]

# NOTICES

## DEPARTMENT OF THE INTERIOR

### Bureau of Land Management

[Misc. 55821]

NEW MEXICO

OPENING CERTAIN LANDS IN NEW MEXICO DECLARED TO BE PUBLIC DOMAIN BY DEPARTMENTAL ORDER OF MARCH 25, 1950

NOVEMBER 18, 1953.

By virtue of the authority vested in the Secretary of the Interior by section 1 of the act of August 13, 1949 (63 Stat. 604; 25 U. S. C. 622) and otherwise, and pursuant to Departmental Order No. 2583 of August 16, 1950, section 2.22 (a), (15 F. R. 5643) as amended, it is ordered as follows:

The lands, which were declared to be public domain by the said act of August 13, 1949, and which were transferred, subject to valid existing rights to the Bureau of Land Management for administration by section II of an order of the Secretary of the Interior of March 25, 1950, are hereby opened to all forms of disposition under the public land laws.

The public lands restored to disposition by this order, aggregating 171,912.25 acres in Sandoval, Bernalillo, Valencia and McKinley Counties are described in section III and IV of the memorandum of information which is attached to and made a part of report of the Secretary of the Interior to the Senate Committee on Interior and Insular Affairs on S. 1323, 81st Congress (Sen. Rep. 549, 81st Cong., 1st Sess.), and comprise portions of the following:

NEW MEXICO PRINCIPAL MERIDIAN

T. 14 N., Rgs. 1 and 2 E.
T. 15 N., R. 1 E.
San Ysidro Grant.

Tps. 10 and 11 N., R. 1 W.
Tps. 9, 10, 11, 12 and 13 N., R. 2 W.
Tps. 9, 11 and 12 N., R. 3 W.
Tps. 11 and 12 N., R. 4 W.
Tps. 6 and 7 N., R. 6 W.
T. 6 N., R. 7 W.
Tps. 7 and 8 N., R. 9 W.
Tps. 6, 7 and 8 N., R. 10 W.
T. 6 N., R. 11 W.
T. 8 N., Rgs. 16, 17 and 18 W.
Tps. 8, 10 and 11 N., R. 19 W.

With respect to applications under the mineral-leasing laws, this order shall be effective on the date of its publication in the FEDERAL REGISTER.

The easterly portions of the lands are rolling to rough, with occasional mesa outcroppings. There is scattered juniper and pinion, under which there is relatively abundant grass and browse cover. Part of the most westerly land is in a wooded area of pinion and juniper with an understory of sage and grass; part is high choice grazing land on the south side of the Zuni uplift. The central portions of the lands are partly high country near the Continental Divide, with pinion and juniper and occasional pine—the headwaters of numerous small drainages. A part is mesa and mountain country cut by washes, the vegetation being juniper and pinion with less than average cover of forage.

The lands are primarily suitable for grazing.

No applications for the land shall be allowed under the homestead, small tract, desert land, or any other non-mineral public-land law unless the lands have already been classified as valuable or suitable for such type of application, or shall be so classified upon consideration of an application.

This order shall not otherwise become effective to change the status of such lands until 10:30 a. m. on the 35th day after the date of this order. At that time the said lands shall, subject to valid existing rights and the provisions of existing withdrawals, become subject to application, petition, location, and selection as follows:

(a) *Ninety-one day period for preference-right filings.* For a period of 91 days, commencing at the hour and on the day specified above, the surveyed public lands restored by this order shall be subject only to (1) application under the homestead or the desert-land laws or the Small Tract Act of June 1, 1938, 52 Stat. 609 (43 U. S. C. 682a), as amended, by qualified veterans of World War II and other qualified persons entitled to preference under the act of September 27, 1944, 58 Stat. 747 (43 U. S. C. 279–284), as amended, subject to the requirements of applicable law, and (2) application under any applicable public-land law based on prior existing valid settlement rights and preference rights conferred by existing laws or equitable claims subject to allowance and confirmation. Applications under subdivision (1) of this paragraph shall be subject to applications and claims of the class described in subdivision (2) of this paragraph. All applications filed under this paragraph either at or before 10:30 a. m. on the 35th day after the date of this order shall be treated as though filed simultaneously at that time. All applications filed under this paragraph after 10:30 a. m. on the said 35th day shall be considered in the order of filing.

(b) *Date for non-preference-right filings.* Commencing at 10:30 a. m. on the 126th day after the date of this order, any lands remaining unappropriated shall become subject to such application, petition, location, selection, or other appropriation by the public generally as may be authorized by the public-land laws. All such applications filed either at or before 10:30 a. m. on the 126th day after the date of this order, shall be treated as though filed simultaneously at the hour specified on such 126th day. All applications filed thereafter shall be considered in the order of filing.

A veteran shall accompany his application with a complete photostatic, or other copy (both sides), of his certificate of honorable discharge, or of an official document of his branch of the service which shows clearly his honorable discharge as defined in § 181.36 of Title 43 of the Code of Federal Regulations, or constitutes evidence of other facts upon which the claim for preference is based and which shows clearly the period of service. Other persons claiming credit for service of veterans must furnish like proof in support of their claims. Persons asserting preference rights, through settlement or otherwise, and those having equitable claims, shall accompany their applications by duly corroborated statements in support thereof, setting forth in detail all facts relevant to their claims.

Applications for these lands, which shall be filed in the Land and Survey Office, Bureau of Land Management, Santa Fe, New Mexico, shall be acted upon in accordance with the regulations contained in § 295.8 of Title 43 of the Code of Federal Regulations and Part 296 of that title, to the extent that such regulations are applicable. Applications under the homestead laws shall be governed by the regulations contained in Parts 166 to 170, inclusive, of Title 43 of the Code of Federal Regulations, and applications under the desert-land laws and the said Small Tract Act of June 1, 1938, shall be governed by the regulations contained in Parts 232 and 257, respectively, of that title.

Inquiries concerning these lands shall be addressed to the Manager, Land and Survey Office, Bureau of Land Management, Santa Fe, New Mexico.

WILLIAM PINCUS, *Assistant Director.*

### Bureau of Reclamation

NORTH PLATTE PROJECT, NEBRASKA

ORDER OF REVOCATION

NOVEMBER 10, 1952.

Pursuant to the authority delegated by Departmental Order No. 2515 of April 7, 1949 (14 F. R. 1937), I hereby revoke Departmental Orders of May 3, 1904 and May 7, 1906, and insofar as said orders affect the following described land: *Provided, however,* That such revocation shall not affect the withdrawal of any other lands by said orders or affect any other orders withdrawing or reserving the land hereinafter described:

SIXTH PRINCIPAL MERIDIAN, NEBRASKA

T. 23 N., R. 54 W.,
Sec. 13, NW¼.

The above area aggregates 160 acres.

H. F. MCPHAIL, *Acting Commissioner.*

NOVEMBER 18, 1953.

I concur. The records of the Bureau of Land Management will be noted accordingly.

The lands are included in reclamation homestead entry, Alliance 020199, and are not subject to the provisions of the act of September 27, 1944 (58 Stat. 747; 43 U. S. C. 279–284) as amended, granting preference rights to veterans of World War II and others.

WILLIAM PINCUS, *Assistant Director, Bureau of Land Management.*

## DEPARTMENT OF AGRICULTURE

### Farm Credit Administration

[Farm Credit Administration Order 583]

DEPUTY COOPERATIVE BANK COMMISSIONER ET AL.

DESIGNATION AS ACTING COOPERATIVE BANK COMMISSIONER AND ORDER OF PRECEDENCE OF OTHERS TO ACT AS SUCH

NOVEMBER 3, 1953.

B. F. Viehmann, Deputy Cooperative Bank Commissioner, is hereby also designated as Acting Cooperative Bank Commissioner, and, as such, is hereby authorized and empowered to execute and perform any and all functions, powers, authority, and duties which the Cooperative Bank Commissioner is authorized and empowered to execute and perform

S. Y. McConnell, Assistant Cooperative Bank Commissioner, is hereby authorized and empowered to execute and perform any and all functions, powers, authority, and duties which the Cooperative Bank Commissioner is authorized to execute and perform, in the event Acting Cooperative Bank Commissioner B. F. Viehmann is absent or unable to serve for any reason.

Dorwin Scott, Treasurer, Central Bank for Cooperatives, is hereby authorized and empowered to execute and perform any and all functions, powers, authority, and duties which the Cooperative Bank Commissioner is authorized and empowered to execute or perform, in the event Acting Cooperative Bank Commissioner B. F. Viehmann and Assistant Cooperative Bank Commissioner S. Y. McConnell are absent or unable to serve for any reason.

The foregoing order shall become effective on November 3, 1953, and revokes Farm Credit Administration Order No.

568 of May 13, 1953 (18 F. R. 2888), as of the same date.

C. R. ARNOLD,
*Governor.*

## Office of the Secretary

UNDER SECRETARY OF AGRICULTURE AND EACH ASSISTANT SECRETARY OF AGRICULTURE

DELEGATION OF AUTHORITY TO PERFORM ALL DUTIES AND EXERCISE ALL POWERS AND FUNCTIONS OF SECRETARY OF AGRICULTURE

a. Pursuant to the authority vested in me by Reorganization Plan No. 2, 1953, and subject to the provisions of paragraph c hereof, there is hereby delegated to the Under Secretary of Agriculture and each Assistant Secretary of Agriculture, severally, the authority to perform all duties and to exercise all the powers and functions which are now, or which may hereafter be, vested in me. The authority herein conferred upon each of the Assistant Secretaries of Agriculture will be exercised by each of such officers in connection with the functions of the agencies assigned to his direction and supervision, except when it may be necessary that he act otherwise because any other Assistant Secretary is absent or otherwise unavailable. The authority granted hereunder may also be exercised in the discharge of any additional functions which the Secretary of Agriculture may assign.

b. There is hereby delegated to the Administrative Assistant Secretary the authority to perform all duties and to exercise all the power and functions which are now, or which may hereafter be, vested in me, in connection with the functions of the agencies assigned to his direction and supervision and any additional functions which the Secretary of Agriculture may assign to him.

c. This order shall not be construed to confer upon any officer named herein the authority of the Secretary of Agriculture to prescribe such regulations as may be necessary pursuant to section 8c (15) (A) of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 608c (15) (A)).

d. The determination of any matter by any of the officers named herein which requires the application of new principles or a departure from principles heretofore announced by the Secretary of Agriculture shall be brought to the attention of the Secretary for approval.

e. (1) This order supersedes the order of August 24, 1953, published in 18 F. R. 5155 and all other orders heretofore issued by the Secretary of Agriculture delegating authority to the Under Secretary of Agriculture and the Assistant Secretary of Agriculture.

(2) Except as provided in subparagraph (1) of this paragraph, the provisions of this order are not intended to supersede or modify any delegations of authority heretofore made by the Secretary of Agriculture.

f. The provisions of this order shall not preclude the Secretary of Agriculture from exercising any of the powers and functions or from performing any of the duties herein conferred.

g. Any action taken by the officers herein designated in the exercise, on or after June 4, 1953, of the authority herein delegated is hereby confirmed, in view of the informal authorization heretofore granted.

Done at Washington, D. C., this 18th day of November 1953.

[SEAL] EZRA TAFT BENSON,
*Secretary of Agriculture.*

# DEPARTMENT OF COMMERCE

## Maritime Administration

[No. S-45]

GRACE LINE INC.

NOTICE OF HEARING ON APPLICATION FOR RENEWAL OF WAIVER

Notice is hereby given that the Maritime Administrator, upon request of Grace Line Inc., has directed that a public hearing be held on the application of Grace Line Inc., for renewal of the waiver of the provisions of section 804 of the Merchant Marine Act, 1936, as amended, and of Article II-14 of applicant's operating-differential subsidy agreement, relative to the agreement between applicant and Johnson Line, whereunder Grace Line's affiliated companies propose to solicit cargo and passengers for the vessels of Johnson Line in its North Pacific Service and its South Pacific Service. The previous waiver granted to applicant relative to such solicitation was cancelled on August 21, 1953, with the understanding that Grace Line Inc., could request a public hearing on said matter of solicitation.

Section 804 of the Merchant Marine Act, 1936, as amended, makes it unlawful for any contractor receiving an operating-differential subsidy to act as agent for a foreign-flag vessel which competes with an American-flag service determined by the Maritime Administrator to be essential under section 211 of that act unless, under special circumstances and for good cause shown, the Maritime Administrator, in his discretion, shall waive such restriction for a specific period of time.

In order to afford applicant Grace Line Inc., an opportunity to show such special circumstances and good cause, a public hearing will be held before a hearing examiner in Room 4519, New General Accounting Office Building, 441 G Street NW., Washington, D. C., on January 13, 1954, at 10 o'clock a. m. The hearing will be conducted pursuant to the rules of practice and procedure of the Federal Maritime Board Maritime Administration (18 F. R. 3716, 4598), and a recommended decision will be issued by the Examiner.

All persons (including individuals, corporations, associations, firms, partnerships, and public bodies) desiring to participate in this proceeding should file petitions for leave to intervene promptly and in accordance with § 201.74 (46 CFR 201.74) (Rule 5 (n)) of said rules of practice and procedure.

Dated: November 19, 1953.

By order of the Maritime Administrator.

[SEAL] A. J. WILLIAMS,
*Secretary.*

[F. R. Doc. 53-9877; Filed, Nov. 23, 1953; 8:52 a. m.]

# DEPARTMENT OF LABOR

## Wage and Hour Division

LEARNER EMPLOYMENT CERTIFICATES

ISSUANCE TO VARIOUS INDUSTRIES

Notice is hereby given that pursuant to section 14 of the Fair Labor Standards Act of 1938, as amended (52 Stat. 1068, as amended; 29 U. S. C. and Sup. 214), and Part 522 of the regulations issued thereunder (29 CFR Part 522), special certificates authorizing the employment of learners at hourly wage rates lower than the minimum wage rates applicable under section 6 of the act have been issued to the firms listed below. The employment of learners under these certificates is limited to the terms and conditions therein contained and is subject to the provisions of Part 522. The effective and expiration dates, occupations, wage rates, number or proportion of learners, and learning period for certificates issued under the general learner regulations (§§ 522.1 to 522.14) are as indicated below; conditions provided in certificates issued under special industry regulations are as established in these regulations.

Single Pants, Shirts and Allied Garments, Women's Apparel, Sportwear and Other Odd Outerwear, Rainwear, Robes and Leather and Sheep-Lined Garments Divisions of the Apparel Industry Learner Regulations (29 CFR 522.160 to 522.168, as amended June 2, 1952, 17 F. R. 3818).

Blue Ridge Manufacturers, Inc., Huntington, W. Va., effective 12-4-53 to 12-3-54; 10 percent of the total number of factory production workers for normal labor turnover purposes (dungarees).

Blue Ridge Manufacturers, Inc., Pulaski and Brown Streets, Petersburg, Va., effective 11-14-53 to 11-13-54; 10 percent of the total number of factory production workers for normal labor turnover purposes (dungarees, misses' and women's denim and twill jeans).

Bellcraft Manufacturing Co., Hartwell, Ga., effective 11-12-53 to 5-11-54; 10 learners for expansion purposes (sport shirts).

Michael Berkowitz Co., Inc., Wayne and Pa., effective 11-12-53 to 11-11-54; 10 percent of the total number of factory production workers for normal labor turnover purposes (pajamas).

Cluett, Peabody & Co., Inc., Fleetwood, Pa., effective 11-10-53 to 5-9-54; 20 learners for expansion purposes (boys' shirts).

Cluett, Peabody & Co., Inc., 2022 Chappell Avenue, SW., Atlanta, Ga., effective 11-15-53 to 11-14-54; 10 percent of the total number of factory production workers for normal labor turnover purposes (dress shirts).

Cordele Uniform Co., 122 Wall Street, Cordele, Ga., effective 11-16-53 to 11-15-54; 10 learners for normal labor turnover purposes (service garments).

Florence Manufacturing Co., Inc., Florence, S. C., effective 11-28-53 to 11-27-54; 10 percent of the total number of factory production workers for normal labor turnover purposes (house dresses).

Lancaster-Walker Manufacturing Co., Inc., Columbia, Ky., effective 11-10-53 to 11-9-54; 12 learners for normal labor turnover purposes (sport shirts).

Linden Apparel Corp., Linden, Tenn., effective 11-23-53 to 11-22-54; 10 percent of the total number of factory production workers for normal labor turnover purposes (dungarees).

Malden Form Brassiere Co., Inc., Route 1, Princeton, W. Va., effective 11-21-53 to 11-20-54; 10 percent of the total number of factory production workers for normal labor turnover purposes (brassieres).

Malden Form Brassiere Co., Inc., Main Street and Monticello Avenue, Clarksburg, W. Va., effective 11-16-53 to 11-15-54; 10 percent of the total number of factory production workers for normal labor turnover purposes (brassieres).

Malden Form Brassiere Co., Inc., 2311 Adams Avenue, Huntington, W. Va., effective 12-1-53 to 11-30-54; 10 percent of the total number of factory production workers for normal labor turnover purposes (brassieres).

Oberman Manufacturing Co., Wrightsville, Ga., effective 11-26-53 to 11-25-54; 10 percent of the total number of factory production workers for normal labor turnover purposes (slacks).

Penn Beach Co., Danville, Ky., effective 12-6-53 to 12-5-54; 7 percent of the total number of factory production workers, for normal labor turnover purposes. Machine operators (except cutting), 480 hours, pressers, 480 hours, hand sewers, 480 hours; at least 65 cents an hour for the first 240 hours and not less than 70 cents an hour for the remaining 240 hours (men's and boys' clothing).

Seminole Manufacturing Co., Columbus, Miss., effective 12-1-53 to 11-30-54; 10 percent of the total number of factory production workers for normal labor turnover purposes (men's and boys' trousers).

Seminole Manufacturing Co., Aberdeen, Miss., effective 12-1-53 to 11-30-54; 10 percent of the total number of factory production workers for normal labor turnover purposes (men's and boys' trousers).

Terre Hill Manufacturing Co., Inc., Blue Ball, Pa., effective 11-10-53 to 11-9-54; 10 percent of the total number of factory production workers engaged in the manufacture of underwear made from woven fabric or other apparel industry products, for normal labor turnover purposes (slips and nightgowns).

Tidewater Garment Co., Inc., 2309 Washington Avenue, Newport News, Va., effective 11-16-53 to 5-15-54; 15 learners for expansion purposes (cotton dresses).

Twin City Manufacturing Co., Twin City, Ga., effective 12-6-53 to 12-5-54; 10 percent of the total number of factory production workers for normal labor turnover purposes (dress and sport shirts).

Wildwood Clothing Co., Inc., 112 East Schellenger Avenue, Wildwood, N. J., effective 12-8-53 to 12-7-54; 10 percent of the total number of factory production workers for normal labor turnover purposes (men's pants).

Glair Industry Learner Regulations (29 CFR 522.201 to 522.211, as amended October 27, 1952, 17 F. R. 8633).

General Cigar Co., Inc., 715-25 North Fourth Street, Allentown, Pa., effective 11-16-53 to 11-15-54; 10 percent of the total number of factory production workers engaged in each occupation listed below: Cigar machine operating, 320 hours; cigar packing, cigars retailing for more than 6 cents, 320 hours; cigars retailing for 6 cents or less, 160 hours; machine stripping, 160 hours; hand stripping, 160 hours, each 65 cents an hour.

General Cigar Co., Inc., Fifth and Hickory Streets, Mount Carmel, Pa., effective 11-13-53 to 11-12-54; 10 percent of the total number of factory production workers engaged in each occupation listed below: Cigar machine operating, 320 hours; cigar packing, cigars retailing for over 6 cents, 320 hours; machine stripping, 160 hours; each 65 cents an hour.

General Cigar Co., Inc., Robert Burns Drive, Philipsburg, Pa., effective 11-13-53 to 11-12-54; 10 percent of the total number of factory production workers engaged in each occupation listed below: Cigar machine operating, 320 hours; cigar packing, cigars retailing for 6 cents or less, 160 hours; machine stripping, 160 hours; each 65 cents an hour.

General Cigar Co., Inc., 154 West Church Street, Nanticoke, Pa., effective 11-13-53 to 11-12-54; 10 percent of the total number of factory production workers engaged in each occupation listed below: Cigar machine operating, 320 hours, cigar packing, cigars retailing for over 6 cents, 320 hours; machine stripping, 160 hours; hand stripping, 160 hours; each 65 cents an hour.

Pennstate Cigar Corp., 426 East Allegheny Avenue, Philadelphia, Pa., effective 11-30-53 to 11-29-54. 10 percent of the total number of factory production workers engaged in each occupation listed below: Cigar machine operating, 320 hours; machine stripping, 160 hours; packing, cigars retailing at 6 cents or less, 160 hours, each 65 cents an hour.

Independent Telephone Industry Learner Regulations (29 CFR 522.82 to 522.93 as amended January 25, 1950, 15 F. R. 393).

Iowa-Illinois Telephone Co., New London, Iowa, effective 11-17-53 to 11-16-54.

Knitted Wear Industry Learner Regulations (29 CFR 522.68 to 522.79, as amended January 21, 1952, 16 F. R. 12866).

Cluett, Peabody & Co., Inc., Eveleth, Minn., effective 11-28-53 to 11-27-54; 5 percent of the total number of factory production workers for normal labor turnover purposes (undershorts).

Coopers, Inc., of Georgia, Millen, Ga., effective 11-12-53 to 11-11-54; 5 percent of the total number of factory production workers for normal labor turnover purposes (men's jockey shorts, midways and T-shirts).

Reidler Knitting Mills, Inc., 757 West Broad Street, Hazleton, Pa., effective 11-24-53 to 11-23-54; 5 percent of the total number of factory production workers for normal labor turnover purposes (underwear).

Terre Hill Manufacturing Co., Inc., Blue Ball, Pa., effective 11-10-53 to 11-9-54; 5 percent of the total number of factory production workers engaged in the production of underwear and nightwear from knitted fabric or other Knitted Wear Industry products, for normal labor turnover purposes (knit slips and nightwear).

Shoe Industry Learner Regulations (29 CFR 522.250 to 522.260, as amended March 17, 1952; 17 F. R. 1500).

Casey Manufacturing Co., East Main, Casey, Ill., effective 11-13-53 to 11-12-54; 10 percent of the number of productive factory workers in the plant for normal labor turnover purposes.

Ettelbrick Shoe Co., Sole Department, Casey, Ill., effective 11-13-53 to 11-12-54; 5 learners for normal labor turnover purposes.

Greenup Manufacturing Co., Greenup, Ill., effective 11-13-53 to 11-12-54; 10 percent of the number of productive factory workers in the plant for normal labor turnover purposes.

The Muskin Shoe Co., Pine Street, Millersburg, Pa., effective 11-17-53 to 11-16-54; 10 percent of the number of productive factory workers in the plant for normal labor turnover purposes.

Town & Country Shoes, Inc., 110 North Missouri, Sedalia, Mo., effective 11-12-53 to 11-11-54; 10 percent of the number of productive factory workers in the plant for normal labor turnover purposes.

Town & Country Shoes, Inc., Odessa, Mo., effective 11-12-53 to 11-11-54; 10 percent of the number of productive factory workers in the plant for normal labor turnover purposes.

Town & Country Shoes, Inc., Warrensburg, Mo., effective 11-12-53 to 11-11-54; 10 percent of the number of productive factory workers in the plant for normal labor turnover purposes.

The following special learner certificates were issued in Puerto Rico to the companies hereinafter named. The effective and expiration dates, the number of learners, the learner occupations, the length of the learning period and the learner wage rates are indicated, respectively.

Denlcotea Panamerican, Inc., Carpenter Road, Hato Rey, P. R., effective 11-16-53 to 3-15-54; 5 learners. Tripoling and polishing of plastic bits, 200 hours at 35 cents an hour (manufacture of plastic cigarette holders).

El Mundo, Inc., San Juan, P. R., effective 11-5-53 to 5-4-54; 3 learners. Teletype operators, 200 hours at 48 cents an hour (daily newspaper).

Each certificate has been issued upon the employer's representation that employment of learners at subminimum rates is necessary in order to prevent curtailment of opportunities for employment, and that experienced workers for the learner occupations are not available. The certificates may be canceled in the manner provided in the regulations and as indicated in the certificates. Any person aggrieved by the issuance of any of these certificates may seek a review or reconsideration thereof within fifteen days after publication of this notice in the FEDERAL REGISTER pursuant to the provisions of Part 522.

Signed at Washington, D. C., this 16th day of November 1953.

MILTON BROOKE,
*Authorized Representative of the Administrator.*

# CIVIL AERONAUTICS BOARD

ADMINISTRATOR OF CIVIL AERONAUTICS

DELEGATION OF CERTAIN ACCIDENT INVESTIGATION FUNCTIONS

NOVEMBER 10, 1953.

Acting pursuant to the authority vested in it by section 601 (c) of the Civil Aeronautics Act of 1938, as amended (52 Stat. 1007; 49 U. S. C. 551), the Civil Aeronautics Board hereby delegates to the Administrator of Civil Aeronautics the following powers and duties in connection with its accident investigation functions under section 702 of the Civil Aeronautics Act of 1938, as amended (52 Stat. 1013; 49 U. S. C. 582):

1. Subject to the terms, conditions, and limitations set forth below, the Board hereby delegates to the Administrator the authority contained in section 702 (a) (2) and section 702 (a) (4) of

the Civil Aeronautics Act of 1938, as amended, with respect to all accidents involving fixed wing aircraft to which Part 62 of the Civil Air Regulations is applicable and which do not involve an aircraft in excess of a certificated maximum take-off weight of 12,500 pounds: *Provided, however*, That the delegation of authority herein shall not apply to any accident involving an aircraft operated by any air carrier authorized by certificate of public convenience and necessity to engage in air transportation in Alaska.

2. The Board hereby further delegates to the Administrator the authority contained in section 702 (c) of the act for all purposes directly connected with the investigation of aircraft accidents by the Administrator pursuant to paragraph 1 hereof: *Provided, however*, That nothing herein contained shall be construed as authorizing the Administrator to hold public hearings in connection with the performance of the function of investigation of aircraft accidents herein delegated to the Administrator.

3. If at any time the Board shall determine either upon request of the Administrator, request of any person having any substantial interest therein, or upon its own initiative that the circumstances of a particular accident being investigated by the Administrator pursuant to the delegation of authority herein are such as to indicate that a public hearing thereon may be desirable in the public interest, the Board will so notify the Administrator. Upon such notification the delegation of authority to the Administrator herein shall terminate as to that particular accident and such accident shall thereafter be investigated and the probable causes thereof be determined in the same manner as accidents not covered by this delegation of authority.

4. Reports on the accidents investigated by the Administrator pursuant to the delegation herein, including reports on the probable causes thereof, may be prepared in such form and manner and made public by such means as the Administrator may determine to be necessary to carry out the purposes and objectives of Title VII of the Civil Aeronautics Act of 1938, as amended. A copy of each such report, if any, whether or not made public by the Administrator, shall be transmitted to the Board.

5. For each accident investigated by the Administrator pursuant to the delegation herein, he shall transmit to the Board for its statistical use an analysis thereof, including a determination of the probable cause, prepared on an accident analysis sheet or sheets acceptable to the Board.

6. The delegation of authority set forth herein shall become effective with respect to accidents occurring after midnight December 31, 1953, local time, and shall remain effective until otherwise ordered by the Board.

By the Civil Aeronautics Board:[1]

[SEAL] M. C. MULLIGAN,
*Secretary.*

[F. R. Doc. 53-9858; Filed, Nov. 23, 1953; 8:52 a. m.]

## SECURITIES AND EXCHANGE COMMISSION

[File No. 1-3237]

ADOLPH GOBEL, INC.

ORDER SUMMARILY SUSPENDING TRADING

At a regular session of the Securities and Exchange Commission held at its office in the City of Washington, D. C., on the 18th day of November A. D. 1953.

The Commission by order adopted March 13, 1953, pursuant to section 19 (a) (4) of the Securities Exchange Act of 1934, having summarily suspended trading in the $1.00 par value common stock of Adolph Gobel, Inc., on the American Stock Exchange for a period of ten days from that date, and subsequently having entered additional orders further suspending such trading in order to prevent fraudulent, deceptive or manipulative acts or practices; and

The Commission being of the opinion that the public interest requires the summary suspension of trading in such security on that Exchange and that such action is necessary and appropriate for the protection of investors; and

The Commission being of the opinion that such suspension is necessary in order to prevent fraudulent, deceptive or manipulative acts or practices, with the result that it will be unlawful under section 15 (c) (2) of the Securities Exchange Act of 1934 and the Commission's Rule X-15C2-2 thereunder, for any broker or dealer to make use of the mails or of any means or instrumentality of interstate commerce to effect any transaction in or to induce or attempt to induce the purchase or sale of, such security otherwise than on a national securities exchange.

*It is ordered*, Pursuant to section 19 (a) (4) of the Securities Exchange Act of 1934, that trading in said securities on the American Stock Exchange be summarily suspended in order to prevent fraudulent, deceptive or manipulative acts or practices, effective at the opening of the trading session on said Exchange on November 19, 1953, for a period of ten days.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
*Secretary.*

[File No. 70-3147]

MONONGAHELA POWER CO.

ORDER AUTHORIZING ISSUANCE AND SALE OF PRINCIPAL AMOUNT OF FIRST MORTGAGE BONDS AT COMPETITIVE BIDDING

NOVEMBER 18, 1953.

Monongahela Power Company ("Monongahela"), a subsidiary company of The West Penn Electric Company, a registered holding company, having filed an application-declaration with this Commission pursuant to sections 6 (a) and 7 of the Public Utility Holding Company Act of 1935 ("act") and Rule U-50 promulgated thereunder with respect to the following proposed transactions:

Monongahela proposes to issue and sell, pursuant to the competitive bidding requirements of Rule U-50, $10,000,000 principal amount of its first mortgage bonds, __ percent series, due 1983. The net proceeds from the sale of said bonds are to be used for construction of property additions and improvements by Monongahela and its subsidiaries. The bonds are to be issued under an indenture dated as of August 1, 1945, as heretofore supplemented, between Monongahela and City Bank Farmers Trust Company as Trustee, and an indenture supplemental to said indenture to be dated as of December 1, 1953. The price of the bonds shall be not less than 100 percent or more than 102¾ percent of the principal amount thereof and the interest rate (which shall be a multiple of ⅛ of 1 percent) will be determined by the competitive bidding.

Due notice having been given of the filing of the application-declaration and a hearing not having been requested of or ordered by the Commission; and the Commission finding that the applicable provisions of the act and rules promulgated thereunder are satisfied and that no adverse findings are necessary, and deeming it appropriate in the public interest and the interest of investors and consumers that said application-declaration, as amended, be granted and permitted to become effective:

*It is ordered*, Pursuant to Rule U-23 and the applicable provisions of said act, that said application-declaration, as amended, be and hereby is, granted and permitted to become effective forthwith, subject to the terms and conditions prescribed in Rule U-24 and subject to the further condition that the proposed sale of bonds shall not be consummated until the results of competitive bidding with respect thereto shall have been made a matter of record in this proceeding and a further order shall have been entered by this Commission in the light of the record so completed, which order may contain such further terms and conditions as may then be deemed appropriate.

*It is further ordered*, That jurisdiction be, and hereby is, reserved over the payment of all fees and expenses incurred or to be incurred in connection with the proposed transactions.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
*Secretary.*

## HOUSING AND HOME FINANCE AGENCY

### Office of the Administrator

REGIONAL ECONOMIST, REGION IV, FORT WORTH, TEXAS

DELEGATION OF AUTHORITY TO PERFORM FUNCTIONS IN CONNECTION WITH DEFENSE HOUSING AUTHORIZED UNDER HHFA REGULATION CR 3

The Regional Economist, Region IV, is hereby authorized, within the area under his jurisdiction, to take any action which it is necessary or appropriate for the Housing and Home Finance Administrator to take in the administration of Housing and Home Finance Agency Regulation CR 3 (as amended and revised July 18, 1953, 17 F. R. 6585, with any subsequent amendments thereto) with respect to releasing applicants or their successors from their obligations under CR 3:

(a) To hold for rent structures containing one-family dwelling units,

(b) To hold any dwelling units for sale, and

(c) To exclusively offer any dwelling units to eligible defense workers.

Delegation of Authority, effective Oct. 2, 1953, 18 F. R. 6324 (Oct. 2, 1953))

Effective this 13th day of November 1953.

W. H. SINDT,
*Regional Representative,*
*Region IV.*

## FEDERAL POWER COMMISSION

[Docket No. E-6532]

MONTANA-DAKOTA UTILITIES CO.

NOTICE OF APPLICATION

NOVEMBER 18, 1953.

Take notice that on November 17, 1953, an application was filed with the Federal Power Commission, pursuant to section 204 of the Federal Power Act, by Montana-Dakota Utilities Co., a corporation organized under the laws of the State of Delaware, and doing business in the States of Minnesota, Montana, North Dakota, South Dakota, and Wyoming, with its principal business office at Minneapolis, Minnesota, seeking an order authorizing the issuance of $6,000,000 of Promissory Notes, payable to the National City Bank of New York, dated as of the dates of their respective issue, due not more than one year after the dates of their respective issue, bearing interest at the prime commercial bank rate in effect at the dates of their respective issue. The Northwestern National Bank of Minneapolis will have a 25 percent participation in each Note and the First National Bank of Minneapolis will have a 15 percent participation in each Note. Applicant proposes to replace $4,000,000 of Notes of $1,000,000 each which were issued on June 24, September 2, October 6, and November 4, 1953, all due June 1, 1954. The other $2,000,000 of Notes will be issued prior to December 31, 1953, as funds are required.

Any person desiring to be heard, or to make any protest with reference to said application, should on or before the 30th day of November 1953, file with the Federal Power Commission, Washington 25, D. C., a petition or protest in accordance with the Commission's rules of practice and procedure. The application is on file with the Commission for public inspection.

## SMALL BUSINESS ADMINISTRATION

[Declaration of Disaster Area 1]

NEW YORK

DECLARATION OF DISASTER AREA

Whereas, it has been reported that on or about November 6, 1953, because of the combined disastrous effect of a gale, snow and the tides, damage resulted to residences and business property located in certain coastal areas in the State of New York; and

Whereas, the Small Business Administration has investigated and has received other reports of investigations of conditions in the areas affected; and

Whereas, after reading and evaluating reports of such conditions, I find that the conditions in such areas constitute a catastrophe within the purview of the Small Business Act of 1953;

Now therefore, as Acting Administrator of the Small Business Administration, I hereby determine that:

1. Applications for disaster loans under the provisions of section 207 (b) of the Small Business Act of 1953 may be received and considered by the SBA Regional Office below indicated from persons or firms where property situated in the coastal areas of the following counties (hereinafter referred to as "the disaster areas") suffered damage or other destruction as a result of the catastrophe above referred to:

Counties of Richmond, Kings, Queens, Nassau, Suffolk, and Bronx. Mr. J. Frederic Benedict, Regional Director, New York Regional Office, Small Business Administration, 2 Park Avenue, New York 16, N. Y.

2. Special field offices will not be established to receive and process such applications.

3. No disaster loan application from any resident or firm situated in the disaster areas will be accepted under the authority of this order subsequent to May 31, 1954.

Dated: November 12, 1953.

WENDELL B. BARNEY,
*Acting Administrator.*

[F. R. Doc. 53-9848; Filed, Nov. 20, 1953; 5:04 p. m.]

[Declaration of Disaster Area 2]

NEW JERSEY

DECLARATION OF DISASTER AREA

Whereas, it has been reported that on or about November 6, 1953, because of the combined disastrous effect of a gale, snow and the tides, damage resulted to residences and business property located in certain coastal areas in the State of New Jersey; and

Whereas, the Small Business Administration has investigated and has received other reports of investigations of conditions in the areas affected; and

Whereas, after reading and evaluating reports of such conditions, I find that the conditions in such areas constitute a catastrophe within the purview of the Small Business Act of 1953;

Now Therefore, as Acting Administrator of the Small Business Administration, I hereby determine that:

1. Applications for disaster loans under the provisions of section 207 (b) of the Small Business Act of 1953 may be received and considered by the SBA Regional Offices below indicated from persons or firms where property situated in the coastal areas of the following counties (hereinafter referred to as "the disaster areas") suffered damage or other destruction as a result of the catastrophe above referred to:

Counties of Monmouth and Middlesex: Mr. J. Frederic Benedict, Regional Director, New York Regional Office, Small Business Administration, 2 Park Avenue, New York 16, N. Y.

Counties of Ocean, Atlantic, and Cape May: Mr. William Henry Herman, Regional Director, Philadelphia Regional Office, Small Business Administration, 1015 Chestnut Street, Philadelphia 7, Pa.

2. Special field offices will not be established to receive and process such applications.

3. No disaster loan application from any resident or firm situated in the disaster areas will be accepted under the authority of this order subsequent to May 31, 1954.

Dated: November 12, 1953.

## INTERSTATE COMMERCE COMMISSION

[4th Sec. Application 28658]

GYPSUM LATH AND RELATED ARTICLES FROM TEXAS, OKLAHOMA, AND KANSAS TO SOUTHERN TERRITORY

APPLICATION FOR RELIEF

NOVEMBER 18, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: F. C. Kratzmeir, Agent, for carriers parties to schedule listed below.

Commodities involved: Gypsum lath and sheathing, gypsum backing boards and related articles, carloads.

From: Specified points in Texas, Eldorado and Southard, Okla., and Medicine Lodge, Kans.

To: Points in southern territory.

Grounds for relief: Competition with rail carriers, and circuitous routes.

Schedules filed containing proposed rates: F. C. Kratzmeir, Agent, I. C. C. No. 4026, supp. 17.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

[SEAL] GEORGE W. LAIRD,
*Secretary.*

[F. R. Doc. 53-9837; Filed, Nov. 20, 1953; 8:52 a. m.]

[4th Sec. Application 28659]

SAND FROM SAULSBURY, TENN., TO THE SOUTHWEST

APPLICATION FOR RELIEF

NOVEMBER 18, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: F. C. Kratzmeir, Agent, for carriers parties to schedule listed below.

Commodities involved: Sand, in carloads.

From: Saulsbury, Tenn.

To: Points in Arkansas, Louisiana, Oklahoma and Texas.

Grounds for relief: Competition with rail carriers, circuitous routes, and to apply rates constructed on the basis of the short line distance formula.

Schedules filed containing proposed rates: F. C. Kratzmeir, Agent, I. C. C. No. 3736, supp. 235.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

[4th Sec. Application 28660]

GRAIN FROM CERTAIN STATES TO TEXAS

APPLICATION FOR RELIEF

NOVEMBER 18, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: F. C. Kratzmeir, Agent, for the Roscoe, Snyder & Pacific Railway Company, St. Louis-San Francisco Railway Company and other carriers.

Commodities involved: Grain, grain products, and related articles, carloads.

From: Points in Arkansas, Kansas, Missouri and Oklahoma, East St. Louis, Ill., and Memphis, Tenn.

To: Points in Texas on Roscoe, Snyder & Pacific Railway.

Grounds for relief: Competition with rail carriers, circuitous routes, and to maintain grouping.

Schedules filed containing proposed rates: F. C. Kratzmeir, Agent, I. C. C. No. 3941, supp. 68.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

# FEDERAL REGISTER

VOLUME 18 NUMBER 230

*Washington, Wednesday, November 25, 1953*

## TITLE 3—THE PRESIDENT

### PROCLAMATION 3038

ENUMERATION OF ARMS, AMMUNITION, AND IMPLEMENTS OF WAR

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA

A PROCLAMATION

WHEREAS section 12 (1) of the joint resolution of Congress approved November 4, 1939, 54 Stat. 11 (22 U. S. C. 452 (1)), provides in part as follows:

"The President is hereby authorized to proclaim upon recommendation of the [National Munitions Control] Board from time to time a list of articles which shall be considered arms, ammunition, and implements of war for the purposes of this section * * *"; and

WHEREAS section 13 of the said joint resolution provides, in part, that the President may exercise any power or authority conferred upon him by that resolution through any such officer or officers as he shall direct:

NOW, THEREFORE, I, DWIGHT D. EISENHOWER, President of the United States of America, acting under and by virtue of the authority conferred upon me by the said joint resolution of Congress, and upon the recommendation of the National Munitions Control Board, do hereby declare and proclaim that the articles listed below and such components, parts, accessories, attachments, and related items as may be designated upon recommendation of the National Munitions Control Board in regulations issued by the Secretary of State and published in the FEDERAL REGISTER shall be considered arms, ammunition, and implements of war for the purposes of section 12 of the said joint resolution of Congress:

CATEGORY I—SMALL ARMS AND MACHINE GUNS

Rifles, carbines, revolvers, pistols, machine pistols, and machine guns using ammunition of caliber .22 or over.

CATEGORY II—ARTILLERY AND PROJECTORS

Guns, howitzers, cannon, mortars, tank destroyers, rocket launchers, military flame throwers, military smoke projectors, and recoilless rifles.

CATEGORY III—AMMUNITION

Ammunition of caliber .22 or over for the arms enumerated in Categories I and II hereof.

CATEGORY IV—BOMBS, TORPEDOES, ROCKETS, AND GUIDED MISSILES

(a) Bombs, torpedoes, grenades (including smoke grenades), smoke canisters, rockets, mines, guided missiles, depth charges, fire bombs, incendiary bombs.

(b) Apparatus and devices for the handling, control, activation, discharge, detonation, or detection of items enumerated in paragraph (a) of this category.

CATEGORY V—FIRE CONTROL EQUIPMENT AND RANGE FINDERS

Fire control, gun tracking, and infrared and other night-sighting equipment; range position and height finders, and spotting instruments; aiming devices (electronic, gyroscopic, optic, and acoustic); bomb sights, gun sights, and periscopes for the arms, ammunition, and implements of war enumerated in this proclamation.

CATEGORY VI—TANKS AND ORDNANCE VEHICLES

Tanks, military type armed or armored vehicles, ammunition trailers, and amphibious vehicles (land vehicles capable of limited endurance in water), military half tracks, military type tank recovery vehicles, and gun carriers.

CATEGORY VII—TOXICOLOGICAL AGENTS

(a) Biological or chemical toxicological agents adapted for use in war to produce casualties or to damage crops.

(b) Equipment for the dissemination, detection, and identification of, and defense against, the items described in paragraph (a) of this category.

CATEGORY VIII—PROPELLANTS AND EXPLOSIVES

Propellants for the articles enumerated in Categories III, IV, and VII hereof; military high explosives.

CATEGORY IX—VESSELS OF WAR AND SPECIAL NAVAL EQUIPMENT

(a) Warships, amphibious warfare vessels, landing craft, mine warfare vessels, patrol vessels, auxiliary vessels, service craft, floating dry docks, and experimental types of naval ships.

(b) Equipment for the laying, detection, detonation, and sweeping of mines.

(c) Submarine nets.

FEDERAL REGISTER

Published daily, except Sundays, Mondays, and days following official Federal holidays, by the Federal Register Division, National Archives and Records Service, General Services Administration, pursuant to the authority contained in the Federal Register Act, approved July 26, 1935 (49 Stat. 500, as amended; 44 U. S. C., ch. 8B), under regulations prescribed by the Administrative Committee of the Federal Register, approved by the President. Distribution is made only by the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

The regulatory material appearing herein is keyed to the Code of Federal Regulations, which is published, under 50 titles, pursuant to section 11 of the Federal Register Act, as amended August 5, 1953.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $1.50 per month or $15.00 per year, payable in advance. The charge for individual copies (minimum 15¢) varies in proportion to the size of the issue. Remit check or money order, made payable to the Superintendent of Documents, directly to the Government Printing Office, Washington 25, D. C.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

CATEGORY X—AIRCRAFT

Aircraft and airborne equipment.

CATEGORY XI—MISCELLANEOUS EQUIPMENT

(a) Radar of all types, including guidance systems and airborne or ground radio equipment therefor; electronic counter-measure and jamming equipment; underwater sound equipment; all other electronic equipment specially designed for military use; radio-communications equipment bearing a military designation; electronic navigational aids specially designed for military use such as radio direction finding equipment, radio distance measuring systems such as Shoran, and hyperbolic grid systems such as Raydist, Loran, and Decca.

(b) Aerial and special purpose military cameras and specialized processing equipment therefor; military photointerpretation, stereoscopic plotting, and photogrammetry equipment.

(c) Armor plate, armored railway trains, military steel helmets, body armor, and flak suits.

(d) Specialized military mobile repair shops specially designed to service military equipment.

(e) Pressurized breathing equipment and partial pressure suits for use in aircraft, anti "G" suits, military crash helmets, parachutes utilized for personnel, cargo, and deceleration purposes, and aircraft liquid oxygen converters.

(f) Military pyrotechnics including projectors therefor.

(g) Specialized military training equipment.

(h) Tear gas and equipment for the dissemination thereof.

CATEGORY XII—CLASSIFIED MATERIAL

All material not enumerated herein which is classified from the standpoint of military security.

This proclamation shall become effective on January 1, 1954, and shall on that date supersede Proclamation No. 2776 of March 26, 1948, entitled "Enumeration of Arms, Ammunition, and Implements of War".

IN WITNESS WHEREOF, I have hereunto set my hand and caused the Seal of the United States of America to be affixed.

DONE at the City of Washington this 18th day of November in the year of our Lord nineteen hundred and [SEAL] fifty-three, and of the Independence of the United States of America the one hundred and seventy-eighth.

DWIGHT D. EISENHOWER

By the President:

JOHN FOSTER DULLES,
*Secretary of State.*

## TITLE 7—AGRICULTURE

### Chapter VII—Production and Marketing Administration (Agricultural Adjustment), Department of Agriculture

PART 711—MARKETING QUOTA REVIEW REGULATIONS

EXTENSION TO PUERTO RICO

The revision herein is for the purpose of extending the regulations in this part to Puerto Rico.

Section 711.36 is revised to read as follows:

§ 711.36 *Applicability of regulations to Puerto Rico.* (a) Notwithstanding any of the provisions of §§ 711.1 to 711.35 the Production and Marketing Administration Caribbean Area Committee (hereinafter referred to as the "PMA Committee") shall perform insofar as applicable the duties and assume such responsibilities and be subject to the limitations as are otherwise required of State and county committees, except as hereinafter provided. The Director, Caribbean Area Office, Production and Marketing Administration, shall recommend members and alternates for appointment to serve on review committees and the areas of venue for such committees. Any farmer who is eligible to vote in a referendum for which a quota has been proclaimed but who did not in any respect participate in the determination of any matter relating to any marketing quota or acreage allotment for the review of which the review committee is established, shall be eligible to serve on review committees subject to the provisions of §§ 711.14 through 711.21. The clerk to the review committee shall be the PMA district supervisor of the district in which the review committee will hold its hearings.

(b) In the event of court proceedings instituted in Puerto Rico by any farmer to obtain a review of the review committee's determination, the clerk to the review committee shall immediately notify the Director, Caribbean Area Office, Production and Marketing Administration, by telephone, telegraph, or messenger, of all the pertinent facts set forth in § 711.33 (b) and the Director shall immediately send a cablegram of all the pertinent facts to the Hearing Clerk, United States Department of Agriculture, Washington, D. C.

(c) Where it is impractical or impossible to use the United States mail to serve the farmer or applicant in Puerto Rico with notice of the farm acreage allotment and marketing quota, notice of hearing, or determination of review committee, use shall be made of such other method of service as is available; however, when such other method is used the PMA Committee shall make provision for keeping an accurate record of the date and method of delivery to the farmer or applicant of such notice of farm acreage allotment and marketing quota, notice of hearing, or determination of the review committee.

(Sec. 375, 52 Stat. 66, as amended; 7 U. S. C. 1375)

Issued at Washington, D. C., this 20th day of November 1953.

[SEAL] TRUE D. MORSE,
*Acting Secretary of Agriculture.*

[F. R. Doc. 53-9922; Filed, Nov. 24, 1953; 8:56 a. m.]

PART 717—HOLDING OF REFERENDA ON MARKETING QUOTAS

EXTENSION TO PUERTO RICO

The amendment herein is for the purpose of extending the regulations in this part to Puerto Rico.

The regulations in this part are amended by adding a new § 717.14 to read as follows:

§ 717.14 *Applicability of regulations to Puerto Rico.* The Production and Marketing Administration Caribbean Area Committee (hereinafter referred to as the "PMA Committee") shall be in charge of and responsible for conducting in the Commonwealth of Puerto Rico each referendum on marketing quotas for any commodity required by the act. Insofar as applicable the PMA Committee shall perform all the duties and assume all the responsibilities otherwise required of State and county committees as provided in the regulations in this part, except that (a) the Director, Caribbean Area Office, Production and Marketing Administration, shall nominate for appointment the members and alternates to serve on community referendum committees and shall establish the boundaries of referendum communities or neighborhoods in such a manner that polling places therein will be conveniently located for the farmers eligible to vote in the referendum, and (b) following the canvass of the ballots as provided in § 717.10 the community referendum committee shall report the results of the referendum to the PMA Committee.

(Sec. 375, 52 Stat. 66, as amended; 7 U. S. C. 1375)

Issued at Washington, D. C., this 20th day of November 1953.

[SEAL] TRUE D. MORSE,
*Acting Secretary of Agriculture.*

PART 721—CORN

FARM ACREAGE ALLOTMENTS FOR 1954 CROP

Sec.
721.510 Basis and purpose.
721.511 Definitions.
721.512 Extent of calculations and rule of fractions.
721.513 Instructions and forms.

Sec
721.514 Method of apportioning county allotments.
721.515 Report of data for old farms.
721.516 Determination of base acreages for old farms.
721.517 Determination of base acreages for new farms.
721.518 Determination of acreage allotments for all farms.
721.519 Supervision, review and approval by the State committee.
721.520 Farms divided or combined.
721.521 Right to appeal.
721.522 Applicability of §§ 721.510 to 721.522.

AUTHORITY: §§ 721.510 to 721.522 issued under sec. 375, 52 Stat. 66, as amended; 7 U. S. C. 1375. Interpret or apply secs. 301, 329, 52 Stat. 38, 52, 7 U. S. C. 1301, 1329.

§ 721.510 *Basis and purpose.* The regulations contained in §§ 721.510 to 721.522 are issued pursuant to the Agricultural Adjustment Act of 1938, as amended, and govern the establishment of 1954 farm acreage allotments for corn. The purpose of the regulations in §§ 721.510 to 721.522 is to provide the procedure for allocating the county corn acreage allotment among farms. Prior to preparing the regulations in this part, public notice (18 F. R. 6456) was given in accordance with the Administrative Procedure Act (60 Stat. 237). The data, views, and recommendations pertaining to the regulations in §§ 721.510 to 721.522, which were submitted, have been duly considered within the limits permitted by the Agricultural Adjustment Act of 1938, as amended.

§ 721.511 *Definitions.* As used in the regulations in this part and in all instructions, forms, and documents in connection therewith, the words and phrases defined in this section shall have the meanings herein assigned to them.

(a) "Act" means the Agricultural Adjustment Act of 1938 and any amendments thereto.

(b) "Secretary" means the Secretary of Agriculture of the United States, or the officer of the Department acting in his stead pursuant to delegated authority.

(c) "Director" means the Director of the Grain Branch, Production and Marketing Administration, U. S. Department of Agriculture.

(d) Committees:

(1) "Community committee" means the persons elected within a community as the community committee pursuant to the regulations governing the selection and functions of the Production and Marketing Administration county and community committees.

(2) "County committee" means the persons elected within a county as the county committee pursuant to the regulations governing the selection and functions of the Production and Marketing Administration county and community committees.

(3) "State committee" means the persons designated by the Secretary as the State committee of the Production and Marketing Administration.

(e) "Farm" means all adjacent or nearby farm or range land under the same ownership which is operated by one person, including also:

(1) Any other adjacent or nearby farm or range land which the county committee, in accordance with instructions issued by the Assistant Administrator for Production, Production and Marketing Administration, determines is operated by the same person as part of the same unit in producing range livestock or with respect to the rotation of crops, and with workstock, farm machinery, and labor substantially separate from that for any other land; and

(2) Any field-rented tract (whether operated by the same or another person) which, together with any other land included in the farm, constitutes a unit with respect to the rotation of crops.

A farm shall be regarded as located in the county or administrative area in which the principal dwelling is situated, or if there is no dwelling thereon it shall be regarded as located in the county or administrative area in which the major portion of the farm is located.

(f) "Cropland" means farmland which in 1953 was tilled or was in regular crop rotation, excluding (1) bearing orchards and vineyards (except the acreage of cropland therein), (2) plowable non-crop open pasture, and (3) any land which constitutes or will constitute if tillage is continued a wind erosion hazard to the community.

(g) "Cropland well suited for corn" means that acreage of cropland on the farm which is determined by the county committee in accordance with generally accepted local standards to be well suited to the production of corn, considering topography, type of soil and drainage.

(h) "Acreage indicated by cropland" means the number of acres computed by multiplying the cropland for a farm by the ratio of historical corn acreage determined for a community or county pursuant to § 721.516 (a) to cropland for the community or county. County ratio determinations will be made subject to approval of the State committee.

(i) "Person" means an individual, partnership, association, corporation, estate, trust, or other business enterprise or legal entity, and, wherever applicable, a State, political subdivision of a State, the Federal Government, or any agency thereof.

(j) "Operator" means the person who is in charge of the supervision and conduct of the farming operations on the entire farm.

(k) "New farm" means a farm on which corn will be planted in 1954 for the first time since 1950.

(l) "Old farm" means a farm on which corn was planted in one or more of the three years 1951 through 1953.

(m) "Corn acreage" means the number of acres of land on which field corn is planted alone or interplanted with other crops, excluding sweet corn unless produced for feed or silage.

(n) Corn allotments:

(1) "County allotment" means the corn acreage allotment apportioned to the county as its share of the 1954 acreage allotment for the commercial corn-producing area as determined on the basis of the acreage planted to corn during the ten calendar years, 1944–53 (plus, in applicable years, the acreage diverted under previous agricultural adjustment and conservation programs), with adjustments for abnormal weather conditions and for trends in acreage during such period, and for the promotion of soil-conservation practices.

(2) "Farm allotment" means the corn acreage allotment determined for a farm as its share of the 1954 county allotment.

(o) "Commercial corn-producing area" means the area designated by the Secretary pursuant to section 301 (b) (4) of the act, and includes all counties in which the average production of corn (excluding corn used for silage) during the ten calendar years, 1944–53, after adjustment for abnormal weather conditions, is 450 bushels or more per farm and 4 bushels or more for each acre of farmland in the county, and also includes any county bordering on such commercial corn-producing area which the Secretary finds is likely to produce 450 bushels or more per farm and 4 bushels or more for each acre of farmland in 1954, or in which there is a minor civil division which the Secretary finds is likely to produce 450 bushels or more per farm and 4 bushels or more for each acre of farmland in 1954.

§ 721.512 *Extent of calculations and rule of fractions.* All acreage determinations shall be rounded to whole acres. Fractional acres of fifty-one hundredths of an acre or more shall be rounded upward, and fractional acres of less than fifty-one hundredths of an acre shall be dropped.

§ 721.513 *Instructions and forms.* The Director shall cause to be prepared and issued such forms as are necessary and shall cause to be prepared such instructions as are necessary for carrying out the regulations in this part. The forms and instructions shall be approved by, and the instructions shall be issued by the Assistant Administrator for Production, Production and Marketing Administration.

§ 721.514 *Method of apportioning county allotments.* The county acreage allotment shall be apportioned to farms in the county on the basis of tillable acres, crop-rotation practices, type of soil, and topography.

§ 721.515 *Report of data for old corn farms.* The owner, operator, or any other interested person shall furnish the following information regarding the farm in which he has an interest to the county PMA office of the county in which the farm is regarded as located if corn was planted on the farm in 1951, 1952 or 1953:

(a) The names and addresses of the owner and operator.

(b) The total acreage of all land.

(c) The acreage of cropland.

(d) The acreage of corn planted in the years 1951, 1952, and 1953.

(e) The acreage of other crops and land uses.

(f) Other pertinent information requested by the county PMA office relative to operations of the farm.

§ 721.516 *Determination of base acreages for old farms.* To reflect the factors of tillable acres, crop-rotation practices, type of soil, and topography, the county committee shall determine for each farm on which there was corn acreage for any one of the years 1951, 1952, and 1953, a base acreage of corn as follows:

(a) *Historical average acreage.* There shall first be established for each farm a historical average corn acreage which shall be the average of the acreages planted to corn for 1951, 1952, 1953.

(b) *Adjusted average acreage.* The county committee shall adjust the historical average corn acreage for any farm by eliminating from the period of years used in determining the historical average acreage the acreage planted to corn in any year or years for which it definitely finds that the corn acreage was not representative of the acreage which normally would have been planted under the established crop-rotation system on the farm because such acreage was:

(1) Abnormally low due to excessive wet weather or flood.

(2) Abnormally low due to drought.

(3) Abnormally high because of failure of crops other than corn.

(4) No longer representative because of a change in operations which results in substantial change in the established crop-rotation system for the farm.

(5) Not representative for 1954 because of a definitely established crop-rotation system being carried out on the farm.

When one or more of the years are eliminated in accordance with the provisions of subparagraphs (1) through (5) of this paragraph, the average of the years not so eliminated shall be considered as the adjusted average acreage. If all three years are eliminated the adjusted average acreage shall be zero.

(c) *Further adjustments.* The historical average acreage or the adjusted average acreage, as the case may be, may be further adjusted so as to make such acreage comparable with those acreages for other farms which are similar with respect to the type of farming operation and to the factors of tillable acreage, topography, and type of soil within the following limitations:

(1) If such acreage is unusually low, the historical average acreage or the adjusted average acreage, as the case may be, may be adjusted upward by not more than 10 percent, but not above the smaller of the acreage indicated by cropland or the cropland well suited for corn, except as provided in subparagraph (2) of this paragraph.

(2) If the adjusted average acreage under paragraph (b) of this section is zero, the adjusted average acreage may be adjusted upward, but not above the smaller of the acreage indicated by cropland or the acreage well suited for corn.

(3) If such acreage is excessively high, it may be adjusted downward by not more than 25 percent, but not below the smaller of the acreage indicated by cropland or the cropland acreage well suited for corn.

(d) *Base acreage.* (1) The base acreage for an old farm shall be the historical acreage determined under paragraph (a) of this section as adjusted under paragraphs (b) and (c) of this section.

(2) A zero base acreage shall be established for a farm pursuant to this section only if corn will not be planted in 1954 under the crop-rotation system for the farm.

§ 721.517 *Determination of base acreages for new farms.* (a) The county committee shall determine a base acreage for use in establishing a corn acreage allotment for each eligible farm on which corn was not planted in any of the years 1951, 1952, and 1953 but for which a corn acreage allotment is requested for 1954 prior to January 15, 1954, or such earlier date established by the State committee as affording reasonable opportunity for requesting such an allotment. Each request for such an allotment shall include the following information:

(1) The acreage of all land and total cropland on the farm for which an allotment is requested.

(2) The acreage of cropland on the farm which is considered by generally accepted local standards to be well suited to the production of corn, considering topography and type of soil and drainage.

(3) The name and address of the farm owner and, if known, the name and address of the 1954 operator.

(4) Location and description of the farm.

(5) Identification and location of any other farm in which the operator will have an interest in 1954.

(6) Acreage of corn in which the operator had an interest in 1951, 1952, or 1953, and identification and location of land on which such corn was planted.

(7) Corn acreage which would be planted in 1954 under the rotation system planned for the farm.

(8) Reason for requesting a 1954 corn acreage allotment.

(9) Reason for not planting corn on the farm in 1951, 1952, and 1953.

(b) Eligibility for a new farm allotment shall be conditioned upon the following:

(1) The land for which an allotment is requested is well suited for the production of corn, and

(2) The producer establishes to the satisfaction of the county committee that:

(i) The system of farming has changed or is changing to the extent that corn will be included in such system for 1954; or

(ii) The established crop-rotation system followed on the farm will include corn for 1954.

In determining the base acreage for a new farm, the county committee shall take into consideration tillable acres, type of soil, topography, and the farming system to be followed by the operator, including the equipment and other facilities available for the production of corn under such farming system, and the extent to which the operator is dependent for his livelihood on his farming operations: *Provided*, That the base acreage determined for a new farm shall not exceed (1) the indicated acreage which would be planted in 1954 under the rotation system planned for the farm, or (2) the acreage indicated by cropland.

§ 721.518 *Determination of acreage allotments for all farms.* The 1954 county acreage allotment after deduction of an appropriate reserve for appeals, correction of errors, and missed farms, shall be apportioned pro rata among the farms within the county on the basis of the base acreages determined under §§ 721.516 and 721.517.

§ 721.519 *Supervision, review, and approval by the State committee.* The State committee shall be responsible for the work of the county committees in the apportionment of the county corn acreage allotments to farms, the review of all allotments, and the correction of any improper determinations made under the regulations in this part. All acreage allotments shall be approved by or on behalf of the State committee and no official notice of an acreage allotment shall be mailed until such allotment has been approved by or on behalf of the State committee.

§ 721.520 *Farms divided or combined.* (a) The 1954 corn acreage allotment determined for a farm shall, if there is a division, be apportioned to each part on the basis of the acreage of cropland on each part, except that, if the county committee determines that this method would result in allotments not representative of the farming operations normally carried out on each part, an allotment may be determined for each part in the same manner as would have been done if such part had been a completely separate farm: *Provided*, That the sum of the allotments thus determined for each part shall not exceed the allotment originally determined for the entire farm which is being divided.

(b) If two or more farms for which the 1954 corn acreage allotments are determined will be combined and operated as a single farm in 1954, the 1954 allotment shall be the sum of the allotments determined for each of the farms comprising the combination.

§ 721.521 *Right to appeal.* Any owner, operator, landlord, tenant, or sharecropper who is dissatisfied with the acreage allotment for his farm may file an appeal for reconsideration of the allotment for his farm. The request for appeal and facts constituting a basis for such consideration must be submitted in writing and postmarked or delivered to the county committee within 15 days after the date of mailing the notice of allotment. If the applicant is dissatisfied with the decision of the county committee with respect to his appeal, he may appeal to the State committee within 15 days after the date of mailing of the notice of the decision of the county committee. If the applicant is dissatisfied with the decision of the State committee, he may, within 15 days after the date of mailing of the notice of the decision of the State committee, appeal to the Director, whose decision shall be final.

§ 721.522 *Applicability of §§ 721.510 and 721.522.* Sections 721.510 to 721.522 shall govern the establishment of the

farm acreage allotments for the 1954 crop of corn for use in connection with farm price support programs. The regulations are contingent upon the proclamation of an acreage allotment of corn for 1954 in the commercial corn-producing area by the Secretary pursuant to section 328 of the Agricultural Adjustment Act of 1938, as amended.

NOTE: The reporting requirements contained herein have been approved by and subsequent reporting requirements will be subject to the approval of the Bureau of Budget in accordance with Federal Reports Act of 1942.

Done at Washington, D. C., this 20th day of November 1953. Witness my hand and the seal of the Department of Agriculture.

[SEAL] TRUE D. MORSE,
*Acting Secretary of Agriculture.*

### Subchapter B—Sugar Requirements and Quotas

[Sugar Reg. 814.9, Amdt. 2]

### PART 814—ALLOTMENT OF SUGAR QUOTAS

### PUERTO RICO, 1953

*Basis and purpose.* This amendment is issued under section 205 (a) of the Sugar Act of 1948, as amended (hereinafter called the "act"), for the purpose of revising Sugar Regulation 814.9, as amended (18 F. R. 2493, 5053), which allots the 1953 quotas for Puerto Rico for consumption in the continental United States (including raw sugar transferred for further processing and shipment within the direct-consumption portion of such quota) and the 1953 sugar quota for local consumption in Puerto Rico among persons who process Puerto Rican sugarcane into sugar (1) to be brought into the continental United States and (2) to be marketed for local consumption in Puerto Rico.

The sugar quota for Puerto Rico for consumption in the continental United States is referred to herein as "mainland quota" and allotments thereof are referred to as "mainland allotments." The sugar quota for consumption in Puerto Rico and allotments thereof are referred to as "local quota" and "local allotments", respectively.

Revision of Sugar Regulation 814.9 is necessary (1) to give effect to Amendment 7 to Sugar Regulation 813 (18 F. R. 7159) which prorated a deficit in the 1953 quota for the domestic beet area and increased the 1953 mainland quota for Puerto Rico by 16,268 short tons, raw value, to a total of 1,117,351 short tons, raw value, and (2) to prorate to other allottees the quantities released by those who are unable to fill their allotments established in Sugar Regulation 814.9, Amendment 1.

Each allottee under § 814.9 has agreed to waive its right to a public hearing prior to the revision of the order to give effect to any change in the mainland quota and the allotment of the quantities which allottees notify the Department that they cannot fill. The revised allotments are made on the same basis as in the initial order.

Because of the limited time remaining in the quota year to which the allotments apply, it is imperative that this amendment become effective at the earliest possible date in order to permit the continued orderly marketing of sugar. Accordingly, it is hereby found that compliance with the 30-day effective date requirement of the Administrative Procedure Act (60 Stat. 237) is impracticable and contrary to the public interest and consequently this amendment shall be effective when published in the FEDERAL REGISTER.

Pursuant to the authority vested in the Secretary of Agriculture by section 205 (a) of the act, paragraph (a) of § 814.9, as amended, is hereby further amended to read as follows:

§ 814.9 *Allotments of 1953 sugar quotas for Puerto Rico*—(a) *Allotments.* The 1953 sugar quota for Puerto Rico for consumption in the continental United States (including raw sugar to be further processed and marketed within the direct-consumption portion of such quota), amounting to 1,117,351 short tons of sugar, raw value, and the 1953 sugar quota for local consumption in Puerto Rico, amounting to 110,000 short tons of sugar, raw value, are hereby allotted to the following processors in amounts which appear in columns (1) and (2) opposite their respective names:

(Short tons, raw value)

| Processor | (1) Mainland quota allotment | (2) Local quota allotment |
|---|---|---|
| Arturo Lluberas, Estate of, y Sobrinos | 21,814 | 22,184 |
| Aguirre Sugar Company, Inc. | 5,471 | 1,796 |
| Aguirre Sugar Co., a trust | 75,813 | 597 |
| Central Aguirre Sugar Co., a trust | 111,672 | 1,880 |
| Central Coloso, Inc. | 61,187 | 712 |
| Central Eureka, Inc. | 37,396 | 1,776 |
| Central Fajardo, Inc. | 11,749 | 1,376 |
| Central Juncal, Inc. | 28,136 | 18,407 |
| Central Mercedita, Inc. | 24,178 | 2,401 |
| Central Monserrate, Inc. | 54,175 | 20,478 |
| Central Plata, Inc. | 57,852 | 1,178 |
| Central San Vicente, Inc. | 6,408 | |
| Central Santa Ana, Inc. | 66,242 | 1,408 |
| Compañía Azucarera del Caribe, Inc. | 13,068 | 66 |
| Compañía Azucarera Los Caños, Inc. | 37,267 | |
| Compañía Azucarera Roig, S. A. | 10,422 | 80 |
| Fajardo Sugar Company | 16,697 | 1,413 |
| Federico Sugar Manufacturing Co. | 118,441 | 15,884 |
| Juncos Sugar Co. | 106,436 | 126 |
| Luce Arbona y Compañía, Inc. | 72,073 | 8 |
| Manuel Montalvo Hijos, Inc. | 31,760 | 1,656 |
| Mayagüez Sugar Co., Inc. | 13,067 | 152 |
| Plata Sugar Company, Inc. | 51,508 | 575 |
| Soller Sugar Company, Inc. | 12,766 | 8 |
| South Porto Rico Sugar Co. of Puerto Rico (Limited) | 80,699 | 15,884 |
| Total quotas | 1,117,351 | 110,000 |

(Sec. 403, 61 Stat. 932; 7 U. S. C. Sup., 1153. Interprets or applies sec. 205, 61 Stat. 926, 7 U. S. C. Sup. 1115)

Done at Washington, D. C., this 20th day of November 1953. Witness my hand and the seal of the Department of Agriculture.

[Sugar Reg. 814.10, Amdt. 1]

### PART 814—ALLOTMENT OF SUGAR QUOTAS

### DIRECT CONSUMPTION PORTION FOR PUERTO RICO, 1953

*Basis and purpose.* This amendment is issued under section 205 (a) of the Sugar Act of 1948 (7 U. S. C., Sup. 1115 (a)) for the purpose of revising Sugar Regulation 814.10 (18 F. R. 2497) to reallot deficits in the allotments of certain allottees.

Except for a quantity of 533 short tons of sugar, raw value, set aside as an unallotted reserve for marketing of raw sugar for direct consumption, the direct-consumption portion of the 1953 sugar quota for Puerto Rico, amounting to 126,033 short tons, raw value, was allotted to five Puerto Rican refiners in Sugar Regulation 814.10. One of the allottees, the Estate of Arturo Lluberas y Sobrinos, has notified the Department in writing that it will be unable to fill its 1953 allotment by an amount of 933 short tons of sugar, raw value. The Central Aguirre Sugar Company, a trust, has notified the Department in writing that it is not in a position to ship additional direct-consumption sugar. Due to final weights and polarization data, this allottee has 11 short tons, raw value, in Customs custody awaiting certification.

The Central Roig Refining Company has notified the Department that it will be able to ship additional direct-consumption sugar in case the over-all mainland allotments are increased. The allotments were increased in Sugar Regulation 814.9, Amendment 2,[1] as a result of an increase of 16,268 short tons, raw value, due to the determination of an additional 80,000 ton deficit in the quota for the domestic beet sugar area in Sugar Regulation 813, Amendment 7 (18 F. R. 7159). The other two allottees have notified the Department that they will be able to fill more than their original allotments during the calendar year 1953. In order to afford interested parties an opportunity to market the full amount of that portion of the Puerto Rican sugar quota which may be filled by direct-consumption sugar, it is necessary to reallot the quantity released.

Since section 205 (a) of the act requires that any amendment or revision of an allotment order be made on the same basis as the original allotment, the Department has asked for and obtained from each of the interested parties a waiver of its right to a public hearing in regard to the amendment made herein. A quantity equal to that released, less 11 tons, is added proportionately to the allotments of the Central Roig Refining Company, the Porto Rican American Refinery, Inc., and the Western Sugar Refining Company. The 11 tons are added to the allotment of Central Aguirre Sugar Company, a trust, to permit the entry of the quantity now in Customs custody.

In order to afford interested parties adequate opportunity to ship the additional sugar allotted herein, and to protect the interest of consumers of sugar, it is essential that the revised allotments be made effective as soon as possible. Accordingly, it is hereby found that compliance with the effective date requirement of the Administrative Procedure Act (60 Stat. 237) is impracticable and contrary to the public interest and this amendment shall become effective on the date of its publication in the FEDERAL REGISTER.

Pursuant to the authority vested in the Secretary of Agriculture by section 205 (a) of the Sugar Act of 1948, paragraph (a) of § 814.10 is hereby amended to read as follows:

§ 814.10 *Allotment of the direct-consumption portion of 1953 sugar quota for Puerto Rico*—(a) *Allotments.* The direct-consumption portion of the 1953 sugar quota for Puerto Rico (126,033 short tons, raw value) is hereby allotted as follows:

| Refiner | Direct-consumption allotment (short tons, raw value) |
|---|---|
| Arturo Lluberas, Estate of, y Sobrinos | 269 |
| Central Aguirre Sugar Co., a trust | 5,927 |
| Central Roig Refining Co. | 20,016 |
| Porto Rican American Refinery, Inc. | 79,501 |
| Western Sugar Refining Company | 19,787 |
| Total | 125,500 |
| Unallotted Reserve for marketing of raw sugar for direct consumption | 533 |
| | 126,033 |

(Sec. 205, 61 Stat. 926; 7 U. S. C. Sup. 1115)

Done at Washington, D. C., this 20th day of November 1953. Witness my hand and the seal of the Department of Agriculture.

[SEAL] TRUE D. MORSE,
*Acting Secretary of Agriculture.*

# TITLE 9—ANIMALS AND ANIMAL PRODUCTS

## Chapter I—Bureau of Animal Industry, Department of Agriculture

### Subchapter C—Interstate Transportation of Animals and Poultry

[B. A. I. Order 383, Revised, Amdt. 13]

### PART 76—HOG CHOLERA, SWINE PLAGUE, AND OTHER COMMUNICABLE SWINE DISEASES

### SUBPART B—VESICULAR EXANTHEMA

### DESIGNATION OF AREAS IN WHICH SWINE ARE AFFECTED WITH VESICULAR EXANTHEMA

Pursuant to the authority conferred upon the Administrator of the Agricultural Research Administration by § 76.27 of Subpart B, as amended, Part 76, Title 9, Code of Federal Regulations (18 F. R. 3637), § 76.27a of said Subpart B (18 F. R. 3829, as amended) is hereby amended to read as follows:

§ 76.27a *Designation of areas in which swine are affected with vesicular exanthema.* The following areas are hereby designated as areas in which swine are affected with vesicular exanthema:

The State of California;

The Town of Manchester in Hartford County, in Connecticut;

Androscoggin, Cumberland, Kennebec, and York Counties, in Maine;

That area consisting of Hampden, Worcester, Middlesex, Essex, Suffolk, Norfolk, Bristol and Plymouth Counties, in Massachusetts;

Bergen, Hudson, Hunterdon, and Morris Counties, that area consisting of Union, Middlesex, Monmouth, Ocean, Burlington, Camden, Gloucester, and Atlantic Counties, that area in Lower Township in Cape May County lying east of U. S. Highway No. 9, and that area in Dennis Township in Cape May County bounded by the Belleplain State Forest on the south and east and State Highway No. 550 on the north and west and State Highway Spur No. 550 on the west, in New Jersey;

Poughkeepsie Township, in Dutchess County, and that area in Clarkstown Township lying north of New York State Route No. 59, in Rockland County, in New York;

Bucks and Delaware Counties, in Pennsylvania;

Anderson, Calhoun, Charleston, Greenwood and Orangeburg Counties, in South Carolina;

That area in Atascosa County lying west of State Highway No. 346 and north of State Highway No. 173 and that area in Bell County lying north of U. S. Highway No. 190 and west of State Highways No. 36 and No. 317, in Texas.

*Effective date.* The foregoing amendment shall become effective upon issuance.

Section 76.27 of Subpart B, as amended, Part 76, Title 9, Code of Federal Regulations (18 F. R. 3637), quarantines the areas so designated.

The amendment designates the following as areas in which swine are affected with vesicular exanthema in addition to the areas heretofore designated:

Anderson, Calhoun, Greenwood and Orangeburg Counties, in South Carolina.

Hereafter, the restrictions pertaining to the interstate movement of swine and carcasses, parts and offal of swine from or through quarantined areas contained in 9 CFR, Part 76, Subpart B, as amended (18 F. R. 3636, as amended), apply to these areas.

The effect of the amendment is to impose certain further restrictions necessary to prevent the spread of vesicular exanthema, a contagious, infectious, and communicable disease of swine, and the amendment must be made effective immediately to accomplish its purpose in the public interest. Accordingly, under section 4 of the Administrative Procedure Act (5 U. S. C. 1003), it is found upon good cause that notice and other public procedure with respect to the amendment are impracticable and contrary to the public interest and good cause is found for making it effective less than 30 days after publication in the FEDERAL REGISTER.

(Sec. 2, 32 Stat. 792, as amended; 21 U. S. C. 111. Interpret or apply secs. 4, 5, 23 Stat. 32, sec. 1, 32 Stat. 791; 21 U. S. C. 120)

Done at Washington, D. C., this 19th day of November 1953.

[SEAL] M. R. CLARKSON,
*Acting Administrator, Agricultural Research Administration.*

[F. R. Doc. 53-9919; Filed, Nov. 24, 1953; 8:55 a. m.]

# TITLE 38—PENSIONS, BONUSES, AND VETERANS' RELIEF

## Chapter I—Veterans' Administration

### PART 3—VETERANS CLAIMS

### PART 4—DEPENDENTS AND BENEFICIARIES CLAIMS

### PRESUMPTIVE SERVICE-CONNECTION FOR ACTIVE NONPULMONARY TUBERCULOSIS

1. In Part 3, a new § 3.1517 is added as follows:

§ 3.1517 *Presumption of service-connection for active nonpulmonary tuberculosis under paragraph I (c), Part I, Veterans Regulation 1 (a) (38 U. S. C. ch. 12)*—(a) *Presumption of service-connection for active nonpulmonary tuberculosis.* Under the provisions of paragraph I (c), Part I, Veterans Regulation 1 (a), as amended by Public Law 241, 83d Congress, active nonpulmonary tuberculosis developing to a 10 percent degree of disability or more within 3 years from date of separation from active wartime service, or where service began prior to January 1, 1947, and extended thereafter, within 3 years from July 25, 1947, or where there was service on or after June 27, 1950, within 3 years from separation from active service or from the termination date prescribed by Public Law 28, 82d Congress, whichever is the earlier, will be considered as having been incurred in service when the conditions of paragraph I (c), Part I, Veterans Regulation No. 1 (a), as amended, are met.

(b) *Effective dates of evaluations and awards.* The effective dates of evaluations and awards, in both original claims and the claims reviewed, will be in accordance with the provisions of controlling VA regulations provided that in no event will benefits under Public Law 241, 83d Congress, be awarded prior to the date of enactment thereof. In the case of a claim wherein service-connection was previously denied for nonpulmonary tuberculosis on the date of the passage of Public Law 241, 83d Congress, reviewed under this section either on motion of the Veterans' Administration, or upon receipt of request from the veteran or his representative, or where a claim is in a pending or appellate status on the date mentioned and entitlement to benefits is shown, the effective date of the evaluation and award will be the date of Public Law 241, 83d Congress, August 8, 1953. (Instruction 1, Public Law 241, 83d Congress.)

2. In Part 4, a new § 4.458 is added as follows:

§ 4.458 *Review of death compensation and pension claims to determine presumptive service-connection for active tuberculosis other than pulmonary type*—(a) *Effective date of awards.* Where entitlement arises solely by virtue of the provisions of Public Law 241, 83d Congress, the effective date of awards will be the day following the date of the veteran's death, if claim was filed within 1 year after the date of the veteran's death, otherwise the date of filing claim, but in no event prior to August 8, 1953: *Provided, however,* That as to claims reviewed under this section the effective date of the award will be August 8, 1953. In those cases in which death pension is being paid to a widow, child or children, the provisions of § 4.52 are not controlling; the change from the payment of death pension to the payment of death compensation will be effective August 8, 1953. (Instruction 2, Public Law 241, 83d Congress.)

(Sec. 5, 43 Stat. 608, as amended, sec. 2, 46 Stat. 1016, sec. 7, 48 Stat. 9; 38 U. S. C. 11a, 426, 707)

This regulation is effective November 25, 1953.

[SEAL] H. V. STIRLING,
*Deputy Administrator.*

[F. R. Doc. 53-9806; Filed, Nov. 24, 1953; 8:51 a. m.]

## TITLE 47—TELECOMMUNICATION

### Chapter I—Federal Communications Commission

[Docket No. 10684]

PART 7—STATIONS ON LAND IN THE MARITIME SERVICE

PART 8—STATIONS ON SHIPBOARD IN THE MARITIME SERVICE

EXTENSION OF TIME TO COMPLY WITH CERTAIN PROVISIONS

In the matter of amendment of Parts 7 and 8 of the Commission's rules to provide extension of time in which to comply with §§ 7.104 (b), 7.189 (c) and 8.106 (c); Docket No. 10684.

1. In response to a request by the American Telephone and Telegraph Company and in accordance with the requirements of section 4 (a) of the Administrative Procedures Act, notice of proposed rule making in the above-entitled matter was published in the FEDERAL REGISTER on September 17, 1953 (18 F. R. 5573). The period for the filing of comments has now expired.

2. The only comments submitted were those of the Lake Carriers' Association, an organization of ship owners operating vessels on the Great Lakes. In essence, the Lake Carriers proposed an extension of time to meet the applicable requirements of §§ 7.104, 7.189 and 8.106 (c) of the rules for two and one-half months (until March 15, 1954) instead of 6 months (July 1, 1954) as was proposed by the Commission.

3. However, the equipment and watch-keeping requirements of §§ 7.104 and 7.189 as they pertain to the frequency 2182 kc in the Great Lakes area have been in force for over a year, and the proposed rule-making did not propose to modify those requirements. With respect to these requirements as they pertain to the frequency 156.8 Mc in the same area, all Great Lakes coast stations subject to the requirements and not yet licensed for 156.8 Mc, obtained construction permits some time ago and it appears likely that they will be equipped, licensed and keep watch on the frequency 156.8 Mc well before such action becomes mandatory by rule as finalized herein.

4. Insofar as § 8.106 (c), relating to provision for specified multi-channel operation of VHF public ship stations, the proposed extension of time was pertinent only to those stations which were licensed subsequent to January 1, 1952. Stations licensed prior to that date are permitted under a special proviso (not the subject of this rule-making and to which no objection was made) to operate with existing equipment until January 1, 1955. Commission license records indicate that in the Great Lakes area all VHF public ship stations either have multi-channel equipment or are licensed to operate with existing equipment until January 1, 1955. In any event, in view of the statement of specific efforts to meet the involved equipment requirement and the difficulties stated to have been encountered; the relatively minor difference between the proposed extension period and that suggested by the Lake Carriers' Association; and the undesirability of possible interruption of public ship-shore VHF radiotelephone service, it is believed that a deferment period until July 1, 1954 rather than March 15, 1954 is reasonable.

5. In view of the foregoing, it is concluded that the public interest would be served by the finalization of the rules amendments as proposed. Therefore, it is ordered, that effective January 1, 1954, and pursuant to sections 303 (b), (c), (f) and (r) of the Communications Act of 1934, as amended, Parts 7 and 8 of the Commission's rules are amended as set forth below.

(Sec. 303, 48 Stat. 1082, as amended; 47 U. S. C. 303)

Adopted: November 18, 1953.

Released: November 20, 1953.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

1. Section 7.104 (b) (1) and (2) is amended by substituting in each subparagraph (1) and (2) the date July 1, 1954, for the date January 1, 1954.

2. Section 7.189 (c) (1) and (2) is amended by substituting in each subparagraph (1) and (2) the date July 1, 1954, for the date January 1, 1954.

3. Section 8.106 (c) is amended to read as follows:

§ 8.106 *Required radio channels for telephony.* • • •

(c) Effective on and after January 1, 1954, each limited ship station, and each marine-utility station when used on board ship (except an experimental or developmental station) which is licensed to transmit by telephony on any radio-channel within the frequency band 156.25 Mc to 157.05 Mc, and effective July 1, 1954, each public ship station (except an experimental or developmental station) which is licensed to transmit on the radio-channel of which the assigned frequency is 157.3 Mc or 157.4 Mc, shall be capable of transmitting and receiving (and shall be licensed to transmit) class F3 emission on the radio-channel of which the authorized carrier frequencies are 156.3 Mc and 156.8 Mc and, in the case of limited ship or marine-utility stations, on at least one radio-channel in this frequency band which is authorized for communication with a coast station or stations; provided, that each ship station licensed prior to January 1, 1952, to use less than three radio-channels for telephony within this band under authority of an experimental or developmental station license, need not comply with this requirement, when authorized to use the same transmitting equipment under regular class of ship station license, until on and after January 1, 1955; provided further, that this requirement shall not apply to marine-utility stations or other stations of portable nature which are not capable of a plate input power in excess of three watts and are not capable of being readily adjusted for operation on more than one radio-channel. The requirement of this paragraph, in respect to basic type of equipment, may be satisfied by the provision of (1) multi-channel equipment, or (2) a plurality of single channel equipments, or (3) a combination thereof, at the option of the station licensee or the applicant for station license.

[F. R. Doc. 53-9949; Filed, Nov. 24, 1953; 8:53 a. m.]

## TITLE 49—TRANSPORTATION

### Chapter I—Interstate Commerce Commission

PART 24—UNIFORM SYSTEM OF ACCOUNTS FOR PERSONS FURNISHING CARS OR PROTECTIVE SERVICES AGAINST HEAT AND COLD

MISCELLANEOUS ACCOUNTS PAYABLE; ACCRUED TAX LIABILITY

At a session of the Interstate Commerce Commission, Division 1, held at its office in Washington, D. C., on the 18th day of November 1953.

The matter of modifying the "Uniform System of Accounts for Persons Furnishing Cars or Protective Service Against Heat or Cold," being under consideration pursuant to the provisions of section 20 (6) of the Interstate Commerce Act, as amended, and the modifications which are set forth below and made a part hereof being deemed necessary for proper administration of Part I of the act (54 Stat. 917, 49 U. S. C. 20 (6)): *It is ordered,* That:

(1) Any interested party may on or before December 21, 1953, file with the Commission a written statement of reasons why the said modification should not become effective as hereinafter ordered and may request oral argument if desired.

(2) Unless otherwise ordered upon consideration of such objections the said modifications shall become effective January 1, 1954.

(3) A copy of this order including the modifications set forth below shall be served upon every person of record which furnishes cars or protective service against heat or cold to or on behalf of any carrier by railroad or express company, and notice of this order shall be given to the general public by depositing a copy thereof in the office of the Secretary of the Commission at Washington, D. C., and by filing it with the Director of the Division of the Federal Register.

By the Commission, Division 1.

[SEAL] GEORGE W. LAIRD,
*Secretary.*

1. In § 24.862 *Miscellaneous accounts payable,* cancel the text without change in the title or note thereto, and substitute the following for it: "This account shall include the amount of drafts outstanding, of taxes withheld from employees and others for the account of taxing agencies, and of other items in the nature of demand liabilities not covered by § 24.860, § 24.861, § 24.863, or § 24.864."

2. In § 24.868, cancel the text and the note thereto, substituting the following for them:

§ 24.868 *Accrued tax liability.* (a) This account shall be credited with the accruals of all taxes which have been concurrently charged to the appropriate income or other accounts for taxes. Such accruals may be based upon estimates, provided such estimates shall be adjusted so as to reflect in this account at all times the carrier's estimate of its unpaid liability for each of the several classes of taxes which have not been finally settled.

(b) Vouchers for the current payment of taxes, including taxes for which accruals have not been made previously, shall be charged to this account. Taxes paid in advance shall also be charged to this account.

(c) The records supporting the entries in this account shall be kept to show separately by classes of taxes the amount of the tax accruals for the current year and adjustments of accruals for prior years.

(Sec. 12, 24 Stat. 383, as amended; 49 U. S. C. 12)

[F. R. Doc. 53-9891; Filed, Nov. 24, 1953; 8:52 a. m.]

# PROPOSED RULE MAKING

## DEPARTMENT OF AGRICULTURE

### Production and Marketing Administration

[7 CFR Part 903]

[Docket No. AO 10-A18]

HANDLING OF MILK IN ST. LOUIS, MISSOURI, MARKETING AREA

DECISION WITH RESPECT TO PROPOSED AMENDMENT TO TENTATIVE MARKETING AGREEMENT AND TO ORDER, AS AMENDED

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and marketing orders (7 CFR Part 900), a public hearing was conducted at St. Louis, Missouri, on October 12-13, 1953, pursuant to notices thereof which were issued on October 7, 1953 (18 F. R. 6384) and October 8, 1953 (18 F. R. 6409), upon proposed amendments to the tentative marketing agreement and to the order, as amended, regulating the handling of milk in the St. Louis, Missouri, marketing area.

By an emergency action of the Assistant Secretary of Agriculture taken on October 26, 1953 (18 F. R. 6825), decision has been made with respect to the Class I pricing provisions for the period through June 1954. Said decision reserved for later determination the remaining issues contained in the hearing record.

Upon the basis of the evidence introduced at the hearing and the record thereof, the Assistant Administrator, Production and Marketing Administration, on October 28, 1953, filed with the Hearing Clerk, United States Department of Agriculture, his recommended decision pertaining to the remaining material issues. Said decision containing notice of opportunity to file written exceptions thereto was published in the FEDERAL REGISTER on November 3, 1953 (18 F. R. 6943).

Within the period reserved therefor, interested parties filed exceptions to certain of the findings, conclusions and actions recommended by the Assistant Administrator. In arriving at the findings, conclusions, and regulatory provisions of this decision, each of such exceptions was carefully and fully considered in conjunction with the record evidence pertaining thereto. To the extent that findings, conclusions and actions decided upon herein are at variance with any of the exceptions, such exceptions are overruled.

To the extent that suggested findings and conclusions proposed by interested persons are inconsistent with the findings and conclusions contained herein, the specific or implied requests to make such findings and reach such conclusions are denied on the basis of the facts found and stated in connection with the conclusions herein set forth.

The material issues, findings and conclusions, and general findings of the recommended decision (18 F. R. 6943, Doc. 53-9248) are hereby approved and adopted as the issues, findings and conclusions, and general findings of this decision as if set forth in full herein, subject to the following modifications described with reference to Federal Register Doc. 53-9248, 18 F. R. 6943:

1. Before the paragraph in column 3, page 6943, which begins with the letter (b), insert the following:

It is necessary to amend § 903.52 to avoid changing the method now used in determining whether approved milk moved between pool plants shall be Class I for purposes of calculating the location differential. This calculation now provided in § 903.52 makes reference to and is dependent upon the calculations of § 903.45 (a) and (b). Therefore, any change in the latter may automatically result in a change in the former. Amendment No. 6 in the attached order is designed to avoid unintended changes in § 903.52.

2. Insert after the first paragraph in column 2, page 6944 the following:

Bulk milk for purposes of these calculations shall be considered as whole milk which has not been processed or standardized in any way, and which is either shipped or received in large unit containers of more than 100-gallon capacity, such as are commonly transported by truck. Milk shipped in 10-gallon cans would not qualify as bulk milk.

*Determination of representative period.* The month of September 1953 is hereby determined to be the representative period for the purpose of ascertaining whether the issuance of the order, as amended and as hereby proposed to be further amended, regulating the handling of milk in the St. Louis, Missouri, marketing area is approved or favored by producers who during such period were engaged in the production of milk for sale in the marketing area specified in such marketing order, as amended.

*Marketing agreement and order, as amended.* Annexed hereto and made a part hereof are two documents entitled respectively, "Marketing Agreement Regulating the Handling of Milk in the St. Louis, Missouri, Marketing Area," and "Order Amending the Order, as Amended, Regulating the Handling of Milk in the St. Louis, Missouri, Marketing Area," which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions. These documents shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and orders have been met.

It is hereby ordered that all of this decision, except the attached marketing agreement, be published in the FEDERAL REGISTER. The regulatory provisions of said marketing agreement are identical with those contained in the order, as amended, and as hereby proposed to be further amended by the attached order which will be published with this decision.

This decision filed at Washington, D. C., this 20th day of November 1953.

[SEAL] TRUE D. MORSE,
*Acting Secretary of Agriculture.*

*Order[1] Amending the Order, as Amended, Regulating the Handling of Milk in the St. Louis, Missouri, Marketing Area*

§ 903.0 *Findings and determinations.* The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order, and of the previously issued amendments thereto and all said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order, as amended, regulating the handling of milk in the St. Louis, Missouri, marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order, as amended, and as hereby further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supply of and demand for milk in the said marketing area, and the minimum prices specified in the order, as amended, and as hereby further amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk and be in the public interest; and

(3) The said order, as amended, and as hereby further amended, regulates the handling of milk in the same manner as and is applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held.

*Order relative to handling.* It is therefore ordered that on and after the effective date hereof the handling of milk in the St. Louis, Missouri, marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as amended, and as hereby further amended as follows:

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and orders have been met.

1. Delete § 903.87 (b) and substitute therefor the following:

(b) Received at a pool plant as Grade A other source milk (except milk subject to the Class I pricing provisions of another order issued pursuant to the act) and allocated to Class I, or

2. Delete § 903.45 (a) (4) and substitute therefor the following:

(4) Subtract from the pounds of skim milk remaining in Class II milk an amount equal to such remainder, or the product obtained by multiplying by 0.05 the pounds of skim milk in approved milk received at plants qualified pursuant to § 903.10 (a), from (i) producers and (ii) plants qualified pursuant to § 903.10 (b) or (c), whichever is less;

3. Delete § 903.41 (b) (3) and substitute therefor the following:

(3) In shrinkage not to exceed an amount calculated (except with respect to milk diverted to a non-pool plant pursuant to § 903.7) as follows:

(i) 0.5 percent of milk received from dairy farmers and disposed of as whole milk in bulk tank lots;

(ii) 1.5 percent of the skim milk or butterfat received as other source milk (except milk received from dairy farmers) or as bulk tank lots of approved whole milk and disposed of in a form other than bulk tank lots of whole milk: *Provided*, That any disposition of whole milk in bulk tank lots shall be assigned first to receipts of milk in such form; and

(iii) 2.0 percent of milk received from dairy farmers and disposed of in a form other than bulk tank lots of whole milk: *Provided*, That shrinkage of skim milk and butterfat not in excess of the percentages specified herein shall be assigned pro rata, pursuant to this subparagraph, to skim milk and butterfat, respectively, in approved milk and in other source milk.

4. In § 903.45 (a) (1) delete the word "producer" and substitute therefor the word "approved."

5. Delete § 903.45 (a) (3) and substitute therefor the following:

(3) Subtract from the pounds of skim milk remaining in Class II milk the remaining pounds of skim milk in other source milk which was not subject to the Class I pricing provisions of an order issued pursuant to the act: *Provided*, That skim milk so subtracted from Class II shall not result in the assignment of more skim milk in approved milk to Class I in a plant which is permitted to receive and bottle Grade A and non-Grade A milk than is contained in the Grade A other source and approved milk received at such plant: *And provided further*, That if the pounds of skim milk to be subtracted is greater than the remaining pounds of skim milk in Class II, the balance shall be subtracted from the pounds of skim milk in Class I;

6. Delete § 903.52 and substitute therefor the following:

§ 903.52 *Location differentials to handlers.* With respect to skim milk and butterfat contained in milk received from producers at a pool plant in Meramac or Bonhomme townships, St. Louis County, Missouri (except in the cities of Valley Park and Kirkwood), or outside the marketing area, which is classified as Class I milk, the price per hundredweight shall be reduced by the amounts set forth in the following schedule according to the airline distance from the plant where the milk is received from producers, or the plant from which the milk is diverted, to the City Hall in St. Louis:

| Mileage: | Allowance (cents) |
|---|---|
| Not more than 10 miles | 6 |
| More than 10 but not more than 20 miles | 12 |
| More than 20 but not more than 30 miles | 14 |
| More than 30 but not more than 40 miles | 16 |
| For each additional 10 miles or fraction thereof an additional | 1 |

*Provided*, That for the purpose of calculating such location differential with respect to milk transferred between pool plants, the Class II approved milk remaining in the transferee plant (except skim milk or butterfat in such plant which was subtracted pursuant to § 903.45 (a) (1), (2) and (b)) after deducting therefrom the amount of such milk or an amount equivalent to 0.05 times the producer milk at such plant, whichever is less, shall be assigned to approved milk from other plants in sequence according to the location differential applicable at each plant, beginning with the plant having the largest differential, and then to producer milk.

[F. R. Doc. 53-9924; Filed, Nov. 24, 1953; 8:57 a. m.]

## [7 CFR Part 965]

[Docket No. AO 166-A17]

### HANDLING OF MILK IN THE CINCINNATI OHIO, MARKETING AREA

### DECISION WITH RESPECT TO PROPOSED AMENDMENT TO TENTATIVE MARKETING AGREEMENT AND TO ORDER, AS AMENDED

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and marketing orders (7 CFR Part 900), a public hearing was conducted at Cincinnati, Ohio, May 18–20, 1953, pursuant to notice thereof which was issued on May 6, 1953 (18 F. R. 2716).

Upon the basis of the evidence introduced at the hearing and the record thereof the Acting Assistant Administrator, Production and Marketing Administration, on September 18, 1953 filed with the Hearing Clerk, United States Department of Agriculture, his recommended decision and opportunity to file written exceptions thereto which was published in the FEDERAL REGISTER on September 24, 1953 (18 F. R. 5679).

The material issues of record related to:

1. The classification and pricing of:

a. Producer milk used in the manufacture of sour (cultured) cream; and

b. Producer milk which is in excess of the market requirements for Class I and Class II milk (this excess milk is hereinafter referred to as reserve supplies);

2. Applicability of the order during work stoppages at plants due to labor disputes; and

3. Powers of the market administrator.

*Findings and conclusions.* The following findings and conclusions on the material issues are based upon the evidence introduced at the hearing and the record thereof.

*Sour cream.* The classification and pricing of milk used in the manufacture of sour (cultured) cream should not be changed. Such milk should continue to be classified and priced as Class II milk.

Local health regulations require that sour cream be made from milk produced and handled in full compliance with these regulations; the same quality of milk as is required for cream for fluid consumption. The only available source of milk of this quality has been from producers as defined in the Cincinnati order, except in times of milk shortages when health authorities have permitted limited amounts of other milk to be used for short periods of time for this and other fluid uses. Thus the market requirements for milk for sour cream should be regularly supplied with producer milk. Milk for this use should carry its share of the burden of maintaining milk supplies at a level sufficient to meet market requirements.

*Reserve supplies.* To be adequately supplied, a market must carry certain reserve supplies in addition to the actual market requirements. These reserve supplies are necessary because of day to day fluctuations in both supplies and requirements and because of variations in normal seasonal patterns of supplies and of requirements. These reserve supplies must be disposed of in such outlets as are available. These reserve supplies of milk should be priced low enough that handlers will accept such milk and seek the available outlets for it, but high enough that supplies beyond those necessary for actual requirements and reserve supplies will not be attracted to the market. Reserve supplies should also be priced in such a manner as to provide a price incentive for such supplies to be channeled into outlets which are more desirable from the standpoint of location and seasonality and which may therefore be expected to yield somewhat higher returns. The highest prices for reserve supplies of milk consistent with the objective of assuring that handlers will accept such milk are in the public interest because such reserve supplies will be making their optimum contribution toward the maintenance of an adequate supply of milk for the market.

No change should be made in the classification and pricing of Class III and Class IV milk except that the basis for classifying milk transferred to a nonpool plant during the month of August should be made the same as during April, May, June, and July.

Proposals considered at the hearing would reduce the level of Class III and Class IV prices, change the classification of milk used in the manufacture of cheddar cheese from Class III to Class IV, change the classification of milk used in the manufacture of ice cream from Class III to Class II but establish a lower price for milk used in ice cream sold outside of the marketing area, eliminate the Class IV classification by including milk used in the manufacture of butter in Class III and change the basis of classification of milk transferred to nonpool plants.

In considering the proposal to change the classification of milk used for ice cream from Class III to Class II, the question arises of whether milk used for ice cream, particularly for ice cream sold in the marketing area, should be considered as regular market requirements for milk or as an outlet for reserve supplies. The basis for this question lies in what the local health regulations and their enforcement require with respect to the quality of milk for use in ice cream. Conflicting evidence was submitted on this point. Sufficient basis cannot be found in the record for changing the classification of milk used for ice cream, and ice cream should continue to be considered as an outlet for reserve supplies of milk and classified as Class III milk.

In considering whether reserve supplies of milk are being priced in accordance with the objective set forth above of providing a price incentive for such supplies to be channelled into the more desirable outlets, it is necessary to consider which outlets are desirable.

Ice cream is a desirable outlet for reserve supplies of milk. Ice cream consumption is greatest in the months when reserve supplies are large. May, June, July, and August are the months when outlets in ice cream have been largest and November, December, January, and February have been the months when such outlets are smallest. This coincides almost exactly with the months when the reserve supplies are seasonally highest and lowest. In the last several years utilization of reserve supplies of milk by handlers in ice cream and ice cream mix in these four heaviest months of the year has been more than double such utilization in the four months when utilization of milk in ice cream is lowest. The utilization of reserve supplies in other products such as butter, nonfat dry milk solids, evaporated milk, and cheddar cheese also vary seasonally, but this seasonal outlet is facilitated by storage of the product rather than by a marked seasonal variation in consumption. Ice cream is also a favorable outlet because reserve supplies should have some location advantage in supplying local needs for milk for ice cream. Milk ingredients are usually incorporated into ice cream mix in the form of cream and condensed products, both of which are relatively bulky and perishable products, so reserve supplies have a greater location advantage in supplying milk for local ice cream outlets than for more concentrated and less perishable products. Reserve supplies have a similar location advantage in supplying milk for use in cottage cheese locally.

In each of the last six months the volume of reserve supplies have been at record levels for that month, however, in the last 12 months reserve supplies have been less than they were in either 1949 or 1950 after adjustments are made in recognition that cottage cheese was in Class II prior to September 1950. It is doubtful if production for the Cincinnati market and accordingly the reserve supplies will continue at the level of recent months. Reserve supplies will probably not exceed their 1950 volume in the next year or two. The period when reserve supplies were at their peak (1949 and 1950) includes the periods (June through September 1949 and March through August 1950) when milk used in the manufacture of cheddar cheese was priced at a level comparable with the present Class IV price. There is some indication that the pricing of milk for cheese at this level may have made cheese such an attractive outlet to handlers that milk supplies in excess of market requirements and necessary reserve supplies were accumulated.

In recent years the most important outlets for reserve supplies have been cottage cheese, butter, condensed products, nonfat dry milk solids, ice cream, and nonpool plants. In each of the four most recent 12 month periods for which information is contained in the record the percentages of the butterfat contained in these reserve supplies which were used in the chief outlets were as follows:

| | 1949–50 | 1950–51 | 1951–52 | 1952–53 |
|---|---|---|---|---|
| Ice cream | 36 | 34 | 42 | 38 |
| Nonpool plants | 36 | 22 | 19 | 21 |
| Butter | 22 | 33 | 28 | 25 |

Similar figures for the chief outlets for skim milk are as follows:

| | 1949–50 | 1950–51 | 1951–52 | 1952–53 |
|---|---|---|---|---|
| Nonpool plants | 32 | 30 | 15 | 17 |
| Cottage cheese | 17 | 26 | 27 | 24 |
| Condensed products | 15 | 13 | 23 | 19 |
| Ice cream | 14 | 11 | 14 | 14 |
| Nonfat dry milk solids | 10 | 10 | 10 | 13 |

These figures indicate that ice cream has retained or slightly increased its position and cottage cheese has become more important as an outlet for reserve milk supplies. Condensed products, which are used to a considerable extent in ice cream, have also become a somewhat larger outlet. Outlets to butter were largest in 1950–51 and 1952–53 when reserve supplies were largest. Nonfat dry milk solids have been a larger outlet than usual in the last year when reserve supplies were heavy. Nonpool plants have declined substantially as an outlet for reserve milk supplies. This outlet includes milk, skim milk, or cream transferred to a nonpool plant. Such milk, skim milk and cream is used for various products including ice cream, cheddar cheese, evaporated milk, and butter. One apparent reason for the decline in the use of nonpool plants as outlets for reserve milk supplies results from the discontinuation effective September 1, 1950, of the pricing of milk for cheese at a level comparable with the present Class IV price.

The above analysis indicates that sufficient outlets have been available for reserve supplies and that the more desirable outlets have been retained or expanded. Reserve supplies do not appear to have been excessive in the last two or three years.

Proponents of a lower price for reserve supplies claimed that the present level of prices has caused them to lose substantial ice cream outlets outside of the marketing area and has priced such milk to them above its value. As was indicated above, ice cream has retained or slightly increased its position as an outlet for reserve supplies. It is difficult to measure the value of reserve supplies of milk to handlers except in terms of handlers' apparent attitudes about obtaining or retaining milk supplies as evidenced by their actions. At the time of the hearing a number of handlers were seeking additional milk supplies. During the period May 1952 through March 1953 one handler's Class I utilization ranged from a low of 35 percent (in June) to a high of 66 percent (in November) of his total receipts of producer milk. Comparable utilization percentages for these months for the entire market were 49 and 79, respectively. Apparently the prices for reserve milk supplies have not been so high as to deter handlers from retaining milk supplies or from seeking additional supplies. The number of producers supplying the market has increased somewhat in recent months.

Proposals were suggested at the hearing which would cause the Class III and Class IV prices to change automatically as the percentage of producer milk classified in those classes change. The record does not contain sufficient evidence to indicate the extent, if any, to which these prices should change in response to changes in utilization percentages.

Proposals were considered to change the classification provisions with respect to milk transferred from a pool plant to a nonpool plant. At the present time milk so transferred is classified during April, May, June, and July upon written certification by the operators of the two plants on the basis of any use at the nonpool plant and during the remaining months of the year on the basis of the highest priced utilization at the nonpool plant. The proposals would make the April–July method of classification applicable for all months of the year. Adoption of these proposals would make it possible for nonpool plants primarily engaged in distributing milk in areas suburban to Cincinnati but not a part of the marketing area to obtain milk as a part of their regular supply from pool plants which milk could be classified on the basis of the lowest priced utilization at the nonpool plant. An important consideration in adopting the present classification provisions for such milk was to prevent this from occurring.

A suggestion was made that milk transferred to a nonpool plant be classified in the highest priced utilization remaining after regular receipts of milk from dairy farmers at such plant is first allocated to the highest priced utilizations at the plant. Evidence in the record shows that milk is transferred to several different nonpool plants each month. There would be a considerable additional administrative burden in effecting this method of classification because of the need for verifying total receipts and utilization of milk at these nonpool plants receiving milk from pool plants. The need for this method of classification does not appear to be great enough to justify this additional burden on the market administrator.

In recent years the reserve supplies of milk have been largest in April, May, June, July, and August. April and August volumes have been similar, and volumes in the remaining months have been notably lower. In order to bring the provisions for classifying milk transferred to a nonpool plant into better alignment with the present seasonality in the monthly volumes of reserve supplies, August should be included as a month when classification is on the same basis as during April, May, June, and July.

*Work stoppages.* Proposals were considered which would cause the order to be inoperative with respect to any handler whose plant is not in operation due to a work stoppage resulting from a dispute between the plant operator and a labor union. Testimony of proponents indicated that the major problems they sought to correct by this proposal result from (1) the present order provisions which do not permit handlers to divert producer milk from the farm directly to a nonpool plant, and (2) the possibility that handlers may not be able to find outlets for all of their milk which will return them as much as they are required by the order to pay producers for such milk.

A review of the present order provisions as they relate to this problem indicates that considerable flexibility now exists pursuant to the order with respect to these problems. If a handler desires to completely remove himself from price regulation with respect to part or all of his regular milk supply he could either divert such milk to a nonpool plant or leave the problem of finding an outlet for such milk to the producers of such milk, or their cooperative association. In the former event, the milk would not be producer milk because it would not be received at a pool plant or diverted by a cooperative association. In the latter event, milk for which individual producers must find an outlet would also not be producer milk for the same reasons; and milk for which the cooperative finds an outlet would not be producer milk for the same reasons unless the association wishes to retain such milk as producer milk by diverting it and becoming a handler with respect to such milk and making the reports required of handlers. If a handler desires that all or part of his milk supply continue to be producer milk he can arrange with a cooperative association for the association to divert the milk. Nothing in the order prohibits a cooperative association from diverting milk of producers who are not members of such association.

In view of this flexibility presently available in the event of a labor strike or work stoppage it is not necessary that any further provisions be included in the order for this purpose.

*Powers of the market administrator.* The powers described in the order for the market administrator should be expanded to authorize him to make rules and regulations to effectuate the terms and provisions of the order and to recommend to the Secretary of Agriculture amendments to the order. The Agricultural Marketing Agreement Act of 1937 specifically authorizes these powers. The need for rules and regulations may arise at some time, and provision for their issuance will permit them to be made if the need arises. At times the market administrator in his official duties may detect certain administrative problems which should in his opinion be corrected by amendments to the order. He should be specifically authorized to recommend such amendments to the Secretary of Agriculture; however, such amendments could only be adopted after the procedures required by law and by regulations issued thereunder have been pursued.

*General findings.* (a) The proposed marketing agreement and the order, as amended, and as hereby proposed to be further amended, and all of the terms and conditions thereof will tend to effectuate the declared policy of the act.

(b) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supply of and demand for milk in the marketing area and the minimum prices specified in the proposed marketing agreement and the order, as amended, and as hereby proposed to be further amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The proposed order, as amended, and as hereby proposed to be further amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activities specified in a marketing agreement upon which a hearing has been held.

*Rulings.* Exception was taken to some of the findings and conclusions and provisions of the recommended marketing agreement and amendment to the order contained in the recommended decision. These exceptions were all fully considered in making the findings and reaching the conclusions contained herein and in deciding upon the appropriate and detailed provisions to be included in the marketing agreement and order to effectuate such conclusions. To the extent that the findings and conclusions or the marketing agreement and order contained herein are at variance with the exceptions pertaining thereto, such exceptions are denied for the reasons set forth in the findings and conclusions on the issue to which the exceptions relate.

Rulings contained in the recommended decision on proposed findings and conclusions are hereby confirmed, and any proposed finding or proposed conclusion not previously ruled upon which is inconsistent with the findings and conclusions contained herein is denied on the basis of facts found and stated in connection with the conclusions herein set forth.

*Determination of representative period.* The month of August 1953 is hereby determined to be the representative period for the purpose of ascertaining whether the issuance of an order amending the order, as amended, regulating the handling of milk in the Cincinnati, Ohio, marketing area in the manner set forth in the attached amended order is approved or favored by producers who during such period were engaged in the production of milk for sale in the marketing area specified in such order, as amended.

*Marketing agreement and order.* Annexed hereto and made a part hereof are two documents entitled "Marketing Agreement Regulating the Handling of Milk in the Cincinnati, Ohio, Marketing Area," and "Order Amending the Order, as Amended, Regulating the Handling of Milk in the Cincinnati, Ohio, Marketing Area," which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions. These documents shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and orders have been met.

*It is hereby ordered*, That all of this decision, except the attached marketing agreement, be published in the FEDERAL REGISTER. The regulatory provisions of said marketing agreement are identical with those contained in the order, as amended, and as hereby proposed to be further amended by the attached order which will be published with this decision.

This decision filed at Washington, D. C., this 20th day of November 1953.

[SEAL] TRUE D. MORSE,
*Acting Secretary of Agriculture.*

*Order*[1] *Amending the Order, as Amended, Regulating the Handling of Milk in the Cincinnati, Ohio, Marketing Area*

§ 965.0 *Findings and determinations.* The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of each of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order, as amended, regulating the handling of milk in the Cincinnati, Ohio, marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order, as amended, and as hereby further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The parity prices of milk produced for sale in the said marketing area as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supplies of and demand for such milk, and the minimum prices specified in the order, as amended, and as hereby further amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk and be in the public interest; and

(3) The said order, as amended, and as hereby further amended, regulates the handling of milk in the same manner as and is applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held.

*Order relative to handling.* It is therefore ordered that on and after the effective date hereof the handling of milk in the Cincinnati, Ohio, marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as amended, and as hereby further amended; and the aforesaid order, as amended, is hereby further amended as follows:

1. Amend § 965.21 to read as follows:

§ 965.21 *Powers.* The market administrator shall have the power to:

(a) Administer the terms and provisions of this subpart;

(b) Report to the Secretary complaints of violations of the provisions of this subpart;

(c) Make rules and regulations to effectuate the terms and provisions of this subpart; and

(d) Recommend to the Secretary amendments to this subpart.

2. Amend the last proviso of § 965.43 (b) to read as follows: "*And provided further*, That in making such verification for months other than April, May, June, July, and August, the market administrator will assign milk, skim milk, or cream so transferred to the highest use classification in the plant of the receiver."

[F. R. Doc. 53-9920; Filed, Nov. 24, 1953; 8:56 a. m.]

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and orders have been met.

## FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 8]

[Docket No. 10764]

CARGO SHIP RADIOTELEGRAPH WORKING BANDS

NOTICE OF PROPOSED RULE MAKING

In the matter of amendment of Part 8 of the Commission's rules and regulations concerning the inauguration of use of the cargo ship radiotelegraph working bands between 4 and 23 Mc as provided by the Geneva (1951) Agreement; Docket No. 10764.

1. Notice is hereby given of proposed rule making in the above entitled matter.

2. The proposed amendments to the rules are intended as a part of the Commission's plan for bringing into force the International Radio Regulations (Atlantic City, 1947) in accordance with the Agreement concluded at the Extraordinary Administrative Radio Conference (Geneva, 1951).

3. The Atlantic City Radio Regulations provide the following frequency bands for exclusive use as Cargo Ship Radiotelegraph Working Bands:

| | |
|---|---|
| 4187 –4368 kc | 12751–12714 kc |
| 6200 – 6337 kc | 16744 1 22 kc |
| 8674 –8476 kc | 2_27–224 kc |

With reference to the activation of these bands, the Agreement concluded at the Extraordinary Administrative Radio Conference (Geneva, 1951) requires that all administrations endeavor to complete the clearance of these bands of out-of-band assignments within a six-month period after the date on which ship stations have commenced to move into the Atlantic City Ship Telegraph Calling Bands. The date of September 1, 1953, was established by the International Telecommunication Union as the date for beginning the activation of the Ship Telegraph Calling Bands on a worldwide basis. Therefore, the target date for the activation of the Cargo Ship Radiotelegraph Working Bands is March 1, 1954. The Agreement further provides that as the target date is approached, the International Telecommunication Union will take steps to establish the actual date based on the progress made by administrations in clearing the bands of out-of-band assignments and the ability of the cargo ships to operate in the new working bands.

4. It therefore appears appropriate to propose certain amendments to Part 8 of the Commission's rules at this time, well in advance of the date of activation, so as to reflect the forthcoming changes in those sections of the rules which relate to the availability of frequencies for use by ship stations. The forthcoming changes would therefore be brought to the attention of all interested parties and permit such preparatory measures as may be necessary with reference to equipment requirements to be undertaken sufficiently far in advance so that when the bands are cleared no delay

will be caused in bringing the new bands into force as a result of equipment limitations.

5. The proposed amendments to the rules are set forth below. They are issued pursuant to the authority of sections 303 (c), (f) and (r) of the Communications Act of 1934, as amended, the Final Acts of the International Telecommunication Radio Conference (Atlantic City, 1947) and the Agreement concluded at the Extraordinary Administrative Radio Conference (Geneva, 1951).

6. Any interested party who is of the opinion that the proposed amendment should not be adopted, or should not be adopted in the form set forth herein, may file with the Commission on or before December 18, 1953, a written statement or brief setting forth his comments. Replies to such comments may be filed within ten days from the last date for filing the original comments. The Commission will consider all comments and briefs presented before taking final action in the matter.

7. In accordance with the provisions of § 1.764 of the Commission's rules and regulations, an original and 14 copies of all statements, briefs or comments filed shall be furnished the Commission.

Adopted: November 18, 1953.

Released: November 20, 1953.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

1. Section 8.321 (a) (1) is amended by inserting footnote designator 1a in the text of subparagraph (1) between "ship stations" and "(public or limited)" and by adding footnote 1a to read as follows:

[1a] The specific frequencies above 515 kc herein listed shall not be assignable to ship stations (public or limited) on board ships after a date to be designated.

2. Section 8.324 (e) (2) is amended by revising the bands of frequencies to read:

| | |
|---|---|
| 2065-2107 kc [1] | 12561-12714 kc [1] |
| 4187-4236 kc [1] | 16748-16932 kc [1] |
| 6280.5-6357 kc [1] | 22270-22400 kc, |
| 8374-8476 kc [1] | |

And by inserting footnote 2d to read:

[2d] Available after a date to be designated.

3. Section 8.324 (f) (2) is amended by inserting footnote designator 2e in the text of subparagraph (2) between "17000 kc" and "when" and by adding footnote 2e to read as follows:

[2e] After a date to be designated, not applicable to frequencies between 4000 and 23000 kc insofar as ship stations aboard cargo vessels may be concerned.

## SECURITIES AND EXCHANGE COMMISSION

### [ 17 CFR Parts 239, 270, 274 ]

REVISION OF FORMS RELATING TO REGISTRATION STATEMENTS AND RELATED AMENDMENTS OF RULES UNDER THE INVESTMENT COMPANY ACT OF 1940

NOTICE OF PROPOSED RULE MAKING

The Securities and Exchange Commission today announced that it was circulating for comment among registered management investment companies copies of proposed revisions of Forms N-8B-1 and S-5 [1] (17 CFR 239.15 and 274.11) and related amendments to the General Rules and Regulations under the Investment Company Act of 1940.

Section 274.11 (Form N-8B-1) is the basic form for registration of management investment companies under the Investment Company Act of 1940. Section 239.15 (Form S-5) is a form for registration under the Securities Act of 1933 of the securities of open-end management investment companies, commonly known as "Mutual Funds." In connection with the preparation of these forms, the Commission has had the cooperation and many practical suggestions of representatives of management investment companies and the distributors of their securities. It is believed that as a result of such cooperation and suggestions the proposed new forms have been materially simplified without any loss to investors of essential information. Particularly, it is believed that the new Form S-5 will reduce substantially the size of the prospectus used in the sale of "Mutual Funds," as the result of the simplification of requirements for financial data to be included therein and the elimination of much statistical data.

Although these forms have been previously circulated for comment among the companies affected and other interested persons, the Commission believes the fundamental character and importance of these basic forms, not only to the companies concerned but to investors, warrants their re-circulation for further comment. All interested persons may obtain copies of such forms and the related rules by writing to the Commission's Secretary, Orval DuBois, at 425 Second Street NW. The Commission requests that all comments upon these forms be made to it not later than December 1, 1953.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
*Secretary.*

NOVEMBER 17, 1953.

## DEPARTMENT OF THE TREASURY

### Office of the Secretary

[Treasury Department Order 150-32]

COMMISSIONER OF INTERNAL REVENUE

DELEGATION OF FINAL APPROVAL OF CLOSING AGREEMENTS

By virtue of the authority vested in me by Reorganization Plan No. 26 of 1950, there are hereby transferred to the Commissioner of Internal Revenue all the functions of the Secretary of the Treasury, the Under Secretary of the Treasury, or any Assistant Secretary of the Treasury with respect to closing agreements under section 3760 of the Internal Revenue Code.

This order continues the delegation made by Treasury Department Order No. 146, dated December 20, 1951, which is hereby superseded.

The functions herein transferred may be delegated by the Commissioner to subordinates in the Internal Revenue Service in such manner as he shall from time to time direct.

Dated: November 18, 1953.

[SEAL] G. M. HUMPHREY,
*Secretary of the Treasury.*

### Office of the Secretary

CONFEDERATED TRIBES OF COLVILLE RESERVATION

ADOPTION OF FEDERAL INDIAN LIQUOR LAWS

Pursuant to the act of August 15, 1953 (Pub. Law 277, 83d Cong., 1st Sess.), I certify that the following ordinance relating to the application of the Federal Indian liquor laws on the Colville Reservation was duly adopted by the Confederated Tribes of the Colville Indian Reservation of Washington which has jurisdiction over the area of Indian country included in the resolution:

Whereas Public Law 277, 83d Congress, approved August 15, 1953, provides that sections 1154, 1156, 3113, 3488 and 3618 of title 18, United States Code, commonly referred to as the Federal Indian liquor laws, shall not apply to any act or transaction within any area of Indian country provided such act or transaction is in conformity with both the laws of the State in which such act or transaction occurs and with an ordinance duly adopted by the tribe having jurisdiction over such area of Indian country certified by the Secretary of the Interior, and published in the FEDERAL REGISTER.

Therefore, be it resolved that the introduction, sale or possession of intoxicating beverages shall be lawful within the Indian country under the jurisdiction of the Confederated Tribes of the Colville Indian Reservation. *Provided*, That such introduction, sale or possession is in conformity with the laws of the State of Washington.

Be it further resolved that any tribal laws, resolutions or ordinances heretofore enacted which prohibit the sale, introduction or possession of intoxicating beverages are hereby repealed.

ORME LEWIS,
*Assistant Secretary of the Interior.*

MINNESOTA CHIPPEWA TRIBE

ADOPTION OF FEDERAL INDIAN LIQUOR LAWS

Pursuant to the act of August 15, 1953 (Pub. Law 277, 83d Cong., 1st Sess.), I certify that the following ordinance relating to the application of the Federal Indian liquor laws on reservations in the State of Minnesota under the jurisdiction of the Consolidated Chippewa Agency was duly adopted by the Minnesota Chippewa Tribe which has jurisdiction over the area of Indian country included in the resolution:

Whereas Public Law 277, 83d Congress, approved August 15, 1953, provides that sections 1154, 1156, 3113, 3488 and 3618 of title 18, United States Code, commonly referred to as the Federal Indian liquor laws, shall not apply to any act or transaction within any area of Indian country provided such act or transaction is in conformity with both the laws of the State in which such act or transaction occurs and with an ordinance duly adopted by the tribe having jurisdiction over such area of Indian country certified by the Secretary of the Interior, and published in the FEDERAL REGISTER.

Therefore, be it resolved that the introduction or possession of intoxicating beverages shall be lawful within the Indian country under the jurisdiction of the Minnesota Chippewa Tribe, Provided, that such introduction or possession is in conformity with the laws of the State of Minnesota.

Be it further resolved, that the sale of intoxicating beverage shall be lawful within the Indian country under the jurisdiction of the Minnesota Chippewa Tribe, only by liquor stores owned and managed by the Minnesota Chippewa Tribe, Provided, that such sale is in conformity with the laws of the State of Minnesota.

Be it further resolved that any tribal laws, resolutions or ordinances heretofore enacted which prohibit the sale, introduction or possession of intoxicating beverages are hereby repealed.

ORME LEWIS,
*Assistant Secretary of the Interior.*

## DEPARTMENT OF AGRICULTURE

### Production and Marketing Administration

UPLAND COTTON MARKETING QUOTA

NOTICE OF REFERENDUM FOR 1954 CROP

The Secretary of Agriculture has duly proclaimed, pursuant to the provisions of the Agricultural Adjustment Act of 1938, as amended, a national marketing quota for the crop of upland cotton produced in 1954.

A referendum of the farmers who were engaged in the production of upland cotton in the calendar year of 1953 will be held on December 15, 1953, pursuant to the provisions of the act and applicable regulations, to determine whether such farmers are in favor of or opposed to the 1954 quota. If two-thirds or more of the cotton farmers voting in the upland cotton referendum favor the quota, such quota will be in effect for the 1954 upland cotton crop. If more than one-third of the cotton farmers voting in such referendum oppose the quota, the quota will not be in effect for the 1954 upland cotton crop.

*Registration.* Any person who, on the basis of the eligibility requirements set forth below, is eligible to vote in the referendum and who has reason to believe he is not on record as a 1953 upland cotton producer in the county should notify the PMA County Committee of his eligibility and request that his name be entered on the register of eligible voters.

*Eligibility to vote.* 1. Farmers eligible to vote in the referendum will be those farmers who were engaged in the production of upland cotton in 1953 as owner-operator, cash tenant, standing-rent or fixed-rent tenant, or landlord (other than a landlord of a standing-rent tenant, cash-rent or fixed-rent tenant) of a share tenant, or as share tenant or sharecropper.

2. Any farmer whose only cotton production in 1953 consisted of extra long staple cotton shall not be eligible to vote in this referendum, but, if otherwise eligible, may vote in the extra long staple cotton referendum.

3. No cotton farmer (whether an individual, partnership, firm, joint-stock company, corporation, association, trust, estate, or other legal entity, or a State or political subdivision thereof or any agency of a State or political subdivision thereof) shall be entitled to more than one vote in the referendum, even though such farmer may have been engaged in 1953 in the production of upland cotton on two or more farms or in two or more communities, counties, or States.

4. In case several persons, such as husband, wife, and children, participated in the production of upland cotton in 1953, under the same rental or cropping agreement or lease, only the persons who signed or entered into the rental or cropping agreement or lease shall be eligible to vote.

5. In the event two or more persons were engaged in producing upland cotton in 1953 not as members of a partnership but as tenants in common or joint tenants or as owners of community property, each such person shall be eligible to vote.

6. No person shall be eligible to vote in any community other than the community in which he now resides except as follows:

(a) Any person who resides in a community other than the community in which he is engaged in the production of upland cotton may, if he will not vote in the community in which he resides, vote at the polling place for the community in which he is engaged in the production of such cotton.

(b) Any person who resides in a community in which there is no polling place shall be eligible to vote at the polling place designated for the community nearest to the community in which he resides.

(c) Any person who on the day of the referendum will not be present in the county in which he is eligible to vote may, as early as 5 days prior to the date of the referendum, obtain a ballot at the most conveniently located PMA County Committee office and may cast his ballot by indicating his choice on the ballot, signing his name thereto and mailing it so that the ballot reaches the PMA County Committee for the county in which he is eligible to vote not later than the closing hour on the date of the referendum, which shall not be earlier than 5 o'clock p. m., local standard time.

7. There shall be no voting by mail (except as provided in paragraph 6 (c) above), by proxy, or by agent, but a duly authorized officer of a corporation, association, or other legal entity or a duly authorized member of a partnership, may cast its vote.

The foregoing provisions relating to registration and eligibility to vote in the referendum will appear on printed notices which will be posted in a conspicuous place in each community in which upland cotton was produced in 1953. The language appearing below will also appear on the notices prepared for posting and will be filled in by the Production and Marketing Administration county committee to show the place for balloting and the time for opening and closing of the polls.

PLACE FOR BALLOTING

EXTRA LONG STAPLE COTTON MARKETING QUOTA

NOTICE OF REFERENDUM FOR 1954 CROP

The Secretary of Agriculture has duly proclaimed, pursuant to the provisions of the Agricultural Adjustment Act of

1938, as amended, a national marketing quota for the crop of extra long staple cotton produced in 1954.

A referendum of the farmers who were engaged in the production of extra long staple cotton in the calendar year of 1953 will be held on December 15, 1953, pursuant to the provisions of the act and applicable regulations, to determine whether such farmers are in favor of or opposed to the 1954 quota. If two-thirds or more of the cotton farmers voting in the extra long staple cotton referendum favor the quota, such quota will be in effect for the 1954 extra long staple cotton crop. If more than one-third of the cotton farmers voting in such referendum oppose the quota, the quota will not be in effect for the 1954 extra long staple cotton crop.

*Registration.* Any person who, on the basis of the eligibility requirements set out below, is eligible to vote in the referendum and who has reason to believe he is not on record as a 1953 extra long staple cotton producer in the county should notify the PMA County Committee of his eligibility and request that his name be entered on the register of eligible voters.

*Eligibility to vote.* 1. Farmers eligible to vote in the referendum will be those farmers who were engaged in the production of extra long staple cotton in 1953 as owner-operator, cash tenant, standing-rent or fixed-rent tenant, or landlord (other than a landlord of a standing-rent tenant, cash-rent or fixed-rent tenant) of a share tenant, or as share tenant or sharecropper.

2. Any farmer whose only cotton production in 1953 consisted of upland cotton shall not be eligible to vote in this referendum, but, if otherwise eligible, may vote in the upland cotton referendum.

3. No cotton farmer (whether an individual, partnership, firm, joint-stock company, corporation, association, trust, estate, or other legal entity, or a State or political subdivision thereof or any agency of a State or political subdivision thereof) shall be entitled to more than one vote in the referendum, even though such farmer may have been engaged in 1953 in the production of extra long staple cotton on two or more farms or in two or more communities, counties or States.

4. In case several persons, such as husband, wife, and children, participated in the production of extra long staple cotton in 1953 under the same rental or cropping agreement or lease, only the persons who signed or entered into the rental or cropping agreement or lease shall be eligible to vote.

5. In the event two or more persons were engaged in producing extra long staple cotton in 1953 not as members of a partnership but as tenants in common or joint tenants or as owners of community property, each such person shall be eligible to vote.

6. No person shall be eligible to vote in any community other than the community in which he now resides except as follows:

(a) Any person who resides in a community other than the community in which he is engaged in the production of extra long staple cotton may, if he will not vote in the community in which he resides, vote at the polling place for the community in which he is engaged in the production of such cotton.

### TOKAY GRAPES GROWN IN SAN JOAQUIN AND SACRAMENTO COUNTIES IN CALIFORNIA

ORDER DIRECTING THAT A REFERENDUM BE CONDUCTED; DESIGNATION OF REFERENDUM AGENTS TO CONDUCT SUCH REFERENDUM; AND DETERMINATION OF REPRESENTATIVE PERIOD

Pursuant to the applicable provisions of Marketing Agreement No. 93, as amended, and Order No. 51, as amended (7 CFR Part 951), and the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (48 Stat. 31, as amended; 7 U. S. C. 601 et seq.), it is hereby directed that a referendum be conducted among the producers who, during the period beginning April 1, 1953, and ending November 1, 1953, both dates inclusive (which period is hereby determined to be a representative period for the purpose of such referendum), were engaged, in San Joaquin and Sacramento Counties in California in the production of Tokay grapes for market to determine whether such producers favor the termination of the said amended marketing agreement and order. Oscar H. Chapin and Harry J. Krade of the Fruit and Vegetable Branch, Production and Marketing Administration, United States Department of Agriculture, are hereby designated as agents of the Secretary of Agriculture to conduct said referendum jointly or severally.

The procedure applicable to this referendum shall be the "Procedure for the Conduct of Referenda Among Producers in Connection with Marketing Orders (Except Those Applicable to Milk and its Products) to Become Effective Pursuant to the Agricultural Marketing Agreement Act of 1937, as amended" (15 F. R. 5176), except that for the purposes of this referendum:

A. Paragraph (c) (1) is amended to read as follows:

(1) Conduct the referendum in the manner herein prescribed, by giving opportunity to producers, who, during the period beginning April 1, 1953, and ending November 1, 1953, both dates inclusive (which period is determined to be a representative period), have been engaged, within San Joaquin and Sacramento Counties in California, in the production of Tokay grapes for market, to cast their ballots relative to the termination of said amended marketing agreement and order.

B. Paragraph (c) (5) is amended to read as follows:

(5) Make available to producers and the aforesaid cooperative associations instructions on voting, and appropriate ballot and other necessary form.

C. Paragraph (d) (3) is amended to read as follows:

(3) Distribute ballots and other necessary forms to producers and receive any ballots which are cast; and

Copies of the aforesaid amended marketing agreement and order, of the aforesaid procedure (15 F. R. 5176), and of this order may be examined in the Office of the Hearing Clerk, Room 1353, South Building, United States Department of Agriculture, Washington, D. C., and at the office of the Field Representative, Fruit and Vegetable Branch, Production and Marketing Administration, United States Department of Agriculture, Room 302, 701 "K" Street, Sacramento, California.

Done at Washington, D. C., this 20th day of November 1953.

[SEAL] TRUE D. MORSE,
*Acting Secretary of Agriculture.*

## CIVIL AERONAUTICS BOARD

[Docket No. 6078]

AIR AMERICA, INC., ET AL.; ENFORCEMENT PROCEEDING

NOTICE OF RE-ASSIGNED HEARING

In the matter of a complaint against Air America, Inc. and certain allegedly associated companies, including Air America Agency Corporation, Air America Agency, Inc., Airline Reservations, Inc. (New York), Airline Reservations, Inc. (Illinois), and Airline Tickets, Inc., filed by American Airlines, Inc., and charging aforesaid respondents, together and severally, with violations of section 411 of the Civil Aeronautics Act of 1938, as amended, and with violations of § 291.1 (a) of the Board's Economic Regulations.

Notice is hereby given that a public hearing in the above-entitled proceeding originally assigned to be held on October 12, 1953, and later postponed is hereby re-assigned to be held on December 8, 1953, at 10:00 a. m., e. s. t., in Room 1205, Temporary Building No. 4, Seventeenth Street and Constitution Avenue NW., Washington, D. C., before Examiner Edward T. Stodola.

Without limiting the scope of the issues presented by the complaint filed by American Airlines, Inc., particular attention will be given to the question whether the respondents, or any of them, are in violation of section 411 of the act and § 291.1 (a) of the Board's Economic Regulations and whether the Board shall exercise its powers under sections 205 (a), 411, 1002 (b) and 1002 (c) of the act and order the respondents, or any of them, to cease and desist from activities and practices which have allegedly resulted in violations of said section 411 of the act and said § 291.1 (a) of the Board's Economic Regulations.

Notice is hereby further given that any person other than parties of record desiring to be heard in this proceeding must file with the Board on or before December 8, 1953 a statement setting forth the issues of fact or law raised by this proceeding which he desires to controvert.

For further details of the issues involved in this proceeding, all interested parties are referred to the complaint and other documents on file under Docket No. 6078 in the docket section of the Civil Aeronautics Board.

Dated at Washington, D. C., November 20, 1953.

[SEAL] FRANCIS W. BROWN,
*Chief Examiner.*

[F. R. Doc. 53-9914; Filed, Nov. 24, 1953; 8:54 a. m.]

[Docket No. 5770 et al.]

LAKE CENTRAL AIRLINES ET AL.; ACQUISITION INVESTIGATION

NOTICE OF HEARING

In the matter of the joint application for approval of certain interlocking relationships involving North Central Airlines, Inc. and Lake Central Airlines, Inc., and the matter of the proposed acquisition of the control of Lake Central Airlines, Inc. by North Central Airlines, Inc. and or Ozark Airlines, Inc., and the investigation of the acquisition of Lake Central's Route 88 in whole or in part by North Central Airlines, Inc., Ozark Airlines, Inc. and or Allegheny Airlines, Inc. pursuant to sections 408 and 409 (a) of the Civil Aeronautics Act of 1938, as amended, under Docket Nos. 5770, 6024, 6068, and 6213.

Notice is hereby given, pursuant to the Civil Aeronautics Act of 1938, as amended, hereinafter called the act, that a hearing in the above-entitled proceeding will be held on November 30, 1953, at 10:00 a. m., e. s. t., in Room 1205, Temporary Building No. 4, Seventeenth and Constitution Avenue NW., Washington, D. C., before Examiner Paul N. Pfeiffer.

Without limiting the scope of the issues presented by the applications and investigations consolidated herein, particular attention will be directed to the following matters:

(1) Whether the acquisition of control of Lake Central Airlines, Inc. by North Central Airlines, Inc. would result in creating a monopoly or monopolies and thereby restrain competition or jeopardize a third air carrier and would not be consistent with the public interest pursuant to section 408 of the act?

(2) Whether the interlocking relationships of Howard A. Morey, Frank N. Buttomer, Grove Webster, Arthur E. Schwandt, Arthur E. A. Mueller, Joe Decoursin, Francis M. Higgins, Don Olen, Harold Emch, Harold N. Carr, A. L. Wheeler and Robert B. Stewart, North Central Airlines, Inc. and Lake Central Airlines, Inc. will not adversely affect the public interest within the meaning of section 409 (a) of the act?

(3) Whether and upon what terms the acquisition of the majority stock holding interest in Lake Central Airlines, Inc. by North Central Airlines, Inc. and or Ozark Airlines, Inc., and whether and upon what terms the acquisition of Lake Central's Route 88 in whole or in part by North Central Airlines, Inc., Ozark Airlines, Inc., and or Allegheny Airlines, Inc. is consistent with the public interest?

For further details of the issues involved in this proceeding, interested persons are referred to the applications and amendments thereto, petitions, motions, and orders entered in the docket of this proceeding, all of which are on file with the Civil Aeronautics Board.

Notice is further given that any person other than parties of record desiring to be heard in this proceeding should file with the Board, on or before November 30, 1953, a statement setting forth the issues of fact or law to be presented.

Dated at Washington, D. C., November 20, 1953.

[Docket No. 2888 et al.]

SKYTRAIN AIRWAYS, INC.; REOPENED LATIN AMERICAN AIR FREIGHT CASE

NOTICE OF POSTPONEMENT OF HEARING

In the matter of the fitness, willingness, and ability of Skytrain Airways, Inc., properly to perform the air transportation encompassed within Docket No. 2888 and Docket No. 4473 and to conform to the provisions of the act and the rules, regulations, and requirements of the Board thereunder.

Notice is hereby given, pursuant to the Civil Aeronautics Act of 1938, as amended, that on November 9, 1953, hearing in the above-entitled proceeding heretofore assigned to be held on December 7, 1953, was postponed to a date later to be assigned.

Notice is further given, that hearing in the above-entitled proceeding is hereby reassigned to be held on January 5, 1954, at 10:00 a. m., e. s. t., in Room 1205, Temporary Building No. 4, Sixteenth Street and Constitution Avenue NW., Washington, D. C., before Examiner Curtis C. Henderson.

## FEDERAL COMMUNICATIONS COMMISSION

[Docket Nos. 8905, 10760]

UNIVERSAL BROADCASTING CO., INC., AND CROSLEY BROADCASTING CORP.

ORDER DESIGNATING APPLICATIONS FOR CONSOLIDATED HEARING ON STATED ISSUES

In re applications of Universal Broadcasting Company, Inc., Indianapolis, Indiana, Docket No. 8905, File No. BPCT-110; Crosley Broadcasting Corporation, Indianapolis, Indiana, Docket No. 10760, File No. BPCT-1594; for construction permits for new television stations.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 18th day of November 1953;

The Commission having under consideration the above-entitled applications,

each requesting a construction permit for a new television broadcast station to operate on Channel 8 in Indianapolis, Indiana; and

It appearing that the above-entitled applications are mutually exclusive in that operation by more than one applicant would result in mutually destructive interference; and

It further appearing that pursuant to section 309 (b) of the Communications Act of 1934, as amended, the above-named applicants were advised by letters of the fact that their applications were mutually exclusive, of the necessity for a hearing and of all objections to their applications; and were given an opportunity to reply; and

It further appearing that upon due consideration of the above-entitled applications, the amendments filed thereto, and the replies to the above letters, the Commission finds that under section 309 (b) of the Communications Act of 1934, as amended, a hearing is mandatory; that each of the above-named applicants is legally, financially and technically qualified to construct, own and operate a television broadcast station;

*It is ordered*, That pursuant to section 309 (b) of the Communications Act of 1934, as amended, the above-entitled applications are designated for hearing in a consolidated proceeding to commence at 10:00 a. m. on the 18th day of December, 1953 in Washington, D. C., upon the following issue:

1. To determine on a comparative basis which of the operations proposed in the above-entitled applications would better serve the public interest, convenience and necessity in the light of the record made with respect to the significant differences between the applications as to:

(a) The background and experience of each of the above-named applicants having a bearing on its ability to own and operate the proposed television station.

(b) The proposals of each of the above-named applicants with respect to the management and operation of the proposed station.

(c) The programming service proposed in each of the above-entitled applications.

*It is further ordered*, That the issues in the above-entitled proceeding may be enlarged by the Examiner, on his own motion or on petition properly filed by a party to the proceeding and upon sufficient allegations of fact in support thereof, by the addition of the following issued: To determine whether the funds available to the applicant will give reasonable assurance that the proposals set forth in the application will be effectuated.

Released: November 20, 1953.

[Docket Nos. 9030, 10758, 10759]

QUEEN CITY BROADCASTING CO. ET AL.

ORDER DESIGNATING APPLICATIONS FOR CONSOLIDATED HEARING ON STATED ISSUES

In re applications of Queen City Broadcasting Company, Seattle, Washington, Docket No. 9030, File No. BPCT-453: KXA, Inc., Seattle, Washington, Docket No. 10758, File No. BPCT-902; Puget Sound Broadcasting Company, Incorporated, Seattle, Washington, Docket No. 10759, File No. BPCT-1592; for construction permits for new television stations.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 18th day of November 1953;

The Commission having under consideration the above-entitled applications, each requesting a construction permit for a new television broadcast station to operate on Channel 7 in Seattle, Washington; and

It appearing that the above-entitled applications are mutually exclusive in that operation by more than one applicant would result in mutually destructive interference; and

It further appearing that pursuant to section 309 (b) of the Communications Act of 1934, as amended, the above-named applicants were advised by letters of the fact that their applications were mutually exclusive, of the necessity for a hearing and of all objections to their applications; and were given an opportunity to reply; and

It further appearing that upon due consideration of the above-entitled applications, the amendments filed thereto, and the replies to the above letters, the Commission finds that under section 309 (b) of the Communications Act of 1934, as amended, a hearing is mandatory; and that each of the above-named applicants is legally, financially and technically qualified to construct, own and operate a television broadcast station; and

It further appearing that Queen City Broadcasting Company filed a letter on November 10, 1953 stating, inter alia, that the Commission, on October 5, 1953, sent pre-hearing letters to each of the above-entitled applicants stating therein that any reply should be filed "within thirty days from the date of this notice" and that "in the absence of a reply from you concerning the above matters, your application will be subject to dismissal pursuant to the provisions of § 1.381 of the Commission's rules."; that on November 4, 1953 Queen City Broadcasting Company filed a reply to its pre-hearing letter and an amendment to its application; that on November 5, 1953 KXA, Inc. filed a "preliminary response" to its pre-hearing letter setting forth the reasons why "a complete amendment" could not have been filed on November 4, 1953 and requesting that an amendment to be filed "within a few days" be "considered by the Commission before the instant application is designated for hearing"; that on November 9, 1953 the Commission received a letter from Puget Sound Broadcasting Company, Incorporated setting forth the reasons why an amended application had not previously been filed and stating that an amendment would be filed on November 9, 1953; and that the applications of KXA, Inc. and Puget Sound Broadcasting Company, Incorporated should be dismissed pursuant to the requirements of the above pre-hearing letters and § 1.381 of the Commission's rules or that, in the alternative, "any late filed amendments" should be disregarded and all three applications should be considered as they stood on November 4, 1953 and designated for hearing on that basis; and that on November 16, 1953, KXA, Inc., filed a reply to said request urging that it be denied; and

It further appearing that amendments to the application of KXA, Inc. were filed on November 10, 1953 and November 16, 1953; that amendments to the application of Puget Sound Broadcasting Company, Incorporated were filed on November 9, 1953 and November 12, 1953; that under § 1.365 (a) of the Commission's rules applications may be amended as a matter of right prior to the designation of such application for hearing; that by their letters filed November 5, 1953 and November 9, 1953, respectively, KXA, Inc., and Puget Sound Broadcasting Company, Incorporated indicated intentions to prosecute their applications; that Queen City Broadcasting Company has not been prejudiced by the late replies to the Commission's letter; and that dismissals of the applications of KXA, Inc., and Puget Sound Broadcasting Company, Incorporated are not warranted on the basis of the above facts.

*It is ordered*, That the requests of Queen City Broadcasting Company, set forth in its letter filed November 10, 1953, are denied in all respects.

*It is further ordered*, That pursuant to section 309 (b) of the Communications Act of 1934, as amended, the above-entitled applications are designated for hearing in a consolidated proceeding to commence at 10:00 a. m. on the 18th day of December, 1953 in Washington, D. C. upon the following issues:

1. To determine on a comparative basis which of the operations proposed in the above-entitled applications would best serve the public interest, convenience and necessity in the light of the record made with respect to the significant differences among the applications as to:

(a) The background and experience of each of the above-named applicants having a bearing on its ability to own and operate the proposed television station.

(b) The proposals of each of the above-named applicants with respect to the management and operation of the proposed station.

(c) The programming service proposed in each of the above-entitled applications.

*It is further ordered*, That the issues in the above-entitled proceeding may be enlarged by the Examiner, on his own motion or on petition properly filed by a party to the proceeding and upon sufficient allegations of fact in support thereof, by the addition of the following issue: To determine whether the funds available to the applicant will give reasonable assurance that the proposals set forth in the application will be effectuated.

Released: November 20, 1953.

MID-ATLANTIC BROADCASTING CO (WMID)

ORDER CONTINUING HEARING

In the matter of Cease and Desist Order to be directed against Mid-Atlantic Broadcasting Company (WMID), Atlantic City, New Jersey, Docket No. 10741.

The Commission having under consideration a "Petition to Reconsider and Vacate Action Looking Toward Issuance of a Cease and Desist Order" filed on November 13, 1953, by Mid-Atlantic Broadcasting Company, Atlantic City, New Jersey, which said petition contained a request that the hearing in the above matter presently scheduled for November 16, 1953, be postponed in order to afford the Commission opportunity to act upon the aforesaid petition;

It appearing that all the parties to this proceeding have consented to a grant of the request for postponement and to a waiver of § 1.745 of the Commission's rules in order to permit immediate consideration thereof.

*It is ordered*, This 16th day of November, 1953, that the motion for continuance is granted and that the hearing scheduled to be held in this proceeding on November 16, 1953, be, and the same is hereby continued indefinitely.

## SECURITIES AND EXCHANGE COMMISSION

[File No. 70-3135]

WORCESTER COUNTY ELECTRIC CO.

SUPPLEMENTAL ORDER REGARDING SALE OF PREFERRED STOCK

NOVEMBER 19, 1953.

The Commission, by order dated November 5, 1953, having granted and permitted to become effective the application-declaration of Worcester County Electric Company ("Worcester County"), a public-utility subsidiary company of New England Electric System, a registered holding company, proposing the issuance and sale by Worcester County of 75,000 shares, -- Percent Series, $100 par value cumulative preferred stock subject to reservations of jurisdiction with respect to the results of competitive bidding under Rule U-50 and the fees and expenses to be incurred in connection with the proposed transaction; and

Worcester County having on November 19, 1953, filed a further amendment to its application-declaration herein setting forth the action taken by it to comply with the requirements of Rule U-50, and stating that, pursuant to the invitation for competitive bids, the following bids have been received:

| Group headed by— | Annual dividend rate (dollars per share) | Price to Company (dollars per share) | Annual cost to Company (per-cent) |
|---|---|---|---|
| Lehman Bros | 4.44 | 100.509 | 4.4175 |
| Harriman Ripley & Co., Inc | 4.48 | 100.27 | 4.4679 |
| Kidder, Peabody & Co., Blyth & Co., Inc., White, Weld & Co., Union Securities Corp. and Merrill Lynch, Pierce, Fenner & Beane. | 4.56 | 100.60 | 4.5328 |
| | 4.60 | 100.483 | 4.5779 |

[1] Exclusive of accrued dividends from November 18, 1953.

The amendment having further stated that Worcester County has accepted the bid of the group headed by Lehman Brothers, as set forth above, and that the preferred stock will be reoffered to the public at a price of $102.068 per share, plus accrued dividends from November 18, 1953, resulting in an underwriting spread of $1.559 per share or an aggregate of $116,925; and

The record having been completed with respect to the fees and expenses to be incurred in connection with the proposed transactions, and it appearing that such fees and expenses are estimated in the aggregate amount of $48,700 as follows:

| | |
|---|---|
| Fee for registration of the preferred stock under the Securities Act of 1933 | $780 |
| Federal original issue stamp tax | 8,250 |
| Massachusetts state filing fee | 3,750 |
| Services of New England Power Co. (an affiliated service company) performed at cost | 17,000 |
| Printing costs of the registration statement, prospectus, exhibits and other related documents | 11,000 |
| Printing of the preferred stock certificates in definitive form | 1,000 |
| Services of Lybrand, Ross Bros. & Montgomery, independent public accounts | 1,200 |
| Services of the transfer agent and registrar with reference to the registration and issue of preferred stock certificates | 2,000 |
| Mailing costs, advertising public invitation for bids, filing fees and qualification under Blue Sky Laws, and miscellaneous (including provision for reimbursement of out-of-pocket expenses in connection with the services described above) | 3,720 |
| Total | 48,700 |

It also appearing that the fee and expenses of Choate, Hall & Stewart, independent counsel for the purchasers of the new preferred stock, which are to be paid by said purchasers, are estimated at $6,000 and $500, respectively; and

The Commission having examined the record in the light of said amendment, and observing no basis for imposing terms and conditions with respect to the price to be received for said preferred stock, the dividend rate and the underwriters' spread and it appearing to the Commission that the above fees and expenses are not unreasonable if they do not exceed the amounts estimated, and it appearing to the Commission that jurisdiction heretofore reserved over the results of competitive bidding and over all fees and expenses be released:

*It is ordered*, That jurisdiction heretofore reserved to consider the results of competitive bidding with respect to the issuance and sale of the new preferred stock and over all fees and expenses to be paid in connection with the proposed sale of said stock, including the fee and expenses of counsel for the successful bidders be, and hereby is, released and that such application-declaration, as amended be granted and permitted to become effective forthwith, subject, however, to the terms and conditions prescribed by Rule U-24.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[File No. 70-3143]

MISSOURI POWER & LIGHT CO.

ORDER PERMITTING DECLARATION REGARDING ISSUANCE OF SHORT-TERM NOTE TO BECOME EFFECTIVE

NOVEMBER 19, 1953.

Missouri Power & Light Company ("Missouri") a public utility subsidiary company of Union Electric Company of Missouri, a registered holding company, having filed a declaration pursuant to section 7 of the Public Utility Holding Company Act of 1935 ("act") with this Commission with respect to a proposed transaction which is summarized below:

On September 21, 1953, Missouri entered into a conditional agreement with The Chase National Bank of the City of New York whereby said bank agreed to make an unsecured loan to Missouri in the principal amount of $2,800,000 on December 10, 1953. The proceeds of the proposed loan will be used by Missouri to pay notes to be outstanding and maturing on December 10, 1953 in that amount. The notes to be then paid by Missouri were authorized by the order of this Commission dated December 8, 1952. The proposed loan will be evidenced by an unsecured promissory note for $2,800,000 which will mature on September 10, 1954, and will bear interest until maturity or prior payment at the rate of 3¼ percent per annum or at the prime commercial rate of interest of The Chase National Bank of the City of New York for such paper at the time of the borrowing, whichever is higher. The interest will be payable on June 10, 1954 and at maturity. Missouri intends subsequently to fund the proposed loan through the issue and sale of stock, mortgage bonds or other form of permanent financing.

The declaration states that no State or Federal Commission, other than this Commission, has jurisdiction over the proposed transaction.

Fees and expenses are estimated at $1,250, including counsel fees of $500.

Due notice having been given of the filing of the declaration, and a hearing not having been requested of or ordered by the Commission; and the Commission finding that the applicable provisions of the act and rules promulgated thereunder are satisfied and that no adverse findings are necessary, and deeming it appropriate in the public interest and the interest of investors and consumers that said declaration be permitted to become effective:

*It is ordered*, Pursuant to Rule U-23 and the applicable provisions of said Act, that said declaration be, and hereby is, permitted to become effective forthwith, subject to the terms and conditions prescribed in Rule U-24.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

## FEDERAL POWER COMMISSION

[Docket Nos. G-1806, G-2054]

ATLANTIC SEABOARD CORP. AND VIRGINIA GAS TRANSMISSION CORP.

ORDER RECONVENING HEARING

On July 28, 1953, following the presentation of their case-in-chief by Atlantic Seaboard Corporation and Virginia Gas Transmission Corporation, the hearings in the above-named proceedings were recessed pending further order of the Commission, to allow time for preparation of cross-examination, as contemplated by the order issued June 8, 1953, setting these matters for hearing. Counsel for the companies also indicated that a recess was desirable to await the decision in the proceedings entitled In the Matter of United Fuel Gas Company, Docket Nos. G-1781 and G-2055, in order to study the effect of such decision on these proceedings. Opinion No. 258 in Docket Nos. G-1781 and G-2055 was issued August 7, 1953.

The Commission finds: It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that the public hearing in the above proceedings be reconvened at the time and place hereinafter ordered.

The Commission orders:

(A) The public hearing in the above consolidated proceedings, concerning the lawfulness of the rates, charges, classifications and services, and the rules, regulations, practices and contracts relating thereto, contained in Atlantic Seaboard Corporation's FPC Gas Tariffs, Fourth and Fifth Revised Volume No. 1, and Virginia Gas Transmission Corporation's FPC Gas Tariffs, Second and Third Revised Volume No. 1, hereby is reconvened commencing January 11, 1954, at 10:00 a. m., e. s. t., in the Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C.

(B) The public hearing hereby reconvened shall be subject to the provisions of the order issued June 8, 1953 in these dockets, as applicable.

Adopted: November 18, 1953

Issued: November 19, 1953.

By the Commission.

[SEAL] LEON M. FUQUAY, *Secretary.*

[F. R. Doc. 53-9883; Filed, Nov. 24, 1953; 8:47 a. m.]

[Docket No. G-2315]

NEW YORK STATE NATURAL GAS CORP.

ORDER SUSPENDING PROPOSED TARIFF CHANGES, FIXING DATE OF HEARING AND SPECIFYING PROCEDURE

On October 21, 1953, New York State Natural Gas Corporation (Applicant), pursuant to section 4 of the Natural Gas Act and the Commission's general rules and regulations, particularly Part 154 thereof (18 CFR Part 154), tendered for filing its proposed FPC Gas Tariff, First Revised Volume No. 1, to supersede its Original Volume No. 1 thereof and its proposed Second Revised Sheet No. 14 and First Revised Sheet No. 20 to its FPC Gas Tariff, Original Volume No. 2, with a proposed effective date of November 21, 1953, and containing proposed changes in form of rates and increased rates and charges for sales by Applicant of natural gas in interstate commerce for resale for ultimate public consumption, subject to the Commission's jurisdiction. These proposed tariff changes involve an estimated annual increase in Applicant's rates and charges for natural gas sold to its utility customers of approximately $5,305,831, based on estimated sales for the calendar year 1953. The distribution of such increase among Applicant's customers is shown below.

This rate increase proposal is in addition to Applicant's proposal, which was filed on January 15, 1953, suspended by the Commission's order issued February 12, 1953, and made effective as of July 15, 1953, under bond and subject to refund, pursuant to the Commission's order issued August 13, 1953, In the Matter of New York State Natural Gas Corporation, Docket No. G-2119, involving an estimated annual increase of approximately $3,741,000, based on estimated sales for the year ending February 14, 1954. Pursuant to an order of the Commission issued October 16, 1953 a public hearing was convened on November 16, 1953 concerning the lawfulness of the increased rates and other tariff changes proposed in Docket No. G-2119.

Applicant bases its proposed increase in rates and charges upon among other things, a claimed increase in the cost of gas purchased from Tennessee Gas Transmission Company (TGT) and from Hope Natural Gas Company (Hope), resulting from proposed increased rates filed by TGT on August 31, 1953, and by Hope on October 9, 1953. The Commission has, however, suspended TGT's and Hope's proposed increased rates and has ordered hearings thereon to commence on February 8, 1954 and March 9, 1954, respectively. Order issued September 24, 1953, In the Matter of Tennessee Gas Transmission Company, Docket No. G-2252, and order issued November 6, 1953, In the Matter of Hope Natural Gas Company, Docket No. G-2303. Applicant also relies upon other claimed increases in its cost of service including, among other things, a rate of return of 6¼ percent and income taxes associated with the return computed at such rate upon its claimed rate base.

Applicant proposes, in addition to the higher rates and charges referred to, other major tariff changes involving, among other things, abandonment of its rate zones and changing from straight line and block commodity rates to demand and commodity rates. Applicant bases its proposed change from zone rates to system-wide rates upon, among other things, alleged changes in its system operations, viz., the purchase of its gas supplies at various points throughout its system instead of at the Pennsylvania-West Virginia boundary line, the point of input in its system of practically all its gas heretofore.

Copies of the aforesaid tariff changes tendered by Applicant on October 21, 1953, and the supporting data submitted by it to the Commission, have been served upon all of Applicant's resale customers as well as interested regulatory agencies, as required by the Commission's general rules and regulations. All such customers and agencies were invited to submit comments with respect to such proposed tariff changes. In response, there have been received several objections and requests for hearing upon the tariff changes in question. In general the comments filed object to the proposed tariff changes with the exception of Applicant's two affiliated customer companies and the Pennsylvania Public Utility Commission which advised they had no comments at this time.

Upon consideration of the aforesaid proposed tariff changes tendered for filing on October 21, 1953, the data tendered in support thereof, the comments and objections filed with respect to the proposed tariff changes, and the Commission's orders heretofore issued in Docket Nos. G-2252 and G-2303 with respect to the increased rates and charges proposed by TGT and Hope, of which orders official notice is hereby taken, it appears that the increased rates and other tariff changes proposed by Applicant in its tendered filing have not been shown to be justified and may be unjust, unreasonable, and otherwise unlawful.

The Commission finds: It is necessary and proper in the public interest, to aid in the enforcement of the provisions of the Natural Gas Act, that the Commission enter upon a hearing, as hereinafter ordered, pursuant to authority contained in section 4 of the act, concerning the lawfulness of the rates, charges, classifications, and services, or any of them, contained in New York State Natural Gas Corporation's FPC Gas Tariff, Original Volume No. 1, as proposed to be amended and superseded by its First Revised Volume No. 1 thereto, and as contained in its Original Volume No. 2 thereof, as proposed to be amended by Second Revised Sheet No. 14 and First Revised Sheet No. 20 thereto; and further that said First Revised Volume No. 1 and Second Revised Sheet No. 14 and First Revised Sheet No. 20 be suspended as hereinafter provided and the use thereof be deferred pending hearing and decision thereon.

The Commission orders:

(A) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 4, 15 and 16 of the Natural Gas Act, and the Commission's general rules and regulations, including rules of practice and procedure (18 CFR Part 1), a public hearing be held commencing on March 23, 1954, at 10:00 a. m., e. s. t., in the Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the lawfulness of the rates, charges, classifications, and services, or any of them, contained in New York State Natural Gas Corporation's FPC Gas Tariff, Original Volume No. 1, as proposed to be amended and superseded by First Revised Volume No. 1 thereto, and as contained in its Original Volume No. 2 thereof, as proposed to be amended by Second Revised Sheet No. 14 and First Revised Sheet No. 20 thereto.

(B) Pending such hearing and decision thereon, New York State Natural Gas Corporation's First Revised Volume No. 1 and Second Revised Sheet No. 14 and First Revised Sheet No. 20 to Original Volume No. 2 of its FPC Gas Tariff, be and the same are hereby suspended and the use thereof deferred until April 21, 1954, unless otherwise ordered by the Commission, and until such further time thereafter as the said proposed First Revised Volume No. 1 and Second Revised Sheet No. 14 and First Revised Sheet No. 20 to Original Volume No. 2 may be made effective in the manner prescribed by the Natural Gas Act.

(C) At the hearing, the parties, including Commission Staff Counsel, may reserve cross examination until after New York State Natural Gas Corporation has presented and completed its case-in-chief.

(D) New York State Natural Gas Corporation, on or before February 23, 1954, shall serve upon all parties copies of the testimony and exhibits it proposes to offer at the hearing, including five (5) copies upon Commission Staff Counsel.

(E) Interested State commissions may participate, as provided by §§ 1.8 and 1.37 (f) of the Commission's rules of practice and procedure (18 CFR 1.8 and 1.37 (f)).

Adopted: November 18, 1953.

Issued: November 19, 1953.

By the Commission.

[SEAL] LEON M. FUQUAY, *Secretary.*

[Docket No. G-2293]

ALGONQUIN GAS TRANSMISSION CO.

ORDER FIXING DATE OF HEARING

Algonquin Gas Transmission Company (Applicant), a Delaware corporation, with its principal place of business in Boston, Massachusetts, on October 26, 1953, filed an application for a certificate of public convenience and necessity, pursuant to section 7 of the Natural Gas Act, authorizing the construction and operation of 40 feet of 2⅜-inch pipeline connecting its Fall River Lateral line

with a proposed metering station at Tiverton, Rhode Island, together with regulating and measuring facilities, for the transportation of natural gas subject to the jurisdiction of the Commission, as described in the application on file with the Commission, and open to public inspection.

The Commission finds: This proceeding is a proper one for disposition under the provisions of § 1.32 (b) (18 CFR 1.32 (b)) of the Commission's rules of practice and procedure, Applicant having requested that its application be heard under the shortened procedure provided by the aforesaid rule for non-contested proceedings, and no request to be heard, protest or petition having been filed subsequent to the giving of due notice of the filing of the application including publication in the FEDERAL REGISTER on November 7, 1953 (18 F. R. 7046).

The Commission orders:

(A) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing be held on December 3, 1953, at 9:30 a. m., e. s. t., in the Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by the application: *Provided, however*, That the Commission may, after a noncontested hearing, forthwith dispose of the proceedings pursuant to the provisions of § 1.32 (b) of the Commission's rules of practice and procedure.

(B) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of the said rules of practice and procedure.

Adopted: November 18, 1953.

Issued: November 19, 1953.

By the Commission.

[SEAL] LEON M. FUQUAY, *Secretary.*

## INTERSTATE COMMERCE COMMISSION

[4th Sec. Application 28666]

WOODPULP FROM NATCHEZ, MISS., TO COOSA PINE, ALA.

APPLICATION FOR RELIEF

NOVEMBER 20, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for carriers parties to schedule listed below.

Commodities involved: Woodpulp, carloads.

From: Natchez, Miss.

To: Coosa Pines, Ala.

Grounds for relief: Competition with rail carriers, and circuitous routes.

Schedules filed containing proposed rates: C. A. Spaninger, Agent, I. C. C. No. 1260, supp. 51.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

[SEAL] GEORGE W. LAIRD, *Secretary.*

[F. R. Doc. 53-9888; Filed, Nov. 24, 1953; 8:50 a. m.]

[4th Sec. Application 28667]

VARIOUS COMMODITIES BETWEEN PERKINS, W. VA., AND POINTS IN THE UNITED STATES

APPLICATION FOR RELIEF

NOVEMBER 20, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: H. R. Hinsch, Alternate Agent, for carriers parties to Agent C. W. Boin's tariff I. C. C. No. A-800 and other tariffs.

Commodities involved: Various commodities.

Between: Perkins, W. Va., and points in the United States.

Grounds for relief: Competition with rail carriers, circuitous routes, and to maintain grouping.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

[SEAL] GEORGE W. LAIRD, *Secretary.*

[F. R. Doc. 53-9889; Filed, Nov. 24, 1953; 8:51 a. m.]

[4th Sec. Application 28668]

SLAG FROM MT. PLEASANT, TENN., TO MISSOURI, OKLAHOMA AND TEXAS

APPLICATION FOR RELIEF

NOVEMBER 20, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: F. C. Kratzmeir, Agent, for carriers parties to schedule listed below.

Commodities involved: Slag, in carloads.

From: Mt. Pleasant, Tenn.

To: Joplin, Mo., Tulsa and Sand Springs, Okla., and Temple, Texas.

Grounds for relief: Rail competition, circuity, to maintain grouping, and to apply rates constructed on the basis of the short line distance formula.

Schedules filed containing proposed rates: F. C. Kratzmeir, Agent, I. C. C. No. 3736, supp. 236.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

## TITLE 7—AGRICULTURE

### Chapter VII—Production and Marketing Administration (Agricultural Adjustment), Department of Agriculture

[1023 (Cotton-54)-2]

PART 722—COTTON

MARKETING QUOTA REGULATIONS RELATING TO APPORTIONMENT OF THE NATIONAL ACREAGE ALLOTMENT FOR THE 1954 CROP OF UPLAND COTTON TO STATES, COUNTIES, AND FARMS

GENERAL

Sec.
722.511 Basis and purpose.
722.512 Definitions.
722.513 Issuance of forms and instructions.
722.514 Extent of calculations and rule of fractions.

STATE AND COUNTY ACREAGE ALLOTMENTS

722.515 Apportionment of national acreage allotment among States.
722.516 Apportionment of State acreage allotment among counties.

ESTABLISHMENT OF FARM ACREAGE ALLOTMENTS

722.517 Apportionment of county acreage allotments.
722.518 Allotments for special farms.

LONG STAPLE COTTON

722.519 Extra long staple cotton.

FARM MARKETING QUOTA AND FARM MARKETING EXCESS

722.520 Notice of farm acreage allotment and marketing quota.
722.521 Amount of the farm marketing quota.
722.522 Amount of the farm marketing excess.
722.523 Publication of farm acreage allotments and marketing quotas.
722.524 Successors-in-interest.
722.525 Marketing quotas not transferable.

MISCELLANEOUS PROVISIONS

722.526 Report of data and information for old cotton farms.
722.527 Acreage planted to cotton.
722.528 Availability of records.
722.529 Approval of county committee determinations and redelegation of authority by the State committee.

REVIEW OF QUOTAS

722.530 Review of quotas.

AUTHORITY: §§ 722.511 to 722.530 issued under sec. 375, 52 Stat. 66; 7 U. S. C. 1375. Interpret or apply secs. 301, 342-347, 361-368, 373-374, 388, 52 Stat. 38, as amended; 7 U. S. C. 1301, 1342-1347, 1361-1368, 1373-1374, 1368.

GENERAL

§ 722.511 *Basis and purpose.* (a) The regulations contained in §§ 722.511 to 722.530 are issued pursuant to the Agricultural Adjustment Act of 1938, as amended, and govern the establishment of State, county, and farm acreage allotments for the 1954 crop of upland cotton. The latest available statistics of the Federal Government have been used in making the determinations required to be made in connection with establishing State and county acreage allotments, and such statistics will be used in making the other determinations required to be made in connection with §§ 722.511 to 722.530. Prior to preparing the regulations in §§ 722.511 to 722.530, public notice was given (18 F. R. 6661) in accordance with section 4 of the Administrative Procedure Act (5 U. S. C. 1003) of proposed regulations being considered for issuance. The data, views, and recommendations which were submitted in response to such notice have been duly considered within the limits permitted by the Agricultural Adjustment Act of 1938, as amended.

(b) In order that the State and county Production and Marketing Administration committees may establish farm acreage allotments as early as possible prior to the cotton referendum to be held not later than December 15, 1953, it is essential that the regulations in §§ 722.511 to 722.530 be made effective as soon as possible. Accordingly, it is hereby determined and found that compliance with the 30-day effective date provision of the Administrative Procedure Act is impracticable and contrary to the public interest, and such regulations shall be effective upon filing of this document with the Director, Division of the Federal Register.

§ 722.512 *Definitions.* As used in §§ 722.511 to 722.530 and in all forms and documents in connection therewith,

| Part 34 | 7538 |
| Part 35 | 7538 |

unless the context or subject matter otherwise requires, the following terms shall have the following meanings and the masculine shall include the feminine and neuter genders and the singular shall include the plural number:

(a) "Act" means the Agricultural Adjustment Act of 1938 and any amendments thereto heretofore or hereafter made.

(b) "Secretary" means the Secretary, or Acting Secretary, of Agriculture of the United States.

(c) "Assistant Administrator" means the Assistant Administrator for Production, or Acting Assistant Administrator for Production, of the Production and Marketing Administration of the United States Department of Agriculture.

(d) "Director" means the Director, or Acting Director, of the Cotton Branch, Production and Marketing Administration, United States Department of Agriculture.

(e) "Committees":

(1) "Community committee" means the persons elected within a community as the community committee pursuant to the Secretary's regulations governing the selection and functions of the Production and Marketing Administration county and community committees (14 F. R. 1916).

(2) "County committee" means the persons elected within a county as the county committee pursuant to the Secretary's regulations governing the selection and functions of the Production and Marketing Administration county and community committees (14 F. R. 5916).

(3) "State committee" means the persons designated by the Secretary as the State committee of the Production and Marketing Administration.

(4) "Review committee" means the review committee appointed by the Secretary pursuant to section 363 of the act.

(f) "Person" means an individual, partnership, firm, joint-stock company, corporation, association, trust, estate, or other legal entity, or State or agency thereof. The term "person" shall include two or more persons having a joint or common interest.

(g) "Owner" or "landlord" means a person who owns farm land and rents such land to another person or who operates such land.

(h) "Cash tenant", "standing-rent tenant", or "fixed-rent tenant" means a person who rents land from another for a fixed amount of cash or a commodity to be paid as rent.

(i) "Share tenant" means a person other than a sharecropper who rents land from another person and pays as rent a share of the crops or the proceeds thereof.

(j) "Sharecropper" means a person who works a farm in whole or in part under the general supervision of the operator and is entitled to receive for his labor a share of the crops produced thereon or the proceeds thereof.

(k) "Operator" means the person who is in charge of the supervision and conduct of the farming operations on the entire farm.

(l) "Farm" means all adjacent or nearby farm or range land under the same ownership which is operated by one person, including also:

(1) Any other adjacent or nearby farm or range land which the county committee, in accordance with instructions issued by the Assistant Administrator, determines is operated by the same person as part of the same unit in producing range livestock or with respect to the rotation of crops and with workstock, farm machinery, and labor substantially separate from that for any other lands; and

(2) Any field-rented tract (whether operated by the same or another person) which, together with any other land included in the farm, constitutes a unit with respect to the rotation of crops.

A farm shall be regarded as located in the county or administrative area, as the case may be, in which the principal dwelling is situated, or if there is no dwelling thereon it shall be regarded as located in the county or administrative area, as the case may be, in which the major portion of the farm is located.

(m) "Farm acreage allotment" means a cotton acreage allotment established for a farm under the regulations in this subpart.

(n) "Upland cotton" (herein referred to as "cotton") means any cotton other than extra long staple cotton.

(o) "Extra long staple cotton" means the kinds of cotton described in section 347 (a) of the act and in the marketing quota regulations relating to apportionment of the national acreage allotment for the 1954 crop of extra long staple cotton to States, counties, and farms.

(p) "State and county code number" means the applicable number assigned by the Production and Marketing Administration to each State and county for the purpose of identification.

(q) "Serial number of the farm" or "farm serial number" means the serial number assigned to a farm by the county committee.

(r) "Old cotton farm" means a farm having an acreage planted to cotton in any one or more of the years 1951, 1952, and 1953.

(s) "New cotton farm" means a farm on which cotton is to be planted in 1954 but on which there was no acreage planted to cotton in any of the years 1951, 1952, or 1953.

(t) "Normal yield" means the average yield of lint cotton per acre for the farm, adjusted for abnormal weather conditions, during the five calendar years 1947, 1948, 1950, 1951, and 1952. If for any such year the data are not available or there is no actual yield, then the normal yield for the farm shall be appraised by the county committee in accordance with instructions issued by the Assistant Administrator, taking into consideration abnormal weather conditions, the normal yield, if any, for the county, and the yield in years for which data are available.

(u) "Normal production" of any number of acres means the normal yield per acre of lint cotton for the farm multiplied by such number of acres.

(v) "Actual yield" means the pounds of lint cotton per acre determined by dividing the number of pounds of lint cotton produced on the farm in 1954 by the acreage planted to cotton on the farm in 1954.

(w) "Actual production" of any number of acres means the actual yield of lint cotton per acre for the farm multiplied by such number of acres.

(x) "Producer" means a person who as landlord (other than the landlord of a standing-rent tenant, fixed-rent tenant, or cash tenant) cash tenant, standing-rent tenant, fixed-rent tenant, share tenant, or sharecropper is entitled to all or a share of the 1954 crop of cotton or of the proceeds thereof.

(y) "Acreage planted to cotton":

(1) *State.* The acreages of cotton to be used in establishing State acreage allotments are as follows:

(i) *For 1947, 1948, 1951, and 1952.* The official planted acreages for the years 1947, 1948, 1951, and 1952 (acreage in cultivation on July 1 of each year plus the estimated acreage planted but abandoned prior to July 1), as determined by the Bureau of Agricultural Economics of the United States Department of Agriculture, plus, for 1947, the total acreage of war crop and veteran credits determined and used under those provisions of the Regulations Pertaining to Acreage Allotments and Marketing Quotas for the 1950 Crop of Cotton (14 F. R. 7441) which implemented Public Law 12, 79th Congress, and section 344 (1) of the act.

(ii) *For 1950.* The measured acreages for all farms in the State, as determined by the county committees for purposes of the 1950 cotton marketing quota program, and adjusted according to the provisions of subsections (f) (4) and (5), (g) (3), and (i) of section 344 of the act.

(2) *County.* The acreages of cotton to be used in establishing county acreage allotments are as follows:

(i) *For 1947 and 1948.* The official acreage in cultivation on July 1 each year as determined by the Bureau of Agricultural Economics of the United States Department of Agriculture, plus, for 1947, the total acreage of war crop and veteran credits determined and used under those provisions of the Regulations Pertaining to Acreage Allotments and Marketing Quotas for the 1950 Crop of Cotton (14 F. R. 7441) which implemented Public Law 12, 79th Congress, and section 344 (1) of the act.

(ii) *For 1950.* The measured acreages for all farms in the county, as determined by the county committee for purposes of the 1950 cotton marketing quota program, and adjusted according to the provisions of subsections (f) (4) and (5), (g) (3), and (i) of section 344 of the act.

(iii) *For 1951 and 1952.* The official planted acreage (acreage in cultivation on July 1 of each year plus the estimated acreage planted but abandoned prior to July 1) as determined by the Bureau of Agricultural Economics of the United States Department of Agriculture.

(3) *Farm.* For purposes of establishing farm acreage allotments for the 1954 crop of cotton, the acreage planted to cotton on a farm means the acreage of land planted to cotton for the years 1951 to 1953, inclusive, which shall be determined as follows:

(i) *For 1951 and 1952.* The acreage measured by the county committee or reported to the county committee for the farm, with such adjustments in the reported acreages as are necessary under instructions issued by the Assistant Administrator. The sum of the reported acreages as adjusted by the county committee, and the measured acreages shall conform with the official planted acreages of the Bureau of Agricultural Economics, United States Department of Agriculture, for the respective years to the extent required under instructions issued by the Assistant Administrator.

(ii) *For 1953.* The acreage measured by the county committee in accordance with instructions issued by the Assistant Administrator.

(4) *Exclusion of acreages planted to extra long staple cotton.* Acreage devoted to the production of American-Egyptian, Sea Island, and Sealand cotton during the period of years 1947 to 1953, inclusive, shall not be included in the acreage planted to cotton, as determined under subparagraphs (1), (2), and (3) of this paragraph, for the purposes of determining acreage allotments for the 1954 crop of cotton.

(z) "Abnormal weather conditions" means weather conditions (including conditions directly resulting therefrom) adversely affecting the planting of cotton, which conditions must have been of sufficient duration and intensity to prevent the seeding of land to cotton and must have continued until the end of the planting season for the area. In apportioning the State acreage allotment to counties, adjustments in county acreages of cotton for abnormal weather conditions for applicable years are made on the basis of recommendations by the State committees. Any such adjustment in county cotton acreages is the amount established by reference to available information and data as the net reduction of planted acreage in the county attributable solely to abnormal weather conditions. Such adjustments for abnormal weather conditions take into consideration failure to seed cotton because of abnormal weather conditions. Also, for the years 1947 and 1948 abandonment of cotton prior to July 1 in excess of normal abandonment by that date because of abnormal weather conditions is taken into consideration in determining adjustments, if any, in county acreages of cotton for these years.

(aa) "Cropland" means the land which in 1953 was tilled or was in regular rotation as determined by the county committee in accordance with instructions issued by the State committee, excluding any land which constitutes, or will constitute, if such tillage is continued, a wind-erosion hazard to the community and also excluding bearing orchards and vineyards (except the acreage of cropland therein) and plowable non-crop open pasture.

§ 722.513 *Issuance of forms and instructions.* The Director shall cause to be prepared such forms and instructions as are necessary for carrying out these regulations. The forms shall be issued by the Director, with the approval of the Assistant Administrator, and the instructions shall be issued by the Assistant Administrator. Copies of such forms and instructions shall be furnished free to persons needing them upon request made to the office of the State or county committee or the Director.

§ 722.514 *Extent of calculations and rule of fractions.* The acreage planted to cotton on farms and farm acreage allotments shall be computed to three places beyond the decimal point and rounded to tenths of acres. Fractions of fifty-one one-thousandths of an acre or more shall be rounded upward, and fractions of less than fifty one-thousands of an acre shall be dropped. For example, 10.051 would be 10.1 and 10.050 would be 10.0.

STATE AND COUNTY ACREAGE ALLOTMENTS

§ 722.515 *Apportionment of national acreage allotment among States.* The national acreage allotment proclaimed for the 1954 crop of cotton (18 F. R. 6556), less the acreage required pursuant to section 344 (k) of the act to provide any State an allotment not less than the smaller of 4,000 acres or the highest acreage planted to cotton in any of the years 1951, 1952, or 1953, is apportioned among the other States on the basis of the average acreage planted to cotton in each such State for the years 1947, 1948, 1950, 1951 and 1952. It has been determined that, on the basis of the latest available data and information, no adjustments in State cotton acreages for abnormal weather conditions are required for any of the aforementioned years. The acreage allotted to a State pursuant to the provisions of this section is herein referred to as the "State acreage allotment". The State acreage allotment for each State for the 1954 crop of cotton is as follows:

| State: | *State acreage allotments* |
|---|---|
| Alabama | 1,139,121 |
| Arizona | 288,223 |
| Arkansas | 1,562,684 |
| California | 697,806 |
| Florida | 33,122 |
| Georgia | 1,005,862 |
| Illinois | [1] 4,000 |
| Kansas | [1] 80 |
| Kentucky | 9,136 |
| Louisiana | 634,906 |
| Mississippi | 1,750,641 |
| Missouri | 391,396 |
| Nevada | [1] 2,289 |
| New Mexico | 167,243 |
| North Carolina | 528,638 |
| Oklahoma | 929,202 |
| South Carolina | 786,006 |
| Tennessee | 575,891 |
| Texas | 7,376,858 |
| Virginia | 18,344 |
| United States total | 17,910,448 |

[1] Minimum State acreage allotments determined in accordance with section 344 (k) of the Agricultural Adjustment Act of 1938, as amended.

§ 722.516 *Apportionment of State acreage allotment among counties*—(a) *Establishment of State acreage reserves.* The State committee shall set aside a total State acreage reserve of 10 percent of the State acreage allotment (15 percent in the case of Oklahoma) unless, on the basis of the needs of the State as determined under paragraph (c) of this section, the State committee recommends a smaller acreage reserve and the Administrator of the Production and Marketing Administration approves such recommendation.

(b) *Computed county acreage allotments.* The State acreage allotment for the 1954 crop of cotton, less the State acreage reserve established pursuant to paragraph (a) of this section, is apportioned to counties (parishes in Louisiana) on the basis of the average acreage planted to cotton in each county in 1947, 1948, 1950, 1951, and 1952 (herein referred to as the "base years"), with adjustments for abnormal weather conditions during such years. The acreage allotted to a county (or parish) pursuant to the provisions of this paragraph is herein referred to as the "computed county acreage allotment."

(c) *State acreage reserve.* The State acreage reserve established for the purposes set forth in subparagraphs (1) through (4) of this paragraph shall be used as provided in such subparagraphs and in accordance with instructions issued by the Assistant Administrator.

(1) *To adjust computed county acreage allotments for trends in the acreage of cotton.* The State committee shall, if necessary, use a part of the State acreage reserve to adjust the computed county acreage allotments for trends in the acreage planted to cotton in the counties during recent years (the period of years may include the year 1953 but shall not include the year 1949). Any such adjustments shall be determined by use of a formula, if needed, applied uniformly to each county in the State.

(2) *To adjust computed county acreage allotments for counties adversely affected by abnormal conditions affecting plantings of cotton.* The State committee shall, if necessary, use a part of the State acreage reserve to adjust the computed county acreage allotments for abnormal conditions adversely affecting plantings in the counties during the base years. The State committee shall examine the acreage planted to cotton for each of the base years to determine whether the acreage planted may have been adversely affected by abnormal conditions. In determining the needs for adjustments for abnormal conditions adversely affecting plantings, the State committee shall take into account (i) abnormal weather conditions adversely affecting plantings during any of the base years; (ii) conditions in counties in which a number of farms are being returned to cotton production or are increasing the acreage in cotton after having been out of production or having been on a reduced level of cotton production because such farms were used to a larger extent than normal in connection with air bases, defense plants, and other wartime activities; (iii) abnormal reduction in planted cotton acreage because of an unusual movement of labor from farms in the area or county to war industries or into the armed forces and its return, as compared with such movements in other counties; and (iv) any other abnormal conditions which adversely affected plantings in the county to a greater extent as compared with other counties.

(3) *To make adjustments in acreage allotments for small farms.* The State committee shall determine the acreage required from the State acreage reserve to supplement that part of the county acreage reserve established as provided for in subparagraphs (1) and (2) of § 722.517 (d) to adjust indicated farm acreage allotments for old cotton farms established under § 722.517 (c) at 15 acres or less. The acreage made available to any county under this subparagraph shall be used by the county committee only for adjustments in small farm allotments. The acreage reserved for small farms may also be used (i) to establish allotments for any small farm which is an old cotton farm but for which an allotment was not established at the time allotments were established for old cotton farms in the county because of oversight on the part of the county committee or because the county committee had no information or data with respect to acreage planted to cotton on the farm in 1951, 1952, or 1953, and (ii) to adjust allotments for small farms where the farm is reconstituted for 1954 due to division of the farm as constituted in 1953 or a combination of a part or all of the 1953 farm with other land.

(4) *To establish 1954 acreage allotments for new cotton farms.* Where the State committee determines that the needs for acreage to establish acreage allotments for new cotton farms are generally uniform throughout the State, the State committee shall determine whether all the acreage required to establish acreage allotments for new cotton farms shall be provided from the State acreage reserve or the county acreage reserve, or from both such reserves. In determining the source of acreage for new cotton farms the State committee shall take into consideration the acreage requirements determined for such farms from the county surveys, if available, as provided for in § 722.517 (d) (3). In States where new areas will be brought into cotton production in 1954 or where it is determined by the State committee that the entire county acreage reserve for any county is needed for adjustments pursuant to subparagraphs (1) and (2) of § 722.517 (d), the State committee shall consider establishing an acreage from the State acreage reserve to supplement the acreage set aside by the county committee, if any, from the county acreage reserve for establishing acreage allotments for new cotton farms. In determining the estimated acreage to be set aside for establishing fair and reasonable acreage allotments for new cotton farms on the basis of the factors set forth in § 722.517 (d) (3), the State committee shall take into consideration the experience of State and county committees in establishing acreage allotments for new cotton farms under previous marketing quota programs and any other available information. The acreage made available to any county under this subparagraph shall be used by the county committee only for new cotton farms.

(d) *Availability of data for inspection.* The following shall be on file and shall be available in the office of the State committee for examination by any interested cotton producer: (1) The amount of the State acreage reserve; (2) the formula, if any, and data developed and used under subparagraphs (1) and (2) of paragraph (c) of this section; and (3) the total acreage set aside from the State acreage reserve for the purposes set forth in subparagraphs (3) and (4) of paragraph (c) of this section.

(e) *County acreage allotment.* The county acreage allotment shall be the sum of (1) the computed county acreage allotment determined under paragraph (b) of this section, and (2) the acreages from the State acreage reserve which are added to the computed county acreage allotment under subparagraphs (1) and (2) of paragraph (c) of this section. This paragraph will be amended at a later date to include the county acreage allotment established for each county.

(f) *Administrative areas.* If the county committee with the approval of the State committee, or if the State committee, determines with respect to a county that, because of the difference in types, kinds, and productivity of the soil or other conditions, different areas of the county should be treated separately in order to prevent discrimination, each such area shall, in accordance with instructions issued by the Assistant Administrator, be designated as an administrative area and, insofar as practicable, each such area shall be treated as a county in determining the acreage allotment for the area and in establishing farm acreage allotments under § 722.517.

ESTABLISHMENT OF FARM ACREAGE ALLOTMENTS

§ 722.517 *Apportionment of county acreage allotment*—(a) *Acreage set aside from county acreage allotment.* The county committee shall set aside an acreage from the county acreage allotment which it estimates will be adequate (1) for establishing allotments for old cotton farms for which allotments are not established at the time allotments are originally established for old cotton farms in the county because of oversight on the part of the county committee or because the county committee had no information or data with respect to acreage planted to cotton on the farm in 1951, 1952, or 1953, (2) for correction by the county committee of errors in farm acreage allotments, and (3) for providing the additional allotment required for farms which are reconstituted for 1954 as provided in paragraphs (f) and (g) of this section.

(b) *Determination of county acreage reserve.* The county committee shall establish a county acreage reserve of not in excess of 15 percent of the county acreage allotment which shall be used to adjust indicated farm acreage allotments for old cotton farms determined under paragraph (c) of this section and to establish acreage allotments for new cotton farms under paragraph (d) (3) of this section. The county acreage reserve shall not be less than 13 percent of the county acreage allotment (less the acreage set aside pursuant to paragraph (a) of this section) unless the county committe recommends a smaller acreage reserve and the State committee gives its approval in accordance with instructions issued by the Assistant Administrator. Any approval of a smaller acreage reserve shall be based upon a showing by the county committee that the recommended acreage is adequate, on the basis of the factors set forth in paragraph (d) of this section, to make necessary adjustments in indicated allotments for old cotton farms and to establish allotments for new cotton farms.

(c) *Indicated acreage allotments for old cotton farms.* The county acreage allotment, less the acreage set aside and reserved pursuant to paragraphs (a) and (b) of this section, shall be used to determine indicated allotments for old cotton farms as follows:

(1) *Indicated minimum acreage allotments for old cotton farms with highest cotton acreage less than 5 acres.* The indicated minimum acreage allotment for each old cotton farm on which the highest acreage planted to cotton in any of the years 1951, 1952, and 1953 was less than 5 acres, shall be equal to such highest acreage.

(2) *Pro rata reduction of indicated acreage allotments for old cotton farms.* If the sum of (i) the indicated acreage allotments determined under subparagraph (1) of this paragraph and (ii) the acreage determined by multiplying the number of old cotton farms with 5 acres or more planted to cotton in any of the years 1951, 1952, and 1953 by 5, exceeds the county acreage allotment, less the acreages set aside and reserved pursuant to paragraphs (a) and (b) of this section, an indicated acreage allotment of 5 acres shall be established for each old cotton farm having 5 acres or more planted to cotton in any of the years 1951, 1952, and 1953. Where indicated acreage allotments of 5 acres are established under this subparagraph, each indicated acreage allotment determined under this subparagraph and under subparagraph (1) of this paragraph for each old cotton farm shall be reduced pro rata so that the sum of the indicated acreage allotments for all old cotton farms shall not exceed the county acreage allotment, less the acreages set aside and reserved pursuant to paragraphs (a) and (b) of this section.

(3) *Indicated acreage allotments for old cotton farms with highest cotton acreage of 5 acres or more in counties where subparagraph (2) of this paragraph is not applicable*—(i) *Determination of adjusted cropland.* If subparagraph (2) of this paragraph is not applicable in a county, the county committee shall, in accordance with instructions issued by the Assistant Administrator, determine an adjusted cropland acreage for each old cotton farm on which the highest acreage planted to cotton in any of the years 1951, 1952, and 1953 was 5 acres or more, by subtracting from the acreage of land on the farm which in 1953 was tilled annually or in regular rotation, the sum of the following acreages:

(a) The 1953 acreage of sugarcane for sugar or for syrup and sugar beets for sugar;

(b) The 1953 acreage of tobacco for market (or the 1953 farm acreage allotment, if any, for the applicable type of tobacco if the 1953 acreage has not been determined);

(c) The 1953 acreage of peanuts picked and threshed as determined by the county committee;

(d) The acreage of wheat for harvest in 1954 for market or for feeding to livestock for market. If the measured wheat acreage for the farm is not available to the county committee, the deduction for wheat acreage shall be the 1954 wheat acreage allotment less the acreage which the county committee determines will be used for purposes other than for market or for feeding to livestock for market. In the counties designated in (g) of this subdivision, the deduction for wheat acreage shall be limited to the acreage by which the deduction which otherwise would be made under this (d) exceeds the acreage deducted under (g) of this subdivision;

(e) The acreage planted to rice in 1953 for market or for feeding to livestock for market, plus the acreage of other rice land on the farm for which water is available and which is not used for the production of cotton under the rotation system for the farm;

(f) The acreage of land devoted in 1953 primarily to orchards or vineyards,

less the acreage therein which qualifies as cropland for 1954; and

(g) In Cochise, Gila, Graham, Greenlee, Maricopa, Mohave, Pima, Pinal, Santa Cruz, Yavapai and Yuma Counties, Arizona, and in Butte, Fresno, Glenn, Imperial, Inyo, Kern, Kings, Los Angeles, Madera, Merced, Riverside, San Benito, San Bernardino, San Diego, San Joaquin, San Luis Obispo, Stanislaus, Tehama, Tulare and Yuba Counties, California, and in Clark and Nye Counties, Nevada, and in Chaves, De Baca, Dona Ana, Eddy, Grant, Guadalupe, Hidalgo, Luna, Otero, Sierra, Socorro and Valencia Counties, New Mexico, and in Brewster, Culberson, El Paso, Hudspeth, Jeff Davis, Loving, Pecos, Presidio, Reeves, Terrell, and Ward Counties, Texas, the acreage of cropland in excess of that acreage for which irrigation water is normally available and adequate from available facilities for the production of irrigated crops during the cotton-producing season (seeding to maturity).

(ii) *Determination of county cropland factors.* The first county cropland factor shall be computed by dividing (*a*) the remainder of the county acreage allotment (less the acreages set aside and reserved pursuant to paragraphs (a) and (b) of this section) after indicated allotments have been made under subparagraph (1) of this paragraph, by (*b*) the total of the adjusted cropland acreages determined for old cotton farms in the county under subdivision (i) of this subparagraph. Second and additional county cropland factors shall be determined, if necessary, by dividing (*1*) the available county acreage allotment remaining after maximum and minimum indicated farm acreage allotments, as defined in subdivision (iii) of this subparagraph, have been established for such old cotton farms by (*2*) the total of the adjusted cropland acreages determined for old cotton farms in the county under subdivision (i) of this subparagraph, which under the preceding factor were not affected by either the maximum or the minimum allotment provisions. The last county cropland factor computed and applied shall be referred to herein as the "final county cropland factor".

(iii) *Indicated farm acreage allotment.* An indicated acreage allotment shall be computed for each old cotton farm under this subparagraph by multiplying the adjusted cropland for each such farm by the applicable county cropland factor except that (*a*) the maximum indicated acreage allotment for any such farm shall not exceed the highest acreage planted to cotton on the farm in any of the years 1951, 1952, and 1953 or (*b*) the minimum indicated acreage allotment for any such farm shall not be less than 5 acres.

(d) *Use of county acreage reserve.* The county acreage reserve shall be used by the county committee as follows:

(1) *Adjustments in indicated farm acreage allotments of 5 to 15 acres.* Not less than 20 percent of the county acreage reserve shall, to the extent required, be used by the county committee to adjust indicated farm acreage allotments of 5 to 15 acres, inclusive, determined under paragraph (c) of this section. Such adjustments shall be made so as to establish acreage allotments which are fair and reasonable in relation to the acreage allotments established for similar farms in the community, taking into consideration for the farm the acreages planted to cotton in 1951, 1952, and 1953; the land, labor, and equipment available for the production of cotton; crop-rotation practices; the soil and other physical facilities affecting the production of cotton; and abnormal conditions of production. The county committee shall not make adjustments so as to cause an acreage allotment to be established for any such farm (i) in excess of the acreage which could be planted on the farm in 1954 consistent with sound crop-rotation practices followed in the community; (ii) in excess of the acreage which can be farmed with the labor and equipment currently or normally available on the farm, or (iii) which would cause cotton to be planted on land unsuited to the production of cotton.

(2) *Adjustments in indicated acreage allotments for other farms.* The remainder of the acreage in the county acreage reserve, after meeting the requirements under subparagraph (1) and (3) of this paragraph, shall be used by the county committee to adjust indicated acreage allotments for farms which are less than 5 acres or more than 15 acres. Such adjustments shall be made so as to establish acreage allotments which are fair and reasonable in relation to the acreage allotments established for similar farms in the community, taking into consideration for the farm the land, labor, and equipment available for the production of cotton; crop-rotation practices; the soil and other physical facilities affecting the production of cotton; and abnormal conditions of production. The acreages planted to cotton on a farm in 1951, 1952, and 1953 shall be considered in determining the land, labor, and equipment available for the production of cotton and in connection with the crop-rotation practices followed on the farm. The county committee shall not make adjustments so as to cause an acreage allotment to be established for any such farm (i) in excess of the acreage which could be planted on the farm in 1954 consistent with sound crop-rotation practices followed in the community, (ii) in excess of the acreage which can be farmed with the labor and equipment currently or normally available on the farm, or (iii) which would cause cotton to be planted on land unsuited to the production of such crop.

(3) *Acreage allotments for new cotton farms*—(i) *Determination of county acreage needed for establishing acreage allotments for new cotton farms.* The county committee, with the assistance of the community committees, shall estimate from county office records and other available sources of information the number of new cotton farms in the county and the adjusted cropland acreage for such farms, and such estimates shall be used by the State and county committees as a basis for determining the acreage that will be required for establishing acreage allotments for new cotton farms. The acreage so determined shall not exceed 75 percent of the acreage obtained by multiplying the county cropland factor, which shall be estimated where necessary, by the total estimated adjusted cropland acreage on new cotton farms in the county. In determining the acreage from the county acreage reserve which is to be used for establishing acreage allotments for new cotton farms, the county committe shall take into consideration the acreage, if any, to be made available from the State acreage reserve pursuant to subparagraph (4) of § 722.516 (c) for establishing acreage allotments for new cotton farms.

(ii) *Eligibility of a new cotton farm for a cotton acreage allotment.* A cotton acreage allotment for a new cotton farm may be established by the county committee in accordance with instructions issued by the Assistant Administrator if each of the following conditions is met:

(*a*) An application for a cotton acreage allotment is filed by the farm operator with the county committee by the closing date established by the State committee. In no event is the closing date to be earlier than January 15, 1954.

(*b*) The farm operator is largely dependent on income from the farm for his livelihood.

(*c*) The farm is the only farm in the county which is owned or operated by the farm operator or farm owner for which a cotton acreage allotment is established for 1954.

(iii) *Establishment of acreage allotments for new cotton farms.* If the applicant's farm is eligible for a cotton acreage allotment, such allotment shall be established by the committee on the basis of land, labor, and equipment available for the production of cotton; crop-rotation practices; the soil and other physical facilities affecting the production of cotton; and abnormal conditions of production. The acreage allotment so determined for any such farm shall not exceed the smallest of (*a*) the acreage allotment established for old cotton farms in the county which are similar with respect to the foregoing factors, (*b*) the acreage allotment requested by the applicant, and (*c*) the result obtained by multiplying the adjusted cropland for the farm by the final county cropland factor. The acreage allotments for new cotton farms shall be subject to review and approval by the State committee.

(e) *Use of acreage allocated to county from State acreage reserve for making adjustments in acreage allotments for small farms.* The acreage allocated to a county from the State acreage reserve for making adjustments in acreage allotments for small farms shall be used by the county committee to adjust indicated farm acreage allotments of 15 acres and less for old cotton farms on the basis of the factors set forth in paragraph (d) (1) and (2) of this section for adjusting small farm allotments.

(f) *Allotments for late and reconstituted farms and correction of errors.* The acreage set aside from the county acreage allotment pursuant to paragraph (a) of this section shall be used by the county committee (1) for establishing allotments for old cotton farms for which allotments were not established at the time allotments were originally established for old cotton farms in the county because of oversight on the part of the county committee or because the county committee had no information or data with respect to acreage planted to cotton on the farm in 1951, 1952, or 1953, (2) for correcting errors in farm acreage allotments, and (3) for use in establishing acreage allotments for farms which are divided or combined for 1954 as provided in paragraph (g) of this section.

(g) *Allotments for farms divided or combined.* If land which was operated as a single farm in 1953 is divided into two or more tracts for 1954 (1) the acreage of cotton on the farm in 1951, 1952, and 1953 shall be divided among the several tracts in proportion to the acreage of cropland on each tract, except that upon agreement by all interested producers and approval by the county committee, the acreages normally considered as rice land, wheat land, and sugarcane land may be excluded from the cropland on each tract in apportioning the cotton acreage history among the tracts, and (2) a cotton acreage allotment shall be determined, for the land which constitutes a farm as it is operated in 1954, in accordance with applicable provisions of paragraphs (c) and (d) of this section. If two or more tracts of land are combined and operated as a single farm in 1954, an allotment for such farm for 1954 shall be determined in accordance with the applicable provisions of paragraphs (c) and (d) of this section.

(h) *Availability of reserves for inspection by interested cotton producers.* The allocations to the county from the State acreage reserve and the total amount and the distribution of the county acreage reserve and all other data used in establishing farm acreage allotments shall be available in the office of the county committee for examination by any interested producer.

§ 722.518 *Allotments for special farms*—(a) *Allotments for farms returned to agricultural production.* The owner or operator of any cotton farm in an area acquired in 1940 or thereafter for non-farming purposes by the United States or any State or agency thereof which has been returned to agricultural production and which is not eligible under the regulations in this subpart for an acreage allotment as an old cotton farm, may make application to the county committee for a cotton acreage allotment for such farm by the earlier of (1) the prescribed closing date established by the State committee which shall not be later than March 1, 1954, and (2) within three years after acquisition of such farm by the applicant. No such owner or operator shall be eligible for an acreage allotment under this paragraph unless it is established to the satisfaction of the county committee that such person was the owner or operator of a cotton farm at the time it was acquired by the United States or any State or agency thereof. The acreage allotment established for any such farm shall compare with the acreage allotments established for other farms in the same area which are similar, taking into consideration the acreage allotment, if any, last established for such farm; the land, labor, and equipment available for the production of cotton; the crop-rotation practices; and the soil and other physical facilities affecting the production of cotton.

(b) *Allotments for other farms owned or operated by persons from whom cotton farms were acquired.* The county committee shall establish an acreage allotment or consider an adjustment in the acreage allotment determined under § 722.517, for any farm within the State owned or operated by a person from whom a cotton farm was acquired in the State in 1940 or thereafter for governmental or other public purposes provided application therefor is filed within three years after acquisition of such farm by the applicant. The acreage allotment established for any such farm shall compare with the acreage allotments established for other farms in the same area which are similar, taking into consideration the acreage allotment, if any, of the farm so acquired from the owner or operator; the land, labor, and equipment available for the production of cotton; the crop-rotation practices; and the soil and other physical facilities affecting the production of cotton: *Provided*, That no person shall be entitled to receive an acreage allotment under both this paragraph and paragraph (a) of this section, and no person who, since his farm was acquired for governmental or other public purposes, has acquired an old cotton farm that for 1954 will have a representative cotton acreage allotment shall be entitled to receive an allotment under this paragraph.

(c) *Cotton farm.* For the purpose of paragraphs (a) and (b) of this section, "cotton farm" means any farm on which there was an acreage planted to cotton (or regarded as planted to cotton under Public Law 12, 79th Congress and section 344 (i) of the act) during any of the three years immediately preceding the year in which the farm was acquired by the United States, or any State or any agency thereof, or for any public purpose.

(d) *Acreage allotted in addition to county and State acreage allotments.* Except to the extent that the production of any farm for which an acreage allotment is established under paragraphs (a) and (b) of this section has contributed to the county and State acreage allotments, the additional acreage allotted under paragraphs (a) and (b) of this section shall be in addition to the acreage allotments otherwise established for the county and State under the applicable provisions of the regulations in this subpart and the production of the additional acreage so allotted shall be in addition to the national marketing quota.

LONG STAPLE COTTON

§ 722.519 *Extra long staple cotton*—(a) *If marketing quotas under section 347 of the act are in effect for the 1954 crop.* If marketing quotas for extra long staple cotton are in effect for the 1954 crop, the provisions of this subpart relating to cotton shall not apply to those types of extra long staple cotton which are subject to marketing quotas under the provisions of section 347 of the act.

(b) *If marketing quotas under section 347 of the act are not in effect for the 1954 crop.* If marketing quotas for extra long staple cotton are not in effect for the 1954 crop—

(1) All of the 1954 crop of American-Egyptian cotton which is produced from pure strain seed in Cochise, Graham, Greenlee, Maricopa, Mohave, Pima, Pinal, Santa Cruz and Yuma Counties, Arizona, and Imperial, and Riverside Counties, California, and Chaves, Dona Ana, Eddy, Grant, Hidalgo, Lea, Luna, Otero and Sierra Counties, New Mexico, and Brewster, Culberson, El Paso, Hudspeth, Jeff Davis, Loving, Pecos, Presidio, Reeves, Terrell, and Ward Counties, Texas, shall be exempted from all provisions of the regulations in this subpart with respect to marketing quotas for the 1954 cotton crop, provided such cotton is ginned on a roller type gin or the Assistant Administrator authorizes the cotton to be ginned on another type gin for experimental purposes or to prevent loss of the cotton due to frost or other adverse conditions, except that such exemption shall not apply to any farm unless the approval of the county committee for the planting of such cotton on any farm is obtained in advance of planting time. Such approval shall be based upon findings by the county committee (i) that pure strain American-Egyptian seed is to be planted and (ii) that roller type gin facilities are available in the area for the ginning of such cotton and that such facilities will be used in the ginning of all cotton produced from such seed. In connection with determining the purity of seed, the county committee may require the farm operator to furnish approved purity test certificates or approved State certification tags covering the American-Egyptian seed to be planted showing that such seed is of pure strain.

(2) All of the 1954 crop of Sea Island and Sealand cotton which is produced from pure strain seed in Alachua, Columbia, Hamilton, Jefferson, Lake, Madison, Marion, Orange, Putnam, Seminole, Suwannee, Union and Volusia Counties, Florida, and Atkinson, Berrien, Cook, and Lanier Counties, Georgia, and all of the 1954 crop of Sea Island cotton which is produced from pure strain seed in Puerto Rico, shall be exempted from all provisions of the regulations in this subpart with respect to marketing quotas for the 1954 crop, provided such cotton is ginned on a roller-type gin or the Assistant Administrator authorizes the cotton to be ginned on another type gin for experimental purposes or to prevent loss of the cotton due to frost or other adverse conditions, except that such exemption shall not apply to any farm unless the approval of the county committee for the planting of such cotton on any farm is obtained in advance of planting time. Such approval shall be based upon findings by the county committee (i) that pure strain Sea Island seed, or pure strain Sealand seed, is to be planted and (ii) that roller-type gin facilities are available in the area for the ginning of such cotton and that such facilities will be used in the ginning of all cotton produced from such seed. In

connection with determining the purity of seed, the county committee may require the farm operator to furnish approved purity test certificates or approved State certification tags covering the Sea Island seed and the Sealand seed to be planted showing that such seed is of pure strain; and

(3) Any cotton produced from the 1954 crop which staples one and one-half inches or more in length and which is ginned on a roller-type gin, or the Assistant Administrator authorizes the cotton to be ginned on another type gin for experimental purposes or to prevent loss of the cotton due to frost or other adverse conditions, shall be exempted from the provisions of the regulations in this subpart with respect to marketing quotas for the 1954 crop of cotton regardless of where the cotton is produced in the United States or the variety of cotton from which such cotton is produced.

FARM MARKETING QUOTA AND FARM MARKETING EXCESS

§ 722.520 *Notice of farm acreage allotment and marketing quota.* Immediately after acreage allotments for farms in a county or other local administrative area are established and approved by the State committee pursuant to § 722.529 (a), the county committee shall mail to the operator of each such farm a written notice of the farm acreage allotment and marketing quota for the farm. The county committee shall also mail to the operator of (a) each new cotton farm for which application for an allotment is made but for which it is determined that no farm acreage allotment and marketing quota will be established and (b) each farm for which no cotton acreage data was reported pursuant to § 722.526 and the county committee has no reliable basis for appraising data for the farm but the county committee believes cotton was planted on the farm in one or more of the years 1951, 1952 and 1953, a similar written notice showing "none" as the acreage allotment and marketing quota established for the farm. The notice shall contain at or near the top thereof the following statement: "To all persons who as operator, landlord, tenant, or sharecropper are interested in the farm for which this acreage allotment and marketing quota are established." Notice so given shall constitute notice to all such persons. Such notice shall also contain a brief statement of the procedure whereby application for review of the marketing quota may be made under section 363 of the act. A copy of each notice, containing a notation thereon of the date of mailing the notice to the operator of the farm, shall be kept among the permanent records of the county committee, and upon request a copy thereof, duly certified as a true and correct copy, shall be furnished without charge to any person who as operator, landlord, tenant, or sharecropper is interested in the cotton produced in 1954 on the farm for which the notice is given. Insofar as practicable, the notice for each old cotton farm shall be prepared and mailed to the operator so as to be received prior to December 15, 1953, the date on which the referendum to determine whether cotton farmers favor or oppose marketing quotas for the 1954 crop will be held.

§ 722.521 *Amount of the farm marketing quota.* The farm marketing quota for any farm for the 1954 crop of cotton shall be the actual production of lint cotton for the acreage planted to cotton on the farm less the farm marketing excess.

§ 722.522 *Amount of the farm marketing excess*—(a) *Where the acreage planted to cotton is determined.* The farm marketing excess for the 1954 crop of cotton shall be the normal production of the acreage of cotton on the farm in excess of the farm acreage allotment. Where it is established by any producer on the farm in connection with an application filed by him or by any other producer on the farm in accordance with regulations to be issued under this part by the Secretary, that the normal production of the excess acreage is larger than the amount by which the actual production of cotton in 1954 on the farm exceeds the normal production of the farm acreage allotment, the farm marketing excess shall be adjusted downward to the smaller amount.

(b) *Where the acreage planted to cotton is not determined.* Whenever the determination of the acreage planted to cotton in excess of the farm acreage allotment is prevented by the farm operator, the farm marketing excess shall be the total number of pounds of cotton produced in 1954 on the farm. In the event the farm operator or any other producer on the farm establishes, in accordance with regulations to be issued under this part by the Secretary, the total number of pounds of cotton produced in 1954 on the farm, the farm marketing excess shall be the number of pounds of cotton produced in 1954 on the farm in excess of the normal production of the farm acreage allotment.

§ 722.523 *Publication of farm acreage allotments and marketing quotas.* One copy of each notice of the farm acreage allotment and marketing quota for farms in a county shall be placed in binders or folders, or in lieu thereof a listing of such allotments shall be prepared, and such notices or listing shall be kept freely available in the office of the county committee for public inspection for a period of not less than thirty calendar days. At the end of such period the copies of the notices or the listing shall be filed in the office of the county committee and remain readily available for further public inspection. If the county is divided into administrative areas, separate binders, folders, or listings shall be prepared and made available for inspection for each administrative area.

§ 722.524 *Successors-in-interest.* Any person who succeeds to the interest of a producer in a farm, or in a cotton crop, or in cotton for which a farm marketing quota and farm marketing excess were established, shall, to the same extent as his predecessor, be entitled to all the rights and privileges incident to such marketing quota and marketing excess and be subject to the restrictions on the marketing of cotton.

§ 722.525 *Marketing quotas not transferable.* A farm marketing quota is established for a farm and may not be assigned or otherwise transferred in whole or in part to any other farm.

MISCELLANEOUS PROVISIONS

§ 722.526 *Report of data and information for old cotton farms.* The owner, operator, or any other interested person shall furnish the county committee of the county in which the farm is located the data and information required to be entered on Form CN-364 (1953), "Farm Acreage Report", a copy of which may be obtained from the county committee of any county in which cotton is grown or from the State committee. The county committee, with the assistance of the community committee, shall, insofar as possible, appraise and otherwise determine the required data and information for any farm for which such report on Form CN-364 (1953) is not filed by a person having an interest in the farm, using for such appraisals and determinations the records of the county office for the farm and other farms in the community and other available information.

§ 722.527 *Acreage planted to cotton*—(a) *Adjustment of acreage planted in excess of farm acreage allotment.* If the acreage determined to be planted to cotton on a farm in 1954 is in excess of the farm acreage allotment, the farm operator may, not later than a date established under instructions issued by the Assistant Administrator, adjust such planted acreage to the farm acreage allotment. The date established under such instructions shall afford farm operators a reasonable time for making such adjustments.

(b) *Underplanting the farm acreage allotment.* For any farm on which cotton is planted in 1954 and the acreage of cotton in 1954 is less than the 1954 farm acreage allotment by not more than the larger of 10 percent of the allotment or one acre, an acreage equal to the farm acreage allotment shall be deemed to be the acreage planted to cotton on the farm in 1954, and the additional acreage added to the cotton acreage history for the farm shall be added to the cotton acreage history for the county and State.

(c) *No credit for overplanting the farm acreage allotment.* Any acreage planted to cotton in 1954 in excess of the farm acreage allotment for the 1954 crop of cotton shall not be taken into account in establishing State, county and farm acreage allotments for the 1955 and subsequent crops of cotton.

§ 722.528 *Availability of records.* The State and county committees shall make available for inspection by owners or operators of farms receiving cotton acreage allotments, all records pertaining to cotton acreage allotments and marketing quotas.

§ 722.529 *Approval of county committee determinations and redelegation of authority by the State committee*—(a) *Approval of county committee determinations.* The State committee shall review all acreage allotments and may correct or require correction of any determinations made under §§ 722.517 to 722.527. All acreage allotments shall be approved by the State committee and no official notice of acreage allotment and marketing quota shall be mailed to a farm operator until such allotment has been approved by the State committee.

(b) *Redelegation of authority.* Any authority delegated to the State committee by the regulations in §§ 722.511 to 722.530 may be redelegated by the State committee.

REVIEW OF QUOTAS

§ 722.530 *Review of quotas*—(a) *Review committees.* Any producer who is dissatisfied with the farm acreage allotment or marketing quota established for his farm, or in the case of a new cotton farm with the action of the county committee in refusing to establish a farm acreage allotment or marketing quota for such farm, may, by making application within 15 days after the mailing to him of the notice provided for in § 722.520, have such allotment, quota, or determination reviewed by a review committee composed of three farmers appointed by the Secretary. The review committee shall, upon proper application review the action of the county committee. The review committee in determining any farm acreage allotment or marketing quota shall, to the same extent as the county committee, be limited to the establishment of a farm acreage allotment or marketing quota in an amount which, under the Act and regulations, should have been established. Unless such application is made within 15 days, the original determination of the farm acreage allotment or marketing quota shall be final. All applications for review shall be made in accordance with the Marketing Quota Review Regulations issued by the Secretary.

(b) *Court review.* If the producer is dissatisfied with the determination of the review committee, he may, within 15 days after notice of such determination is mailed to him by registered mail, institute proceedings against the review committee to have the determination of the review committee reviewed by a court in accordance with section 365 of the act.

NOTE: The reporting requirements contained herein have been approved by, and subsequent reporting requirements will be subject to the approval of the Bureau of Budget in accordance with Federal Reports Act of 1942.

Done at Washington, D. C., this 20th day of November 1953. Witness my hand and the seal of the Department of Agriculture.

[SEAL] EZRA TAFT BENSON,
*Secretary of Agriculture.*

[F. R. Doc. 53-9954; Filed, Nov. 25, 1953; 8:51 a. m.]

# TITLE 9—ANIMALS AND ANIMAL PRODUCTS

## Chapter I—Bureau of Animal Industry, Department of Agriculture

### Subchapter A—Meat Inspection Regulations

PART 14—TANKING AN DENATURING CONDEMNED CARCASSES AND PARTS

PART 16—MARKING, BRANDING, AND IDENTIFYING PRODUCTS

PART 17—LABELING

PART 18—REINSPECTION AND PREPARATION OF PRODUCTS

PART 24—EXPORT STAMPS AND CERTIFICATES

PART 28—DEFINITIONS AND STANDARDS OF IDENTITY

MISCELLANEOUS AMENDMENTS

On October 20, 1953, there was published in the FEDERAL REGISTER (18 F. R. 6645) a notice of proposed amendments of the Meat Inspection Regulations (9 CFR, Chapter I, Subchaper A, as amended). After due consideration of all relevant matters submitted in connection with the notice, the Secretary of Agriculture, pursuant to the authority conferred upon him by the Meat Inspection Act, as amended (21 U. S. C. 71-91), and section 306 of the Tariff Act of 1930 (19 U. S. C. 1306), hereby amends the aforesaid regulations as follows:

1. Paragraph (a) of § 14.1 is amended to read:

(a) Condemned carcasses and product at official establishments having facilities for tanking shall be disposed of by tanking as follows:

(1) The lower opening of the tank shall first be sealed securely by a Meat Inspection employee, except when permanently connected with a blow line, then the condemned carcasses and product shall be placed in the tank in his presence, after which the upper opening shall also be sealed securely by such employee, who shall then see that the contents of the tank are subjected to sufficient heating for sufficient time to effectively destroy the contents for food purposes.

(2) The use of equipment such as crushers or hashers for pre-tanking preparation of condemned carcasses and product in the inedible products department has been found to give inedible character and appearance to the material. Accordingly, if condemned carcasses and product are so crushed or hashed, conveying systems, rendering tanks, and other equipment used in the further handling of the crushed or hashed material need not be locked or sealed during the tanking operation. If the rendering tanks or other equipment contain condemned material not so crushed or hashed, the equipment shall be sealed as prescribed in subparagraph (1) of this paragraph. If the crushed or hashed material is not rendered in the establishment where produced it shall be denatured as provided for in § 14.4.

2. Paragraph (a) of § 14.4 is amended to read:

(a) Any carcass or product condemned at an official establishment which has no facilities for tanking shall be denatured with crude carbolic acid, cresylic disinfectant, or other prescribed agent, or be destroyed by incineration, under the supervision of a Meat Inspection employee. When such carcass or product is not incinerated it shall be slashed freely with a knife, before the denaturing agent is applied.

3. Paragraph (d) of § 16.13 is amended to read:

(d) (1) When product is placed in casing to which artificial coloring is applied, as permitted under this subchapter, the article shall be legibly and conspicuously marked by stamping or printing on the casing or securely affixing to the article the words "artificially colored."

(2) If the casing is removed from product at an official establishment and there is evidence of artificial coloring on the surface of the product, the article from which the casing has been removed shall be marked by stamping directly thereon or by securely affixing thereto the printed words "artificially colored."

(3) The casing containing product need not be marked to show that it is colored if it is colored prior to its use as a covering for the product, and the coloring is of a kind and so applied as not to be transferable to the product and not to be misleading or deceptive with respect to color, quality, or kind of product enclosed in the casing.

(4) In the case of sausage of the smaller varieties the marking prescribed in this paragraph may be limited to links bearing the inspection legend.

4. Paragraph (b) of § 16.15 is amended to read:

(b) When any product prepared in an official establishment for domestic commerce has been inspected and passed and is enclosed in a cloth wrapping, such wrapping may bear, in lieu of the domestic meat label, the inspection legend and establishment number applied by the approved 2½-inch rubber brand: *Provided*, The domestic meat label or rubber brand may be omitted in those cases in which the inspection legend and establishment number on the articles themselves are clearly legible through the wrapping or the wrapping is labeled in accordance with Part 17 of this subchapter: *Provided further*, That plain unprinted wrappings such as stockinettes, cheese cloth, paper and crinkled paper bags for properly marked fresh meat, including carcasses, and primal parts thereof, which are used solely to protect the product against soiling or excessive drying during transportation or storage need not bear the marks of inspection.

5. Section 16.16 is amended by deleting paragraph (a) and amending the section to read:

§ 16.16 *Tank cars and tank trucks of edible product.* Each tank car and each tank truck carrying inspected and passed product from an official establishment shall bear a label containing the true name of the product, the inspection

legend, the establishment number, and the words "date of loading," followed by a suitable space for the insertion of the date. The label shall be located conspicuously and shall be printed on material of such character and so affixed as to preclude detachment or effacement upon exposure to the weather. Before the car or truck is removed from the place where it is unloaded, the carrier shall remove or obliterate such label.

6. Section 17.8 (c) (37) is amended to read:

(37) Product labeled "ham spread," "tongue spread," and the like, shall contain not less than 50 percent of the meat ingredient named computed on the weight of the fresh meat. Other meat and fat may be used to give the desired spreading consistency provided it does not detract from the character of the named spread.

7. Paragraph (c) of § 17.8 is amended by adding the following new subparagraphs:

(54) The preparation of cooked cured product such as hams, pork shoulders, pork shoulder picnics, pork shoulder butts, and pork loins, either by moist or dry heat, shall not result in the finished cooked article weighing more than the fresh uncured product: that is, the weight of the finished cooked article plus the weight of the skin, bones, fat, and trimmings removed during the preparation shall not exceed the weight of the fresh uncured product.

(55) Product labeled "chopped ham," "pressed ham," "chopped ham with natural juices," and "pressed ham with natural juices," shall be prepared with ham containing no more shank meat than is normally present in the boneless ham. The weight of the cured chopped ham prior to canning shall not exceed the weight of the fresh uncured ham, exclusive of the bones and fat removed in the boning operations, plus the weight of the curing ingredients and 3 percent moisture.

8. Paragraph (b) of § 17.9 is amended to read:

(b) (1) When product is placed in casing to which artificial coloring is applied, as permitted under this subchapter, there shall appear on the label, in a prominent manner and contiguous to the name of the product, the words "artificially colored."

(2) If the casing is removed from product at an official establishment and there is evidence of the artificial coloring on the surface of the product, there shall appear on the label in a prominent manner and contiguous to the name of the product, the words, "artificially colored."

(3) When the casing is colored prior to its use as a covering for product, the color shall be of a kind and so applied as not to be transferable to the product and not to be misleading or deceptive with respect to color, quality, or kind of product enclosed in the casing, and no reference to color need appear on the label.

9. Paragraph (b) of § 18.7 is amended to read:

(b) There may be added to product, with appropriate declaration as required under Parts 16 and 17 of this subchapter, common salt, approved sugars, wood smoke, a vinegar, flavorings, spices, sodium nitrate, sodium nitrite, potassium nitrate (saltpeter), and potassium nitrite.

10. Section 18.7 (d) (9) is amended to read:

(9) Monoisopropyl citrate not to exceed $\frac{1}{100}$ of 1 percent. When used in combination with other antioxidants, the amount of monoisopropyl citrate shall not exceed $\frac{5}{1000}$ of 1 percent.

11. Paragraph (b) of § 18.10 is amended to read:

(b) Products containing pork muscle tissue (including hearts, pork stomachs and pork livers), or the pork muscle tissue which forms an ingredient of such products including those named in this paragraph and products of the character thereof, are classed as articles which shall be effectively heated, refrigerated, or cured at a federally inspected establishment to destroy any possible live trichinae: Bologna; frankfurts; viennas; smoked sausage; knoblauch sausage; mortadella; all forms of summer or dried sausage, including mettwurst; cooked loaves; roasted, baked, boiled, or cooked ham, pork shoulder, or pork shoulder picnic; Italian-style ham; Westphalia-style ham; smoked boneless pork shoulder butts; cured meat rolls; capocollo (capicola, capacola); coppa; fresh or cured boneless pork shoulder butts, hams, loins, shoulders, picnics, and similar pork cuts, in casings or other containers in which ready-to-eat delicatessen articles are customarily enclosed (excepting Scotch-style hams); cured boneless pork loin; boneless back bacon, smoked pork cuts such as hams, shoulders, loins, and picnics (excepting smoked hams and smoked pork shoulder picnics which are specially prepared for distribution in tropical climates, or smoked hams delivered to the Armed Services).

12. Section 24.7 is amended to read:

§ 24.7 *Uninspected tallow, stearin, oleo oil, etc.; not to be exported unless exporter certifies as inedible.* No tallow, stearin, oleo oil, or the rendered fat derived from cattle, sheep, swine, or goats, that has not been inspected, passed, and marked in compliance with the regulations in this subchapter shall be exported, unless the shipper files with the collector of customs at the port from which the export shipment is made a certificate by the exporter that such article is inedible.

13. Paragraph (b) of § 28.2 is amended by adding the following subparagraph:

(8) Beef fat.

The primary purposes of the foregoing amendments are to incorporate in the regulations changes which have been thoroughly worked out with the meat packing industry during the past year and to include new requirements controlling the composition and treatment of certain meat food products along lines which have been thoroughly investigated by Meat Inspection, Bureau of Animal Industry.

(Ch. 2907, 34 Stat. 1264, sec. 306, 46 Stat. 689; 19 U. S. C. 1306, 21 U. S. C. 89)

The foregoing amendments shall become effective December 29, 1953.

Done at Washington, D. C., this 20th day of November 1953.

[SEAL] TRUE D. MORSE,
*Acting Secretary of Agriculture.*

## TITLE 14—CIVIL AVIATION

### Chapter I—Civil Aeronautics Board

[Supp. 4]

### PART 25—AIR-TRAFFIC CONTROL-TOWER OPERATOR CERTIFICATES

EXAMINATION

The purposes of this supplement are to (1) make editorial corrections and (2) explain how certain applicants for air-traffic control-tower operator certificates may satisfy the examination requirements of § 26.3.

1. In § 26.3-1, published on December 23, 1950, in 15 F. R. 9231, the caption and second sentence are revised to read:

§ 26.3-1 *Content and scope of written examination required for control-tower operator certificate in proof of aeronautical knowledge (CAA policies which apply to § 26.3).* • • • Since a control-tower operator's aeronautical knowledge requirements are extensive in scope, complete coverage in the examination is not feasible. • • •

2. A new § 26.3-2 is adopted to read:

§ 26.3-2 *Demonstration of knowledge on equivalent examination (CAA interpretations which apply to § 26.3).* An applicant for an air-traffic control-tower operator certificate who has passed the written examination for an Airways Operations Specialist Certificate will be deemed to have passed the examination prescribed in § 26.3, since the examinations are equivalent in content and scope.

(Sec. 205, 52 Stat. 984, as amended; 49 U. S. C. 425. Interpret or apply sec. 602, 52 Stat. 1008, as amended; 49 U. S. C. 552)

This supplement shall become effective November 30, 1953.

[SEAL] F. B. LEE,
*Administrator of Civil Aeronautics.*

[F. R. Doc. 53-9927; Filed, Nov. 25, 1953; 8:45 a. m.]

[Supp. 19]

### PART 42—IRREGULAR AIR CARRIER AND OFF-ROUTE RULES

MAINTENANCE OF LARGE AIRCRAFT

Under § 42.32 (a), air carriers are required to maintain facilities for the proper inspection, maintenance, overhaul, and repair of large aircraft used in conducting Part 42 operations, unless

they make arrangements acceptable to the Administrator with other persons possessing such facilities. The purpose of this supplement is to redefine "facilities for the proper inspection, maintenance, overhaul, and repair" and to explain how the Administrator will determine the acceptability of arrangements made for such facilities.

1. Section 42.32-1, published on October 12, 1950, in 15 F. R. 6853, and amended on March 27, 1953, in 18 F. R. 1719, is deleted.

2. Sections 42.32-2 through 42.32-6, published on November 22, 1949, in 14 F. R. 7036, and amended on November 9, 1951 in 16 F. R. 11415, are redesignated §§ 42.32-3 through 42.32-7, respectively.

3. Sections 42.32-1 and 42.32-2 are adopted to read:

§ 42.32-1 *Facilities for the proper inspection, maintenance, overhaul, and repair (CAA interpretations which apply to § 42.32).* (a) The facilities required in § 42.32 (a) include housing, work space, equipment, supplies, materials, tools, parts, and aircraft components in sufficient quantity and quality to assure that the needed inspection, maintenance, overhaul, and repair of the air carrier's aircraft (including airframes, powerplants, propellers, and appliances) can be satisfactorily performed at all times by either the air carrier or persons with whom the air carrier has made arrangements for the performance of such functions. The housing, facilities, equipment, and materials specified in § 52.21-1 through § 52.21-3 of this subchapter and § 52.30-1 through § 52.36-1 of this subchapter which are appropriate to the particular air carrier's aircraft and maintenance system, are considered to be the minimum facilities required by § 42.32 (a).

§ 42.32-2 *Arrangements acceptable to the Administrator (CAA policies which apply to § 42.32 (a)).* The Administrator will determine the acceptability of arrangements made by the air carrier with other persons for the inspection, maintenance, overhaul, and repair of the types of aircraft used by the air carrier on the basis of the following criteria:

(a) Such arrangements conform to the approved continuous airworthiness, maintenance, and inspection program which the air carrier must perform in accordance with its maintenance manual.

(b) The inspection, maintenance, overhaul, and repair of the air carrier's aircraft, including airframes, powerplants, propellers, and appliances, is performed, inspected, and/or approved, by a certificated repair station, appropriately certificated air carrier, or manufacturer, in accordance with §§ 18.10 (b), (d), or (e); 18.11 (a) (2), (3), or (4); and 18.11 (b) (2), (3), or (4) of this subchapter: *Provided*, That inspections and maintenance specified in subparagraphs (1) and (2) of this paragraph may be performed and/or approved by a certificated mechanic in accordance with §§ 18.10 (a) and 18.11 (a) (1) of this subchapter.

(1) The performance of preventative maintenance and the performance and approval of minor maintenance, minor repairs, and minor inspections at points in the air carrier's area of operation, where persons specified in § 18.10 (b), (d), or (e) of this subchapter do not provide the facilities required in § 42.32 (a).

(2) The performance of inspections and associated minor maintenance operations which are limited to pre-flight inspections, daily inspections, and the most frequent periodic inspection and or check listed in the air carrier's maintenance manual other than pre-flight or daily inspections.

(c) Such arrangements provide that all replacement parts, components, and materials furnished directly or indirectly by such persons for use on the air carrier's aircraft conform to the type, quality, strength, and standards of maintenance established in the air carrier's maintenance manual and as required by § 18.30 of this subchapter.

(d) The air carrier's maintenance manual provides full, clear, and accurate information and instructions regarding the inspection, maintenance, overhaul, and repairs to be performed by such persons, and contains the names, location of facilities, and obligations of such persons to the carrier.

(e) The overhaul, major repair, and major inspection of aircraft and aircraft components are performed by or under the direct and immediate supervision of persons who are prime contractors and are conducted at the principal maintenance base of such persons or within the environs of such maintenance base.

(f) Such arrangements are made with qualified persons who provide competent personnel and possess adequate facilities and all other requisites appropriate to the type of aircraft or aircraft component on which any inspection, maintenance, or repair is to be performed for the air carrier.

(g) Such arrangements are reviewed by the Administrator prior to the accomplishment of any inspection, maintenance, or repairs; except that temporary arrangements may be made on an emergency basis without prior review by the Administrator provided that the air carrier gives written notice to the Administrator of each such arrangement not later than ten days after any inspection, maintenance, or repairs have been performed on such emergency basis and further provided that such temporary arrangements are limited to persons who are fully qualified and competent to perform such inspection, maintenance or repairs.

(Sec. 205, 52 Stat. 984, as amended; 49 U. S. C. 425. Interpret or apply sec. 601, 604, 605, 52 Stat. 1007, 1010; 49 U. S. C. 551, 554, 555)

This supplement shall become effective December 15, 1953.

[SEAL] F. B. LEE,
*Administrator of Civil Aeronautics.*

[F. R. Doc. 53-9929; Filed, Nov. 25, 1953; 8:46 a. m.]

### Chapter II—Civil Aeronautics Administration, Department of Commerce

[Amdt. 50]

### PART 610—MINIMUM EN ROUTE IFR ALTITUDES

MISCELLANEOUS AMENDMENTS

The minimum en route IFR altitudes appearing hereinafter have been coordinated with interested members of the industry in the regions concerned insofar as practicable. The altitudes are adopted without delay in order to provide for safety in air commerce. Compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedure Act would be impracticable and contrary to the public interest, and therefore is not required.

Part 610 is amended as follows:

1. Section 610.104 *Amber civil airway No. 4* is amended to read in part:

| From— | To— | Minimum Altitude |
|---|---|---|
| Newark (INT), Ohio | Zanesville, Ohio (LF/R) | 2,400 |

2. Section 610.210 *Red civil airway No. 10* is amended to read in part:

| From— | To— | Minimum Altitude |
|---|---|---|
| Atlanta, Ga. (LF/R) | Thomaston (INT), Ga. | 2,500 |
| Thomaston (INT), Ga. | Columbus, Ga. (LF/R) | 2,500 |
| | Fort Benning, Ga. | 2,500 |

3. Section 610.298 *Red civil airway No. 98* is amended to read:

| From— | To— | Minimum Altitude |
|---|---|---|
| Vichy, Mo. (LF/R) | Int. 248° T. from Rosebud, Mo. (LF/R) and Int. 068° T. from St. Louis, Mo. (LF/R). | 2,500 |

4. Section 610.603 *Blue civil airway No. 3* is amended to read in part:

| From— | To— | Minimum Altitude |
|---|---|---|
| Grand Rapids, Mich. (LF/R) | White Cloud (INT), Mich. | 2,800 |
| White Cloud (INT), Mich. | Cadillac, Mich. (LF/RBN). | 2,700 |

5. Section 610.610 *Blue civil airway No. 10* is amended to read in part:

| From— | To— | Minimum Altitude |
|---|---|---|
| Fresno, Calif. (LF/R) | Evergreen, Calif. (LF/RBN). | 6,000 |
| Los Banos, Calif. (FM) | Fresno, Calif. (LF/R) Eastbound only. | 3,000 |
| Evergreen, Calif. (LF/RBN).[1] | Oakland, Calif. (LF/R) | 5,000 |

[1] 16,000'—Minimum crossing altitude at Evergreen (LF/RBN), southeastbound.

6. Section 610.654 *Blue civil airway No. 54* is amended to read:

| From— | To— | Minimum altitude |
|---|---|---|
| Salinas, Calif. (LF/RBN) | Evergreen, Calif. (LF/RBN). | 6,000 |
| Evergreen, Calif. (LF/RBN) | San Francisco, Calif. (LF/RBN). | 3,000 |

[1] 6,000—Minimum crossing altitude at Evergreen (LF/RBN), Southbound.

7. Section 610.670 *Blue civil airway No. 70* is amended to read in part:

| From— | To— | Minimum altitude |
|---|---|---|
| Int 290° 110° mag. brg. Oklahoma City, Okla. (LF/RBN), and 20° 200° mag. brg. Tulsa, Okla. (LF/RBN), Ardmore, Okla. (LF/RBN). | Tulsa, Okla. (LF/RBN) | 2,400 |
| Mineral Wells, Tex. (LF/RBN). | Ardmore, Okla. (LF/RBN). | 2,600 |

8. Section 610.1001 *Direct routes, United States* is amended by adding:

| From— | To— | Minimum altitude |
|---|---|---|
| Galena, Alaska (LF/RBN) | Kotzebue, Alaska (LF/RBN). | 5,500 |
| McGrath, Alaska (LF/RBN). | Galena, Alaska (LF/RBN). | 5,500 |
| Wichita, Kans. (VOR) | North Fork, Kans. (LF/RBN) | 3,000 |
| Wichita, Kans. (LF/RBN) | North Fork, Kans. (LF/RBN). | 3,000 |

9. Section 610.1001 *Direct routes, United States* is amended to eliminate:

| From— | To— | Minimum altitude |
|---|---|---|
| Spartanburg, S. C. (LF/RBN). | Hendersonville (INT), N. C. | 6,300 |
| Hendersonville (INT), N. C. | Bulls Gap (INT), Tenn. | 8,000 |

10. Section 610.6002 *VOR civil airway No. 2* is amended to read in part:

| From— | To— | Minimum altitude |
|---|---|---|
| MacKeron, Mich. (VOR) | Lansing, Mich. (VOR) | |
| Direct | Direct | 2,500 |
| S. alter | S. alter | 2,200 |

11. Section 610.6015 *VOR civil airway No. 15* is amended to read in part:

| From— | To— | Minimum altitude |
|---|---|---|
| Ardmore, Okla. (VOR) | Okemah (INT), Okla. | [1] 3,000 |

## TITLE 39—POSTAL SERVICE

### Chapter I—Post Office Department

PART 34—CLASSIFICATION AND RATES OF POSTAGE

PART 35—PROVISIONS APPLICABLE TO THE SEVERAL CLASSES OF MAIL MATTER

MISCELLANEOUS AMENDMENTS

In Part 34—Classification and Rates of Postage make the following changes:

a. In § 34.9 *Business reply cards and envelopes* amend paragraph (c) to read as follows:

(c) *Application for permit.* A person or concern desiring a permit to send out or distribute business reply cards and envelopes for return under this section shall make application therefor on Form 3614 to the postmaster at the office to which the cards or envelopes are to be returned, who shall issue a permit on Form 3616. The instructions for the permit holder on the form shall be strictly complied with. No fee is required for the issuance of such a permit.

(R. S. 161, 396, secs. 304, 309, 42 Stat. 24, 25, 5 U. S. C. 22, 369)

b. Section 34.50 *Separations for delivery at letter-carrier post office* is rescinded.

c. In § 34.66 *Pound rate for bulk mailings of third-class matter* make the following changes:

1. Amend subparagraph (1) of paragraph (c) to read as follows:

(1) *Procedure.* Persons desiring the privilege of mailing third-class matter in bulk under the provisions of this section shall make application to the postmaster for a permit to pay postage under one of the methods described in paragraph (b) of this section.

2. Delete paragraph (d).

3. Redesignate paragraph (e) as paragraph (d) and amend same to read as follows:

(d) *Conditions for mailing.* Mailings under the provisions of this section are subject to the following conditions:

(1) Each mailing shall be accompanied with a statement on a form provided therefor, signed by the sender, showing such information as may be required.

(2) When there are 10 or more pieces in a mailing for any city or state they shall be tied out into separate packages. State packages shall be properly labeled. Such separations shall also be made for post office stations or branches when the station or branch name forms a part of the address.

(3) Mailings under this section may not be registered or sent as insured or c. o. d. mail.

4. Delete paragraphs (f), (g), (h), and (i).

(R. S. 161, 396, secs. 304, 309, 42 Stat. 24, 25; 5 U. S. C. 22, 369)

In Part 35—*Provisions Applicable to the Several Classes of Mail Matter*, make the following changes:

a. In § 35.4 *Mailing of matter without stamps affixed* make the following changes:

1. Amend paragraphs (e), (f), and (g) to read as follows:

(e) *Fee to accompany application for nonmetered permit—(1) Amount.* Each application for a permit to mail matter without stamps affixed as provided by sections 221a, 273, 291, 291a, and 295 of this title, and the regulations made pursuant thereto by the Postmaster General, shall be accompanied with a fee of $10: *Provided*, That no fee shall be required to accompany applications for permits to mail matter without stamps affixed as metered mail. (47 Stat. 647; 39 U. S. C. 273a.)

(2) *Receipt for fees.* Receipts for fees collected under the provisions of this section shall be issued on Form 3603 (See § 34.66 (c) (2) of this chapter regarding annual fee for bulk mailings of third-class matter.)

(f) *Application.* Applications to mail matter of any class without stamps affixed under the provisions of this section shall be filed on Form 3612 at the post office where the mailings are to be made.

(g) *Permit.* Postmasters shall issue permits on Form 3601 for mailing nonmetered matter of all classes, and on Form 3601-A for mailing metered matter of all classes.

2. Paragraphs (i), (j), (k), (l), (m), and (n) are amended to read as follows:

(i) *Acceptance of second-class and international matter.* Only such second-class matter as is chargeable with postage at the rate to Canada of 1 cent for each 4 ounces; the local and headquarters rates of 1 or 2 cents per copy; and the transient second-class rate of 2 cents for the first 2 ounces and 1 cent for each additional 2 ounces (see §§ 34.40 (g), 34.41 (a); (b), (i), and (j), and 34.42 of this chapter); and only such international matter as is subject to the international printed matter rate may be accepted as nonmetered matter under the provisions of this section.

(j) *Statement to accompany nonmetered mailings.* Publishers shall file a statement on Form 3542 in accordance with the instructions in § 34.46 (b) of this chapter for mailings of second-class publications charged with postage at the per copy rates required by § 34.41 of this chapter. Each mailing of other nonmetered matter shall be accompanied with a statement on Form 3602.

(k) *Verification of statement of mailing.* Mailings shall be verified with Form 3602 and certified on the back of the form by two employees, except that when only one employee is on duty, he may perform the verification and certification. Mailings shall be verified with Form 3542 in the manner required by § 34.45 (g) of this chapter.

(l) *Separations.* The mailer shall separate the mailings in such manner as may be prescribed by the Department. When the mailing of matter of the second, third, or fourth class extends over two or more consecutive days, and the number of pieces presented on the last day to complete the mailing is less than prescribed by paragraph (d) of this section, such number shall be accepted and the receipt Form 3603 or 3539 shall be endorsed "Remainder of mailing of _____" with the date of the preceding mailing.

(m) *Payment of postage and issuance of receipts.* Postage on the entire quantity shall be paid at or before the time the matter is presented for mailing, either in money or, at the option of the postmaster and at his risk, by check drawn to his order. The postmaster shall issue to the mailer a receipt on Form 3539 in accordance with the instructions in § 34.45 (i) of this chapter for postage charged on second-class publications at the per copy rates required by § 34.41 of this chapter, and on Form 3603 for each mailing of other nonmetered matter. A receipt shall be issued on Form 3603-A at the time of setting a meter device for the amount collected.

(n) *Accounting for postage and fees.* At the close of each quarter of the calendar year, the postmaster shall enter in the appropriate items of the quarterly postal account the total amount of postage and nonmetered application fees collected under the provisions of this section during the quarter. Postage collected on second-class publications at the per copy rates required by § 34.41 of this chapter shall be included in A. C. 013 with other second-class postage. The duplicate copies of the receipts issued on Forms 3603, 3603-A, and 3539, for the postage and fees shall be sent with the quarterly postal account to the regional accounting office.

(R. S. 161, 396, sec. 5, 41 Stat. 593, as amended, secs. 304, 309, 42 Stat. 24, 25, 47 Stat. 647; 5 U. S. C. 22, 369, 39 U. S. C. 273, 273a)

b. In § 35.5 *Precanceled Government-stamped envelopes and postal cards* make the following changes:

1. Delete paragraphs (b) to (j) inclusive and the note following paragraph (j).

2. Insert new paragraphs (b), (c), and (d) to read as follows:

(b) *Application for permit.* Persons or firms desiring the privilege of using precanceled Government stamped envelopes, precanceled Government postal cards or precanceled postage stamps, shall make application therefor on Form 3623 to the postmaster at the post office where the matter is to be mailed. The postmaster shall issue a permit on Form 3620. The instructions for the permit holder on the form shall be strictly complied with. No fee is required for the issuance of such a permit.

(c) *Conditions governing use of precanceled stamped paper.* Permits for the use of precanceled stamped paper are issued subject to the following conditions.

(1) Precanceled stamps may be used for the payment of postage on matter of the second, third, and fourth classes, and on post cards. Such stamps may be used only at the office where precanceled. Precanceled stamps above the 6-cent denomination, or lower denominations when the postage exceeds 6 cents, must be overprinted (or hand-stamped) in black ink by the permit holders with their initials and the abbreviations of the month and year, as for example: "A. B. Co. 9-53." Precanceled stamps so overprinted or stamped are acceptable for postage during the month designated, and up to and including the tenth day of the following month.

(2) Any number of pieces may be mailed at one time, regardless of whether they are identical, except in the case of third-class matter mailed under § 34.66 of this chapter, P. L. & R., when each mailing must consist of not less than 20 pounds or 200 pieces and be accompanied with a statement of mailing on Form 3602-PC.

(3) Mailings shall be faced and presented in such manner as to permit easy examination.

(4) Precanceled postage stamps may not be used for the payment of postage on matter mailed in boxes, cases, bags, or other containers specially designed to be reused for mailing purposes.

(5) Precanceled postage stamps shall not be sold by permit holders.

(6) Where Government stamped envelopes or postal cards are precanceled by means of a mailer's postmark, such postmark shall embody the name of the post office and State, the permit number and, in the case of first-class mail, the date of mailing.

(d) *Cancellation of permits.* Permits are subject to cancellation for misuse of if mailings are not made thereunder within a 12-month period.

(R. S. 161, 396, 3921, as amended, secs. 304, 309, 42 Stat. 24, 25, 46 Stat. 264, 5 U. S. C. 22, 369, 39 U. S. C. 365, 370)

## PROPOSED RULE MAKING

### DEPARTMENT OF AGRICULTURE

#### Production and Marketing Administration

[7 CFR Part 914]

[Docket No. AO 245-A1]

HANDLING OF NAVEL ORANGES GROWN IN ARIZONA AND A DESIGNATED PART OF CALIFORNIA

NOTICE OF HEARING WITH RESPECT TO PROPOSED AMENDMENTS TO MARKETING AGREEMENT AND ORDER

Pursuant to the Agricultural Marketing Agreement Act of 1937, as amended (48 Stat. 31, as amended; 7 U. S. C. 601 et seq.) and in accordance with the applicable rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders (7 CFR 900.1 et seq.), notice is hereby given of a public hearing to be held in Room 330, Federal Building, 312 North Spring Street, Los Angeles, California, beginning at 9:00 a. m., P. s. t., December 9, 1953, with respect to proposed amendments to the marketing agreement and Order No. 14 (7 CFR Part 914), hereinafter referred to as the "marketing agreement" and "order," respectively, regulating the handling of Navel oranges grown in the State of Arizona and a designated part of the State of California. The proposed amendments have not received the approval of the Secretary of Agriculture.

The public hearing is for the purpose of receiving evidence with respect to the economic and marketing conditions which relate to the provisions of the

proposed amendments, which are hereinafter set forth, and appropriate modifications thereof.

The amendments to the marketing agreement and order which have been proposed by the Navel Orange Administrative Committee, the administrative agency established pursuant to the marketing agreement and order, are as follows:

1. Delete "not less than 2 growers for one grower member; not less than 2 growers for 1 alternate grower member;" in § 914.22 (c) and insert in lieu thereof "not less than 4 growers for 2 grower members; not less than 4 growers for 2 alternate grower members;".

2. Delete "not less than 4 growers for 2 grower members; not less than 4 growers for 2 alternate grower members;" in § 914.22 (d) and insert in lieu thereof "not less than 2 growers for 1 grower member; not less than 2 growers for 1 alternate grower member;".

3. Add to § 914.29 *Duties* the following new paragraph:

(n) With the approval of the Secretary to readjust the number of producer members or handler members of the Navel Orange Administrative Committee who are nominated pursuant to § 914.22 (c) and (d), respectively. Any such changes shall be based insofar as practicable, upon the proportionate amount of Navel oranges handled by the respective types of marketing organizations.

The Fruit and Vegetable Branch, Production and Marketing Administration, has proposed the following amendments to the marketing agreement and order:

4. Delete the requirement in § 914.22 (b), (c), (d) and (f) that 2 or more members and alternates should be nominated for each position and provide that one or more members and alternates should be nominated for each position.

5. Delete § 914.23 *Selection* and insert in lieu thereof the following:

§ 914.23 *Selection.* From the nominations made pursuant to § 914.22 (b), or from other qualified growers or handlers, the Secretary shall select three grower members of the committee and an alternate to each of such grower members; also two handler members of the committee and an alternate to each of such handler members. From the nominations made pursuant to § 914.22 (c), or from other qualified growers or handlers, the Secretary shall select one grower member of the committee and an alternate to such grower member; also one handler member of the committee and an alternate to such handler member. From the nominations made pursuant to § 914.22 (d) or from other qualified growers or handlers the Secretary shall select two grower members of the committee and an alternate to each of such grower members; also one handler member of the committee and an alternate to such handler member. From the nominations made pursuant to § 914.22 (f), or from other qualified persons, the Secretary shall select one member of the committee and an alternate to such member.

6. Delete paragraphs (g) and (h) in § 914.53 *Prorate bases* and insert in lieu thereof the following:

(g) Each week during the marketing season the committee shall compute the total quantity of oranges available for current shipment by each person who has applied for a prorate base and for allotments in each prorate district. On the basis of such computation, the committee shall fix a prorate base for each person who is entitled thereto in each prorate district. Such prorate base shall represent the ratio between the total quantity of oranges available for current shipment in each such district by each person and the total quantity of oranges available for current shipment in each such district by all such persons. The committee shall notify the Secretary of the prorate base fixed for each person and shall notify each such person of the prorate base fixed for him.

7. Delete the first sentence in § 914.54 *Allotments* and insert in lieu thereof the following: "Whenever the Secretary has fixed the quantity of oranges which may be handled during any week in a prorate district, and the committee has fixed prorate bases for persons entitled thereto, the committee shall calculate the quantity of oranges which may be handled by each such person during such week."

8. Make such other changes in the marketing agreement and order as may be necessary to make the entire marketing agreement and order conform with any amendment thereto that may result from this hearing.

Copies of this notice of hearing may be obtained from the offices of the Hearing Clerk, United States Department of Agriculture, Room 1353, South Building, Washington, D. C., or the Field Representative, Fruit and Vegetable Branch, Production and Marketing Administration, Room 1005, 1031 South Broadway, Los Angeles, California.

(48 Stat. 31, as amended; 7 U. S. C. 601 et seq.)

Done at Washington, D. C., this 20th day of November 1953.

[SEAL] GEORGE A. DICE,
*Deputy Assistant Administrator.*

[F. R. Doc. 53-9965; Filed, Nov. 25, 1953; 8:55 a. m.]

---

## [7 CFR Part 924]

[Docket No. AO-225-A4]

### HANDLING OF MILK IN DETROIT, MICHIGAN, MARKETING AREA

### NOTICE OF RECOMMENDED DECISION AND OPPORTUNITY TO FILE WRITTEN EXCEPTIONS WITH RESPECT TO PROPOSED AMENDMENTS TO TENTATIVE MARKETING AGREEMENT AND TO ORDER, AS AMENDED

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), notice is hereby given of the filing with the Hearing Clerk of the recommended decision of the Assistant Administrator, Production and Marketing Administration, United States Department of Agriculture, with respect to a proposed marketing agreement and a proposed order, amending the order, as amended, regulating the handling of milk in the Detroit, Michigan, marketing area. Interested parties may file written exceptions to this decision with the Hearing Clerk, United States Department of Agriculture, Washington 25, D. C. not later than the close of business the 20th day after publication of this decision in the FEDERAL REGISTER. Exceptions should be filed in quadruplicate.

*Preliminary statement.* The hearing, on the record of which the proposed amendments, as hereinafter set forth, to the tentative marketing agreement and to the order, as amended, were formulated, was conducted at Detroit, Michigan on July 27-28, 1953, pursuant to notice thereof which was issued on July 11, 1953 (18 F. R. 4071).

No appearance was made at the hearing by the originator of proposals numbered 5 and 23 relating to the position of producer-handlers under the order. Proposal number 10, relating to the method of determining the Class I price, was not supported by any proponent.

The material issues considered on the record of the hearing related to:

(1) Expansion of the marketing area to include three townships in Oakland County, Michigan;

(2) Revisions relating to the determination of milk to be priced under the order by (a) deleting the Wayne County Department of Health as one of the health authorities qualified to approve country supply plants, (b) raising the qualification requirements for country supply plants and modifying the conditions for maintaining handler plant status, and (c) including a cooperative association as a handler on milk diverted to a non-handler;

(3) A review of the order provisions applicable to other source milk;

(4) Reclassification of fluid skim milk from Class I to Class II;

(5) Changes in the pricing provisions which would (a) alter the location adjustment schedule applicable to milk moved for Class I use and to producer milk delivered to country plants, (b) apply location adjustments on milk disposed of as Class I from plants located within the marketing area but more than 34 miles distant from Detroit City Hall, (c) extend the butter-powder credit on Class II milk to all months of the year, and (d) allow a transportation credit on Class II milk necessarily moved from a receiving plant to a manufacturing plant;

(6) Revision of certain of the rules for establishing and applying bases under the base-rating plan for encouraging level production; and

(7) Making certain administrative revisions of order language.

*Findings and conclusions.* The following findings and conclusions on the issues decided herein are hereby made upon the basis of the record of the hearing:

(1) *Marketing area.* The marketing area should not be extended to include Highland, Milford, and Lyon Townships in Oakland County.

Inclusion of the additional area was proposed by a distributor who buys his milk in bottled form from a Detroit handler and sells it in a general area which includes the three townships. Other Detroit dairies also serve the townships, and it was testified that 80 percent of the milk distributed in the area was regulated under the Detroit order. The remaining 20 percent of sales originate from handlers primarily associated with the Flint market, there being no milk receiving and bottling plants in the three townships.

Flint is a sizable population center and milk distributors there are not under Federal order regulation. Unless there was some change in the pattern of distribution, extending the Detroit marketing area to include the townships would bring the affected Flint handlers under the Detroit order. As regulated handlers, these distributors would be in competition with unregulated distributors in their primary sales territory. It is concluded that the marketing area should not be extended to include the three townships.

(2) *Milk to be priced.* The Wayne County Department of Health should be removed from the list of health authorities whose approval is one element in the qualification of a country supply plant, i. e., one from which milk is supplied to a distributing plant. No other change should be made in the requirements for the qualification of the operator of a supply plant as a handler under the order. However, a cooperative association should be a handler with respect to milk diverted to a non-handler.

Producers proposed that the portion of the definition of a handler which relates to the operator of a "supply" plant be modified in several important respects. A "supply" plant, also commonly referred to as a "country" plant, is one from which the requisite percentages of milk are shipped, during specified months, to plants from which milk is disposed of as Class I on a route in the marketing area. The latter are referred to as "distributing" or "city" plants. The present standard is that a supply plant be approved as a source of fluid milk by one of the 5 named health authorities and that 10 percent or more of the plant's dairy farm supply of milk be moved to a distributing plant in each of the months of November and December.

One proposed change would remove the Wayne County Department of Health from the list of health authorities whose approval is one element of handler qualification. The other proposals would alter the minimum shipping requirements for the attainment of handler status and participation in the marketwide pool. It was proposed that 50 percent or more of a supply plant's supply of milk be required to be shipped to a distributing plant in each of the 4 months October through January; that a new plant not be qualified until after the second month in which it had shipped not less than 50 percent of its supply; and that after qualification had been established, a proprietary handler could maintain such qualification on the basis of the combined receipts and sales at all plants operated by him, while a cooperative association could similarly combine receipts and sales at all plants (cooperative or proprietary) where the movement of milk was under the direction of such association.

The Wayne County Department of Health is a factor in qualifying certain of the Detroit handlers. These include handlers operating supply plants and distributing plants. In the case of distributing plants, the approval of health authorities is not specified. Instead, the order relies upon the provision requiring that milk distributed in any part of the marketing area must be approved by the health authority having jurisdiction in the particular area of distribution. Milk is distributed in the marketing area from several plants which serve territory in which the Wayne County Department is the applicable health authority.

Effective November 1, 1952 the Wayne County Department of Health was added to the list of those health departments whose approval would be acceptable for determination of qualification as "supply plant" handler. The supply plant handler definition does not specifically enumerate health requirements applicable either to farms or to milk plants. It does name the specific health authorities whose inspection standards are substantially uniform and whose operations provide a basis for positively identifying the producers, plants, and milk which meet the sanitary requirements for fluid use. The order, in turn, allows the established requirements and procedures of the Health Departments to determine who are acceptable as producers, and to assure that milk from inspected sources only is used by the distributing plants for fluid purposes in marketing areas.

It was testified that the Wayne County Health Department representatives did not make actual inspections of all producers approved by them. That Department accepted inspections conducted by the Michigan Department of Agriculture, though Wayne County made spot checks of these inspected producers. Testimony with respect to administrative procedures of the Wayne County Health Department also revealed that until very recently no recording system had been maintained listing producers who had been either directly or indirectly approved by that Department, and consequently there was no means for verification of the individual shippers, nor of the total number of shippers who were producers for a particular supply plant for the Detroit market. The Wayne County Department, further, did not require that milk to be used for fluid purposes be handled in a plant entirely separated from a building in which milk for manufacturing uses was received. Other held authorities named by the Order do require separate buildings as a means of insuring the identity of inspected milk.

The handler definition relating to the operator of a supply plant sets forth the criteria for determining an operator's status under the marketwide pool. In addition to its being approved by a qualifying Health Department, a supply plant must furnish, as Order No. 24 is presently written, 10 percent of its supply of milk to the market in November and December. The proposed revision would require 50 percent of a plant's supply during October through January rather than 10 percent in two months. A plant which meets the minimum shipping requirements becomes fully regulated under the order, and farmers shipping milk to such a plant achieve the status of producers and participate in the equalization fund. The supply plant definition should, as nearly as possible, include any plant which is part of the essential and regular source of supply for the market, at least in the fall months. The late fall months constitute the period of lowest milk production. Class I sales, however, are essentially the same in all months of the year. Under these conditions the fall months are the critical ones in determining adequacy of supply. Supply plants which are called upon infrequently, or for insignificant proportions of their milk supply, and who commonly market their milk in outlets other than the Detroit market need not be fully regulated under the order, and should not be permitted to participate in the equalization pool.

Solely from the viewpoint of measuring regularity, supply plant requirements should pertain primarily to the service which the plant is presently rendering to the market. Otherwise, conditions may so change that a plant which was once a regular source of supply, has shifted its outlets to such an extent that it serves the market less well than plants which may be available as new sources. Because the total supply of milk in the market varies from year to year, the level of required shipments must be sufficiently low to avoid disqualifying plants during a fall season when supplies per producer may be larger than normal in relation to sales. On the other hand, the supply plant standards should be sufficiently definitive to avoid including in the pool handlers whose principal outlets for milk are in other markets, either for fluid or for manufacturing uses.

In several important respects the producers' proposals fail to fulfill the fundamental purposes of supply plant criteria as well as those presently in effect.

Both the present and the proposed supply plant definitions stipulate percentages of supply which must be "moved to a plant" from which distribution is made in the marekting area. In order to maintain pool status, supply plants may make shipments at times when adequate supplies are already available at closer locations. As a result, extra transportation costs are incurred on the milk shipped in, and it may even be necessary to move milk from the distributing plants back out to the country for manufacture. In fact it was testified that such out-of-position shipments occurred during November and December, 1952, when milk supplies were unusually large for that season of

the year. However, the scale of such shipments and the likelihood of their recurrence are substantially less under the existing requirement of 10 percent for two months than under a requirement of 50 percent for four months.

A further shortcoming of the proposed supply plant standards is that the conditions for initially attaining pool status are markedly more difficult than the subsequent maintenance of status. This difference arises from two aspects of the proposal. One is that each plant must qualify initially as an individual plant, whereas any plant which is a member of a proprietary or cooperative group of supply plants will be able to maintain status (subsequently) when the group as a whole sends 50 percent of total receipts into one market.

The second source of difference is that during the initial qualifying period, the plant does not attain status until after it has shipped 50 percent of its supply for two full months. (This requirement was tempered, through testimony by the proponent, to the extent that it becomes inoperative in months when total market supplies of producer milk were less than 105 to 107 percent of Class I utilization.) The less stringent requirements for maintaining status than for qualifying initially were proposed because the proponent cooperative association guarantees its members a market for their milk and therefore desires to maintain the pool status of all plants at which it has members. It will be recognized that this objective involves other considerations than the limited goal of designating pool plants strictly in accordance with their current service to the market.

A third problem in the consideration of the supply plant proposals is the difference in the qualifications applicable to independent plants as compared with those applicable to plants which are one of a group which is either operated by a handler or whose movements of milk to distributing plants is under the direction of a cooperative association. Some aspects of this proposal were reviewed in the preceding paragraph. Under the present order each handler, proprietary or cooperative, may combine operations at all his plants into a single report. If, instead, the order required each plant to be qualified individually, a handler could restrict shipments from his nearby plants to the extent necessary to draw the requisite quantities from the more distant plants, so long as the total receipts by his own or other distributing plants were sufficient to keep his group of supply plants qualified. Since, in these circumstances, a handler could meet the shipping requirements, it is reasonable to permit him to combine his plant reports and to draw his entire supplies from the least distant country supply plants. The proposal would allow for the extending of the permission to combine supply plants for the purpose of maintaining pool status to all plants at which a cooperative association directs the movement of milk. This proposal rests on the same logic as the combining of plants by a single handler, since such an association can direct the movement of milk from any particular plant, at will.

The extending of the concept of supply plant groups or systems, however, further demonstrates the weakness of relying on shipping requirements as a basis for market need. These systems can keep in the pool plants from which milk may never be needed for fluid purposes in the marketing area. At the same time any supply plant not in such a system would have to demonstrate a continued high degree of need for its milk in the market. A more thorogoing means of determining pool status on the basis of need would be to allow credit only on supply plant milk actually needed by distributing plants for Class I use. Conceivably this might be accompanied by a requirement that shipments from the nearest supply plants be allocated to Class I before allowing credit to more distant supply plants. Any such standards would also be more equitable as between single plants and groups of plants.

The comparatively moderate shipping requirements in the present order reflect the fact that over a period of many years the market structure has been essentially related to the supplying of milk for fluid use, without any extensive participation in pooling arrangements by plants with other primary interests. The potentialities of pool riding were discussed at length at the hearing and a present instance of the type of participation which the proponent expressly desired to prohibit was revealed. However, the fact that in recent months supplies have been in balance with Class I sales to the extent that the Class I supply-demand price adjustment has been inoperative, indicates that the pool has not thus far been unduly diluted. For the reasons heretofore stated, the proposed changes would create serious inequities between individual and group supply plants and would tend to encourage uneconomic shipments of milk without providing the possibility of more than a partial solution to the pool plant problem.

It is concluded that no change should be made in the standards applicable to the participation of supply plants in the marketwide pool. If the present and potential threats to the integrity of the pool are considered sufficiently urgent to merit developing a definition based on Class I need rather than on the basis of shipments, it might be desirable to consider such proposals at a subsequent hearing.

It was proposed that the definition of a handler should be extended to include a cooperative association with respect to milk customarily received by a handler who operates a plant, but which milk is diverted to a non-handler plant for the account of the association. The primary proponent of this proposal, a cooperative association, has no plant facilities and therefore is not a handler under other provisions of the order. The cooperatives which have been in the market since inception of the order are handlers by current order definition. At present, a handler to whom members of this association ships milk may divert the milk for such handler's account and thereby retain the members' status as producers. In this event the handler remains accountable for the payment of Class Prices on the milk. The proposed amendment, however, gives such a cooperative association direct authority to divert the members' milk, and at the same time makes the association responsible for payments on such milk. A similar provision is included in many of the other Federal orders to cover similar contingencies.

One proposed amendment to the handler definition was designed to exclude from regulation a plant located within the marketing area, but from which milk is neither distributed in the marketing area, nor furnished to another plant from which milk is so distributed. This proposal was identified as number 3 in the Notice of Hearing. No such amendment is needed to provide this intended exemption since the definition of a handler is in terms relating to area of distribution rather than to location of plant.

(3) *Other source milk.* The proposed changes in pool plant requirements prompted a review of the order provisions applicable to milk obtained from sources other than pooled supplies. Even though no changes in the plant qualifications are recommended herein, it is appropriate to review the position of other source milk in the light of experience gained during nearly two years of operation of the order.

One category of other source milk consists of that which is priced under other Federal orders. Any handler who is subject to another order and who distributes more Class I milk under such other order than in the Detroit marketing area is exempt from all but the reporting provisions of the Detroit orders. The problem herein considered relates, therefore, to milk from sources other than those under Federal regulation.

The allocation of other source milk in determining the use classification of producer milk was not under review at the hearing. The order provides that producer milk be allocated first to the Class I utilization of any handler who has received both producer milk and other source supplies during any given reporting period.

The prices paid by a handler for other source milk are not, however, regulated by the order. Testimony revealed that, in practice, there has been comparatively little unpriced milk obtained by the regulated handlers. All plants from which appreciable quantities of milk are distributed as Class I in the marketing area are fully regulated. (Distributors of insignificant quantities are exempt, and distributors whose principal volume of sales are in another Federal order market remain regulated under such other order.) Any dairy farmers delivering to distributing plants are, therefore, "producers" and only such supplemental supplies of non-producer milk as might be obtained by such plants would be other source. The qualification standards for supply plants are moderate, and sufficient plants have qualified to keep the market as a whole well supplied, thereby minimizing any need for obtaining milk from other sources. It would be possible under the order for individual handlers to carry only a partial supply of producer milk, and depend upon other sources for supplementary supplies. To date, however, producer milk made available by cooperative associations or other handlers has been the principal source of supplemental milk for this type of handler. The producers' proposal to require a supply plant to complete two months of shipment before qualifying as a handler's plant would designate milk shipped during the qualifying period as an "other source" supply.

Milk obtained from other than regulated sources is not priced under the order. The conditions under which such unpriced milk has been or could be drawn upon to supply Class I sales in the marketing area were reviewed in the preceding paragraph. If any handler was able to obtain a price advantage on such milk, he would be in a favorable position relative to the handlers buying producer milk. This in turn would force other handlers to seek the same type of advantage. In much the same fashion as seasonably excess milk tends, in the absence of an order or other effective check on utilization by all handlers, to be used by non-participating handlers to obtain a buying advantage over handlers who are purchasing milk under a classified price plan.

Extending the classified price plan to all handlers in the marketing area prevents any one of them from achieving a buying advantage on regulated milk. Similarly, the classified price plan must be protected from the possible use of unpriced milk from unregulated sources. Since minimum prices are not established for non-handlers, the alternative is to levy a charge which removes any advantage there may be in the purchase of other source milk.

The order specifies that each handler who had other source milk allocated to Class I shall pay to the producer equalization fund each month an amount computed by multiplying the hundredweight of milk so allocated by the difference between Class I and Class II prices for the month. This is the amount which is considered necessary to eliminate any advantage in the purchase of the cheapest available supplies of other source milk. It is an objective, single rate of payment, applying to any purchase of other source milk. The fixed rate will still leave handlers an incentive to seek out the cheapest sources of any unregulated milk which they may require. However, they will not be able to achieve a buying advantage over handlers who rely upon producer milk.

It was testified that supplies of milk suitable to fluid use are available at all seasons of the year. Alternative outlets for such milk (including supplies at plants in process of qualifying) would generally be the manufacture of dairy products. The seller of such milk could be expected to make it available at little or no margin over its value for manufacture, plus a charge for such plant services as receiving, cooling, and loading out, and for transportation. Similar charges are customarily added to the Class I price by supply plants selling to distribution plants, so the difference between the Class I price and the manufacturing value remains an appropriate measure of the price advantage on such purchases of other source milk. The Class II price under the order is the average of prices paid to farmers for milk at a representative group of local milk manufacturing plants. It therefore constitutes an appropriate measure of the level of prices paid for manufacturing milk, and the difference between the Class I and Class II prices is an appropriate rate of compensatory payment.

Several alternative means of determining an appropriate rate of compensatory payment on other source milk were discussed at the hearing. One of these was to determine the actual price paid by the Detroit handler for such milk. However, it was shown that this technique has serious administrative limitations. The prices at which interplant transactions occur could be purely nominal, whether the purchase and sale took place between plants under a common ownership or between unrelated plants. Also, it would be difficult, if not impossible, to determine what proportion of the transfer price represented the value of milk delivered f. o. b. the originating plant and what portion was a handling and transportation cost, or whether such charges were reasonable. The scope of the order is strictly confined to the pricing of milk delivered by farmers at the f. o. b. plant level; resale prices applicable to inter-plant transfers are not regulated.

A second suggestion for determining the rate of compensatory payment was to use the difference between the Class I price under the order and the prices actually paid to dairy farmers at the unregulated plant. It is not possible, however, to make such a determination on a basis entirely comparable with order pricing. Any premiums paid to a portion of the farmers would constitute part of the farm price paid at the unregulated plant, whereas a regulated plant must pay at least the order prices to all shippers. The lack of verification of weights and tests, possible patronage dividends at cooperative plants, and possible nominal rates of charge for transportation and other services further obscure any comparison of prices paid. A further problem is that the unregulated plant commonly pays a blend price. Unless a complete audit of such a plant's class utilization is made, no valid comparison of payment rates to the dairy farmers with order prices paid to producers is possible. Complete audit of each plant from which an occasional shipment of other source milk may be obtained is manifestly impracticable in so large a market as Detroit.

A third possibility is to set the payment rate at the difference between the Class I and the uniform price payable to producers under the order. This procedure depends upon the premise that unregulated plants are in such a closely competitive situation that they pay the blend price. The testimony was, however, that manufacturing values rather than blend prices represent the opportunity cost or alternative value of milk at unregulated plants.

(4) *Classification.* The proposal to classify skim milk sold in fluid form as Class II rather than as Class I should not be adopted.

Testimony on this proposal was based upon the competition afforded to sales of fluid skim milk by nonfat dry milk solids which are now widely sold in home-use packages by grocery stores. No specific evidence was presented to show the degree of this competition. It was pointed out, however, that not all the nonfat solids sold at retail are used to reconstitute skim milk for fluid consumption; they are also used for cooking purposes in the home. Data on the disposition of fluid skim milk by handlers under the order are published regularly by the Market Administrator in the "Detroit Market Bulletin". Official notice is hereby taken of such data. Sales of skim milk show a marked upward trend, with a seasonal peak during the summer months. Sales of fluid skim during the first six months of 1953 were 23 percent above sales for the corresponding months of 1952. It is indicated from this that the possible substitution of dried nonfat solids for fluid skim has not yet reached the point of reducing the sales of fluid skim milk. Furthermore, so long as fluid skim milk is required by health authorities to be obtained from inspected sources, such quantities as are sold must continue to be priced at such level as will encourage producers to supply inspected milk.

(5) *Class prices.* The rate of the location adjustments which applies as a credit to handlers on milk moved for Class I use and to milk delivered by producers to country plants should progress indefinitely instead of reaching a maximum of 26 cents, no location adjustment should be allowed on milk disposed of as Class I from plants located within the marketing area, the Class II price provisions should not be changed, and no credit should be allowed on such quantities of Class II milk as it may be necessary for a handler to move from the point of delivery by producers to manufacturing plants.

The proposal to change the schedule of location adjustments was designed primarily to relieve procurement difficulties which have arisen subsequent to the amendments of November 1, 1952. The schedule of location adjustments in the original order reached a maximum differential of 21 cents which applies to any distance greater than 97 miles. The amendment extended the schedule at the rate of one cent per 8 miles to a maximum of 26 cents for all plants located more than 137 miles from Detroit City Hall. The proponents who testified operate plants in the 23- and 25-cent zones. Prior to the November, 1952 amendment, the 21-cent differential applied to both plants, and producers delivering to these plants received from 1 to 3 cents less than producers delivering to two competitive plants closer to Detroit. Currently, these producers receive 3 to 7 cents less, and the farm-to-plant haulers have experienced a corresponding additional disadvantage of 2 cents per hundredweight at one plant and 4 cents at the other in territories where produc-

ers are in a position to ship to the plants closer to Detroit. It was proposed by the handlers operating plants in the 23- and 25-cent zones that the present zone schedule be continued through the 20-cent zone, the 97 mile limit, beyond which the location adjustment would increase at the rate of 1 cent per 18 miles instead of 1 cent per 8 miles.

It must be recognized that a country plant at a given distance from the market will always be at a disadvantage in competing with a plant closer to market for the milk supply of farmers living in the territory between the two plants. The normal competitive relationship between such plants results from differences in the long-haul costs from plant to market. The primary function of a country receiving plant is to assemble small lots of milk from farmers into tank lot quantities for economical shipment to market. It follows that the farmer-patrons at each plant can be paid the f. o. b. market price less the tank-lot transportation cost. This cost increases with distance and is reflected in the form of producer location differentials under the order. The differentials cannot be arbitrarily altered to accommodate the farm-to-plant haulers at a particular plant without inviting uneconomic shifts of milk supplies.

An alternative proposal was offered by Michigan Milk Producers Association. It modified the zone schedule for distances over 51 miles by using a rate increase of 1 cent for each additional 10 miles. This later proposal would set 21-cent and 22-cent rates at the former proponents' plants, but would leave the plants involved at a disadvantage of 2 to 6 cents relative to competitive plants located closer to the marketing area. It was asserted that the recommended lower schedule of rates developed in the alternative proposal was based upon over-all operating experience, but no specific or general cost data were presented which might permit cross-examination or comparison with similar data of other handlers in the market.

Both proposals for changing the location adjustment schedule contained a provision to extend the rate schedule without limit, replacing the present provision establishing a maximum differential of 26 cents applicable to all locations beyond 137 miles from Detroit City Hall. Subsequent to the amendment setting 137 miles rather than 97 miles as the distance beyond which the differential ceased to increase, one plant situated 165 miles from the City Hall has been added to the market supply, and additional prospective plants are located at distances of 175 and 247 miles. Handlers shipping milk from these greater distances should receive location credits commensurate with the extra transportation costs involved on milk moved to the marketing area for Class I purposes. Also, producers delivering to such distant plants should not receive as large a rate of return from the marketwide pool as producers located closer to market since their milk is available to the market only at a higher transportation cost. To properly price milk at the more distant locations, the present rate of 1 cent per each additional 8 miles should progress in like manner to include any distance at which a handler's plant may be qualified.

Handlers whose plants are located within the marketing area but more than 34 miles from Detroit City Hall repeated the proposal originally made at the promulgation hearing to the effect that a location adjustment be allowed on milk received from producers at such plant and disposed of as Class I.

No testimony was offered by way of exception to the original basis for denying this proposal, namely that all portions of the marketing area are dependent upon the entire production area for a year around supply of milk and that the prices necessary to attract an adequate supply of milk for the entire area should apply to all parts of the area.

Further, testimony and questions at the hearing showed that the proposal would create substantial differences in the cost of milk between handlers distributing in the same territories. Two handlers whose principal sales are in the Ypsilanti and Ann Arbor area would not receive the proposed location credit because their plants are located slightly less than 34 miles distant from Detroit City Hall. Also, a handler whose plant is located in Detroit and who distributes significant volumes of milk in the same territory as one of the proponents would not receive the credit.

The proposed change in the method of establishing the Class II price which was considered at the hearing would extend the credit allowed on butterfat and skim milk manufactured into butter and nonfat dry milk solids to all months of the year instead of confining it to April, May, and June. A similar proposal was considered at the hearing of February 20, 1953. The record of that hearing and the decision filed by the Secretary July 24, 1953 were incorporated in the current record.

The significantly new aspect of the problem considered at the July hearing was a suggestion by one of the proponents that butterfat and skim milk used to manufacture butter and nonfat dry milk solids should always be priced at a butter-powder formula price, regardless of whether such price were above or below the local plant price. This modification of the proposal was advanced in response to questions; it was not included in the notice of hearing nor in the direct testimony of any proponent of the proposal for extending the period of applicability of the butter-powder credit.

It was stated that the modification should be adopted only if the "make allowance" in the currently effective butter-powder credit was increased to reflect operating costs. The make allowance was considered at the previous hearing and a review of that record and of the current record do not alter the previous conclusions regarding the make allowance.

One other aspect of the proposed modification merits attention. Many handlers dispose of all or a portion of their Class II milk by selling it to unregulated manufacturing plants. Some of these are equipped to manufacture butter and nonfat dry milk solids. However, whether they are specialized butter-powder plants or multi-purpose plants, it is not to be expected that they will pay significantly more than the competitive price for milk. Therefore it is unlikely that a regulated handler would be able to obtain a butter-powder price for Class II milk shipped to such a plant for conversion into butter and nonfat solids in periods like the past several months when butter-powder values have been substantially in excess of condensery pay prices. This would create a serious limitation on the ability of some handlers to dispose of Class II milk.

Handlers' proposals for a transportation credit on Class II milk necessarily moved to a manufacturing plant were also considered at the hearing of February 20, 1953, and the conclusions previously reached are applicable to the additional evidence received at the recent hearing.

(6) *Base rules.* The base rules should be revised to provide that: (1) A producer who delivers milk on less than 122 days during the base-forming period (but who does not lose his base by reason of failure to deliver for 45 consecutive days) shall have a daily base beginning on the following February 1 equal to his total deliveries of milk divided by 122; (2) bases may be combined jointly upon formation of a bona fide partnership, and jointly held bases may, upon termination of the joint holding, be divided among the joint holders as specified in writing to the market administrator without requiring that the transfer be to a person who maintains a herd on the same farm; (3) a producer who stands to lose his base as a result of fire or windstorm damage of sufficient destructiveness to result in loss of the health permit shall retain his old base for a period not to exceed 6 months; and (4) notification of intention to establish a new base may specify the month, the first day of which is to begin the base-forming period; however the day will be not earlier than the first day of the months in which the notification of intention is received by the market administrator.

The order now provides for a base, to begin on the following February 1, for any producer who delivers milk on as many as 122 days during the base-forming period of August through December. However, a producer who delivers on fewer days has no base and is paid a base price on specified percentages which vary seasonally until he has completed the 3 months' shipments which establish a new base. It is logical that such a producer be allowed a base, to become effective on the following February 1, equal to his deliveries during the base-forming months divided by 122. As an alternative, a producer continues to have the option of establishing a new base during a 3-month period.

The rules presently applicable to joint holdings of bases require that any transfer of base upon termination of the joint relationship be only to persons who maintain a herd on the same farm. In all other respects the base rules are in terms of the producer's identity rather than the location of the producer's herd or farm, and it is desirable to allow jointly held bases to be divided between the holders in any acceptable way agreed to by them. Also, a rule should be inserted to permit the combining of bases upon the formation of bona fide partnerships.

The provision for loss of base upon the producer's failure to deliver milk for 45 consecutive days should be modified in the case of producers who suffer a complete loss as a result of fire or windstorm. It was proposed that such a producer be allowed to keep his old base for one year, but it appears that a period of 6 months should be sufficient to accommodate any producer who takes prompt action to restore his barn, even allowing for delays resulting from winter weather. It was testified that completeness of loss could be objectively measured by revocation of the producer's health permit.

In practice, producers are able in some instances to notify the market administrator of intention to establish a new base farther in advance than is contemplated by the order language. Obviously, they should be allowed to do so; the essential limit on such notification is that it not be received after the close of the first month in which the new base is to be established.

(7) *Administrative provisions.* The several administrative changes proposed by the Dairy Branch, Production and Marketing Administration, should be adopted.

The skim milk equivalent of concentrated fluid products should be specifically defined as Class I utilization. One type of these "concentrated products" is made by partial evaporation of fluid skim milk. The original skim milk is obtained from sources approved for fluid use and the producers supplying such skim milk should receive a Class I price for the original weight of skim milk rather than for the weight of the concentrated product. A second type of concentrated products is made adding condensed skim milk or nonfat dry milk solids to such Class I items as fluid skim milk, buttermilk, and chocolate drink. The health regulations require that handlers in the Detroit market draw upon producer milk for these additional solids, and the skim milk equivalent should be classified as Class I. In accounting for the additional solids, the skim milk equivalent is listed as a receipt of other source milk. Under the allocation procedure such a receipt is subtracted first from any Class II utilization by the handler, thereby raising the classification of an equivalent quantity of producer skim milk from Class II to Class I.

The definition of Class II utilization should be modified to account for the skim milk and butterfat in sterilized flavored milk drinks on a "used to produce" basis rather than on a "disposed of as" basis. The milk furnished to a plant making such drinks can be accounted for readily whereas the ultimate disposition of the drinks is not part of the dairy enterprise sales records.

The Class II definition should also be revised to specify the fat content which constitutes the demarcation between milk and cream, that dumping of skim milk be subject to specific authorization by the market administrator, that dumping be eliminated as a Class II disposition of butterfat, and that eggnog be designated as a Class II utilization. The dividing line used to distinguish between milk and cream has been to consider as "milk" all items testing less than 10 percent butterfat and as "cream" those containing 10 percent or more of fat. Dumping can be verified only by witnessing the action, since no independently verifiable record is available for audit purposes. There is no longer any need to include butterfat as a dumping utilization since Class I and Class II butterfat prices are now identical. Eggnog was not originally named as a Class II utilization but, since the ingredients can be obtained from uninspected sources which are available at the Class II level of prices, eggnog should properly be classified as Class II.

The provision for transferring milk in bulk from a cooperative plant to a handler's bottling plant at the base price should not be limited to cooperative plants from which no milk is disposed of on a route(s) in the marketing area since the limitation is not an essential element of such accounting.

Any amount due to the pool on other source milk used as Class I should be part of each handler's regular settlement with the pool rather than treated as a separate payment to the producer equalization fund later in the month. The final payment by the handlers and amount received by producers would not be affected by the change. However, since the quantities of other source milk utilized as Class I are already known as part of the handler's utilization reports which are submitted on the fifth working day of each month, payments on such milk can be most expeditiously handled as part of the regular settlement procedure.

For purely administrative reasons the location adjustment credit should apply to the handler operating a distributing plant rather than to the handler operating a country supply plant from which milk is supplied to distributing plants. The credit is allowed only on milk actually utilized as Class I. The supply plant must obtain such information from the distributing plant receiving the milk. Frequently several distributing plants receive milk from a single supply plant and vice versa, and any change in utilization at the distributing plant which may be revealed by audit involves corresponding changes in location adjustment credits. The proposed change would obviate these several difficulties and thereby facilitate both the accounting procedures under the order and the arrangements between supply plants and distributing plants.

The amount to be deducted in computing the uniform price and the uniform base price for use as a revolving fund in the producer-equalization fund should be raised to between 6 and 7 cents instead of the current provision of between 4 and 5 cents. This provides a revolving fund since not less than half the unobligated balance in the producer-equalization fund is added to the computation of the value of producer milk each month. The larger revolving fund is necessary to cover the normal lag between payments and receipts in this market.

*General findings.* (a) The proposed marketing agreement and the order and all of the terms and conditions thereof will tend to effectuate the declared policy of the act;

(b) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply of and demand for milk in the marketing area, and the minimum prices specified in the proposed marketing agreement and the order are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The proposed order will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held.

*Rulings on proposed findings and conclusions.* Briefs were filed on behalf of producers and handlers. The briefs contained proposed findings of fact, conclusions and argument with respect to the proposals discussed at the hearing. Every point covered in the briefs was carefully considered along with the evidence in the record in making the findings and reaching the conclusions hereinbefore set forth. To the extent that such suggested findings and conclusions contained in the briefs are inconsistent with the findings and conclusions contained herein the request to make such findings or to reach such conclusions are denied on the basis of the facts found and stated in connection with the conclusions in this decision.

*Recommended marketing agreement and order as amended.* The following amendments to the order, as amended, are recommended as the detailed and appropriate means by which the foregoing conclusions may be carried out. The proposed marketing agreement is not included because the regulatory provisions thereof would be the same as those contained in the order, as amended, and as proposed to be further amended:

1. In § 924.6 (b) delete the phrase "or of Wayne County".

2. Add a paragraph "(c)" to § 924.6 as follows:

(c) A cooperative association with respect to milk customarily received by a handler, as described under paragraphs (a) or (b) of this section, which is diverted to a person not a handler for the account of the association.

3. In § 924.41 (a) insert following the phrase "all skim milk" the following: "(including the skim milk equivalent of concentrated products)".

4. Amend § 924.41 (b) to read as follows:

(b) Class II utilization shall be all skim milk and butterfat (1) disposed of

for fluid consumption as sweet or sour cream or any mixture of cream and milk or skim milk containing 10 percent or more of butterfat; (2) used to produce sterilized flavored milk drinks, ice cream or ice cream mix, cheese (including cottage cheese), dried whole milk, nonfat dry milk solids, evaporated or condensed whole or skim milk, sweetened or unsweetened, disposed of in bulk or in hermetically sealed cans, eggnog, butter; (3) disposed of as livestock feed or skim milk dumped subject to prior notification to and inspection (at his discretion within 18 hours) by the market administrator; (4) in shrinkage of producer milk up to 2 percent of receipts from producers; or (5) in shrinkage of other source milk.

5. In § 924.43 (c) delete the phrase "from which no milk is disposed of on a route(s) in the marketing area."

6. In § 924.46 (a) change the reference to "§ 924.41 (c) (3)" to read "§ 924.41 (b) (4)".

7. In § 924.60 (a) change the phrase "Subject to paragraps (c)" to read "Subject to paragraphs (b) and (c)" and change the reference to "§ 924.46 (c)" to read "§ 924.46 (e)."

8. Amend § 924.60 (c) to read as follows:

(c) A handler who operates a plant as described in § 924.6 (b) (or § 924.6 (a) and located more than 34 miles by shortest highway distance from the boundary of the market area) and who dispose of, from such plant for Class I utilization (other than to a handler), milk received from producers, and a handler who receives at a plant described in § 924.6 (a) producer milk moved in bulk from a plant described in § 924.6 (b) which milk is utilized as Class I (prorating to such milk the utilization of all producer milk received at the plant) shall receive a credit with respect to milk so disposed of or so received and utilized at a rate determined by the market administrator as follows:

| Shortest road distance from Detroit City Hall: | Rate per hundredweight |
|---|---|
| More than 34 miles but not more than 49 miles | $0.14 |
| More than 49 miles but not more than 57 miles | .15 |

Add 1 cent for each 8 miles or fraction thereof over 57 miles.

9. Amend § 924.62 (b) to read as follows:

(b) Subtracting not less than 6 cents nor more than 7 cents.

10. In § 924.64 (c) delete the first sentence and substitute therefor the following: "Subtract not less than 6 cents nor more than 7 cents."

11. Add a paragraph (e) to § 924.70 as follows:

(e) A producer who does not forfeit his base pursuant to § 924.71 (c) but who fails to deliver milk on at least 122 days of the August 1 through December 31 period shall have his base for the 12 months beginning the following February 1 computed by dividing the total pounds shipped during the period by 122.

12. Amend § 924.71 (b) (2) to read as follows:

(2) Bases may be held jointly and if such joint holding is terminated the base may be transferred as specified in writing to the market administrator.

13. Add a subparagraph (3) to § 924.71 (b) as follows:

(3) Two or more producers with bases may combine those bases upon the formation of a bona fide partnership.

14. Amend § 924.71 (c) to read as follows:

(c) A producer who does not deliver milk to any handler for 45 consecutive days shall forfeit his base except that a producer who suffers the complete loss of his barn as a result of fire or windstorm may retain his base without loss for six months.

15. In § 924.72 insert after the phrase "first day of the month" the phrase "specified but not earlier than the first day of the month".

16. Delete the period at the end of § 924.10, and add the following: "and shall include the skim milk equivalent of concentrated products classified as Class I pursuant to § 924.41 (a)."

Filed at Washington, D. C., this 20th day of November 1953.

[SEAL] GEORGE A. DICE,
*Deputy Assistant Administrator.*

[F. R. Doc. 53-9956; Filed, Nov. 25, 1953; 8:52 a. m.]

## [ 7 CFR Part 927 ]

[Docket No. AO-71-A-26]

### HANDLING OF MILK IN NEW YORK METROPOLITAN MILK MARKETING AREA

### DECISION WITH RESPECT TO PROPOSED MARKETING AGREEMENT AND PROPOSED ORDER AMENDING ORDER, AS AMENDED

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and marketing orders (7 CFR Part 900), a public hearing was conducted, beginning at Utica, New York on November 18, 1952, pursuant to notice thereof issued on November 10, 1953 (18 F. R. 7249) upon proposed amendments to the tentative marketing agreement and to the order, as amended, regulating the handling of milk in the New York metropolitan milk marketing area.

The material issues presented on the record of the hearing are concerned with:

1. Amendment of the order so that the computation of prices established for Class I–A milk for the month of December 1953 and subsequent months will not reflect the reduction in the volume of milk utilized for fluid use (in Classes I–A, I–B, and I–C) during October 1953 resulting from a strike of dairy plant employees and drivers, and

2. The need for prompt action necessitating omission of a recommended decision and opportunity for exceptions.

*Findings and conclusions.* The following findings and conclusions on the material issues are based upon the evidence in the record of the hearing:

(1) It is concluded that § 927.40 (a) of the order should be amended to prevent the distortion in Class I–A prices for December 1953 and ensuing months which otherwise would occur a a result of a strike of dairy plant employees and drivers which occurred during the last week of October 1953.

The strike resulted in the utilization of approximately 32 million fewer pounds of October pool milk in fluid form (Classes I–A, I–B, and I–C) than reasonably may be expected to have been so utilized if there had been no strike. The percentage of October pool milk reported by handlers to have been utilized in Classes I–A, I–B, and I–C was 54.7. Addition of the additional 32 million pounds, which it is estimated would have been so utilized if the strike had not occurred, results in a utilization percentage for October of 60.5.

This latter figure (60.5) is the utilization percentage for October 1953 which should be used in calculating monthly prices for Class I–A milk beginning with the price for December 1953 pursuant to the Class I–A pricing formula contained in the order. The reduction in the sale of Class I milk which occurred during the period of the strike is the result of an abnormal market situation which the Class I–A pricing formula is not designed to reflect. Use of the actual utilization percentage under these circumstances in computing Class I–A prices for December and ensuing months would tend not to reflect supply and demand conditions in the market accurately.

(2) The due and timely execution of the function of the Secretary under the act with respect to action on Issue No. 1 imperatively and unavoidably requires the omission of a recommended decision by the Assistant Administrator, Production and Marketing Administration, and the opportunity for exceptions thereto.

Failure to make the attached amendment order effective by not later than December 1, 1953 would defeat, to a significant degree, the purpose of such amendment. The preparation, filing and publication of a recommended decision, with opportunity for exceptions thereto would preclude the making of such amendment effective by December 1, 1953 because of the time necessarily required for completion of such procedural steps. Accordingly, those procedural steps should be omitted in this instance.

*General findings.* (a) The proposed marketing agreement and the order, as amended, and as hereby proposed to be further amended, and all of the terms and conditions thereof will tend to effectuate the declared policy of the act;

(b) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supply of and demand for milk in the marketing area and the minimum prices specified in the proposed marketing agreement and the order, as amended, and as hereby proposed to be further amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The proposed marketing agreement and the order, as amended and as hereby proposed to be further amended, will regulate the handling of milk in the same manner as, and are applicable only to persons in the respective classes of industrial and commercial activity specified in the said marketing agreement upon which a hearing has been held.

*Determination of representative period.* The month of July 1953 is hereby determined to be the representative period for the purpose of ascertaining whether the issuance of the order, amending the order, now in effect, regulating the handling of milk in the New York metropolitan milk marketing area, in the manner set forth in the attached amending order is approved or favored by producers who, during such period, were engaged in the production of milk for sale in the marketing area.

*Marketing agreement and order.* Annexed hereto and made a part hereof are two documents entitled "Marketing Agreement Regulating the Handling of Milk in the New York Metropolitan Milk Marketing Area" and "Order Amending the Order, as Amended Regulating the Handling of Milk in the New York Metropolitan Milk Marketing Area" which have been decided upon as the appropriate and detailed means of effectuating the foregoing conclusions. These documents shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders have been met.

*It is hereby ordered*, That all of this decision, except the attached marketing agreement, be published in the FEDERAL REGISTER. The regulatory provisions of said marketing agreement are identical with those contained in the attached order amending the order, as amended, which will be published with the decision.

This decision filed at Washington, D. C., this 23d day of November 1953.

[SEAL] TRUE D. MORSE,
*Secretary of Agriculture.*

Order[1] *Amending the Order, as Amended, Regulating the Handling of Milk in the New York Metropolitan Milk Marketing Area*

§ 927.0 *Findings and determinations.* The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of each of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order, as amended, regulating the handling of milk in the New York metropolitan milk marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order, as amended, and as hereby further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The parity prices of milk as determined pursuant to § 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the marketing area and the minimum prices specified in the said order, as amended, and as hereby further amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order, as amended, and as hereby further amended, regulates the handling of milk in the same manner as and is applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held.

*Order relative to handling.* It is therefore ordered that on and after the effective date hereof, the handling of milk in the New York metropolitan milk marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as amended and as hereby further amended; and the aforesaid order, as amended, is hereby further amended as follows:

1. Amend § 927.40 (a) by adding at the end of the first sentence thereof the following proviso: "*Provided*, That the utilization percentage for the month of October 1953 used in making such computations shall be 60.5."

[F. R. Doc. 53-9966; Filed, Nov. 25, 1953; 8:55 a. m.]

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and orders have been met.

---

[Docket No. AO-173-A6]

### HANDLING OF MILK IN WICHITA, KANSAS, MARKETING AREA

### SUPPLEMENTAL NOTICE OF HEARING ON PROPOSED AMENDMENTS TO TENTATIVE MARKETING AGREEMENT AND TO ORDER

Notice was issued on September 18, 1953 (18 F. R. 5630), of a public hearing to be held on October 7, 1953, at the Allis Hotel, Wichita, Kansas, on certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Wichita, Kansas, marketing area. At the hearing, testimony was received on some of the proposals, and the hearing was recessed to resume at 10:00 a. m., c. s. t., December 1, 1953, at the Allis Hotel, Wichita, Kansas.

Notice is hereby given, pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), that, in addition to the proposed amendments contained in the notice of September 18, 1953, evidence will also be received at the resumed hearing with respect to the proposed amendments hereinafter set forth (which are in part modifications of proposals contained in the original hearing notice) or appropriate modifications thereof. Such additional proposed amendments have not received the approval of the Secretary.

Additional amendments to the order were proposed as enumerated below.

Proposed by Wichita Milk Producers Association:

13a. Delete §§ 968.3, 968.8, 968.40 through 968.45, 968.50, 968.51, 968.60 through 968.63, 968.70, 968.71, 968.88, and substitute or add as follows:

§ 968.3 *Wichita, Kansas Marketing Area.* "Wichita, Kansas Marketing Area" means all of the territory within the corporate limits of the City of Wichita, Kansas and the territory within Delano, Kechi, Minneha, Riverside, Waco, Gypsum and Wichita Townships, and the City of Eastborough, all in Sedgwick County, Kansas.

§ 968.8 *Pool plant.* "Pool plant" means any approved plant other than that of a producer-handler, (a) during any delivery period within which such plant disposes of as Class I in the marketing area, an amount of milk equal to 25 percent or more of such plant's receipts of milk from approved dairy farmers, and (b) disposes of in Class I an amount equal to 50 percent or more of such plant's receipts of milk from approved dairy farmers.

For the purposes of this definition the following shall apply:

(1) Milk diverted from an approved plant for the account of the handler operating such approved plant shall be considered a receipt at the approved plant from which it was diverted; and

(2) Milk diverted from an approved plant for the account of a cooperative association which does not operate a plant shall be deemed to have been received by such cooperative association at a pool plant.

b. Add a new paragraph (f) to § 968.22 as follows:

(f) On or before the 10th day after the end of each delivery period, report to each cooperative association which so requests (1) the amount and class utilization of milk received by each handler from approved dairy farmers who are members of such cooperative association. For the purpose of this report,

the milk so received shall be prorated to each class in the proportion that total receipts of milk from approved dairy farmers were used in each class; (2) in respect to each member of such cooperative association, the number of days shipped, the amount of delivered base milk, the amount of delivered excess milk, the total delivery of milk, the butterfat test and the amount deducted for marketing service.

§ 968.40 *Skim milk and butterfat to be classified.* All skim milk and butterfat received within the month by a handler and which is required to be reported pursuant to § 968.30 shall be classified by the market administrator pursuant to the provisions of §§ 968.41 to 968.46.

§ 968.41 *Classes of utilization.* Subject to conditions set forth in § 968.43 and 968.44, classes of utilization shall be:

(a) Class I milk shall be all skim milk (including reconstituted skim milk and butterfat (1) disposed of in the form of milk, skim milk, buttermilk, flavored milk, flavored milk drink, yogurt, cream, cultured sour cream, aerated products containing milk or cream, egg nog, any mixture (except bulk ice cream mix) of cream and milk or skim milk, (2) used to produce concentrated (including frozen) milk, flavored milk or flavored milk drink disposed of or for fluid consumption neither sterilized nor in hermetically sealed cans, skim and fat used in creaming cottage cheese and (3) all other skim milk and butterfat not specifically accounted for as Class II milk.

(b) Class II milk shall be all skim milk and butterfat: (1) Used to produce butter, cheese (including skim milk used to produce cottage cheese curd, but not including skim milk or butterfat used in creaming cottage cheese) plain or sweetened condensed or evaporated milk, spray or roller process nonfat dry milk solids, powdered whole milk, ice cream, in ice cream mix, frozen desserts, casein, margarin; (2) in cream frozen and stored; (3) used for starter churning, wholesale baking and candy making; (4) disposed of as livestock feed; (5) in skim milk dumped after prior notification and an opportunity for verification by the market administrator; (6) in shrinkage up to 2 percent of receipts from producers; (7) in shrinkage of other source milk; and (8) in inventory at the end of the month as milk, skim milk, cream (except frozen) or any product specified in paragraph (a) of this section.

§ 968.42 *Shrinkage.* The market administrator shall prorate shrinkage of skim milk and butterfat classified in Class II milk between the receipts of skim milk and butterfat, respectively, in milk from producers and from other sources. For the purpose of prorating shrinkage of skim milk and butterfat, skim milk and butterfat in milk diverted directly from producers' farms to another handler shall be included as a receipt of the handler to whom such skim milk and butterfat was diverted, and excluded from receipts of the diverting handler.

§ 968.43 *Responsibility of handlers and reclassification of milk.* (a) All skim milk and butterfat shall be Class I milk unless the handler who first receives such skim milk or butterfat can prove to the market administrator that such skim milk or butterfat should be classified otherwise.

(b) Any skim milk or butterfat classified as Class II milk shall be reclassified if such skim milk or butterfat is later disposed of by such handler or another handler (whether in original or other form) as Class I milk. Any skim milk or butterfat which was classified as Class II in the previous month pursuant to § 968.41 (b) (7) shall be reclassified as Class I milk if it is subtracted in the current month from Class I pursuant to § 968.46 (a) (4).

§ 968.44 *Transfers.* Skim milk or butterfat transferred from a pool plant shall be classified:

(a) As Class I milk if transferred in the form of milk, skim milk, or cream, to the pool plant of another handler unless utilization in Class II is mutually indicated in writing to the market administrator by the operators of both plants on or before the 7th day after the end of the delivery period within which such transfer occurred: *Provided*, That the skim milk or butterfat so assigned to Class II shall be limited to the amount thereof remaining in Class II in the plant of the transferee-handler after the subtraction of other source milk pursuant to § 968.46, and any additional amounts of such skim milk or butterfat shall be assigned to Class I: *And provided further*, That if either or both plants have received other source milk, the skim milk or butterfat so transferred shall be classified at both plants so as to allocate the greatest possible Class I utilization to producer milk.

(b) As Class I milk if transferred in the form of milk, skim milk, or cream to a producer-handler.

(c) As Class I milk if transferred in the form of milk, skim milk or cream to a nonpool plant located more than 250 miles from the pool plant by the shortest highway distance as determined by the market administrator, except that (1) cream so transferred may be classified as Class II milk if its utilization as Class II milk is established through the operation of another Federal order for another milk marketing area; or (2) cream so transferred with prior notice to the market administrator, and with each container labeled or tagged with a certificate of the transferor that such cream is sold as "Grade C cream for manufacturing only", may be classified as Class II milk, subject to such verification of alternate utilization as the market administrator may make.

(d) As Class I milk, if transferred in the form of milk, skim milk or cream to a nonpool plant located less than 250 miles from the pool plant from which transferred, unless the market administrator is permitted to audit the records of receipts and utilization at such nonpool plant, in which case the classification of all skim milk and butterfat received at such nonpool plant shall be determined and the skim milk and butterfat transferred from the pool plant shall be allocated to the highest use remaining after subtracting, in series beginning with Class I milk, receipts of skim milk and butterfat at such nonpool plant direct from dairy farmers who the market administrator determines constitute the regular source of supply for fluid usage of such nonpool plant in markets supplied by such plant.

(e) Skim milk or butterfat moved from an approved plant to an unapproved plant located not more than 250 miles from the approved plant and which does not distribute fluid milk or cream shall be classified as Class II milk.

(f) Skim milk or butterfat transferred to a nonpool plant from which fluid milk, skim milk or cream is transferred to a pool plant shall be subject to reclassification to the extent of the amount so transferred from such nonpool plant.

§ 968.45 *Computation of the skim milk and butterfat in each class.* For each month, the market administrator shall correct for mathematical and for other obvious errors the report of receipts and utilization submitted by each handler and shall compute the pounds of skim milk and butterfat in Class I and Class II milk for such handler.

§ 968.46 *Allocation of skim milk and butterfat classified.* After making the computations pursuant to § 968.45 the market administrator shall determine the classification of milk received from producers as follows:

(a) Skim milk shall be allocated in the following manner:

(1) Subtract from the total pounds of skim milk in Class II the pounds of skim milk determined pursuant to § 968.41 (b) (5);

(2) Subtract from the remaining pounds of skim milk in each class the pounds of skim milk received from other pool plants in a form other than milk, skim milk or cream according to its classifications pursuant to § 968.41;

(3) Subtract from the remaining pounds of skim milk, in series beginning with Class II, the pounds of skim milk in receipt of other source milk;

(4) Subtract from the remaining pounds of skim milk in series beginning with Class II, the pounds of skim milk in inventory at the beginning of the month in the form of milk, skim milk, cream (except frozen) or any product specified in § 968.41 (a);

(5) Subtract from the remaining pounds of skim milk in each class the skim milk received from other handlers in the form of milk, skim milk or cream according to its classification as determined pursuant to § 968.44 (a);

(6) Add to the remaining pounds of skim milk in Class II the pounds of skim milk subtracted pursuant to subparagraph (1) of this paragraph; and

(7) If the remaining pounds of skim milk in both classes exceed the pounds of skim milk received from producers subtract such excess from the remaining pounds of skim milk in series beginning with Class II milk. Any amount to be subtracted shall be called "overage".

(b) Butterfat shall be allocated in accordance with the same procedure outlined for skim milk in paragraph (a) of this section.

(c) Determine the weighted average butterfat content of the Class I and Class II milk computed pursuant to paragraphs (a) and (b) of this section.

§ 968.50 *Basic formula price to be used in determining Class I prices.* The basic formula price to be used in determining the price per hundredweight of Class I milk shall be the highest of the prices computed pursuant to paragraphs (a) and (b) of this section.

(a) The average of the basic or field prices per hundredweight reported to have been paid or to be paid for milk of 3.5 percent butterfat content received from farmers during the month at the following plants or places for which prices have been reported to the market administrator or to the Department divided by 3.5 and multiplied by 3.8:

*Present Operator and Location*

Borden Co., Mount Pleasant, Mich.
Carnation Co., Sparta, Mich.
Pet Milk Co., Hudson, Mich.
Pet Milk Co., Wayland, Mich.
Pet Milk Co., Coopersville, Mich.
Borden Co., Greenville, Wis.
Borden Co., Black Creek, Wis.
Borden Co., Orfordville, Wis.
Borden Co., New London, Wis.
Carnation Co., Chilton, Wis.
Carnation Co., Berlin, Wis.
Carnation Co., Richland Center, Wis.
Carnation Co., Oconomowoc, Wis.
Carnation Co., Jefferson, Wis.
Pet Milk Co., New Glarus, Wis.
Pet Milk Co., Belleville, Wis.
White House Milk Co., Manitowoc, Wis.
White House Milk Co., West Bend, Wis.

(b) The price per hundredweight computed by adding together the plus values pursuant to subparagraphs (1) and (2) of this paragraph:

(1) From the simple averages as computed by the market administrator, of the daily wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk creamery butter per pound at Chicago as reported by the Department during the month, subtract 3 cents, add 20 percent thereof and multiply by 3.8.

(2) From the simple average, as computed by the market administrator, of the weighted averages of carlot price per pound for nonfat dry milk solids, spray, and roller process, respectively, for human consumption, f. o. b. manufacturing plants in the Chicago area, as published for the period from the 26th day of the immediately preceding month through the 25th day of the current month by the Department, deduct 5.5 cents, multiply by 8.5, and then multiply by 0.962.

§ 968.51 *Class prices.* Subject to the provisions of § 968.52, the minimum prices per hundredweight to be paid by each handler for milk received at his plant from producers during the month shall be as follows:

(a) *Class I milk.* The price per hundredweight shall be the price determined pursuant to § 968.50 plus $1.90.

(b) *Class II milk.* The price per hundredweight shall be a price computed pursuant to § 968.50 (b) using prices for butter and nonfat dry milk solids for the current delivery period minus 20 cents.

§ 968.52 *Butterfat differentials to handlers.* If the average butterfat content of the milk of any handler allocated to either class pursuant to § 968.46 is more or less than 3.8 percent there shall be added to the respective class price computed pursuant to § 968.51 for each one-tenth of 1 percent that the average butterfat content of such milk is above 3.8 percent, or subtracted for each one-tenth of 1 percent that such average butterfat content is below 3.8 percent, an amount equal to the butterfat differential computed as follows:

(a) For Class I milk, multiply the butter price specified in § 968.50 (b) (1) by 1.25 and divide the result by 10;

(b) For Class II milk, multiply the butter price specified in § 968.50 by 1.15 and divide the result by 10.

§ 968.60 *Producer-handlers.* (a) Sections 968.40 to 968.46, 968.50 to 968.52, 968.70 to 968.71, 968.80 to 968.88, shall not apply to a producer-handler.

(b) *Other source milk.* If a handler has purchased or received skim milk or butterfat from a producer-handler, or from sources other than producers or other handlers, and has sold or disposed of such skim milk or butterfat for other than Class II purposes, the market administrator in determining the net pool obligation of the handler pursuant to § 968.70 shall add an amount equal to the difference between (1) the value of such milk and butterfat according to its utilization by the handler and (2) the value at the Class II price. The provisions of this section shall not apply if the handler can prove to the market administrator that such skim milk and butterfat was used only to the extent that skim milk and butterfat from producers was not available either directly from producers or at the plant of another handler at the class prices pursuant to §§ 968.51 and 968.52.

§ 968.61 *Handlers subject to other orders.* In the case of any handler who the Secretary determines disposes of a greater portion of his milk as Class I milk in another marketing area regulated by another milk marketing agreement or order issued pursuant to the act, the provisions of this order shall not apply except as follows:

(a) The handler shall, with respect to his total receipts of skim milk and butterfat, make reports to the market administrator at such time and in such manner as the market administrator may require and allow verification of such reports by the market administrator.

(b) If the price which such handler is required to pay under the other Federal order to which he is subject, for skim milk and butterfat which would be classified as Class I milk under this order is less than the price provided by this order, such handler shall pay to the market administrator for deposit into the producer-settlement fund (with respect to all skim milk and butterfat disposed of as Class I milk within the marketing area) an amount equal to the difference between the value of such skim milk or butterfat as computed pursuant to this order and its value as determined pursuant to the other order to which he is subject. Such payments shall be made on or before the 12th day after the end of each delivery period.

§ 968.63 *Handler operating an approved plant which is not a pool plant.* Each handler who operates an approved plant which is not a pool plant during a delivery period, shall in lieu of the payments required pursuant to §§ 968.80 through 968.85, pay to the market administrator, for the producer-settlement fund, on or before the 25th day after the end of such delivery period, the amount resulting from the computations of either paragraph (a) or paragraph (b) of this section, whichever is less.

(a) From the value determined by multiplying the amount of milk disposed of in the marketing area by such handler as Class I milk during the delivery period by the Class I price determined pursuant to § 968.51 (a) subtract the amount determined by multiplying such amount of milk by the Class II price determined pursuant to § 968.51 (b).

(b) Any plus amount resulting from the following computation:

(1) To an amount equal to the net pool obligation which would be computed pursuant to § 968.70 for such handler for such delivery period if such handler operated a pool plant, add for each one-tenth by which the average butterfat content of milk received from approved dairy farmers by such handler is greater than 3.8 percent, or subtract for each one-tenth percent that such average butterfat content is less than 3.8 percent, an amount computed by multiplying the butterfat differential computed pursuant to § 968.82 by the total hundredweight of such milk; and

(2) Deduct the gross payments made by such handler to approved farmers for milk received during such delivery period.

§ 968.70 *Computation of the value of milk received from producers by each handler at pool plants.* The value of milk received during each delivery period by each handler from producers at pool plants shall be a sum of money computed as follows:

(a) Multiply the pounds of milk in each class computed pursuant to § 968.46 (c) by the applicable respective class prices (adjusted pursuant to § 968.52) and add together the resulting amounts;

(b) Add an amount computed by multiplying the pounds of overage deducted from each class pursuant to § 968.46 (a) (5) by the applicable respective class prices;

(c) Add any charges computed as follows:

(1) For any skim milk or butterfat in inventory reclassified pursuant to § 968.43 (b) which is not in excess of the quantity in producer milk classified as Class II milk (other than as shrinkage) in the handler's plant(s) for the preceding month, a charge shall be computed at the difference between its value at the Class I price for the current month

and its value at the Class II price of the preceding month;

(2) For any other skim milk or butterfat reclassified pursuant to § 968.43 (b) a charge shall be computed at the difference between its value at the Class I price for the current months and its value at the Class II price for the month in which previously classified as Class II milk;

(d) For any other source skim milk or butterfat subtract from Class I milk pursuant to § 968.46 (a) (2), (3) and (b), add an amount equal to the difference between the values of such skim milk and butterfat at the Class I price and at the Class II price, unless the handler can prove to the satisfaction of the market administrator that such other source skim milk and butterfat was used only to the extent that producer milk was not available either directly from producers or at the plant of another handler at the class prices pursuant to § 968.51 (a) and (b).

§ 968.71 *Computation of uniform prices for base milk and excess milk.* For each delivery period, the market administrator shall compute the uniform prices per hundredweight for base milk and excess milk as follows:

(a) Combine into one total the values computed pursuant to § 968.70 for all handlers who made the reports prescribed in § 968.30 and who made the payments pursuant to §§ 968.80 and 968.83 for the preceding month:

(b) Add an amount equal to one-half of the unobligated balance in the producer-settlement fund;

(c) Subtract if the average butterfat content of the milk included in these computations is greater than 3.8 percent; or add if such average computed by multiplying the amount by which the average butterfat content of such milk varies from 3.8 percent by the butterfat differential computed pursuant to § 968.82 and multiplying the resulting figure by the total hundredweight of such milk;

(d) Compute the total value on a 3.8 percent butterfat basis of the excess milk included in these computations by multiplying the hundredweight of such milk not in excess of the total quantity Class II milk included in these computations by the price of Class II milk of 3.8 percent butterfat content, multiplying the hundredweight of such milk in excess of the total hundredweight of such Class II milk by the price of Class I milk of 3.8 percent butterfat content and adding together the resulting amounts;

(e) Divide the total value of excess milk obtained in paragraph (d) of this section by the total hundredweight of such milk and adjust to the nearest cent. The resulting figure shall be the uniform price for excess milk of 3.8 percent butterfat content received from producers;

(f) Subtract the value of excess milk obtained in paragraph (d) of this section from the value of all milk obtained in paragraph (c) of this section and adjust by any amount involved in adjusting the uniform price of excess milk to the nearest cent;

(g) Divide the amount obtained in paragraph (f) of this section by the total hundredweight of base milk included in these computations;

(h) Subtract not less than 4 cents nor more than 5 cents from the amount computed pursuant to paragraph (g) of this section. The resulting figure shall be the uniform price for base milk of 3.8 percent butterfat content received from producers.

§ 968.88 *Expense of administration.* As his prorata share of the expense of administration of this part, each handler shall pay to the market administrator on or before the 12th day after the end of each month, 4 cents per hundredweight, or such amount not exceeding 4 cents per hundredweight as the Secretary may prescribe, with respect to all receipts within the month of (a) other source milk which is classified as Class I milk, and (b) all milk from approved dairy farmers which is classified Class I.

Proposed by Beatrice Foods Co., Steffen Dairy Foods Company, Inc., DeCoursey Cream Company and Hyde Park Dairies, Inc.:

14. That the entire order be amended to read as follows:

DEFINITIONS

§ 968.1 *Act.* "Act" means Public Act No. 10, 73d Congress, as amended and as re-enacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended.

§ 968.2 *Secretary.* "Secretary" means the Secretary of Agriculture or any officer or employee of the United States who is authorized to exercise the powers and to perform the duties of the Secretary of Agriculture.

§ 968.3 *Wichita, Kansas, Marketing Area.* "Wichita, Kansas, marketing area" means all the territory within the corporate limits of the City of Wichita, Kansas, and the territory within Delano, Kechi, Minneha, Riverside, Waco, Gypsum, Park, Payne and Wichita Townships, and the City of Eastborough, all in Sedgwick County, Kansas.

§ 968.4 *Person.* "Person" means any individual, partnership, corporation, association, or any other business unit.

§ 968.5 *Approved dairy farmer.* "Approved dairy farmer" means any person who holds a currently valid permit or license issued by the Health Department of the City of Wichita or of Sedgwick County for the production of milk to be disposed of as Grade "A" milk.

§ 968.6 *Producer.* "Producer" means any approved dairy farmer, other than a producer-handler, whose milk is received at a pool plant or is diverted from a pool plant by the handler who operates such pool plant, or by a cooperative association, to a plant which is not a pool plant for the account of such handler or cooperative association. This definition shall not include any approved dairy farmer with respect to milk received by a handler who is partially exempted from the provisions of this order pursuant to § 968.62.

§ 968.7 *Approved plant.* "Approved plant" means any plant approved by the health authorities of the City of Wichita, Kansas or of Sedgwick County, Kansas, for the handling of milk to be disposed of for fluid consumption as milk in the marketing area and currently used for any or all of the functions of receiving, weighing (or measuring), sampling, cooling, pasteurizing or other preparation of milk for sale or disposition as milk or cream for fluid consumption in the marketing area.

§ 968.8 *Pool plant.* "Pool plant" means any approved plant other than that of a producer-handler.

(a) That during any delivery period within which such plant disposes of as Class I milk in the marketing area, an amount of milk equal to 20 percent or more of such plant's receipts of milk from approved dairy farmers, and

(b) Disposed of as Class I milk, a total amount of milk equal to 40 percent or more of such plant's total receipts of milk from approved dairy farmers, during such delivery period.

(c) For the purposes of this definition, the following shall apply:

(1) Milk diverted from an approved plant for the account of the handler operating such approved plant shall be considered a receipt at the approved plant from which it was diverted; and

(2) Milk diverted from an approved plant to an unapproved plant for the account of a cooperative association which does not operate a plant shall be deemed to have been received by such cooperative association at a pool plant.

§ 968.9 *Handler.* "Handler" means any person who, on his own behalf or on behalf of others, disposes of as Class I or Class II milk in the marketing area all or a portion of the milk purchased or received by him at an approved plant from (a) approved dairy farmers, (b) his own production, and (c) other handlers. This definition shall include a cooperative association with respect to milk which it causes to be delivered from a producer to a plant from which no milk is disposed of as Class I milk or as Class II milk in the marketing area.

§ 968.10 *Cooperative association.* "Cooperative association" means any cooperative association of producers which the Secretary determines:

(a) To have its entire activities under the control of its members, and

(b) To have and to be exercising full authority in the sale of milk of its members.

§ 968.11 *Producer-handler.* "Producer-handler" means any approved dairy farmer who operates an approved plant, but who receives no milk from other approved dairy farmers.

§ 968.12 *Delivery period.* "Delivery period" means the then current marketing period from the first to, and including, the last day of each month.

§ 968.13 *Milk product.* "Milk product" means any product manufactured from milk or milk ingredients except products which fall within the definition of Class II milk pursuant to paragraph (b) of § 968.41 and which are disposed of in the form in which received without further processing or packaging by the handler.

§ 968.14 *Market administrator.* "Market administrator" means the person designated pursuant to § 968.20 as the agency for the administration of this part.

§ 968.15 *Exempt milk.* "Exempt milk" means any skim milk or butterfat which is received at a pool plant:

(a) In bulk from a non-pool plant for processing and bottling, and for which an equivalent quantity of packaged milk is returned to the operator of the non-pool plant during the same month; or

(b) In packaged form from a non-pool plant in return for an equivalent quantity of bulk skim milk or butterfat moved from a pool plant for processing and bottling during the same month.

§ 968.16 *Emergency milk.* "Emergency milk" means skim milk or butterfat other than that in producer milk which is received by a handler under the conditions and subject to the limitations prescribed in § 968.45.

§ 968.17 *Producer milk.* "Producer milk" means any skim milk or butterfat which is produced by a producer, other than a producer-handler, all of which except that used for home consumption, is being regularly shipped to a handler either directly from the producer or from other handlers.

§ 968.18 *Other source milk.* "Other source milk" means any skim milk or butterfat other than that contained in producer milk, emergency milk or exempt milk.

MARKET ADMINISTRATOR

§ 968.20 *Designation.* The agency for the administration of this part shall be a market administrator who shall be a person selected by the Secretary. Such person shall be entitled to such compensation as may be determined by, and shall be subject to removal at, the discretion of the Secretary.

§ 968.21 *Powers.* The market administrator shall:

(a) Administer the terms and provisions of this part, and

(b) Report to the Secretary complaints of violations of the provisions of this part.

§ 968.22 *Duties.* The market administrator shall:

(a) Within 45 days following the date upon which he enters upon his duties execute and deliver to the Secretary a bond, conditioned upon the faithful performance of his duties, in the amount and with surety thereon satisfactory to the Secretary;

(b) Pay out of the funds provided by § 968.88 the cost of his bond, his own compensation, and all other expenses necessarily incurred by him in the maintenance and functioning of his office;

(c) Keep such books and records as will clearly reflect the transactions provided for in this part and surrender the same to his successor or to such other person as the Secretary may designate;

(d) Publicly disclose to handlers and producers, unless otherwise directed by the Secretary, the name of any person

who within 10 days after the date upon which he is required to perform such acts, has not:

(1) Made reports pursuant to §§ 968.30 through 968.32 or

(2) Made payments pursuant to §§ 968.80 through 968.86; and

(e) Promptly verify the information contained in the reports submitted by handlers.

REPORTS, RECORDS AND FACILITIES

§ 968.30 *Periodic reports.* On or before the 7th day after the end of each delivery period each handler, except a producer-handler, shall, with respect to milk or milk products which were purchased, received, or produced by such handler during such delivery period, report to the market administrator in the detail and form prescribed by the market administrator, as follows:

(a) The receipts at each plant of milk from each producer or approved dairy farmer, the butterfat content, and the number of days on which milk was received from each producer;

(b) The receipts of milk, cream, and milk products from handlers who purchase or receive milk from producers or approved dairy farmers and the butterfat content;

(c) The receipts of milk, cream, and milk products received as emergency milk, exempt milk, and other source milk and the butterfat content thereof.

(d) The respective quantities of milk and milk products and the butterfat content which were sold, distributed or used, including sales to other handlers for the purpose of classification pursuant to § 968.40; and

(e) Such other information with respect to the use of the milk as the market administrator may request, including a separate statement of Class I and Class II milk disposed of within the marketing area.

§ 968.31 *Reports of payments.* On or before the 20th day after the end of each delivery period, upon the request of the market administrator, each handler who purchased or received milk from producers or approved dairy farmers shall submit to the market administrator his producer payroll for such delivery period which shall show for each producer and each approved dairy farmer:

(a) His total deliveries of base milk and total deliveries of milk in excess of base milk;

(b) The average butterfat content of his milk; and

(c) The net amount of such handler's payments to such producer or approved dairy farmer with the price, deductions, and charges involved.

§ 968.32 *Reports of producer-handlers.* Each producer-handler shall make reports to the market administrator at such time and in such manner as the market administrator shall require.

§ 968.33 *Verification of reports and payments.* The market administrator shall verify all reports and payments of each handler by audit of such handler's records and of the records of any other handler shall keep adequate records of milk the classification depends. Each handler or person upon whose disposition receipts and utilization of milk and milk products and shall, during the usual hours of business, make available to the market administrator or his representative such records and facilities as will enable the market administrator to:

(a) Verify the receipts and disposition of all milk and milk products, and in case of errors or omissions, ascertain the correct figures;

(b) Weigh, sample, and test for butterfat content the milk purchased or received from producers and any product of milk upon which classification depends; and

(c) Verify the payments to producers prescribed in § 968.80.

§ 968.34 *Retention of records.* All books and records required under this part to be made available to the market administrator shall be retained by the handler for a period of three years to begin at the end of the calendar month to which such books and records pertain: *Provided*, That if, within such three-year periods, the market administrator notifies the handler in writing that the retention of such books and records, or specified books and records, is necessary in connection with a proceeding under section 8c (15) (A) of the act or a court action specified in such notice, the handler shall retain such books and records, or specified books and records, until further written notification from the market administrator. In either case the market administrator shall give further written notification to the handler promptly, upon the termination of the litigation or when the records are no longer necessary in connection therewith.

CLASSIFICATION

§ 968.40 *Skim milk and butterfat to be classified.* All skim milk and butterfat received within the delivery period by a handler which is required to be reported pursuant to § 968.30 shall be classified by the market administrator pursuant to the provisions contained in §§ 968.41 through 968.46.

§ 968.41 *Classes of utilization.* Subject to the conditions set forth in §§ 968.42 through 968.46, the classes of utilization shall be as follows:

(a) Class I milk shall be all skim milk and butterfat disposed of for consumption under a Grade A label in the form of milk, skim milk, buttermilk, flavored milk drinks, cream (sweet or sour, including any mixture of cream and milk or skim milk containing less butterfat than the regular standard for cream), and all skim milk and butterfat contained in shrinkage of producer milk in excess of amount provided for in paragraph (b) (5) of this section.

(b) Class II milk shall be all skim milk and butterfat accounted for:

(1) As having been used to produce any product other than those specified in Class I milk which shall include, but not limited to, butter, plain or sweetened condensed or evaporated milk, spray or roller process powdered milk solids, ice cream, ice cream mix, frozen desserts, eggnog, aerated cream products, any sterilized dairy product, cream, marga-

rine and cheese (including cottage cheese or baked cheese); or

(2) Disposed of for livestock feed; or

(3) In cream frozen and stored; or

(4) In skim milk dumped, after prior notification to and opportunity for verification by the market administrator; or

(5) In shrinkage up to 3 percent of receipts from producers; or

(6) In shrinkage of other source milk; or

(7) Disposed of in bulk to commercial bakeries or food products manufacturing plants (other than dairy plants) which do not dispose of milk for fluid consumption; or

(8) In inventory variations.

§ 968.42 *Shrinkage.* The market administrator shall allocate shrinkage over a handler's receipts as follows:

(a) Plant shrinkage shall be determined by deducting the total of specific uses from the volume handled. The remainder, if it can reasonably be considered to represent the loss or shrinkage in fluid milk products normally incurred by the handler in the receiving, processing, packaging, and distribution of the milk products handled by him, shall be considered his plant shrinkage.

(b) Plant shrinkage shall be prorated between the receipts of skim milk and butterfat in receipts from producers, of emergency milk, of exempt milk and of other source milk.

§ 968.43 *Responsibility of handlers in establishing the classification of milk.* (a) All skim milk and butterfat shall be Class I milk unless the handler who first receives such milk or butterfat can prove to the market administrator that such skim milk or butterfat should be classified otherwise according to the provisions contained in § 968.41 through 968.46.

(b) Any skim milk of butterfat shall be reclassified if verification by the market administrator discloses that the original classification was incorrect according to the provisions contained in §§ 968.41 through 968.46.

§ 968.44 *Transfers.* Milk, skim milk or cream transferred from an approved plant to other milk plants shall be classified as follows:

(a) Milk or skim milk moved in fluid form from an approved plant to an unapproved plant located more than 250 miles from the approved plant shall be Class I milk;

(b) Cream moved in fluid form from an approved plant to an unapproved plant located more than 250 miles from the approved plant shall be Class I milk if moved under Grade A certification and shall be Class II milk if so moved without Grade A certification;

(c) Milk, skim milk, or cream moved in fluid form from an approved plant to an unapproved plant located not more than 250 miles from the approved plant and from which fluid milk and cream are distributed, shall be Class I if moved in the form of milk or skim milk or cream: *Provided*, That if the purchaser certifies that the market administrator may verify the necessary records such milk, skim milk, or cream, shall be classified as follows:

(1) Determine the classification of all milk received in the unapproved plant; and

(2) Allocate the milk, skim milk or cream received from the approved plant to the highest use classification remaining after subtracting, in series beginning with the highest use classification, the receipts of milk at such unapproved plant received directly from dairy farmers whom the market administrator determines constitute its regular source of milk for Class I use;

(d) Milk, skim milk or cream moved from an approved plant to an unapproved plant located not more than 250 miles from the approved plant and which does not distribute fluid milk or cream shall be classified as Class II milk;

(e) Milk, skim milk or cream moved from an approved plant to the approved plant of another handler, except a producer-handler, shall be Class I, unless utilization in another class is indicated in writing by both the seller and the buyer on or before the 7th day after the end of the delivery period, but in no event shall the amount classified in any class exceed the total use in such class by the receiving handler: *Provided*, That if either or both handlers have purchased other source milk, skim milk or cream so moved shall be classified at both plants so as to return the highest class utilization to producer milk.

(f) Milk, skim milk or cream disposed of from an approved plant to a producer-handler shall be Class I.

§ 968.45 *Emergency milk.* In any delivery period in which the market administrator determines that the supply of skim milk or butterfat in producer milk available to any handler at the Class I price is insufficient for such handler's disposition of Class I milk, skim milk or butterfat, other than that in producer milk, which is received by such handler and which is permitted by the health authorities in the marketing area to be disposed of as Grade A milk, shall be considered "emergency milk" up to an amount equal to 5 percent of his total disposition of skim milk or butterfat in Class I milk.

§ 968.46 *Exempt milk.* All receipts of exempt skim milk and butterfat shall be assigned to Class I skim milk and butterfat.

§ 968.47 *Computation of skim milk and butterfat in each class.* For each delivery period the market administrator shall correct for mathematical and other obvious errors the delivery period report submitted by each handler and shall compute the total pounds of skim milk and butterfat, respectively, in each class for such handler.

§ 968.48 *Allocation of skim milk and butterfat classified.* Skim milk and butterfat shall be allocated in the following manner:

(a) Subtract from the total pounds of skim milk and butterfat in Class II the pounds of skim milk and butterfat in shrinkage pursuant to § 968.41 (b) (5).

(b) Subtract from the total pounds of skim milk and butterfat in Class I the pounds of skim milk and butterfat contained in "emergency milk" as set forth in § 968.45.

(c) Subtract from the total pounds of skim milk and butterfat in Class I the pounds of skim milk and butterfat contained in "exempt milk" as set forth in § 968.15.

(d) Subtract from the remaining pounds of skim milk and butterfat in each class the pounds of skim milk and butterfat received from other handlers in a form other than milk, skim milk or cream according to its classification pursuant to § 968.41.

(e) Subtract from the remaining pounds of skim milk and butterfat in Class II the pounds of skim milk and butterfat received as Class II milk in the form of cream from ungraded sources from the approved plant of another handler at which ungraded milk is regularly received from dairy farmers.

(f) Subtract the pounds of skim milk and butterfat in milk, skim milk or cream received from pool plants of other handlers from the pounds of skim milk and butterfat remaining in the class to which assigned, pursuant to § 968.44.

(g) Subtract from the pounds of skim milk and butterfat remaining in Class II milk the pounds of skim milk and butterfat in other source milk which was not subject to the Class I pricing provisions of an order issued pursuant to the act: *Provided*, That if the pounds of skim milk or butterfat to be subtracted is greater than the remaining pounds of skim milk in Class II, the balance shall be subtracted from the pounds of skim milk or butterfat in Class I;

(h) Subtract pro rata from the pounds of skim milk and butterfat remaining in Class I and Class II the pounds of skim milk and butterfat in other source milk which was subject to the Class I pricing provisions of another order issued pursuant to the act;

(i) Add to the pounds of skim milk and butterfat remaining in Class II milk the pounds of skim milk and butterfat subtracted pursuant to paragraph (a) of this section.

(j) If the pounds of skim milk and butterfat remaining in all classes exceed the pounds of skim milk and butterfat in milk received from producers, subtract such excess from the pounds of skim milk and butterfat remaining in the various classes in series beginning with the lowest price class.

§ 968.49 *Determination of producer milk in each class.* For each class add the pounds of skim milk and the pounds of butterfat allocated to producer milk pursuant to § 968.48 and determine the percentage of butterfat in each class.

MINIMUM PRICES

§ 968.50 *Basic formula price.* The basic formula price to be used in determining the price per hundredweight of Class I milk for the delivery period shall be the higher of the prices computed pursuant to paragraphs (a) or (b) of this section.

(a) The average of the basic or field prices per hundredweight reported to have been paid or to be paid for milk of 3.5 percent butterfat content received from farmers during the delivery period at the following plants or places for which prices have been reported to the market administrator or to the Department divided by 3.5 and multiplied by 3.8:

*Present Operator and Location*

Borden Co., Mount Pleasant, Mich.
Carnation Co., Sparta, Mich.
Pet Milk Co., Hudson, Mich.
Pet Milk Co., Wayland, Mich.
Pet Milk Co., Coopersville, Mich.
Borden Co., Greenville, Wis.
Borden Co., Black Creek, Wis.
Borden Co., Orfordville, Wis.
Borden Co., New London, Wis.
Carnation Co., Chilton, Wis.
Carnation Co., Berlin, Wis.
Carnation Co., Richland Center Wis.
Carnation Co., Oconomowoc, Wis.
Carnation Co., Jefferson, Wis.
Pet Milk Co., New Glarus, Wis.
Pet Milk Co., Belleville, Wis.
White House Milk Co., Manitowoc, Wis.
White House Milk Co., West Bend, Wis.

(b) The price per hundredweight computed as follows:

(1) From the simple average, as computed by the market administrator, of the daily wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk creamery butter per pound at Chicago as reported by the Department during the delivery period, subtract 3¢, add 20 percent thereof and multiply by 3.8.

(2) From the simple average, as computed by the market administrator, of the weighted averages of carlot prices per pound of nonfat dry milk solids, spray and roller process, respectively, for human consumption, f. o. b. manufacturing plants in the Chicago area, as published for the period from the 26th day of the preceding month through the 25th day of the current month by the Department, deduct 5.5 cents, and multiply by 8.5 and then multiply by 0.962.

(3) Add together the results of subparagraphs (1) and (2) of this paragraph.

§ 968.51 *Class I milk prices.* Subject to the provisions of § 968.53, a minimum price per hundredweight to be paid by each handler for milk received from his plant by producers during the month and disposed of as Class I milk shall be as follows: To the basic formula price, as determined by § 968.50, as determined during the preceding delivery period for the months of August through March, add $1.55; all other months, add $1.15.

§ 968.52 *Class II prices.* Subject to the provisions of § 968.53, a minimum price per hundredweight to be paid by each handler for Class II milk received at his plant from producers during the month shall be as follows: Determine the average of the basic or field prices per hundredweight reported to have been paid or to be paid for milk of 3.8 percent butterfat content received from farmers during the current delivery period at the following plants or places for which prices have been reported to the market administrator or to the Department.

*Plants and Locations*

DeCoursey Cream Co., Wichita, Kans.
Arkansas City Cooperative Milk Association, Arkansas City, Kans.
Pet Milk Co., Iola, Kans.
Page Milk Co., Coffeyville, Kans.

§ 968.53 *Handler butterfat differential.* If the average butterfat test of Class I milk or Class II milk is calculated pursuant to § 968.49 and is more or less than 3.8 percent, there shall be added to, or subtracted from, as the case may be, the price for such class of utilization for each one-tenth of one percent that such average butterfat test is above or below 3.8 percent is calculated as follows: Multiply by 0.120 the average of the daily wholesale prices (using the midpoint of any price range as one price) of 92-score bulk creamery butter per pound at Chicago as reported by the Department of Agriculture during the previous delivery period and round to the nearest one-tenth cent.

§ 968.54 *Emergency price provision.* (a) Whenever the provisions of this part require the market administrator to use a specific price or prices for any milk product for the purpose of determining class prices or for any other purpose, the market administrator shall add to the specific price the amount of any subsidy payment being made by any Federal agency in connection with the milk, or product, associated with the prices specified.

(b) If the specified price which the market administrator is required to use for the purpose of determining class prices or for any other purpose is not reported or published, the market administrator shall use a price determined by the Secretary to be equivalent to or comparable with the price specified.

APPLICATION OF PROVISIONS

§ 968.60 *Producer-handlers.* Sections 968.40 through 968.49, 968.50 through 968.54, 968.61 through 968.62, 968.70, 968.71, 968.80 through 968.88, shall not apply to a producer-handler.

§ 968.61 *Handlers subject to other orders.* In the case of any handler (as defined in this part) who the Secretary determines disposes of a greater portion of his milk as Class I milk in another marketing area regulated by another milk marketing agreement or order issued pursuant to the act, the provisions of this subpart shall not apply except as follows:

(a) The handler shall with respect to his total receipts and utilization of milk, make reports to the market administrator at such time and in such manner as the market administrator may require and shall allow verification of such reports;

(b) If the price which such handler is required to pay under the other Federal order to which he is subject for milk which would be classified as Class I milk under this subpart is less than the price provided by this subpart, such handler shall pay to the market administrator, for deposit in the producer-settlement fund, with respect to all milk disposed of (except to other handlers) as Class I milk within the marketing area, an amount equal to the difference between the value of such milk as computed pursuant to this subpart and its value as determined pursuant to the other order to which he is subject.

§ 968.62 *Handler operating an approved plant which is not a pool plant.* Each handler who operates an approved plant which is not a pool plant during a delivery period, shall in lieu of the payments required pursuant to § 968.80 through § 968.85, pay to the market administrator, for the producer-settlement fund, on or before the 25th day after the end of such delivery period, the amount resulting from the computations of either paragraph (a) or paragraph (b) of this section, whichever is less.

(a) The sum of the product of the quantity of milk received by such handler which was disposed of in the marketing area as Class I milk during the delivery period multiplied by the difference between the price for Class I milk pursuant to § 968.51 and the price for Class II milk pursuant to § 968.52.

(b) Any plus amount resulting from the following computation:

(1) To an amount equal to the net pool obligation which would be computed pursuant to § 968.70 for such handler for such delivery period if such handler operated a pool plant, and for each one-tenth by which the average butterfat content of milk received from approved dairy farmers by such handler is greater than 3.8 percent, or subtract for each one-tenth percent that such average butterfat content is less than 3.8 percent, an amount computed by multiplying the butterfat differential computed pursuant to § 968.82 by the total hundredweight of such milk; and

(2) Deduct the gross payments made by such handler to approved dairy farmers for milk received during such delivery period.

§ 968.63 *Overage.* If a handler after subtracting receipts from other handlers and receipts from sources determined as other than producers, or other handlers, has disposed of milk or butterfat in excess of the milk or butterfat which, on the basis of his reports, has been credited to his producers as having been delivered by them, the market administrator, in determining the net pool obligation of the handler, pursuant to § 968.70, shall add an amount equal to the value of such milk or butterfat according to its utilization by the handler.

DETERMINATION OF UNIFORM PRICE TO PRODUCERS

§ 968.70 *Net pool obligations of handlers.* The net pool obligation of each handler for milk received from producers during each delivery period shall be a sum of money computed for such delivery period by the market administrator as follows: Multiply the pounds of milk in each class computed pursuant to § 968.49 by the applicable class price pursuant to § 968.51 or § 968.52 and § 968.53, add together the resulting values and add the value of any payments required to be made pursuant to § 968.63.

§ 968.71 *Computation and announcement of uniform prices.* For each delivery period the market administrator shall compute and announce the uniform prices per hundredweight for base milk and excess milk as follows:

(a) Combine into one total the net pool obligations of all handlers computed pursuant to § 968.70 who made the reports prescribed by § 968.30 for such delivery period and who made the payments prescribed by §§ 968.80 and 968.84 for the preceding delivery period;

(b) Add an amount equal to one-half of the cash balance in the producer-settlement fund less the amount due handlers pursuant to § 968.86;

(c) Compute the total value of the milk included in these computations which is in excess of the delivered base of producers by assigning such milk first to Class II milk and then to each succeeding higher classification until all such milk has been classified, and then multiplying the total pounds of excess milk assigned to each class by the appropriate class price adjusted for butterfat differences pursuant to § 968.53 and adding together the resulting amounts;

(d) Divide the total value of excess milk obtained in paragraph (c) of this section by the total hundredweight of such milk and round to the nearest cent. This result shall be known as the uniform price for excess milk at test.

(e) Subtract the value of excess milk obtained in paragraph (c) of this section from the value of all milk obtained in paragraph (b) of this section and adjust by any amount involved in rounding the uniform price for excess milk to the nearest cent;

(f) Divide the result obtained in paragraph (e) of this section by the total hundredweight of milk represented by the delivered bases of producers;

(g) Subtract not less than 4 cents nor more than 5 cents; the result shall be known as the uniform price per hundredweight for such delivery period for base milk of producers at test.

(h) The value of base and excess milk of 3.8 percent butterfat content shall be determined by adjusting the values obtained in paragraphs (d) and (g) of this section pursuant to § 968.82.

PAYMENTS

§ 968.80 *Time and method of payment.* On or before the 12th day after the end of each delivery period each handler shall make payment, after deducting the amount of the payment made pursuant to § 968.81, subject to the butterfat differential set forth in § 968.82 for milk purchased or received from producers by such handler during such delivery period as follows:

(a) To each producer, except as set forth in paragraph (c) of this section, not less than the uniform price per hundredweight computed pursuant to § 968.71 (g) for that quantity of milk received from such producer not in excess of such producer's base;

(b) To each producer, except as set forth in paragraph (c) of this section, not less than the excess price, computed pursuant to § 968.71 (d), for that quantity of milk received from such producer in excess of such producer's base; and

(c) To a cooperative association for milk which it caused to be delivered to a handler from producers and for which such cooperative association collects payments, a total amount equal to not less than the sum of the individual payments otherwise payable to such producers under paragraphs (a) and (b) of this section.

§ 968.81 *Half delivery period payments.* On or before the 27th day of each delivery period, each handler shall make payment to each producer for the approximate value of the milk of such producer which, during the first 15 days of such delivery period, was received by such handler.

§ 968.82 *Producer butterfat differential.* If, during the delivery period, any handler has purchased or received from any producer milk having an average butterfat content other than 3.8 percent, such handler in making the payments prescribed in § 968.80 shall add to the prices per hundredweight for such producers for each one-tenth of one percent of average butterfat content in milk above 3.8 percent not less than, or shall subtract from such prices for such producer for each one-tenth of one percent of average butterfat content in milk below 3.8 percent not more than, an amount computed as follows: To the average price of 92-score butter at wholesale in the Chicago market as reported by the United States Department of Agriculture (or such other Federal agency as may hereinafter be authorized to perform this price reporting function) for the delivery period during which such milk was received, add 20 percent and divide the resulting sum by 10.

§ 968.83 *Producer-settlement fund.* The market administrator shall establish and maintain a separate fund known as the "producer-settlement fund" into which he shall deposit all payments made by handlers pursuant to §§ 968.84, 968.86, 968.61 and 968.62, and out of which he shall make all payments to handlers pursuant to §§ 968.85 and 968.86: *Provided*, That the market administrator shall offset any such payment due to any handler against payments due from such handler. Immediately after computing the uniform price for each delivery period, the market administrator shall compute the amount by which each handler's net pool obligation, including the payments to producers which are required to be made pursuant to § 968.63, is greater or less than the sum obtained by multiplying the hundredweight of milk of producers by the appropriate prices required to be paid producers by handlers pursuant to § 968.80 and adding together the resulting amounts, and shall enter such amount on each handler's account as such handler's pool debit or credit, as the case may be, and render such handler a transcript of his account.

§ 968.84 *Payments to the producer-settlement fund.* On or before the 12th day after the end of each delivery period, each handler shall pay to the market administrator for payment to producers through the producer-settlement fund, the amount by which the net pool obligation of such handler, including the payments required to be made pursuant to § 968.63, is greater than the sum required to be paid producers by such handler pursuant to §§ 968.80 and 968.81.

§ 968.85 *Payments out of the producer-settlement fund.* (a) On or before the 12th day after the end of each delivery period, the market administrator shall pay to each handler for payment to producers the amount by which the sum required to be paid producers by such handler pursuant to §§ 968.80 and 968.81 is greater than the net pool obligation of such handler, including the payments required to be made pursuant to § 968.63.

(b) If the balance in the producer-settlement fund is insufficient to make all payments pursuant to this paragraph, the market administrator shall reduce uniformly such payments and shall complete such payments as soon as the necessary funds are available. No handler who, on the 12th day after the end of the delivery period, has not received the balance of such reduced payment from the market administrator, shall be deemed to be in violation of § 968.80 if he reduces his payments to producers by not more than the amount of the reduction in payment from the producer-settlement fund.

§ 968.86 *Adjustment of errors in payments.* (a) Whenever verification by the market administrator of reports or payments of any handler discloses errors in payments to the producer-settlement fund made pursuant to § 968.84, the market administrator shall promptly bill such handler for any unpaid amount and such handler shall, within 5 days of such billing, make payment to the market administrator of the amount so billed. Whenever verification discloses that payment is due from the market administrator to any handler pursuant to § 968.85, the market administrator shall, within 5 days, make payment to such handler. Whenever verification by the market administrator of the payment by a handler to any producer discloses payment to such producer of an amount which is less than is required by this section, the handler shall make up such payment to the producer not later than the time of making payment to producers next following the disclosure.

(b) Whenever verification by the market administrator of the payment by a handler to any producer discloses payment to such producer of an amount which is more than was required to be paid pursuant to § 968.80, no handler shall be deemed to be in violation of § 968.80 if he reduces his payment to such producer by not more than such overpayment.

§ 968.87 *Marketing services.* (a) Deductions from marketing services. Except as set forth in paragraph (b) of this section, each handler shall deduct 4 cents per hundredweight, or such lesser amount as the Secretary may prescribe, from the payments made to each producer other than himself pursuant to § 968.80 (a) and (b) with respect to all milk of such producer purchased or received by such handler during the delivery period and shall pay such deductions to the market administrator on or before the 12th day after the end of such delivery period. Such moneys shall be used by the market administrator to verify weights, samples and tests of milk received from, and to provide market information to such producers. The market administrator may contract with a cooperative association or cooperative associations for the furnishing of the whole or any part of such services.

(b) Deductions with respect to members of a cooperative association. In the case of producers for whom a cooperative association which the Secretary determines to be qualified under the provisions of the act of Congress of February 18, 1922, as amended, known as the "Capper-Volstead Act," is actually performing, as determined by the Secretary, the services set forth in paragraph (a) of this section, each handler shall make the deductions from the payments to be made directly to producers pursuant to § 968.80 (a) and (b) which are authorized by such producers, and, on or before the 12th day after the end of each delivery period, pay over such deductions to the association of which such producers are members.

§ 968.88 *Expense of administration.* As his pro rata share of the expense of the administration of this part, each handler who purchased or received milk from producers, with respect to all milk received from approved dairy farmers during the delivery period, shall pay to the market administrator, on or before the 10th day after the end of such delivery period, an amount not to exceed 4 cents per hundredweight, which amount shall be determined by the market administrator subject to review by the Secretary.

§ 968.89 *Termination of obligation.* The provisions of this section shall apply to any obligation under this part for the payment of money.

(a) The obligation of any handler to pay money required to be paid under the terms of this part shall, except as provided in paragraphs (b) and (c) of this section, terminate two years after the last day of the calendar month during which the market administrator receives the handler's utilization report on the milk involved in such obligation, unless within such two-year period the market administrator notifies the handler in writing that such money is due and payable. Service of such notice shall contain but need not be limited to, the following information:

(1) The amount of the obligation;

(2) The month(s) during which the milk, with respect to which the obligation exists, was received or handled; and

(3) If the obligation is payable to one or more producers or to an association of producers, the name of such producer(s) or association of producers, or if the obligation is payable to the market administrator, the account for which it is to be paid.

(b) If a handler fails or refuses, with respect to any obligation under this part, to make available to the market administrator or his representative all books and records required by this part to be made available, the market administrator may, within the two-year period provided for in paragraph (a) of this section, notify the handler in writing of such failure or refusal. If the market administrator so notifies a handler, the said two-year period with respect to such obligation shall not begin to run until the first day of the calendar month following the month during which all such books and records pertaining to such obligation are made available to the market administrator or his representatives.

(c) Notwithstanding the provisions of paragraphs (a) and (b) of this section, a handler's obligation under this part to pay money shall not be terminated with respect to any transaction involving fraud or willful concealment of a fact, material to the obligation, on the part of the handler against whom the obligation is sought to be imposed.

(d) Any obligation on the part of the market administrator to pay a handler any money which such handler claims to be due him under the terms of this part shall terminate two years after the end of the calendar month during which the milk involved in the claim was received if an under-payment is claimed, or two years after the end of the calendar month during which the payment (including deduction or setoff by the market administrator) was made by the handler if a refund or such payment is claimed, unless such handler, within the applicable period of time, files, pursuant to section 8c (15) (A) of the act, a petition claiming such money.

BASE RATING

§ 968.90 *Determination of base setting period.* For each delivery period the base of each producer shall be a quantity of milk calculated by the market administrator in the following manner: Multiply the applicable figure computed pursuant to § 968.91 by the number of days during such delivery period on which milk was received from such producer.

§ 968.91 *Determination of daily base.* (a) Effective January 1, 1948, and for each subsequent year thereafter the daily base of each producer, who regularly delivered milk to a handler during the next previous delivery periods of August, September, October, and November shall be computed by the market administrator in the following manner: Determine for each such producer his average daily delivery of milk to a handler for the time he delivered during the period from the next previous August 1 to November 30.

(b) The daily base of each producer who did not regularly deliver milk to a handler during the next previous delivery periods of August, September, October, and November but who began deliveries of milk to a handler subsequent to August 31 shall be computed by the market administrator in the following manner: For each delivery period from the date upon which the producer first delivers milk to a handler until January 1 after he shall have established a base pursuant to paragraph (a) of this section, the market administrator shall multiply such producer's daily average deliveries of milk during such period by the percentage that total base deliveries are to total deliveries of all producers.

(c) In case of a producer-handler who disposes of all of his delivery routes to another handler who is not a producer, the market administrator shall determine the daily average of the total sales of Class I milk and Class II milk by such producer during the preceding three months. The figures so determined shall be such producer's base until his base may be established pursuant to paragraph (a) of this section.

§ 968.92 *Base rules.* (a) Any producer who ceases to deliver milk to a handler for a period of more than 30 consecutive days shall forfeit his base. In the event such producer thereafter commences to deliver milk to a handler he shall be allotted a daily base computed in the manner provided in § 968.91.

(b) A landlord who rents on a share basis shall be entitled to the entire daily base to the exclusion of the tenant if the landlord owns the entire herd. A tenant who rents on a share basis shall be entitled to the entire daily base to the exclusion of the landlord, if the tenant owns the entire herd. If the cattle are jointly owned by the tenant and landlord, the daily base shall be divided between the joint owners according to ownership of the cattle when such share basis is terminated.

(c) A producer, whether landlord or tenant, may retain his base when moving his entire herd of cows from one farm to another: *Provided*, That at the beginning of a tenant and landlord relationship the base of each landlord and tenant may be combined and may be divided when such relationship is terminated.

(d) Base may be transferred only under the following conditions:

(1) In case of the death of a producer, his base may be transferred to a surviving member or members of his family who carry on the dairy operations; and

(2) On the retirement of a producer, his base may be transferred to an immediate member of his family who carries on the dairy operations.

(e) The base of two producers may be combined in the case of forming a partnership, or may be divided in the case of the dissolution of a partnership.

(f) For the purposes of this section only, the term "producer" shall include any person who has been a producer as defined in § 968.6 but whom the Wichita Board of Health has suspended temporarily for failure to produce milk in conformity with the applicable health regulations of the City of Wichita, Kansas.

EFFECTIVE TIME, SUSPENSION, OR TERMINATION

§ 968.100 *Effective time.* The provisions of this part, or any amendment to this part, shall become effective at such time as the Secretary may declare and shall continue in force until suspended, or terminated, pursuant to § 968.101.

§ 968.101 *Suspension or termination.* Any or all of the provisions of this part, or any amendment to this part, may be suspended or terminated as to any or all handlers after such reasonable notice as

the Secretary shall give and shall, in any event, terminate whenever the provisions of the act cease to be in effect.

§ 968.102 *Continuing power and duty of the market administrator.* (a) If, upon the suspension or termination of any or all provisions of this part there are any obligations arising under this part the final accrual or ascertainment of which requires further acts by any handler, by the market administrator, or by any other person, the power and duty to perform such further acts shall continue notwithstanding such suspension or termination: *Provided*, That any such acts required to be performed by the market administrator shall, if the Secretary so directs, be performed by such other person, persons, or agency as the Secretary may designate.

(b) The market administrator, or such other person as the Secretary may designate, shall:

(1) Continue in such capacity until removed,

(2) From time to time account for all receipts and disbursements and when so directed by the Secretary deliver all funds on hand, together with the books and records of the market administrator, or such person, to such person as the Secretary shall direct, and

(3) If so directed by the Secretary execute assignments or other instruments necessary or appropriate to vest in such person full title to all funds, property, and claims vested in the market administrator or such person pursuant thereto.

§ 968.103 *Liquidation after suspension or termination.* Upon the suspension or termination of any or all provisions of this part the market administrator, or such person as the Secretary may designate, shall, if so directed by the Secretary, liquidate the business of the market administrator's office and dispose of all funds and property then in his possession or under his control, together with claims for any funds which are unpaid or owing at the time of such suspension or termination. Any funds collected pursuant to the provisions of this part, over and above the amounts necessary to meet outstanding obligations and the expenses necessarily incurred by the market administrator or such person in liquidating such funds, shall be distributed to the contributing handlers and producers in an equitable manner.

Copies of the original notice of hearing, this supplementary notice of hearing and of the order now in effect may be procured from the market administrator, 310 Derby Building, 352 North Broadway, Wichita 2, Kansas, or from the Hearing Clerk, Room 1353, South Building, United States Department of Agriculture, Washington 25, D. C., or may be there inspected.

Dated: November 20, 1953, at Washington, D. C.

GEORGE A. DICE,
*Deputy Assistant Administrator.*

[F. R. Doc. 53-9957; Filed, Nov. 25, 1953; 8:52 a. m.]

## PROPOSED RULE MAKING

### [ 7 CFR Part 997 ]

[Docket No. AO 205-A1]

### HANDLING OF FILBERTS GROWN IN OREGON AND WASHINGTON

### NOTICE OF RECOMMENDED DECISION AND OPPORTUNITY TO FILE WRITTEN EXCEPTIONS WITH RESPECT TO PROPOSED AMENDMENTS TO MARKETING AGREEMENT AND ORDER

Pursuant to the rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders (7 CFR, 1952 Rev., Part 900), notice is hereby given of the filing with the Hearing Clerk of this recommended decision of the Assistant Administrator, Production and Marketing Administration, United States Department of Agriculture, with respect to proposed amendments to the marketing agreement and order (7 CFR, 1952 Rev., Part 997) regulating the handling of filberts grown in Oregon and Washington (hereinafter referred to as the "order"). That order is effective pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), (hereinafter referred to as the "act"), and any amendments which may be adopted as a result of this proceeding also will be effective pursuant to said act. Interested persons may file exceptions to this recommended decision with the Hearing Clerk, United States Department of Agriculture, Room 1353, South Building, Washington 25, D. C., not later than the 12th day after publication of this recommended decision in the FEDERAL REGISTER, except that, if such 12th day should fall on a Saturday, Sunday, or a holiday, they must be filed not later than the next succeeding workday. Exceptions should be filed in quadruplicate.

*Preliminary statement.* A public hearing, on the record of which the presently recommended amendments of the order are formulated, was held at Portland, Oregon, on August 4, 1953. Such hearing was held pursuant to a notice thereof which was published in the FEDERAL REGISTER (18 F. R. 4144) on July 15, 1953. That notice contained amendments to the order which had been proposed to the Secretary of Agriculture (hereinafter referred to as the "Secretary") by the Filbert Control Board, the administrative agency for operations under the order (hereinafter referred to as the "board"), with a request for a hearing thereon. The notice also contained two amendments which had been proposed by John W. Wilkens, a filbert grower located at Huber, Oregon, and also two comparatively routine amendments which had been proposed by the Fruit and Vegetable Branch, Production and Marketing Administration, United States Department of Agriculture.

The material issues, presented on the record of the hearing, are as follows:

(1) The amendment of § 997.31 so as to: (a) Delete the portion relating to original members and alternate members of the board and the references in the remainder to subsequent members and alternates as their successors in office; (b) specify that the nominees and selectees for each group represented on the board must be members of the particular group; (c) add provisions precluding certain independent growers who also handle filberts from voting for, or serving as, independent grower representatives on the board; and (d) also add provisions precluding certain independent growers who are, or have been, employees of independent handlers during the fiscal year in which the election is held from serving as independent grower representatives on the board. Also, the amendment of § 997.33 so as to make corresponding changes therein, with certain exemptions therefrom in regard to current independent grower representatives on the board.

(2) The amendment of § 997.32 to provide a new title, the correction of a reference in the first sentence to § 997.31 (b), and also a new procedure for the nominations of independent grower representatives on the board, including authorization for the Secretary to change such new procedure in case it proves to be unsatisfactory.

(3) The amendment of appropriate sections of the order to authorize the exportation of unmerchantable filberts which meet specified quality and size requirements, including authorization for the subsequent modification of such requirements by the Secretary in certain circumstances, the handling of such exportations either by the board or by handlers acting as its agents under its direction and supervision, the imposition of administrative assessments on the quantities which are so exported, and appropriate inspection, certification, and labeling requirements in that regard. Also, the amendment of §§ 997.80 and 997.81 so as to make it clear that the reporting requirements contained therein will continue to apply only to merchantable filberts.

(4) The amendment of §§ 997.62 and 997.90 so as to change, from August 15 to August 20, the final date for the submission by the board to the Secretary of its estimates and recommendation with respect to the salable and surplus percentages for a fiscal year, and also its recommendation, with supporting data, as to its expenses for such fiscal year, as well as to delete certain obsolete provisions in § 997.90.

(5) The amendment of § 997.18 so as to delete that portion which identifies the first fiscal year.

(6) The amendment of § 997.60 so as to delete that portion of the first sentence after the proviso, which specifies the salable and surplus percentages for the first fiscal year, and so as to delete the word "subsequent" before the words "salable and surplus percentages" in the second sentence.

(7) The amendment of § 997.63 so as to delete the last sentence, which specifies the withholding percentage for the first fiscal year.

(8) The addition of a new section (§ 997.23) to define "part" and "subpart."

(9) The making of such other changes in the order as may be necessary to make the entire order conform with the specific amendments thereof which are herein proposed for adoption.

*Findings and conclusions.* The following findings and conclusions on the material issues are based upon the evidence adduced at the hearing and the record thereof:

(1) Section 997.31 of the order should be amended as follows: (a) The portion relating to the original members and alternate members of the board and the references in the remainder to subsequent members and alternates as their successors in office should be deleted; (b) that portion of the present second paragraph (now lettered (b)) which precedes the delineation of the six handler and grower groups which are granted representation on the board should be reworded so as to specify that the nominees and selectees for each of such groups must be members of the particular group; (c) a provision should be added which would preclude a grower who is not a member of a cooperative marketing association (i. e. an independent grower), from voting for, or serving as a representative of such independent growers if, during the fiscal year in which the election is held, he handled any filberts other than those which were produced by him; and (d) a provision should also be added which would preclude an independent grower who is, or who has been, an employee of a filbert handler during the particular fiscal year in which an election is held from serving as a representative (either as a member or as an alternate member) of independent growers on the board for the succeeding term. In line with the above conclusions, § 997.33 of the order, which relates to the qualifications for members and alternate members of the board, should be amended so as to require the automatic disqualification of any independent grower representative who, during his term of office, either serves as an employee of a filbert handler or handles filberts of other than his own production as aforesaid, except that such disqualification provisions should not apply to any existing independent grower representative during the remainder of his current term of office insofar as relates to actions which would have disqualified him if the presently proposed restrictions had been in effect at the time of his selection.

With respect to the proposed change set forth under (a) above, present § 997.31 is divided into two parts which are separate and distinct from each other. The first part (designated as paragraph (a)) relates exclusively to the original members and alternate members of the board, whose terms of office as such have long since expired. The second part (designated as paragraph (b)) relates to subsequent members and alternate members of the board, and it contains complete and adequate provisions in that connection. In these circumstances, it is obvious that the further continuance in the order of the special provisions relating to the original members and alternate members of the board would serve no useful purpose and they should, therefore, be deleted. Since the provisions relating to subsequent members and alternate members will hereafter apply to all existing and future representatives on the board, it is equally obvious that the reference to them as successors should be stricken. The latter changes would involve the deletion of the heading "Successor members" from the present paragraph (b), the elimination of the letter reference before said paragraph, and the deletion of the words "The Successors of" from the first sentence of said paragraph.

With reference to the proposed change set forth under (b) above, the present provisions leave each group free to nominate, and the Secretary free to select, any representatives which may be desired, and regardless of whether such persons are members of the particular group. However, it was stated in the Decision which preceded the issuance of the original order that: "Successors to the original members should be appointed annually by the Secretary from specified groups" (14 F. R. 5657), and this practice has been followed. The present proposal to restrict specifically the nominations and selections of representatives for each group to persons who are members of that group has been approved unanimously by the board, and it is the general practice of this Department to observe the wishes of the particular industry in connection with this aspect. Its adoption would, therefore, not only be in accordance with the practice which has been followed up to this time, but it would also insure that such practice would be followed in the future, as is desired by the filbert industry.

In regard to the proposed change set forth in (c) above, it was argued on behalf of the majority of the board that every grower who also qualifies as a handler should be precluded from voting for, or serving as, an independent grower representative. On the other hand, a member of the board supported by other members of the industry, argued that this prohibition should not apply unless such grower had, during the preceding fiscal year, handled a quantity of filberts produced by others in excess of the quantity of filberts of his own production which he had handled during that period.

The order definition of "handler" (§ 997.9) is such that any person who handles 250 pounds, or more, or filberts during any fiscal year is so classified and becomes subject to the regulation. Neither of the two proposals is intended to change the present provisions in that regard. In other words, the sole objective of each proposal is to restrict the right of an independent grower who also engages in handling operations to vote for, or serve as, an independent grower representative on the board, the difference between them being the extent of the handling operations which should be deemed sufficient to justify the imposition of the restrictions. As indicated above, the board's proposal would fix the line of demarcation at 250 pounds, whereas the other (or the Wilken's) proposal would base the determination on whether the particular grower had handled a quantity of filberts produced by others in excess of the quantity of filberts of his own production which he handled.

It was generally agreed that, of the approximately 3,000 independent growers of filberts in the production area, only 23 growers had also qualified as handlers (i. e., handled 250 pounds or more) of filberts during the preceding fiscal year, and that this is fairly representative of the situation in that regard which had existed in other years under the order operations. Of these 23 grower-handlers, 4 handled approximately 16.5 percent of the total filbert tonnage handled during the period, whereas the remaining 19 filbert handlers handled only 1.6 percent of the total filbert tonnage which was so handled, and some of the latter handled only filberts of their own production while some also handled filberts produced by others.

It was argued on behalf of the board that independent growers should be represented only by "pure" growers; that is, by growers who have no connection with filbert handling operations in excess of 250 pounds per fiscal year. This view was predicated on the basis that the fundamental philosophies of the two segments conflict with each other, in that the grower approach is to maximize the returns from their crops by obtaining the highest prices obtainable for it, whereas the handler approach is to prevent the price from reaching a point where the entire salable portion of the crop cannot be sold, thus leaving them with unduly large carry-overs. It was contended that the handling activity of a grower to such a small extent as 250 pounds of filberts during a fiscal year might influence his interest or viewpoint so that he would not reflect accurately the grower philosophy. In this connection, it was pointed out that the order provides for equal representation on the board as between independent handlers and independent growers, and it was stressed that the maintenance of this equality of balance between the two segments should not be disturbed by permitting independent growers to be represented by any person who is "handler-minded" to any degree.

It was argued on behalf of the other (or the Wilken's) proposal that the adoption of the board's proposal would amount, in effect, to the disenfranchisement of many, if not most, of the existing grower-handlers, in that they would be precluded from voting for, or serving as, independent grower representatives, and, in view of the small tonnages handled by them as compared with the tonnages handled by regular independent handlers and the fact that independent handler votes are weighted on the basis of tonnages handled, any votes which they might cast in the latter connection would necessarily have a negligible effect. It was testified, without contradiction, that during the past several years few growers have been able to derive a substantial profit from their growing operations; that this has been due primarily to the fact that production costs have approximated the sales prices; that some of the more resourceful and progressive growers have attempted to im-

original members and alternate mem-

only as many petitions as there are posi-

which is submitted, i. e., separate peti-

prove this situation by processing and marketing all, or a part, of their respective productions; and that such "disenfranchisement" of grower-handlers in this category is unfair and unjust, because such persons are still primarily growers having a grower viewpoint.

It is believed that a distinction in this connection should be made between a grower who processes and markets only filberts of his own production and a grower who also processes and markets filberts which were produced by others. It seems clear that, in the latter situation, the grower's handling actions have advanced beyond the point where he may properly be regarded as having confined such operations to those which are consistent with his operations as a grower. In other words, when he goes into the open market and buys filberts produced by others for the purpose of processing and selling them at a profit he is engaging in handling as a regular, recognized handler, and he should be treated as such. Therefore, such a person should be precluded from voting for, or serving as, an independent grower representative, but such voting and serving on his part should be from the standpoint of independent handlers.

On the other hand, a grower who processes and sells only filberts of his own production is not believed to be departing so drastically from grower operations that he should be considered as an independent handler, rather than as an independent grower. Such action in those circumstances is considered to be normal and natural in that the grower thereby enables himself to continue in business as a grower, which he might not be able to do otherwise. The nature of these situations is such that the grower-handlers who fall in this category will presumably not handle a large volume of filberts in comparison with the total volume of filberts handled, either individually or in the aggregate. Therefore, any "handler viewpoint" which may conceivably arise from such handling should be relatively minor. In any event, it is believed that this is outweighed by the fact that to refrain from granting grower-handlers who fall in this category the same voting and serving privileges as are afforded other independent growers would be unfair and inequitable under the circumstances. While a fiscal year begins on August 1, the term of office of the members and alternate members of the board begin on "the first Tuesday after the first Monday in April," and the nominations in that connection are required to be submitted to the Secretary not later than March 20th. It is, of course, desirable that the base period be that which is the most current one which is practicable for use. It is concluded that, insofar as the amendment in this regard which is hereinafter proposed to be adopted is concerned, a practicable and reasonably current base period for use would be the fiscal year in which the election is held up to the time of such election. If, at the time of such election, a grower-handler should qualify thereunder, he should be eligible to vote and to be nominated. However, if after nomination, he should handle any filberts which have been produced by another, he should thereupon become ineligible for selection.

Considerable testimony was presented at the hearing with respect to the desirability of amending the provisions in this connection so that the board may be able to ascertain with reasonable certainty which grower-handlers should vote and serve as independent growers and which should vote and serve as independent handlers. It is believed that this objective would be accomplished by the proposal which is proposed herein for adoption, in that grower-handlers who handle filberts produced by others would automatically be placed in the independent handler group. The remaining grower-handlers would presumably wish to remain in the independent grower group for voting purposes, in that their relative volume of handlings as compared with those of regular independent handlers would be so insignificant that their voting power in the latter group would be negligible.

As regards the proposed change which is set forth under (d) above, it is concluded that a grower who is employed by a handler at any time during a fiscal year in which an election is held should be precluded from serving as a representative of independent growers, because such a person may be susceptible to influence, or pressure, by the particular handler in connection with his voting in board deliberations. Such an influence could reasonably be expected to arise from the employer and employee relationship, in that the employee may consider the retention of his present, or the resumption of his former, position as being of greater importance than the privilege of exercising his free, and untrammeled, judgment in voting in the board deliberations. This possibility is enhanced by reason of the fact that balloting by the board is not secret, and how each member or alternate member acting in the place of a member votes is readily ascertainable. The possibility of the exercising of such influence or pressure should be avoided. In this connection, there are some growers who perform only part time work for handlers, and who are normally not so employed at the time the elections are held. Nevertheless, some such persons presumably would expect to obtain reemployment when their services are needed again. Thus, the prohibition should apply to them the same as to growers who are employed by handlers at the time the election is held.

It is possible, of course, that a grower may accept employment by a handler with no expectation or desire, after its termination, that he will accept such employment again. Obviously such a person should not be precluded indefinitely after the termination of such employment from serving as an independent grower representative in those circumstances. It is believed to be logical and reasonable to fix the period for determining the matter of eligibility or ineligibility in this connection as the fiscal year in which the election is held. Such period would serve to cover under the preclusion growers who serve as employees of handlers only during the peak, or busy season, and, at the same time, it would afford former employees who no longer intend to accept future employment to reacquire eligibility after a reasonable period to serve as independent grower representatives. It is possible that a grower who is nominated to serve as an independent grower representative may have met this eligibility requirement at the time of his nomination but subsequently accepts employment by a handler before his selection and qualification. In such an event, he should automatically become ineligible for selection.

The indicated proposed changes in § 997.33 of the order are desirable, except as indicated below, in order to insure that an independent grower representative will not engage in any of the prohibited actions (i. e., either handling filberts produced by others or being employed by a handler) during his term of office. This latter proposed restriction should not apply to an existing member of the board, during his present term of office, who would have been ineligible at the time of his selection if the proposed change had then been in effect. However, such exemption in that regard should be limited to the particular situation which existed at that time. For instance, if such a current member handled filberts produced by others, he should be permitted to do so for the remainder of his term of office without disqualification, but, if he was not also employed by a handler, he should not be permitted to accept such employment during his term of office, and vice versa. It is believed that such an exception would be reasonable and proper because the selection was made in those circumstances and it would not be fair or equitable to require that he now make an election between losing his official position or refraining from continuing the activity in question. But, as indicated, such prohibition should apply to any existing members in connection with whom either such situation did not exist at the time of their respective selections, as well as to all future selections, including the filling of all vacancies.

(2) Section 997.32 of the order should be amended in the following respects.

(a) The title should be changed to read "nominations for members and alternates" instead of "nominations for successor members and alternates," and the reference in the first sentence to § 997.31 (b) should be changed so as to refer to § 997.31; and (b) the present provisions, as set forth in the fourth, fifth and sixth sentences, regarding the nominations of members and alternate members of the board to represent independent growers should be replaced with provisions setting forth a new procedure designed to insure that such nominations will represent more accurately the choice of these growers, with authorization for the Secretary to substitute another procedure for the proposed new procedure in case the latter should prove to be unsatisfactory.

With respect to (a) above, it was concluded in the discussion under the issue numbered (1) that the provisions in paragraph (a) of § 997.31 respecting the

original members and alternate members of the board should be deleted because they are obsolete, and that conforming changes should be made in paragraph (b) of said section relating subsequent members and alternates so as to refer to them as members and alternates. These proposed changes also involve the elimination of the letter reference before such paragraph. The indicated changes here would be in conformity with the indicated changes in § 997.31.

With reference to (b) above, the present provisions have proven to be unsatisfactory. They are very general in nature and experience has demonstrated that they do not set forth in sufficient detail or clarity the exact procedure which is intended to be followed in making nominations of this nature. The only existing requirements are that such nominations shall be submitted after balloting pursuant to announcements by press releases through this Department to the principal newspapers in the filbert producing areas in Washington and Oregon; that these releases provide pertinent information, including the names of the then incumbents of the positions and where ballots may be obtained; and that the ballots contain "full instructions as to their marking and mailing."

Since independent growers are unorganized and are scattered over the production area, it has not been practicable to hold assembled meetings of them for the purpose of selecting candidates and electing nominees. The holding of these meetings would also have entailed the expenditure of considerable sums of money. In any event, the present provisions do not require the holding of such meetings, but, instead, obviously contemplate mail balloting, and the only express provisions for the listing of candidates are that the names of the then existing incumbents shall be publicized. In an effort to "widen the field" for voting purposes, the board, in connection with the last such election, obtained the names of other potential candidates from county agents and independent handlers and added those names to the ballots. While the latest procedure represented an improvement over the previous practice of publicizing only the names of the then incumbents of the positions as candidates, it was still unsatisfactory because the other prospective candidates were not named by the independent growers themselves. It was testified that only about 7.5 percent of the eligible independent growers voted in the last nomination election, indicating that even the modified procedure referred to above was not sufficient to arouse their interest to a considerable degree.

In an effort to correct the present undesirable situation, the board proposed and argued at the hearing that the following substitute provisions should be incorporated in the order: (i) Names of the candidates to accompany the ballots shall be submitted to the board prior to February 10 of each fiscal year on petitions signed by not less than 10 independent growers of whom it has a record; (ii) each such grower may sign only as many petitions as there are positions to be filled; (iii) ballots accompanied by the lists of candidates so submitted, together with instructions as to voting, shall be mailed to all independent growers of whom the board has a record; (iv) the qualified person receiving the highest number of votes for the position for which his name was placed on the ballots shall be nominated, except that, in case of a tie vote, the decision as to the nominee shall be made by lot; and (v) if the Secretary determines later that this new method is not satisfactory to independent growers, or it is too difficult or costly to administer, or it does not result in a sufficient number of qualified candidates, or it needs to be changed for other reasons, he is authorized to put another method in effect on the basis of the board's recommendation or other pertinent available information.

It is concluded that the proposed new procedure, as outlined in the preceding paragraph, should be adopted in lieu of the existing procedure, except that the proposed procedure for deciding by lot as to the nominee in case of a tie vote is not recommended. The justification given for each of the other aspects of the proposed new procedure enumerated in the second preceding paragraph and the conclusions which have been reached in those connections are set forth, in sequence, below:

(i) The petition method of obtaining the naming of candidates by independent growers is desirable because the other potential method of doing so through assembled meeting is neither practicable nor economical. The requiring of at least ten independent growers to sign each petition should be imposed because: It should promote greater interest and participation among them in the balloting for the several nominees; it represents a reasonable balance between making the naming of candidates unduly easy and unduly difficult; it should result generally in the naming of candidates of higher standing in the industry; the plan has been used in other comparable situations and has been found to operate satisfactorily; and last, but not least, it would insure the naming of such of the candidates by an appreciable number of the independent growers themselves, thus indicating a substantial interest in such candidate as a potential representative. The signers of the petition should be of record with the board as being independent growers in order that it may be in a position to determine whether they belong to that group. It was testified that the board will continue to keep current and accurate records of independent growers by checking with independent handlers each fiscal year in respect to the names of growers from whom they have received filberts. The fixing of February 10 as the time limit for the filing of the petitions is necessary to enable the board to hold the nomination election and submit the list of nominees to the Secretary by the required time of March 20.

(ii) It is contemplated that separate petitions will be submitted in connection with each independent grower position which is submitted, i. e., separate petitions for each independent grower member position and separate petitions for each independent grower alternate member position. This is obviously necessary to delineate the candidates for each such position for balloting purposes. Likewise, each independent grower should be permitted to sign only as many petitions as there are positions to be filled. Stated differently, such a grower should be permitted to sign only one petition in connection with each of the positions which are to be filled for his group. Otherwise, a relatively small number of aggressive independent growers could, by signing petitions for various candidates for each position, dominate that aspect, or, at least, affect the matter disproportionate to their relative numerical importance.

(iii) It has been the practice up to this time for the board to mail to each independent grower of whom it has a record a ballot, accompanied by a list of the candidates for the several positions which are to be filled, along with appropriate instructions as to voting. This practice has been found to be satisfactory, and should be continued in effect. The new method contemplates, of course, that such candidates will be named by the independent growers themselves, rather than by other persons.

(iv) It has also been the practice up to this time to consider the candidate receiving the largest number of votes for each position as being the nominee for that position. Such practice should also be continued in effect, as it recognizes and enforces the wishes of the majority. It was argued that, in case of a tie vote in connection with the position to be filled, the nominee for that position should be determined by lot. No provision of this kind is included in the order in respect to other board positions, and it is not believed necessary to provide in the order a method of selecting the nominee for an independent grower position in case of a tie vote. In case of a tie, the names of the tied candidates should be submitted. In such event, the Secretary would select one of the tied candidates or some other qualified person.

(v) The basic objective of the provisions in question here is that they result in the representation of independent growers on the board by persons who are the best qualified obtainable and whom the majority of the independent growers desire to represent them. While it is believed that the proposed new procedure should accomplish these desirable results to a reasonably satisfactory degree, there can be no assurance that this will be the case in the absence of operations under them for a reasonable period of time. If the proposed new procedure should be adopted and experience should demonstrate that it is unsuitable for the purposes such as by being unsatisfactory to the independent growers, or too difficult or costly to administer, or it does not result in a sufficient number of qualified candidates, or for other valid reasons, the Secretary should be permitted to put another procedure in effect without hav-

ing to undergo the considerable expense and effort which would be entailed in connection with a formal amendment of the order. It could happen that such a change of method would be desirable in a situation where amendments of other provisions of the order would not be needed.

In addition, any rules and regulations in that regard will need to be issued pursuant to the provisions of section 4 of the Administrative Procedure Act, which contemplates the giving of prior public notice of the proposed rule making action, the affording to the public, and particularly to the members of the filbert industry, of an opportunity to participate in the rule making action through the submission of written data, views, and comment, and requires the consideration of such written data, views, and comment in connection with the issuance of the final regulation. In addition, careful consideration would be given to the views and recommendations of the board on the matter. Thus, the filbert industry will have an important voice in determining any substitute procedure in that regard which may be prescribed later.

The only additional expense which the adoption of the presently proposed method would entail would apparently be the cost of the petition forms, which it was estimated would be minor. This extra cost would presumably be more than offset by the fact that newspaper advertisements in connection with the balloting would no longer be needed. These advertisements have cost appreciable sums of money in the past.

It is required, in § 997.36 of the order, that a successor to fill any vacancy in a member or alternate member position on the board for the unexpired portion of the particular term shall "be selected in the manner provided in § 997.32, so far as applicable, within 30 days after such vacancy occurs." It was testified on behalf of the board that it should be practicable under the proposed new method to determine and submit to the Secretary the name of a nominee to fill such a vacancy in time to permit the selection of the successor within the 30-day time limit.

(3) The permissible methods for the regulation of fruits and vegetables (in which filberts are included by express reference) are set forth in section 8c (6) of the act. The basic objective of these methods (as indicated by the provisions of that section in conjunction with the provisions of section 2) is to cause an increase in the prices which are received by the producers of the particular commodity to as near the parity level as is reasonably practicable, consistent with the protection of the interests of consumers, by limiting the quantity which is available for sale in the normal market channels to a quantity which is no more than reasonably sufficient to meet such estimated demand. The remainder, or surplus, is left for disposition in channels which are not considered to be competitive with the normal market outlets. These permissible methods are of two general kinds, namely: (a) A separation of the production by prescribing the meeting of specified minimum grade, size, or quality standards for the portion permitted to be sold in the normal market channels; and (b) a separation of the production by specifying so-called salable and surplus percentages for application against it. However, the act permits the use of a combination of the two methods in the same program, and, as is indicated below, the order provides for the regulation of filberts along that line.

The method of separation referred to under (a) above is effectuated by the provisions of §§ 997.50 and 997.53 of the order. By the terms of § 997.50, the handling of unshelled filberts, except as is provided in § 997.53, is prohibited unless and until they have been inspected and certified as meeting certain prescribed minimum standards of grade and quality. Those which are found to meet those minimum standards as a result of inspection by the official inspection agency are thereafter identified and referred to as "merchantable filberts" and are certified as such. The remainder are known and referred to as "unmerchantable filberts." The latter may be disposed of as shelled filberts, one of the two recognized surplus disposition outlets under the order, and the provisions of § 997.53 permit the disposition of unshelled unmerchantable filberts to any sheller for shelling. Assurance against the disposition of unmerchantable filberts in unshelled form (other than to a sheller for shelling) under the existing regulation is provided for through the requirement that all dispositions of unshelled filberts be preceded by inspections, certifications, and appropriate marking of the containers (see § 997.51), showing that they meet the indicated minimum standards. Thus, although, these unmerchantable filberts are not included in the surplus pool, they are, nevertheless, surplus filberts from the standpoint of the order operations. That this is the case was expressly recognized in the decision (14 F. R. 5659) which preceded the original issuance of the order.

The further method of separation, i. e., the one referred to under (b) above, is effectuated by the provisions of §§ 997.60 to 997.73, both inclusive, of the order. This method operates against the merchantable filberts after the first separation has taken place (and the merchantable filberts have been thus identified) by way of the fixing and application against them of so-called salable and surplus percentages. Those percentages are fixed on the basis of a consideration of the estimated total available supply of merchantable filberts for the particular fiscal year in relation to the estimated market demand for merchantable unshelled filberts for that year. That is to say, the salable percentage is designed to make available for the sale in such normal market outlets only that quantity which is considered to be reasonably necessary for that purpose. The balance, or the surplus portion, of the merchantable filbert supply, is required to be held by handlers for the account of the board and for disposition into outlets which are not considered to be competitive with the normal market outlets for unshelled merchantable filberts. These recognized surplus outlets are for shelling and for export.

Filberts which are disposed of in shelled form have traditionally brought appreciably lower prices than filberts which are disposed of in the unshelled form. It was set forth in the notice of hearing and argued at the hearing that the existing provisions should be expanded to the extent of permitting certain of the larger sizes of unmerchantable filberts of the better quality to be exported because such action should result in increasing the overall returns to the producers. In other words, that such portion should be authorized to be disposed of in the other recognized surplus disposition outlet. It is concluded that such a modification of the order should be adopted as set forth below.

By terms of § 997.50 of the order, unshelled filberts, to qualify as merchantable filberts, must (a) be at least "U. S. No. 1 Medium," as then, and now, defined in the United States Standards for filberts in the shell (see 13 F. A. 4623), except that the portion of the tolerance provision in the U. S. No. 1 grade for grade requirements, other than for type and size, reading "not more than five percent shall be allowed for blanks" are inapplicable, and (b) as to minimum standards of quality, be at least U. S. No. 1 grade as defined in the said standards, "with the aforesaid modified tolerance as to blanks." Those minimum standards for merchantability as unshelled filberts were prescribed from the standpoint that unshelled filberts were being sold primarily to the domestic trade, and experience had demonstrated that filberts of a lower grade and quality and of a smaller size were not acceptable to that trade, and, therefore, should not be sold to that trade at any time. On the other hand, it was recognized that filberts which fail to meet these minimum standards generally have some food value, which should be conserved and made available to the public, and that this could be done appropriately by permitting the sale of them in shelled form. (See the aforementioned decision, 14 F. R. 5659.)

The official records of the board show the following productions of unmerchantable or small size filberts: of the 1950–51 crop, 299,341 pounds, or 2.2 percent of the entire production; of the 1951–52 crop, 370,055 pounds, or 2.6 percent of the entire production; and, of the 1952–53 crop (based on the figures available on January 1, 1953), 1,775,527 pounds, or 8.1 percent of the entire production. The percentage of a crop consisting of unmerchantable or small size filberts varies from year to year, and results primarily from the kind of growing conditions which were in effect. In any event, there is a considerable quantity produced each year, and an appreciable poundage presumably would qualify for exportation under the proposal.

The bulk of export sales which have been made up to this time have been to Cuba and Canada, but those sales have consisted of the better, or merchantable, filberts. In this connection, the present order provides (in the definition of "trade demand" in § 997.21) for the consideration of prospective sales for the salable portion of the merchantable supply to Cuba and Canada "whenever the board is of the opinion that such distribution may be made to the particular country at prices to handlers approximating such prices on distribution in the Continental United States." In any event, consumer acceptance requirements for those two countries seems to approximate that of the United States.

However, such a situation does not appear to be the case with respect to other foreign countries. For instance, filberts produced in Turkey of smaller sizes than those now permitted to be sold in export under the order find a fairly ready sale in unshelled form in England and certain of the countries on the Continent of Europe. Past experience has demonstrated that it is not practicable to make sales of the larger sized, or merchantable, filberts in those countries last referred to, apparently because the economic situations in them are such that the potential buyers are financially unable to pay the prices which must be charged for them. Thus, such export sales should not interfere with the presently established export outlets for unshelled filberts of merchantable quality, but should be new business which could not be obtained otherwise.

During the last fiscal year (1952–53), the shelling of small size filberts by the cooperative marketing association resulted in a gross return of 13½ cents per pound, whereas medium size filberts were sold in so-called "off-shore export markets" at as low as 18 cents per pound, f. o. b. "Portland." This situation was not unique insofar as previous fiscal years are concerned. This margin of difference in the prices for the two outlets is considerable, and leaves room for an appreciable reduction in the export price and still affords a greater return to handlers, and through them to the producers, than could be derived from the disposition of small size filberts as shelled filberts. While no testimony was presented as to the prices for which small size filberts of Turkish production are being sold in unshelled form in England and European countries, the aforementioned margin indicates the probability that small size filberts of American production could be sold in those foreign outlets on a competitive basis.

The minimum size requirements (i. e., those in connection with U. S. No. 1, Medium) for merchantable filberts, as prescribed in the aforesaid United States Standards for filberts in the shell, are as follows: For round type varieties, those which will not pass through a round opening $^{13}/_{64}$ of an inch in diameter, but will pass through a round opening $^{15}/_{64}$ of an inch in diameter; and, for long type varieties, those which will not pass through a round opening $^{14}/_{64}$ of an inch in diameter, but will pass through a round opening $^{15}/_{64}$ of an inch in diameter. However, those standards also provide for the following size tolerances: "Twelve percent, by count, for filberts which fail to meet the size requirements for the size specified, but not more than five-sixths of this amount, or 10 percent, shall be allowed for filberts which pass through the smallest opening required for the size specified."

It was argued at the hearing that the same grade and quality requirements as are now required in connection with merchantable filberts should also be prescribed with respect to these small size filberts which are to be permitted to be exported, except that the size requirements should be smaller. The proposed size requirements for such small size filberts are as follows: For round type filberts, those which will not pass through a round opening $^{10}/_{64}$ of an inch in diameter but will pass through a round opening $^{11}/_{64}$ of an inch in diameter; and, for long type filberts, those which will not pass through a round opening $^{11}/_{64}$ of an inch in diameter but will pass through a round opening $^{12}/_{64}$ of an inch in diameter. The higher figure with respect to each type corresponds with the size requirement for that type which is set forth in the United States Standards for filberts in the shell for the small size of filberts. Thus, the proposal would authorize the exportation of that portion of the unmerchantable filberts which are also of merchantable quality, except for size, and the maximum differences in the minimum size requirements are only $^{2}/_{64}$ of an inch in diameter in connection with the round type and only $^{3}/_{64}$ of an inch in diameter in connection with the long type. In other words, such exportation of small size filberts will be limited to the best quality small size, or unmerchantable, filberts, in that they will have to meet the minimum requirements for merchantable filberts, other than for the indicated decrease in size. The adoption of this proposal will presumably leave an appreciable quantity of small size filberts which will not qualify for exportation, and which will have to be shelled the same as in the past.

It was testified without contradiction that any small size filberts of smaller than the respective minimum sizes proposed for exportation would not give consumer satisfaction in the countries to which it is expected that they will be exported because those filberts which are smaller than those sizes are generally irregular in shape, they often have blighted tips, the kernels may be malformed, and they do not ordinarily present a good appearance. Therefore, the exportation of sizes smaller than the minimum sizes indicated above should not be permitted, regardless of whether the estimated season average price for filberts for the particular fiscal year is above or below the parity level.

The indicated changes set forth above should properly be incorporated in the order by amending § 997.50, relating to pack specifications and minimum standards, so as to include them therein. The nature of the situation is such that the section should be broken down into paragraphs which will cover merchantable filberts and small size filberts for export separately where that action is reasonably necessary and appropriate. As indicated below, the putting of this proposal into effect will entail the addition, further along in the order, of a new section (to be numbered 997.76) to cover the details of the exportation of these small size filberts generally similar to the details in that connection which are now set forth in § 997.74 with respect to the exportation of merchantable surplus filberts. Reference to this new section should, therefore, be incorporated in the first sentence of amended § 997.50 along with the present reference to § 993.53.

The present provisions in § 997.50 authorize the modification of the pack specifications and minimum standards for merchantable filberts "at any time it appears that such action would tend to effectuate the declared policy of the act." This authorization for modification should be expanded to cover the small size filberts which are permitted to be exported for the same reasons it was provided for in the case of merchantable filberts. In fact, it may be even more probable that the presently proposed standards in connection with small size filberts for export will need to be modified, in that the outlet will be a new one, and the exact standards which are needed to serve the purpose will have to be determined later in the light of operational experience. If it develops that changes should be made, such action should be taken promptly and without having to do so through formal amendment proceedings. As is now the case in regard to merchantable filberts, any such changes should be made by the Secretary after due consideration of the board's recommendations and other available pertinent data.

To insure that the pack specifications and minimum standards with respect to merchantable filberts are observed by handlers, provisions for the inspection by the official inspection agency for each such lot handled or to be handled by each handler, the certification of each such lot, as to the meeting of such specifications and standards, the inclusion of certain other specified pertinent information in the certificate, and the fixing of appropriate seals, stamps, or tags to the containers are now contained in § 997.51 of the order. In case the pending proposal to permit the exportation of the indicated small size filberts is adopted, the provisions of § 997.51 should be modified to make these requirements apply also to such small size filberts. The need for this action is believed to be too obvious to require any discussion.

The detailed mechanism for the physical disposition of merchantable surplus filberts in export is now contained in § 997.74 of the order. Briefly, this mechanism is as follows: such exports may be made only by the board; any handler desiring to make such exportation shall deliver to the board the surplus to be exported, but the board shall be obligated to sell in export only those quantities for which it may be able to find satisfactory export outlets; any surplus which the board is unable to export shall be returned to the handler delivering it; such export sales shall be made only on execution of an agreement to prevent reimpor-

tation into the United States, and, in case of export to Canada or Mexico, the filberts may be sold only on the basis of a delivered price, duty paid; a handler may be permitted to act as an agent of the board, upon such terms and conditions as the board may specify, in negotiating export sales, and, when he so acts, he shall be entitled to receive a selling commission of five percent of the export sales price, f. o. b. area of production; and the proceeds of all export sales, after deducting all expenses actually and necessarily incurred, shall be paid to the handler whose merchantable surplus filberts are exported.

This mechanism was evolved after careful and thorough consideration at the promulgation hearing which preceded the issuance of the present order, and the several steps, together with the respective reasons therefor, were set forth (see 14 F. R. 5664) in the decision in that connection. These steps are obviously appropriate and necessary to enable the board to exercise the supervision and control adequate to insure against the prohibited disposition of the merchantable surplus into normal market outlets. It was contemplated that such dispositions in export would normally be made through certain of the handlers as agents, particularly those handlers who have business connections in foreign countries through whom they are able to negotiate sales of filberts in those countries. In cases where they sell their own merchantable surplus in export, they are entitled to receive the net proceeds therefrom, after the deduction of all actual and necessary expenses. In any case where a handler sells in export the merchantable surplus of another handler, the selling handler receives only the established commission of five percent of the export sales price, f. o. b. area of production, and the handler for whom the export was made receives the net proceeds remaining after the payment of actual and necessary expenses, including the specified sale commission.

The same mechanism should be provided for the physical disposition of the small size filberts in export, in that the circumstances surrounding the exportations of the two categories are generally similar, and obviously require the same safeguards to prevent their wrongful dispositions in normal market outlets. In fact, the only substantial difference is that, under the pending proposal, it will be permissible to export filberts of a smaller size than has been permitted up to this time. This difference has no significance in the present connection. It should be borne in mind that the possibility of this wrongful disposition in normal market channels will have been enhanced by reason of the fact that they will have been inspected and certified as meeting the specifications and standards prescribed in that connection. While these are lower than those which are prescribed for merchantable filberts, the certification aspect alone should make this wrongful disposition more feasible. While the provisions in this connection on the two categories should be similar, they should, in the interests of clarity, be set forth in separate sections. This may be done appropriately by retaining unchanged the present section (§ 997.74) relating to the disposition of merchantable surplus filberts in export and by adding a new section (997.76) to prescribe similar requirements with respect to the disposition of the small size surplus in export.

It is apparently contemplated by the board that, in the event, the pending proposal to permit the exportation of the small size filberts is adopted, it will include in the terms and conditions of its agency agreements with handlers specifications as to the minimum and maximum prices for which they may sell such filberts in export. This action is necessary and proper in connection with the export disposition of surplus, in that it enables the board on the one hand to prevent the making of the sales at such a low price as to make profitable the reimportation and wrongful disposition of it in normal market channels, and on the other hand to prevent the making of such sales at such a high price as to interfere unduly with the selling by handlers of their merchantable salable filberts. Except as may be exempted by law, contracts and combinations to fix prices are prohibited by the so-called antitrust laws. Such an exemption is provided for in section 8b of the act insofar as authorized and legally permissible operations under marketing agreements and orders are concerned. However, the fixing of prices under programs of this nature is restricted to the surplus portions. Certain questions which were asked at the hearing seemed to imply that these small size filberts from the unmerchantable portion were not actually a part of the surplus, but that they were being designated as such in order to bring the contemplated price fixing actions within the ambit of the exemption. This is not the case. Such action in those circumstances would constitute an obvious attempt to accomplish indirectly a result which could not legally be accomplished directly, and it would not be approved. As has been demonstrated above, unmerchantable filberts constitute a part of the surplus, and they have been consistently so recognized since the order was put into effect. So long as their disposition is confined to the shelled form, the circumstances are such that there is no need to refer specifically to them in the order as surplus filberts, inasmuch as their lack of certification insures that they will not be disposed of in normal market channels. This lack also relieves the board of the obligation to supervise such dispositions as closely as is necessary in the case of merchantable surplus, and, thus, provisions in that regard have not been necessary. However, for reasons which have been set forth above, the adoption of the present proposal will require the certification and close supervision of the small size filberts which are exported, the same as for merchantable surplus filberts which are exported, and they will need to be covered under the order similar to merchantable surplus filberts insofar as exportation is concerned.

There was also considerable discussion at the hearing to the general effect that the same size tolerances which apply to merchantable filberts should also be made applicable to the small size filberts which are permitted to be exported, and that, if the proposed amended order language in the latter connection does not make this clear, it should be revised so as to do so. The size tolerances in question are contained in the aforementioned United States Standards for filberts in the shell, and the provisions in that connection are quoted above. They are expressly made applicable to each of the four recognized size groups of filberts, namely, jumbo, large, medium, and small. The first three size groups (i. e., jumbo, large, and medium) come within the merchantable category if they are also of the U. S. No. 1 grade. The application of such tolerances to merchantable filberts arises from the fact that those size groups are included "as now defined in United States Standards for filberts in the shell." As stated heretofore, the small size filberts whose exportation is proposed to be permitted fall in the upper ranges of the small size category as defined in those standards and it is believed to be reasonable and proper to apply the same size tolerances to them in the present connection. In order to insure that this will be done, it is concluded that provisions for the application of such size tolerances in the latter connection should be included after the descriptions of the applicable minimum and maximum size ranges in proposed § 997.50 (c) in the form of a proviso.

It was also proposed and argued at the hearing that § 997.91 of the order, relating to assessments, should be amended so as to impose such assessments also against the small size filberts which are exported. At the present time, the provisions require the imposition of assessments against each handler "for each pound of merchantable filberts certified for him, including those certified for handling and also those certified for surplus." It was stated that the proposed new procedure in connection with the supervision and control by the board in connection with the exportation of the small size filberts should entail the incurring of the same operational expense as is incurred in connection with its supervision and control of merchantable filberts. Therefore, these small size filberts should bear their proportionate part of the administrative expenses. It seems clear that the adoption of the pending proposal to permit the exportation of small size filberts will increase the costs of operation beyond that which the operation of this program would cost without it. The act requires, in section 10 (b) (2) (ii), that each handler shall pay to the administrative agency his pro rata share of the costs of the operation of a program of this nature. Of course such a proration of the costs as between the several handlers should be fair and equitable. It is concluded that the imposition of the assessment against the small size filberts which are exported would be in line with those requirements in that they would be paid, in each instance, by the handler who benefitted therefrom. For instance, if a handler should export his own small size filberts, such assessment would be paid from the proceeds, and this would reduce his net returns to that extent. But, if a handler should export the small size filberts of another handler, the payment from the proceeds to cover assessments would be regarded as a part of the actual and necessary expenses of the sale, and would reduce, to that extent, the net proceeds from the sale which are payable to the handler for whom the export was made. Thus, fair and equitable proration of costs would be achieved, in that each handler would pay in proportion to the relative costs to the board for the supervision and control by it over his dealings. In this connection, the cost of supervision of the disposition of unmerchantable filberts as shelled filberts is comparatively negligible, and the present practice of not collecting assessments on such filberts should be continued in effect.

The adoption of the present proposal will involve certain other relatively minor and obviously appropriate conforming changes in the order. These changes are as follows: (a) The deletion of the center heading reading "Surplus Control" immediately preceding § 997.60 and the substitution of a center heading reading "Merchantable Surplus Control;" (b) the amendment of the first sentence of § 997.64 by inserting the word "merchantable" between the words "handle" and "unshelled;" (c) the amendment of §§ 997.60 to 997.75, both inclusive, and of §§ 997.80 and 997.81 so as to insert the word "merchantable" before the word "surplus" wherever the latter word is not now preceded by the word "merchantable;" and (d) the addition of a new center heading, reading "Control of Small Size Filberts For Export," between present § 997.75 and proposed new § 997.76.

So-called conforming changes similar to those set forth in (c) above (i. e., inserting "merchantable" before "surplus" where such is not now the case) were also set forth in the notice of hearing and argued at the hearing with respect to §§ 997.83 and 997.91. However, these latter proposals should not be adopted in their entirety.

Section 997.83 relates to the verification of reports, and it was argued that this would be confined to the specified reports on merchantable filberts which handlers are required to file with the board by the provisions of §§ 997.80 and 997.81 and also that it was not the present intention of the board to require the filing of any reports with respect to the small size filberts which are exported. Except to the extent indicated below, it is concluded that this proposal with respect to § 997.83 should not be adopted. This § 997.83 is the one which authorizes the board, through its representatives, to enter the premises of handlers and to inspect all of their filberts and business records and requires the handlers to cooperate in those connections. It is clearly necessary that the board have this authority in regard to small size filberts which are exported in order that it may assure itself that they are actually exported and also that they are not subsequently reimported and wrongfully placed in normal market channels. Further, certain of the documents which will need to be submitted to the board pursuant to the provisions of new § 997.76 may partake of the nature of reports, and, in any event, the board should be able to make appropriate verifications as to their accuracy when that seems to be desirable. Also, in addition to the specific reports on merchantable filberts which are required under §§ 997.80 and 997.81, the board is authorized (in § 997.82) to require the filing of any other reports it may deem necessary to enable it "to perform its duties and to exercise its powers hereunder." It is considered that this general reporting requirement authority contained in § 997.82 will apply to the small size surplus which is exported in case a need for reports in that connection should arise later. The one exception to the foregoing is the last sentence of § 997.83, which requires the separate storage of surplus filberts. It is obvious that this requirement should not be applicable with respect to the small size filberts which are exported, and the word "merchantable" shou'd be inserted before the word "surplus" in that sentence.

In regard to § 997.91, relating to assessments, it was apparently overlooked that another amendment which was proposed at the hearing and which is recommended above for adoption, would amend that section so as to provide for the imposition of assessments against small size filberts which are exported, as well as against all merchantable filberts. The present aspect is being taken care of in connection with such other amendment.

In conclusion, some apprehension was expressed at the hearing with respect to the possibility that the reference in the amended order to the small size filberts which are permitted to be exported as surplus may serve to imply that they will be eligible for use in satisfying handlers' surplus withholding obligations with respect to their merchantable filberts, and also possibly that the present definite distinction between merchantable filberts and unmerchantable filberts will be obscured. It was testified that these results would be undesirable and should not be allowed to occur. In order to remove any doubt in that regard, it is not contemplated or intended that the adoption of the proposal to permit the exportation of the small size filberts will make any change in the effect of the existing provisions with respect to merchantable filberts, and particularly with respect to surplus merchantable filberts. Special care has been taken in redrafting the order, as proposed to be amended, to make it clear that this will be the case.

(4) Section 997.62 of the order should be amended so as to extend, from August 15 to August 20, the final date by which the board is required to submit to the Secretary its estimates and recommendation in connection with the fixing of the salable and surplus percentages on merchantable filberts for a fiscal year. Further, § 997.90 of the order should likewise be amended so as to make the same extension of the final date by which the board is required to submit to the Secretary its recommendation, together with all supporting data, as to its expenses for the fiscal year, and also the proviso at the end of the second sentence, relating to the time of such submission for the first fiscal year, should be deleted.

With respect to the recommended amendment of § 997.62, the Department's August estimate of filbert production, which is essential to the board in formulating its estimates and in determining its recommendation as to the salable and surplus percentages for a fiscal year, is ordinarily released to the public on August 10. It could happen, however, that it would not be released until a day or more later. In any event, the release of the estimate on August 10 would provide a maximum period of only five days in which the board manager must analyze the information and prepare on the basis thereof the necessary statistical tables, furnish such information and tables to the individual members of the board, and for such members to study and relate the data to the filbert situation and determine the estimates and recommendation which should be submitted to the Secretary. Also, there is for consideration the fact that the board members are scattered over the area and some time should be allowed for the transmittal of the information and tables to them for consideration prior to their attendance at the particular meeting, which now may be held not later than August 15. In these circumstances, the granting of ten, instead of five, days for the purpose is believed to be fair and proper. It was testified that filberts normally begin moving to market during the early part of October, but, in some years, the movement begins during the last week in September. It should be practicable to fix the percentages in time to cover all such movements in case the proposed extension of time is granted.

With reference to the recommended amendment of § 997.90 to provide a similar extension of time for the submission of the proposed budget of expenses, and the supporting data, the board ordinarily considers that matter at the same meeting at which it considers the salable and surplus percentages for merchantable filberts. In fact, if it did not do so, an extra, and unnecessary, meeting would need to be held. Also, there is entailed in connection with the determination of the budget a consideration of the expense of the particular regulation which is contemplated and the necessity for insuring that the rate of assessment as applied to the estimated quantity of merchantable filberts will provide sufficient money to meet expenses of operation. Thus, the two matters should be considered at the same time. The proviso at the end of the second sentence of that section should be deleted because it is now obviously obsolete.

(5) Section 997.18 of the order contains a definition of the term "fiscal year" and delineates such period as being the 12 months from August 1 to the following July 31, both inclusive, "except that the fiscal year ending July 31, 1950, shall begin on the effective date of this subpart (October 1, 1949)." Since the quoted portion is now obsolete, in that

(e) The seventh member and his alter-

individual growers shall be given equal

the period in question expired several years ago, it should be deleted.

(6) The proviso at the end of the first sentence of § 997.60 should be deleted because it is now obsolete. Such proviso fixed the salable and surplus percentages on merchantable filberts for the first fiscal year of the order operations at 75 percent and 25 percent, respectively. Also, the word "subsequent" before the words "salable and surplus percentages" in the second sentence should be deleted because its inclusion in that connection is no longer necessary or desirable. The deletion of such word would be in conformity with the deletion of the proviso at the end of the first sentence.

(7) The last sentence of § 997.63 should be deleted because it is now obsolete. Such sentence specified the withholding percentage for the first fiscal year of the order operations.

(8) The order should be amended so as to add a new section (designated as § 997.23) to define "part" and "subpart." The term "part" should mean the order regulating the handling of filberts grown in Oregon and Washington, and all rules, regulations, and supplementary orders issued thereunder, and the order regulating the handling of filberts grown in Oregon and Washington should be a "subpart" of such part. The use of such terms having those meanings would be in accordance with the requirements of the Federal Register Division for orders of this nature.

(9) It was testified, in effect, at the hearing that changes should also be made in provisions of the order not directly involved in connection with specific amendments of it which may result from this proceeding, but which are necessary to make such other provisions conform with any such specific amendments which are so adopted. Any such changes should, of course, be limited strictly to those which are obviously necessary and appropriate, and, other than to that extent, such changes should not affect the present meaning of such provisions. It does not appear necessary to make any such conforming changes of significance.

*Proposed findings and conclusions.* At the conclusion of the hearing, the Presiding Officer fixed a period of time in which briefs from interested parties with respect to the testimony presented in evidence at the hearing and the conclusions to be drawn therefrom must be received by the Hearing Clerk of this Department. Such period expired some time ago, and no such briefs have been received.

*General findings.* (a) The findings hereinafter set forth are supplementary and in addition to the findings and determinations (14 F. R. 5667 and 5694) which were made in connection with the original issuance of this marketing agreement and order, and all of such previous findings and determinations, other than the finding as to the base period for the parity computation, are hereby ratified and confirmed, except insofar as such previous findings and determinations may be in conflict with the findings set forth herein.

(b) The marketing agreement and order, as hereby proposed to be amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act.

(c) The marketing agreement and order, as hereby proposed to be amended, will be applicable only to persons in the respective classes of commercial and industrial activities specified, or necessarily included, in the proposals upon which the amendment hearing was held.

(d) There are no differences in the production and marketing of filberts in the production area covered by this marketing agreement and order, as hereby proposed to be amended, which make necessary different terms or provisions applicable to different parts of such area.

*Recommended amendment of the marketing agreement and order.* The following proposed amendment of the marketing agreement and order [1] is recommended as the detailed means by which the aforesaid conclusions may be carried out:

DEFINITIONS

§ 997.1 *Secretary.* "Secretary" means the Secretary of Agriculture of the United States, or any other officer or employee of the United States Department of Agriculture who is, or who may be, authorized to perform the duties of the Secretary of Agriculture of the United States.

§ 997.2 *Act.* "Act" means Public Act No. 10, 73d Congress, as amended and as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.; 63 Stat. 282).

§ 997.3 *Person.* "Persons" means an individual, partnership, corporation, association, or any other business unit.

§ 997.4 *Filberts.* "Filberts" means filberts or hazelnuts produced in the States of Oregon and Washington from trees of the genus Corylus.

§ 997.5 *Unshelled filberts.* "Unshelled filberts" means filberts the kernels of which are contained in the shell.

§ 997.6 *Merchantable filberts.* "Merchantable filberts" means all unshelled filberts meeting the pack specifications and minimum standards of quality prescribed pursuant to § 997.50 (b), or as such specifications and standards may be modified pursuant to § 997.50 (d).

§ 997.7 *Area of production.* "Area of production" means the States of Oregon and Washington.

§ 997.8 *Grower.* "Grower" is synonymous with "producer" and means any person engaged in a proprietary capacity, in the commercial production of filberts.

§ 997.9 *Handler.* "Handler" means any packer or distributor of unshelled filberts handling not less than 250 pounds of filberts during any fiscal year.

§ 997.10 *Packer.* "Packer" means any person who packs and handles unshelled filberts.

§ 997.11 *Distributor.* "Distributor" means any person other than a packer who handles unshelled filberts which have not been subjected, in the hands of a previous holder, to compliance with the surplus-control provisions hereinafter contained.

§ 997.12 *Cooperative handler.* "Cooperative handler" means any handler which is a cooperative marketing association regardless of where or under what laws it may be organized.

§ 997.13 *Sheller.* "Sheller" means any person engaged in the business of shelling filberts for any commercial purpose.

§ 997.14 *Pack.* "Pack" means a specific commercial classification according to size, internal quality, and external appearance and condition of filberts packed in accordance with any of the pack specifications prescribed pursuant to § 997.50.

§ 997.15 *To pack.* "To pack" means to bleach, clean, grade, or otherwise prepare filberts for market as unshelled filberts in any manner whatsoever.

§ 997.16 *To handle.* "To handle" means to sell, consign, transport or ship (except as a common carrier of filberts owned by another person), or in any other way to put into the channels of trade, either within the area of production or from such area to points outside thereof: *Provided*, That such sales or deliveries by growers to a packer for packing or a sheller for shelling or to a distributor within the production area, shall not be considered as handling.

§ 997.17 *Federal-State Inspecion Service.* "Federal-State Inspection Service" means that inspection service on filberts which is performed within the States of Oregon and Washington by the United States Department of Agriculture or by said Department under a cooperative arrangement with either of such States pursuant to authority contained in any act of Congress.

§ 997.18 *Fiscal year.* "Fiscal year" means the 12 months from August 1 to the following July 31, both inclusive.

§ 997.19 *Handler carryover.* "Handler carryover" as of any given date means all merchantable filberts (except merchantable filberts held as surplus) wherever located, then held by handlers or for their accounts (whether or not sold) including the estimated quantity of merchantable filberts in unbreaded lots then held by handlers and intended for packing as merchantable filberts.

§ 997.20 *Trade carryover.* "Trade carryover" means all merchantable filberts theretofore delivered by handlers and then remaining in the possession or control of the wholesale or chain store or supermarket trade, exclusive of filberts in retail outlets, as of any given date.

§ 997.21 *Trade demand.* "Trade demand" means the quantity of merchantable filberts which the wholesale, chain store and supermarket trade will acquire from all handlers during a fiscal year for distribution in the Continental United States, Alaska, Hawaii, Puerto Rico, and the Canal Zone; except that there may also be considered in the making of such computation such acquirements for distribution in Canada or Cuba, whenever the board is of the opinion that such distribution may be made to the particular country at prices to handlers approximating such prices on distribution in the Continental United States.

§ 997.22 *Control board.* "Control board" or "board" means the Filbert Control Board established pursuant to §§ 997.30 through 997.40.

§ 997.23 *Part and subpart.* "Part" means the order regulating the handling of filberts grown in Oregon and Washington, and all rules, regulations, and supplementary orders issued thereunder. This order regulating the handling of filberts grown in Oregon and Washington shall be a "subpart" of such part.

FILBERT CONTOL BOARD

§ 997.30 *Establishment and membership.* A control board consisting of seven members, with an alternate member for each such member, is hereby established.

§ 997.31 *Selection and term of office.* (a) Members and their respective alternates shall be selected annually by the Secretary for a term of one year beginning with the first Tuesday after the first Monday in April, and shall serve until their respective successors shall be selected and shall qualify. One member and one alternate member shall be selected from nominees submitted by each of the following groups, which nominees shall be eligible members of the respective groups which nominate them:

(1) The cooperative handlers;

(2) All handlers, other than the cooperative handlers;

(3) The group of cooperative handlers or the group of other than cooperative handlers, whichever during the preceding fiscal year handled more than 50 percent of the merchantable filberts handled by all handlers;

(4) Those growers of filberts who market their filberts through cooperative handlers;

(5) All other growers of filberts;

(6) Those growers whose filberts were marketed during the preceding fiscal year through the handler group specified in subparagraph (3) of this paragraph.

(b) The following additional restrictions shall apply to the growers who do not market their filberts through cooperative handlers: (1) Such a grower may not vote in a nomination election for a representative of his group if, during that portion of the fiscal year up to the time of such election, he handled any filberts which were produced by another grower, and such a grower shall not be selected to serve as a representative of that group, if, during the fiscal year in which the nomination election is held, he handled any filberts which were produced by another grower; and (2) such a grower who, at any time during the fiscal year in which the nomination election is held, was employed by a filbert handler shall not be selected to serve as such a representative, but he shall be entitled to vote in the nomination election.

(c) The seventh member and his alternate shall be selected after the selection of the first six members as provided for in this section, and after opportunity for such six members to nominate a seventh member and his alternate, who shall not be members of any of the six groups described in this section.

§ 997.32 *Nominations for members and alternates.* (a) Each of the six groups specified in § 997.31 may nominate one person as member and one person as alternate; and the six members first selected by the Secretary may nominate, by majority vote, one person as member and one person as alternate for that member. Nominations for each handler group shall be submitted on the basis of ballots to be mailed by the control board to all handlers in such group whose pack for the preceding fiscal year is on record with the control board. Nominations on behalf of growers who market their filberts through cooperative handlers shall be submitted on the basis of ballot cast by each cooperative handler for its grower patrons. Nominations on behalf of growers who market their filberts through other than cooperative handlers shall be submitted after ballot by such growers conducted as follows:

(b) Names of the grower candidates to accompany the ballot shall be submitted to the control board prior to February 10 of each fiscal year on petitions signed by not less than ten growers who market their filberts through other than cooperative handlers and who are of record with the control board; each grower may sign only as many petitions as there are persons to be nominated as members of the control board; ballots accompanied by the list of candidates submitted by petitions, together with instructions, shall be mailed to all growers who market their filberts through other than cooperative handlers and who are of record with the control board; the qualified person receiving the highest number of votes for the position for which his name was placed on the ballot shall be the nominee for that position, except that, in case of a tie, the names of the tied candidates shall be submitted. If the Secretary determines that this procedure is unsatisfactory to the growers who market their filberts through other than cooperative handlers, because it is too difficult or costly to administer, it does not result in the name of a sufficient number of qualified candidates being submitted with the ballot, or it should be changed for other reasons, he may change this procedure through the formulation and issuance of superseding regulations.

(c) All votes cast by cooperative handlers, handlers other than cooperative handlers, or for cooperative growers, shall be weighted according to the tonnage of merchantable filberts (computed to the nearest whole ton in case of fractions) recorded by the control board as certified for handling by the handler or for the cooperative grower group during the preceding fiscal year, and if less than one ton is recorded for any such handler or grower group, its vote shall be weighted as one vote. All votes cast by individual growers shall be given equal weight. Nominations received in the foregoing manner by the control board shall be reported to the Secretary on or before March 20 of each fiscal year, together with a certificate of all necessary data and other information deemed by the board to be pertinent or requested by the Secretary. If such nominations of any group are not submitted as hereinbefore provided to the Secretary on or before that date, the Secretary may select the representatives of that group without nomination. If nominations for the seventh member or his alternate are not submitted on or before April 15 of any year, the Secretary may select such member or alternate without nomination.

§ 997.33 *Qualification.* Any person selected as a member or alternate of the control board shall qualify by filing a written acceptance of his appointment with the Secretary or his designated representative. Any member or alternate, who at the time of his selection, was a member of, or employed by a member of the group which nominated him and who thereafter ceases to be such a member or employee shall thereupon become disqualified to serve further and his position on the control board shall be deemed vacant. In the event any member or alternate member of the control board qualified and selected, in accordance with the provisions of §§ 997.31 and 997.32, to represent growers who market their filberts through other than cooperative handlers should, during his term of office, handle filberts produced by other growers, or become an employee of a handler, his position on the control board shall thereupon be deemed to be vacant: *Provided*, That these disqualification provisions shall not apply to any initial representative of such growers for the term which began in April 1953 in connection with the continuance, for the balance of such term, of either such prohibited handling or employment situation which existed when he was selected and qualified.

§ 997.34 *Alternates.* An alternate for a member of the control board shall act in the place and stead of such member (a) in his absence, or (b) in the event of his death, removal, resignation, or disqualification, until a successor for his unexpired term has been selected and has qualified.

§ 997.35 *Temporary substitutes.* In the event any member of the control board and his alternate are both unable to attend a meeting of the control board, any alternate for any other member nominated by the same group that nominated the absent member may serve in the place and stead of the absent member and his alternate, or in the event such other alternate cannot attend, or there is no such other alternate, such member or, in the event of his disability or a vacancy, his alternate may designate, subject to the disapproval of the Secretary, a temporary substitute to attend such meeting. At such meeting such temporary substitute may act in the place and stead of such member. For the purposes of this section a cooperative handler group and a coopera-

[1] The provisions identified with an asterisk (*) apply only to the proposed amendment of the marketing agreement and not to the proposed amendment of the marketing order.

tive grower group shall be considered the same group.

§ 997.36 *Vacancy.* To fill any vacancy occasioned by the death, removal, resignation, or disqualification of any member or alternate of the control board, a successor for his unexpired term shall be selected in the manner provided in § 997.32, so far as applicable, within 30 days after such vacancy occurs.

§ 997.37 *Expenses.* The members of the control board shall serve without compensation, but shall be allowed their necessary expenses.

§ 997.38 *Powers.* The control board shall have the following powers:

(a) To administer the provisions of this subpart in accordance with its terms;

(b) To make rules and regulations to effectuate the terms and provisions of this subpart;

(c) To receive, investigate, and report to the Secretary complaints of violations of this subpart;

(d) To recommend to the Secretary amendments to this subpart.

§ 997.39 *Duties.* The duties of the control board shall be among other things as follows:

(a) To act as intermediary between the Secretary and any handler or grower;

(b) To keep minute books and records which will clearly reflect all of its acts and transactions, and such minute books and records shall at any time be subject to the examination of the Secretary;

(c) To furnish to the Secretary such available information as he may request;

(d) To appoint such employees as it may deem necessary and to determine the salaries, define the duties and fix the bonds of such employees;

(e) To cause the books of the control board to be audited by one or more competent public accountants at least once for each fiscal year and at such other times as the control board deems necessary or as the Secretary may request, and to file with the Secretary three copies of all audit reports made; and

(f) To investigate the growing, shipping, and marketing conditions with respect to filberts and to assemble data in connection therewith.

§ 997.40 *Procedure—(a) Organization and rules.* The members of the control board shall select a chairman from their membership and all communications from the Secretary may be addressed to the chairman at such address as may from time to time be filed with the Secretary. The board shall select such other officers and adopt such rules for the conduct of its business as it may deem advisable. The board shall give to the Secretary or his designated agent and representative the same notice of meeting of the control board as is given to members of the board.

(b) *Quorum.* All decisions of the control board, except where otherwise specifically provided, shall be by a majority vote of the members present. The presence of five members shall be required to constitute a quorum.

(c) *Permissive method of voting.* The control board may vote by mail or telegram upon due notice to all members: *Provided,* That voting by mail or telegram shall not be permitted at any assembled meeting of the board. When any proposition is submitted for voting by such method, one dissenting vote shall prevent its adoption by that method.

(d) *Right of the Secretary.* The members of the control board (including successors, alternates, or other persons selected by the Secretary), and any agent or employee appointed or employed by the control board, shall be subject to removal or suspension by the Secretary, in his discretion, at any time. Each and every order, regulation, decision, determination, or other act of the control board shall be subject to the continuing right of the Secretary to disapprove of the same at any time, and, upon such disapproval, shall be deemed null and void except as to acts done in reliance thereon or in compliance therewith.

CONTROL OF DISTRIBUTION

§ 997.50 *Pack specifications and minimum standards—(a) General restrictions as to handling.* In order to effectuate the declared policy of the act, and except as otherwise provided in §§ 997.53 and 997.76, no handler shall handle any unshelled filberts except those which have been certified by the control board as merchantable filberts.

(b) *Merchantable filberts.* Unless and until modified by the Secretary, after consideration of the control board's recommendations and other available pertinent data, unshelled filberts shall be deemed to be merchantable if they meet the following requirements:

(1) As to pack specifications, such filberts shall be "U. S. No. 1, Jumbo," "U. S. No. 1, Large," or "U. S. No. 1, Medium," as now defined in the United States Standards for filberts in the shell (13 F. R. 4623), except that the portion of the tolerance provision in the U. S. No. 1 grade, for grade requirements, other than for type and size, reading "not more than five percent shall be allowed for blanks" shall not be applicable; and

(2) As to minimum standards of quality, shall be U. S. No. 1 grade as defined in the aforementioned standards, with the aforesaid modified tolerance as to blanks, and the lower limit of medium size as defined in such United States Standards for filberts in the shell.

(c) *Small size filberts for export.* Unless and until modified by the Secretary, after consideration of the control board's recommendations and other available pertinent data, unshelled filberts which are below the minimum requirements for merchantable filberts, as set forth in paragraph (b) of this section, only with respect to size may be exported pursuant to the provisions of § 997.76 if they meet the following size requirements: Round type filberts which will not pass through a round opening $^{40}/_{64}$ of an inch in diameter but will pass through a round opening $^{45}/_{64}$ of an inch in diameter, and long type filberts which will not pass through a round opening $^{35}/_{64}$ of an inch in diameter but will pass through a round opening $^{35}/_{64}$ of an inch in diameter: *Provided,* That 12 percent, by count, shall be allowed for those filberts which fail to meet these size requirements but not more than $^{5}/_{64}$ of this amount, or 10 percent, shall be allowed for filberts which pass through the smallest opening specified for the respective type.

(d) *Modifications.* The aforementioned pack specifications and minimum standards for unshelled filberts as prescribed in paragraphs (b) and (c) of this section may be modified, at any time that it appears that such action would tend to effectuate the declared policy of the act, in which event unshelled filberts desired to be certified must meet the applicable modified pack specifications and minimum standards in order to be considered as merchantable filberts or as small size filberts for export, as the case may be.

(e) *Above parity situations.* The provisions of this section relating to minimum standards of quality for merchantable unshelled filberts or small size filberts for export, as the case may be, and the applicable grading and inspection requirements pertaining thereto, within the meaning of section 2 (3) of the act, and any other provisions relating to the administration and enforcement thereof, shall continue in effect irrespective of whether the estimated season average price for filberts is in excess of the parity level specified in section 2 (1) of the act.

§ 997.51 *Certification of merchantable filberts and surplus small size filberts for export.* Each handler, at his own expense, shall obtain a certificate for each lot of merchantable filberts handled or to be handled by him, and for each lot of surplus merchantable filberts, and also for each lot of surplus small size filberts for export disposed of by him as agent for the control board. Said certificates shall be obtained from the Federal-State Inspection Service. All such certificates shall show, in addition to such other information as the control board may specify, the identity of the handler, if for export, the country of destination, the quantity and pack of filberts in such lot, markings (if any) on the containers, including brands or labels, and that the filberts covered by such certificates conform to the pack specifications and minimum standards of quality prescribed pursuant to § 997.50 for merchantable filberts or for surplus small size filberts for export, as the case may be. All lots so inspected and certified shall be identified by appropriate seals, stamps, or tags to be affixed to the containers by the handler under the direction and supervision of the control board, or of the Federal-State Inspection Service.

§ 997.52 *Copies of certificates.* The inspector shall furnish to the control board as many copies of each such certificate as it may request.

§ 997.53 *Filberts for packing or shelling.* Nothing contained in this part shall be construed to prevent any person from selling or delivering, within the area of production, unshelled filberts, other than merchantable filberts, to any packer for packing or sheller for shelling.

MERCHANTABLE SURPLUS CONTROL

§ 997.60 *Salable and surplus percentages for merchantable filberts.* The salable and surplus percentages for merchantable filberts for each fiscal year shall be fixed by the Secretary at such amounts as in his judgment will most effectively tend to accomplish the purposes of the act. In fixing such salable and surplus percentages, the Secretary shall give consideration to the ratio of the estimated trade demand to the sum of the estimated production of merchantable filberts and the handler carryover (with appropriate adjustment for such handler carryover as may have theretofore contributed to merchantable surplus), the recommendation submitted to him by the control board, and such other pertinent data as he deems appropriate. The total of the salable and surplus percentages as fixed each fiscal year shall equal 100 percent.

§ 997.61 *Increase of salable percentage.* At any time prior to February 15 of any fiscal year, the Secretary may, on request of the control board (or if the control board shall fail so to request, on request of two or more packers who have handled during the immediately preceding fiscal year at least ten percent of the total tonnage handled by all packers during such fiscal year) and after a finding of fact, based on such revised and current information as may be pertinent, that the merchantable filberts available for handling will not be sufficient to supply the trade demand, increase the salable percentage to conform to such new relation as may be found to exist between trade demand and available supply.

§ 997.62 *Estimated carryover, trade demand, and production.* (a) To aid the Secretary in fixing the salable and surplus percentages for merchantable filberts, the board shall furnish to the Secretary, not later than August 20 of each fiscal year, the following estimates and recommendation, each of which shall be adopted by at least a majority vote of the entire control board:

(1) Its estimate of the quantity of merchantable filberts to be produced and packed during such year;

(2) Its estimate of handler carryover as of August 1;

(3) Its estimate of trade carryover as of August 1;

(4) Its estimate of the total trade demand (on the basis of prices not exceeding the maximum prices contemplated in section 2 of the act); in determining such trade demand consideration shall be given to the estimated trade carryover at the beginning and end of the fiscal year; and

(5) Its recommendation as to the salable and surplus percentages to be fixed for merchantable filberts.

(b) The board shall also furnish to the Secretary a complete report of the proceedings of the board meeting at which these recommended salable and surplus percentages to be fixed by the Secretary were adopted.

§ 997.63 *Withholding percentage.* The withholding percentage shall be the ratio (measured as a percentage) of the surplus percentage to the salable percentage for merchantable filberts. Such percentage shall be announced by the Secretary and, in its computation, may be adjusted by the Secretary to the nearest whole number.

§ 997.64 *Withholding of merchantable surplus filberts.* No handler shall handle merchantable unshelled filberts unless prior to or upon the shipment thereof (except as otherwise provided in § 997.65) he shall have withheld from handling a quantity of merchantable filberts equal to the withholding percentage, by weight of such quantity handled or certified for handling by him: *Provided,* That this requirement shall not apply to any lot of filberts for which the merchantable surplus obligation has been met by a previous holder. The quantity of filberts hereby required to be withheld shall constitute, and may be referred to as, the "merchantable surplus" or "surplus obligation" of a handler. The merchantable filberts handled by any handler in accordance with the provisions of this subpart shall be deemed to be that handler's quota fixed by the Secretary within the meaning of Section 8a (5) of the act.

§ 997.65 *Postponement of withholding merchantable surplus upon filing bond—(a) Privilege.* Compliance by any packer with the requirements of § 997.64 as to the time when merchantable surplus filberts shall be withheld shall be deferred to any date desired by the packer, but not later than December 31 of the fiscal year, upon the voluntary execution and delivery by such packer to the control board, before he handles any merchantable filberts of such fiscal year, of a written undertaking that on or prior to such date he will have fully satisfied his merchantable surplus obligation required by § 997.64.

(b) *Bonding requirement.* Such undertaking shall be secured by a bond or bonds to be filed with and acceptable to the control board, and with a surety or sureties acceptable to the control board, in the amount or amounts stated below conditioned upon full compliance with such undertaking. Such bond or bonds shall, at all times during their effective period, be in such amounts that the aggregate thereof shall be no less than the total bonding value of the packer's deferred merchantable surplus obligation. The bonding value shall be the deferred merchantable surplus obligation poundage bearing the lowest bonding rate or rates, which could have been selected from the packs handled or certified for handling, multiplied by the applicable bonding rate. The cost of such bond or bonds shall be borne by the packer filing same.

(c) *Bonding rate.* Said bonding rate for each pack shall be an amount per pound representing the season's domestic price for such pack net to packer f. o. b. shipping point which shall be computed at 95 percent of the opening price for such pack announced by the packer or packers who during the preceding fiscal year handled more than 50 percent of the merchantable filberts handled by all packers. Such packer or packers shall be selected in order of volume handled in the preceding fiscal year, using the minimum number of packers to represent a volume of more than 50 percent of the total volume handled. If such opening prices involve different prices announced by two or more packers for respective packs, the prices so announced shall be averaged on the basis of the quantity of such packs handled during the preceding fiscal year by each such packer.

§ 997.66 *Disposition of sums collected through default on bonds—(a) Filbert purchases.* Any sums collected through default of a packer on his bond shall be used by the control board to purchase, from packers, as provided in this paragraph, a quantity of merchantable filberts not to exceed the total quantity represented by the sums collected. Purchases shall be made from the salable percentages with respect to which the merchantable surplus obligation has been met and at the bonding rate for each pack. The control board shall at all times purchase the lowest priced packs offered and the purchases shall be made from the various packers as nearly as practicable in proportion to the quantity of their respective offerings of the pack or packs to be purchased.

(b) *Unexpended sums.* Any unexpended sums, which have been collected by the control board through default of a packer on his bond, remaining in the possession of the control board at the end of a fiscal year shall be used to reimburse the board for its expenses, including administrative and other costs incurred in the collection of such sums, and in the purchase of merchantable filberts as provided in paragraph (a) of this section. Any balance remaining after reimbursement of such expenses shall be distributed among all handlers in proportion to the quantity of merchantable filberts handled or certified for handling by them during the fiscal year in which the default occurred.

(c) *Transfer of filbert purchases.* Filberts purchased as provided in this paragraph shall be turned over to those packers, who have defaulted on their bonds, for disposal by them as merchantable surplus. The quantity delivered to each packer shall be that quantity represented by the sums collected through default, and the different grades, if any, shall be apportioned among the various packers on the basis of the quantity of filberts to be delivered to each packer to the total quantity purchased by the control board with bonding funds.

§ 997.67 *Collection upon bonds.* Collection upon any bond or bonds filed pursuant to the provisions of § 997.65 shall be deemed a satisfaction of the merchantable surplus obligation represented by such collection: *Provided,* That the filberts purchased by the control board with funds collected under bonds and subsequently turned over to such packers are used only for the purposes provided in §§ 997.74 and 997.75.

§ 997.68 *Interhandler transfers for merchantable surplus.* For the purpose of meeting his merchantable surplus obligation, any handler may, upon notice to and under the supervision and direction of the control board, acquire from another handler merchantable filberts with respect to which the merchantable surplus has not been withheld and any merchantable surplus obligation with respect to any filberts so transferred shall be waived. If any such sales are made from filberts on which the merchantable surplus obligation has been met, the seller's merchantable surplus obligation shall be reduced accordingly upon proof satisfactory to the control board that the purchaser is withholding such filberts as merchantable surplus.

§ 997.69 *Assistance of control board in accounting for merchantable surplus.* The control board, on written request, may assist handlers in accounting for their merchantable surplus obligation and may aid any handler in acquiring merchantable filberts to meet any deficiency in a handler's merchantable surplus, or in accounting for and disposing of merchantable surplus filberts.

§ 997.70 *Application of merchantable salable, surplus, and withholding percentages, and bonding rates, after end of fiscal year.* (a) The merchantable salable, surplus, and withholding percentages established for any fiscal year shall continue in effect with respect to all merchantable filberts, for which the merchantable surplus obligation has not been previously met, which are handled or certified for handling as merchantable filberts by any handler after the end of such fiscal year and before merchantable salable, surplus, and withholding percentages are established for the succeeding fiscal year. After such percentages are established for the new fiscal year, the withholding requirements for all such filberts theretofore handled or certified for handling as merchantable filberts during that fiscal year shall be adjusted to the newly established percentages.

(b) The bonding rates established for any fiscal year shall continue in effect with respect to any bond or bonds executed and delivered pursuant to § 997.65 before the bonding rates for the new fiscal year are established. After such bonding rates are established for the new fiscal year, the new rates shall be applicable and any bond or bonds theretofore given for that fiscal year shall be adjusted to the new rates.

§ 997.71 *Exchange of merchantable surplus filberts.* Any handler who has withheld merchantable surplus filberts pursuant to the requirements of § 997.64 and has had the same certified as merchantable surplus filberts may exchange therefor an equal quantity, by weight, of other merchantable filberts. Any such exchange shall be made under the supervision and direction of the control board with appropriate inspection and certification of the filberts involved.

§ 997.72 *Adjustment upon increase of merchantable salable percentage.* Upon any increase in the merchantable salable percentage and corresponding decrease in the merchantable surplus and withholding percentages, the merchantable surplus obligation of each handler with respect to the filberts handled by him for the entire fiscal year shall be recomputed in accordance with such revised merchantable salable, surplus, and withholding percentages. From the merchantable surplus filberts still held by a handler and from such merchantable surplus filberts that may have been delivered by him to the control board pursuant to § 997.74, and still held by the control board, the handler shall be permitted to select, under the supervision and direction of the control board, the particular merchantable surplus filberts to be restored to his salable percentage.

§ 997.73 *Prohibition against handling of merchantable surplus.* Except as provided in §§ 997.74 and 997.75, or for any use other than for distribution as unshelled filberts in established trade channels, merchantable surplus filberts withheld pursuant to the requirements of § 997.64 shall not be handled by any person as unshelled filberts.

§ 997.74 *Disposition of merchantable surplus by export.* Sales of merchantable surplus filberts for shipment or export to destinations outside the Continental United States, Alaska, Hawaii, Puerto Rico, and the Canal Zone shall be made only by the control board. Any handler desiring to export any part or all of his merchantable surplus filberts shall deliver to the control board his merchantable surplus to be exported, but the control board shall be obligated to sell in export only such quantities for which it may be able to find satisfactory export outlets. Any filberts so delivered for export which the control board is unable to export shall be returned to the handler delivering them. Sales for export shall be made by the control board only on execution of an agreement to prevent reimportation into the United States; and in case of export to Canada or Mexico, such filberts shall be sold only on the basis of a delivered price, duty paid. A handler may be permitted to act as agent of the control board, upon such terms and conditions as the control board may specify, in negotiating export sales; and when so acting shall be entitled to receive a selling commission of five percent of the export sales price, f. o. b. area of production. The proceeds of all export sales, after deducting all expenses actually and necessarily incurred, shall be paid to the handler whose merchantable surplus filberts are so sold by the board.

§ 997.75 *Disposal of merchantable surplus for shelling.* (a) Any handler may shell his merchantable surplus filberts or deliver them for shelling to an authorized sheller. Any person who desires to become an authorized sheller in any fiscal year may submit an application to the control board. Such application shall be granted only upon condition that the applicant agrees:

(1) To use such merchantable surplus filberts as he may receive for no purpose other than shelling;

(2) To dispose of or deliver such merchantable surplus filberts, as unshelled filberts, to no one other than another authorized sheller;

(3) To comply fully with all laws and regulations applicable to the shelling of filberts;

(4) To report to the control board, immediately upon receipt of any lot of merchantable surplus filberts, the quantity and pack of the filberts so received and the identity of the person from whom received, and within 15 days after the disposition of such filberts, to report their disposition to the control board. All such reports shall be certified to the control board and to the Secretary as to their correctness and accuracy.

(b) The board, if it finds that such an application is made in good faith and if the applicant may be reasonably relied upon to fulfill and observe the conditions to which it has agreed, shall issue a letter of authority to such applicant to serve as an authorized sheller. Such letter of authority shall expire with the end of the fiscal year during which it is issued by the Board.

CONTROL OF SMALL SIZE FILBERTS FOR EXPORT

§ 997.76 *Disposition of small size filberts by export.* Sales of small size filberts meeting the pack specifications and minimum standards prescribed in § 997.50 (c), for shipment or export to destinations outside the Continental United States, Alaska, Hawaii, Puerto Rico, and the Canal Zone shall be made only by the control board. Any handler desiring to export any part, or all, of his small size filberts meeting these specifications shall deliver them to the control board to be exported, but the control board shall be obligated to sell in export only such quantities for which it may be able to find satisfactory export outlets. Any small size filberts so delivered for export which the control board is unable to export shall be returned to the handler delivering them. Sales for export shall be made by the control board only on execution of an agreement to prevent reimportation into the United States; and in case of export to Canada or Mexico, such small size filberts shall be sold only on the basis of a delivered price, duty paid. A handler may be permitted to act as agent of the control board, upon such terms and conditions as the control board may specify, in negotiating these export sales; and, when so acting, shall be entitled to receive a selling commission of five percent of the export sales price, f. o. b. area of production. The proceeds of all such export sales, after deducting all expenses actually and necessarily incurred, shall be paid to the handler whose small size filbers are so sold by the board.

REPORTS

§ 997.80 *Reports of handler carryover of merchantable filberts.* Each handler, on or before August 5 and January 15 of each fiscal year, shall file with the control board a written report, under oath, of all merchantable filberts (except filberts held as merchantable surplus) including the estimated quantity of merchantable filberts in ungraded lots intended for packing as merchantable filberts, by him held on the first day of August and the first day of January, respectively, showing the pack (if merchantable), and location thereof and the quantities:

(a) Which theretofore have been certified for handling, and on which the merchantable surplus obligation has previously been met;

(b) Which have been packed as merchantable filberts, but have not been certified; and

(c) Which are estimated as merchantable but have not been packed as merchantable filberts and are intended for packing as merchantable filberts.

§ 997.81 *Reports of disposition of merchantable surplus.* (a) Each handler, before he disposes of any quantity of merchantable surplus filberts held by him, shall file with the control board a report of his intention to dispose of such quantity of merchantable surplus filberts. This report shall be filed not less than five days prior to the date on which the merchantable surplus filberts are disposed of unless the five-day period is expressly waived by the control board.

(b) Each handler, within 15 days after the disposition of any quantity of merchantable surplus filberts, shall file with the control board a report of the actual disposition of such quantity of merchantable surplus filberts. Such reports shall be certified to the control board and to the Secretary as to their correctness and accuracy.

(c) Each handler, from time to time, on demand of the control board, shall file with the board a report of his holdings of merchantable surplus filberts as of any date specified by the board. Such report, at the request of the control board, may be in the form of a confirmation of the records of the control board of such handler's holdings. Such report shall be certified to the control board and to the Secretary as to its correctness and accuracy.

(d) All reports required by this section shall show the quantity, pack, and location of the filberts covered by such reports and in the case of reports required by paragraphs (a) and (b) of this section, the applicable handler's storage lot and inspection certificate numbers, and the disposition of the merchantable surplus which is intended or which has been accomplished.

§ 997.82 *Other reports.* Upon request of the control board, made with the approval of the Secretary, every handler shall furnish to the board, in such manner and at such times as it prescribes (in addition to such other reports as are specifically provided for in this subpart), such other information as will enable the control board to perform its duties and to exercise its powers under this subpart.

§ 997.83 *Verification of reports.* For the purpose of checking and verifying reports made by handlers to it, the control board through its duly authorized agents, shall have access to the handler's premises wherever filberts may be held by such handler and, at any time during reasonable business hours, shall be permitted to inspect any filberts so held by such handler and any and all records of the handler with respect to the holding or disposition of all filberts which may be held or which may have been disposed of by such handler. Every handler shall furnish all labor necessary to facilitate such inspections as the control board may make of such handler's holdings of any filberts. Every handler shall store merchantable surplus filberts in such manner as to facilitate inspection and shall maintain adequate storage records which will permit accurate identification with respect to control board certificates of respective lots of all such filberts held or theretofore disposed of.

§ 997.84 *Confidential information.* All reports and records furnished or submitted by handlers to the board which include data or information constituting a trade secret or disclosing of the trade position, financial condition, or business operations of the particular handler from whom received shall be received by and at all times kept in the custody and under the control of one or more employees of the board, who shall disclose such information to no person except the Secretary. Notwithstanding the above provisions of this section, information may be disclosed to the board when reasonably necessary to enable the board to carry out its functions under this part.

EXPENSES AND ASSESSMENTS

§ 997.90 *Expenses.* The control board is authorized to incur such expenses as the Secretary may find are reasonable and likely to be incurred by it during each fiscal year, for the maintenance and functioning of the control board and for such purposes as the Secretary may, pursuant to the provisions of this subpart, determine to be appropriate. The recommendation of the control board as to the expenses for each such fiscal year, together with all data supporting such recommendations, shall be submitted to the Secretary on or before August 20 of the fiscal year in connection with which such recommendation is made. The funds to cover such expenses shall be acquired by levying assessments as provided in § 997.91.

§ 997.91 *Assessments.* (a) Each handler shall pay to the control board on demand by the control board, from time to time, the sum of two-tenths of a cent for each pound of filberts certified for him, including those certified as merchantable filberts (including both salable and surplus) and those certified as small size filberts for export. At any time during or after a fiscal year, the Secretary may increase the rate of assessment to apply to all filberts so certified during such fiscal year, including those certified in said fiscal year prior to the date of such increase, to secure sufficient funds to cover the expenses authorized by § 997.90, or by any later finding by the Secretary relative to the expenses of the control board, and such additional assessments shall be paid by the handler on demand. At the end of any fiscal year for which the assessment rate may be increased by the Secretary, the rate shall revert to two-tenths of a cent a pound.

(b) Any money collected as assessments during any fiscal year and not expended in connection with the respective fiscal year's operations hereunder may be used and shall be refunded by the control board in accordance with the provisions of this subpart. Such excess funds may be used by the control board during the period of four months subsequent to such fiscal year in paying the expenses of the control board incurred in connection with the new fiscal year. The control board shall, however, from funds on hand, including assessments collected during the new fiscal year, distribute or make available, within five months after the beginning of the new fiscal year, the aforesaid excess to each handler from whom an assessment was collected, as aforesaid, in the proportion that the amount of the assessment paid by the respective handler bears to the total amount of the assessments paid by all handlers during said fiscal year.

(c) Any money collected from assessments under this subpart and remaining unexpended in the possession of the control board upon the termination of this subpart shall be distributed in such manner as the Secretary may direct.

MISCELLANEOUS PROVISIONS

§ 997.95 *Personal liability.* No member or alternate member of the control board, or any employee or agent thereof, shall be held personally responsible, either individually or jointly with others, in any way whatsoever, to any handler or any other person for errors in judgment, mistakes, or other acts either of commission or omission, as such member, alternate member, agent or employee, except for acts of dishonesty.

§ 997.96 *Separability.* If any provision of this subpart is declared invalid, or the applicability thereof to any person, circumstance, or thing is held invalid, the validity of the remainder of this subpart or the applicability thereof to any other person, circumstance, or thing shall not be affected thereby.

§ 997.97 *Derogation.* Nothing contained in this subpart is, or shall be construed to be, in derogation or in modification of the rights of the Secretary or of the United States to exercise any powers granted by the act or otherwise, or, in accordance with such powers, to act in the premises whenever such action is deemed advisable.

§ 997.98 *Duration of immunities.* The benefits, privileges, and immunities conferred upon any person by virtue of this subpart shall cease upon the termination of this subpart, except with respect to acts done under and during the existence of this subpart.

§ 997.99 *Agents.* The Secretary may, by a designation in writing, name any person, including any officer or employee of the United States Government, or name any bureau or division in the United States Department of Agriculture, to act as his agent or representative in connection with any of the provisions of this subpart.

§ 997.100 *Effective time, termination or suspension*—(a) *Effective time.* The provisions of this subpart, as well as any amendments to this subpart, shall become effective at such time as the Secretary may declare, and shall continue in force until terminated or suspended in one of the ways specified in this section.

(b) *Suspension or termination.* (1) The Secretary may, at any time, terminate the provisions of this subpart by giving at least one day's notice by means of a press release or in any other manner which he may determine.

(2) The Secretary shall terminate or suspend the operation of any or all of the provisions of this subpart whenever he finds that such provisions do not tend to effectuate the declared policy of the act.

(3) The Secretary shall terminate the provisions of this subpart at the end of any fiscal year whenever he finds that such termination is favored by a majority of the producers of filberts who during the preceding fiscal year have been engaged in the production for market of filberts in the States of Oregon and Washington: *Provided*, That such majority have during such period produced for market more than 50 percent of the volume of such filberts produced for market within said States; but such termination shall be effected only if announced on or before July 1 of the then current fiscal year.

(4) The provisions of this subpart shall, in any event, terminate whenever the provisions of the act authorizing them ceases to be in effect.

(c) *Proceedings after termination.* (1) Upon the termination of the provisions of this subpart, the members of the control board then functioning shall continue as joint trustees for the purpose of liquidating the affairs of the control board, of all funds and property then in the possession or under the control of the board, including claims for any funds unpaid or property not delivered at the time of such termination. Action by said trusteeship shall require the concurrence of a majority of the said trustees.

(2) Said trustees shall continue in such capacity until discharged by the Secretary; shall, from time to time, account for all receipts and disbursements and deliver all property on hand, together with all books and records of the control board and the joint trustees, to such person as the Secretary may direct; and shall, upon the request of the Secretary, execute such assignments or other instruments necessary or appropriate to vest in such person full title and right to all of the funds, property, and claims vested in the control board or the joint trustees pursuant to this subpart.

(3) Any person to whom funds, property, or claims have been transferred or delivered by the control board or its members, pursuant to this section, shall be subject to the same obligations imposed upon the members of the said board and upon said joint trustees.

§ 997.101 *Effect of termination or amendment.* Unless otherwise expressly provided by the Secretary, the termination of this subpart or of any regulation issued pursuant to this subpart, or the issuance of any amendment to either thereof, shall not (a) affect or waive any right, duty, obligation, or liability which shall have arisen or which may thereafter arise in connection with any provision of this subpart or any regulation issued under this subpart, or (b) release or extinguish any violation of this subpart or of any regulation issued under this subpart, or (c) affect or impair any right or remedies of the Secretary or of any other person, with respect to any such violation.

§ 997.102 *Amendments.* Amendments to this subpart may be proposed, from time to time, by any person or by the control board.

§ 997.103 *Special agreement provisions*—(a) *Counterparts.* This agreement may be executed in multiple counterparts, and when one counterpart is signed by the Secretary, all such counterparts shall constitute, when taken together, one and the same instrument as if all such signatures were contained in one original.*

(b) *Additional parties.* After the effective date hereof, any handler may become a party hereto if a counterpart hereof is executed by him and delivered to the Secretary. This agreement shall take effect as to such new contracting party at the time such counterpart is delivered to the Secretary and the benefits, privileges, and immunities conferred by this agreement shall then be effective, as to such new contracting party.*

(c) *Request for order.* Each signatory handler hereto requests the Secretary to issue an order pursuant to the act regulating the handling of filberts produced in Oregon and Washington in the same manner as provided in this agreement.*

Issued at Washington, D. C., this 20th day of November 1953.

[SEAL] GEORGE A. DICE,
*Deputy Assistant Administrator, Production and Marketing Administration.*

## SECURITIES AND EXCHANGE COMMISSION

### [ 17 CFR Part 240 ]

GENERAL RULES AND REGULATIONS UNDER THE SECURITIES EXCHANGE ACT OF 1934

OVER-THE-COUNTER MARKETS; TRADING IN WEST GERMAN BONDS

Notice is hereby given that the Securities and Exhange Commission has under consideration a proposal to adopt § 240.15c2-3 (Rule X-15C2-3) under section 15 (c) (2) of the Securities Exchange Act of 1934. Under the proposed rule it would be a "fraudulent, deceptive, or manipulative act or practice," as used in section 15 (c) (2) of the act, for any broker or dealer to effect any transaction in, or to induce or attempt to induce the purchase or sale, in the over-the-counter market, of West German bonds which have not been validated pursuant to German law. The Commission has been informed by representatives of the exchanges upon which certain issues of German bonds have been traded that bonds which have not been validated will not be considered "good delivery" against sales made on those exchanges.

Following the outbreak of war in December 1941, the Commission requested brokers and dealers to refrain from effecting transactions in securities of German origin. On February 27, 1953 an Agreement on German External Debts was signed in London which provided that only West German bonds that have been validated pursuant to German law will be paid by the German issuers. This provision was necessary because of the large volume of German foreign currency bonds, purchased for redemption by the Germans and held in negotiable form in Berlin, which found their way into unauthorized hands after the occupation of Berlin in 1945. The Federal Republic of Germany has enacted legislation requiring the submission for validation of all German foreign currency bonds, and in accordance with an agreement entered into between the United States Government and the Federal Republic of Germay, a Validation Board for German Bonds has been established in this country. Registration of West German bonds for validation with the Validation Board began in September 1953.

Accordingly, validation procedures are now established and in operation. Looted bonds will not be validated and hence will not be eligible for payment under the debt settlement agreement signed in London. Transactions in bonds which have not been validated could result in looted bonds being unloaded upon innocent and unwary purchasers in this country. The proposed rule is intended to prevent this. Transactions in these bonds may, under certain circumstances, violate other anti-fraud provisions of the securities acts.

The text of the rule, which is proposed pursuant to the provisions of the Securities Exchange Act of 1934, particularly sections 15 (c) (2) and 23, is as follows:

§ 240.15c2-3 *Trading in West German bonds.* The term "fraudulent, deceptive, or manipulative act or practice," as used in section 15 (c) (2) of the act is hereby defined to include any act of any broker or dealer designed to effect any transaction in, or to induce or attempt to induce the purchase or sale of, any bond which is required to be validated under the validation law of the Federal Republic of Germany (West Germany) and which has not been duly validated.

All interested persons are invited to submit views and comments on the proposed rule, in writing, to the Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C., on or before December 7, 1953.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
*Secretary.*

NOVEMBER 19, 1953.

### Office of the Secretary

[Treasury Dep't Order 167-6; CGFR 53-46]

COMMANDANT, U. S. COAST GUARD

DELEGATION OF FUNCTIONS

Pursuant to the authority vested in me as Secretary of the Treasury, as provided in sections 92, 631, and 633 in 14 U. S. C., Reorganization Plan No. 26 of 1950 (15 F. R. 4935), and sections 143a, 356, and 360 in 33 U. S. C., there is hereby delegated to the Commandant, United States Coast Guard, those functions of the Secretary of the Treasury with respect to certain statutory rules for preventing marine collisions as applicable to Coast Guard vessels. The functions herein delegated are those vested in me by:

(1) 33 U. S. C. 143a (October 11, 1951, sec. 2, 65 Stat. 407), with respect to lights required by the "Regulations for Preventing Collisions at Sea, 1948", for a Coast Guard vessel or class of vessels.

(2) 33 U. S. C. 356 (May 21, 1948, sec. 4, 62 Stat. 250), with respect to any requirement of a nautical rule for preventing collisions for the Mississippi River and its tributaries above the Huey P. Long Bridge, that part of the Atchafalaya River above its junction with the Plaquemine-Morgan City alternate waterway, and the Red River of the North, for a Coast Guard vessel or class of vessels.

(3) 33 U. S. C. 360 (December 3, 1945, sec. 1, 59 Stat. 590), with respect to lights required by any applicable nautical rule for preventing collisions on navigable waters of the United States, or its territories or possessions, for a Coast Guard vessel or class of vessels.

In performing functions delegated, the Commandant shall be governed by the applicable provisions and conditions set forth in these laws. The Commandant is authorized to redelegate any function herein delegated to the extent that he may deem necessary or appropriate.

Dated: November 17, 1953.

[SEAL] H. CHAPMAN ROSE,
*Acting Secretary of the Treasury.*

## DEPARTMENT OF AGRICULTURE

### Production and Marketing Administration

PEANUTS

NOTICE OF REDELEGATION OF FINAL AUTHORITY BY ALABAMA AND TENNESSEE STATE PRODUCTION AND MARKETING ADMINISTRATION COMMITTEES

Section 729.530 of the Marketing Quota Regulations for the 1954 Crop of Peanuts (18 F. R. 6372), issued pursuant to the marketing quota provisions of the Agricultural Adjustment Act of 1938, as amended (7 U. S. C. 1301-1376), provides that any authority delegated to the State Production and Marketing Administration Committee by the regulations may be redelegated by the State committee. In accordance with section 3 (a) (1) of the Administrative Procedure Act (5 U. S. C. 1002 (a)), which requires delegations of final authority to be published in the FEDERAL REGISTER, there are set out herein the redelegations of final authority which have been made by the Alabama and Tennessee State Production and Marketing Administration Committees of authority vested in such committees by the Secretary of Agriculture in the regulations referred to above. Shown below are the sections of the regulations in which such authority appears and the person to whom the authority has been redelegated:

ALABAMA

Section 729.528—B. L. Collins, Administrative Officer, State PMA Office.

TENNESSEE

Sections 729.511 (1) (2), 729.517 (b) (5), 729.518, 729.520, 729.522, and 729.528—Administrative Officer, or Acting Administrative Officer, of the State PMA Office, or the Program Specialist in charge of peanut marketing quotas of the State PMA Office.

(Sec. 375, 52 Stat. 66, as amended; 7 U. S. C. 1375. Interpret or apply secs. 301, 358, 359, 361-368, 373, 374; 52 Stat. 38, 62, 65, as amended, 55 Stat. 88, as amended; 66 Stat. 27; 7 U. S. C. 1301, 1358, 1359, 1361-1368, 1373, 1374)

Issued at Washington, D. C. this 23d day of November 1953.

[SEAL] HOWARD H. GORDON,
*Administrator, Production and Marketing Administration.*

[F. R. Doc. 53-9963; Filed, Nov. 25, 1953; 8:54 a. m.]

FAIR AND REASONABLE WAGE RATES FOR PERSONS EMPLOYED IN PRODUCTION, CULTIVATION, OR HARVESTING OF SUGAR BEETS IN CERTAIN AREAS

POSTPONEMENT OF HEARING AT GREELEY, COLO.

Pursuant to the authority contained in subsections (c) (1) and (c) (2) of Section 301 of the Sugar Act of 1948, as amended, (61 Stat. 929; 7 U. S. C. Sup. 1131), notice is hereby given that the public hearing formerly announced at Greeley, Colorado, December 9, 1953, 10:00 a. m., V. F. W. Hall, 7th Avenue and 25th Street, published in the FEDERAL REGISTER on November 17, 1953 (F. R. Doc. 53-9631) is cancelled and will be held as follows:

At Greeley, Colorado, December 11, 1953, 10:00 a. m., State Armory.

The location and dates of other hearings as published in the FEDERAL REGISTER on November 17, 1953 are not changed.

Issued this 23d day of November 1953.

## DEPARTMENT OF THE INTERIOR

### Bureau of Land Management

IDAHO

NOTICE OF FILING OF PLAT OF SURVEY

NOVEMBER 19, 1953.

Notice is hereby given that the plat of dependent resurvey and survey of the following described lands, accepted September 9, 1953, will be officially filed in the Land and Survey Office, Boise, Idaho, effective at 10:00 a. m., on the 35th day after the date of this notice:

T. 9 S., R. 44 E., B. M., Idaho,
All of secs. 2, 3,
All of secs. 10, 11,
All of secs. 14, 15,
All of secs. 17 to 20 inclusive,
All of secs. 23 to 26 inclusive,
All of secs. 28 to 33 inclusive,
All of secs. 35, 36.

The areas described aggregate 14,151.08 acres.

All of the lands described are within the exterior boundaries of the Caribou National Forest, by proclamation of May 6, 1910.

This plat of dependent resurvey and survey represents a retracement of the west boundary and a portion of the subdivisional lines designed to restore the corners in their original locations according to the best available evidence, and an extension survey embracing lands not included in the original survey shown upon the plat approved December 30, 1902.

Anyone having a valid settlement or other right to any of these lands initiated prior to the dates of the withdrawals of the lands should assert the same within three months from the date on which

the plat is officially filed by filing an application under appropriate public land law setting forth all facts relevant thereto.

All inquiries relating to these lands should be addressed to the Manager, Land and Survey Office, Boise, Idaho.

PAUL A. SHEPARD,
*Manager.*

[Docket No. G-2248]

UNITED FUEL GAS CO.

ORDER FIXING DATE OF HEARING

On September 14, 1953, United Fuel Gas Company (Applicant), a West Virginia corporation having its principal place of business at Charleston, West Virginia, filed an application, which was supplemented on October 20, 1953, for an order disclaiming jurisdiction by the Commission, or, in the alternative, for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing the construction and operation of certain natural-gas transmission facilities, all as more fully described in said application, as supplemented.

The Commission finds: This proceeding is a proper one for disposition under the provisions of § 1.32 (b) (18 CFR 1.32 (b)) of the Commission's rules of practice and procedure. Applicant having requested that the application be heard under the shortened procedure provided by the aforesaid rules for noncontested proceedings, and no request to be heard, protest or petition having been filed subsequent to the giving of due notice of the filing of the application, including publication in the FEDERAL REGISTER on October 28, 1953 (18 F. R. 6811),

The Commission orders:

(A) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing be held on December 8, 1953, at 9:30 a. m. in the Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved and the issues presented by such application: *Provided, however,* That the Commission may, after a noncontested hearing, forthwith dispose of the proceeding pursuant to the provisions of § 1.32 (b) of the Commission's rules of practice and procedure.

(B) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of the said rules of practice and procedure.

Adopted: November 19, 1953.

Issued: November 20, 1953.

By the Commission.

[SEAL] LEON M. FUQUAY,
*Secretary.*

[F. R. Doc. 53-9934; Filed Nov. 25 1953; 8:47 a. m.]

[Docket No. G-2298]

MONTANA-DAKOTA UTILITIES CO.

NOTICE OF APPLICATION

NOVEMBER 20, 1953.

Take notice that on November 2, 1953, Montana-Dakota Utilities Co. (Applicant), a Delaware corporation with its principal office in Minneapolis, Minnesota, filed an application pursuant to section 7 of the Natural Gas Act, for (1) a certificate of public convenience and necessity authorizing the construction and operation of the following described facilities:

(1) 12,500' of 3½" OD lateral transmission main between Basin, Wyoming, and Applicant's Worland, Wyoming, to Cabin Creek, Montana, 12¾" OD transmission main leased from Montana-Wyoming Gas Pipe Line Co.) and construct new town border station to continue gas service to town of Basin;

(2) 20,000' of 4½" OD lateral transmission main between Greybull, Wyoming, and Applicant's Worland, Wyoming, to Cabin Creek, Montana, 12¾" OD transmission main (leased from Montana-Wyoming Gas Pipe Line Co.) and construct new town border station to continue gas service to town of Greybull, and to the Gordon Refining Company adjacent to Greybull;

(3) 17,500' of 2⅜" OD lateral transmission main between Basin, Wyoming, and the Lamb Dome and Torchlight Fields, Big Horn County, Wyoming, to continue firm industrial gas service to Pond Petroleum Company at Lamb Dome and Stanolind Oil and Gas Company at Torchlight;

And (2) permission and approval to abandon the following described facilities:

(4) 23.653 miles of gas transmission main between Rairden and Greybull in Big Horn County, Wyoming, consisting of 20.544 miles of 14" OD pipe and 3.109 miles of 8" OD pipe, together with measuring station structures and station equipment.

The application recites, that the facilities described in items (1), (2) and (3) will provide facilities for continuing the sale of natural gas to (a) Wyoming Gas Company for the towns of Basin and Greybull, Wyoming, (b) Pond Petroleum Company, and (c) Stanolind Oil and Gas Company; and the facilities described in item (4) will be abandoned, removed and salvaged, continuing gas service to certain customers affected by the proposed line abandoned by means of the new construction proposed as described in items (1), (2) and (3) hereof, but resulting in abandonment of service to (i) Lest Kraft, Rural Route, Manderson, Wyoming; (ii) customers receiving gas for drilling rigs in Manderson Field, Wyoming, namely, Socony-Vacuum Oil Company, Inc., (iii) Boyle Bros.-Cockburn Co., 1321 South Main Street, Salt Lake City, Utah. Agreements providing for continuance of service have been entered into with Tony Vigil, Mrs. J. H. Bishop and Otto Wastenberg, and for abandonment of service to Lest Kraft (tenant of Inez Denton).

The estimated capital cost of the facilities described in items (1), (2) and (3) hereof is $86,580. Cost of removal, charge to retirement reserve, and salvage of facilities described in item (4) hereof are stated to be as follows: total retirement $292,351; removal, $61,915; salvage, $105,130; net charge to retirement reserve, $249,136. Cost of construction of facilities proposed will be defrayed from funds supplied from Applicant's working capital.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 10th day of December 1953.

The application is on file with the Commission for public inspection.

[SEAL] LEON M. FUQUAY,
*Secretary.*

[F. R. Doc. 53-9931; Filed, Nov. 25, 1953; 8:46 a. m.]

[Docket No. G-2305]

IROQUOIS GAS CORP.

NOTICE OF APPLICATION

NOVEMBER 20, 1953.

Take notice that Iroquois Gas Corporation (Applicant), a New York corporation, having its principal place of business in Buffalo, New York, filed, on November 9, 1953, an application for a certificate of public convenience and necessity, pursuant to section 7 of the Natural Gas Act, authorizing the construction and operation of metering facilities, subject to the jurisdiction of the Commission, at 2 points of connection on its system with Republic Light, Heat and Power Company, Inc. (Republic), in Niagara and Erie Counties, New York, for the sale of mixed and/or natural gas to Republic for resale in Republic's Niagara District.

Applicant proposes to construct and operate facilities at new points of delivery for the sale of volumes of mixed or natural gas to meet the requirements of Republic's consumers in Republic's "Niagara District", Republic having been purchased by National Fuel Gas Company, parent of Applicant. The properties of Republic will be integrated with the properties of Applicant.

The estimated capital cost of the facilities is $5,000, and will be defrayed from current funds of the Applicant.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure 18 CFR 1.8 or 1.10) on or before the 10th day of December 1953.

The application is on file with the Commission for public inspection.

[Docket Nos. IT-5696—IT-5698]

ALUMINUM CO. OF AMERICA ET AL.

ORDER FIXING DATE OF ORAL ARGUMENT

In the matters of Aluminum Company of America, Knoxville Power Company, and Carolina Aluminum Company; Docket Nos. IT-5696, IT-5697 and IT-5698.

Pursuant to the provisions of § 1.31 of the Commission's rules of practice and procedure (18 CFR 1.31), the Aluminum Company of America, Knoxville Power Company, and Carolina Aluminum Company (Respondents), filed on October 30, 1953, their exceptions to the recommended decision issued by the Presiding Examiner in the above-entitled matter on July 20, 1953.

In the previous oral arguments heard on September 18, 1942 and on October 4, 1951, in these matters, Respondents proceeded first. However, during the further hearing convened on August 5, 1952, it was stipulated by Counsel for Respondents and by Commission Staff Counsel that the order of procedure be reversed.

The Commission finds: It is appropriate and in the public interest to afford an opportunity to Counsel for Respondents and Commission Staff Counsel to present oral argument upon the issues relating to the Commission's licensing jurisdiction, if any, over Respondents' power developments involved in these proceedings.

The Commission orders: Order argument in the above-entitled matters be had before the Commission on January 25, 1954, at 10:00 a. m., e. s. t., in the Hearing Room of the Commission at 441 G Street, NW., Washington, D. C., upon the issues involved in these proceedings.

Adopted: November 18, 1953.

Issued: November 20, 1953.

By the Commission.

## INTERSTATE COMMERCE COMMISSION

[4th Sec. Application 28669]

SULPHURIC ACID FROM MCINTOSH, ALA., TO CORINTH, MISS.

APPLICATION FOR RELIEF

NOVEMBER 23, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-

haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for carriers parties to schedule listed below.

Commodities involved: Acid, sulphuric, in tank-car carloads.

From: McIntosh, Ala.

To: Corinth, Miss.

Grounds for relief: Rail competition, circuitous routes, and to apply rates constructed on the basis of the short line distance formula.

Schedules filed containing proposed rates: C. A. Spaninger, Agent, I. C. C. No. 1357, supp. 21.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

[4th Sec. Application 28670]

PAPER FROM SOUTHERN TERRITORY TO KANSAS

APPLICATION FOR RELIEF

NOVEMBER 23, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: F. C. Kratzmeir, Agent, for carriers parties to schedule listed below.

Commodities involved: Paper and paper articles, carloads.

From: Points in southern territory.

To: Points in Kansas.

Grounds for relief: Competition with rail carriers, circuitous routes, and additional routes.

Schedules filed containing proposed rates: F. C. Kratzmeir, Agent, I. C. C. No. 4063, supp. 26.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

[4th Sec. Application 28671]

PAPER FROM CERTAIN POINTS TO NEW MEXICO

APPLICATION FOR RELIEF

NOVEMBER 23, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: F. C. Kratzmeir, Agent, for carriers parties to schedule listed below.

Commodities involved: Paper and paper articles, also wallboard, carloads.

From: Points in Illinois and Indiana, and points in southern, southwestern and western trunkline territories.

To: Points in New Mexico.

Grounds for relief: Competition with rail carriers, circuity, and to maintain grouping.

Schedules filed containing proposed rates: F. C. Kratzmeir, Agent, I. C. C. No. 4063, supp. 27.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. [Drouth Order 50]

TRANSPORTATION OF HAY AND FEED TO WEST VIRGINIA

REDUCED RATES

In the matter of relief under section 22 of the Interstate Commerce Act.

It appearing that by reason of a prolonged drouth existing in the State of West Virginia, the Secretary of Agriculture by letter dated November 19, 1953, has requested the Commission to enter an order under section 22 of the Interstate Commerce Act authorizing railroads subject to the Commission's jurisdiction to transport hay and feed to West Virginia at reduced rates:

*It is ordered*, That carriers by railroad participating in the transportation of hay and feed to West Virginia be, and they are hereby, authorized under section 22 of the Interstate Commerce Act, to establish and maintain until December 31, 1953, reduced rates for such transportation, the rates to be published and filed in the manner prescribed in section 6 of the Interstate Commerce Act except that they may be made effective one day after publication and filing instead of thirty.

*It is further ordered*, That the class of persons entitled to such reduced rates is hereby defined as persons designated as being in distress and in need of relief by the United States Department of Agriculture or by such State agents or agencies as may in turn be designated by the United States Department of Agriculture to assist in relieving the distress caused by the drouth.

*It is further ordered*, That during the period in which any reduced rates authorized by this order are effective the carriers may, not withstanding the provisions of section 4 of the Interstate Commerce Act, maintain higher rates to directly intermediate points and maintain through rates in excess of the aggregate of intermediate rates over the same routes if one or more of the factors of such aggregate of intermediate rates is a reduced rate established under the authority of this order.

*And it is further ordered*, That any tariffs or tariff provisions published under the authority of this order shall explicitly so state, making reference to this order by number and date.

*And it is further ordered*, That notice to the affected railroads and the general public shall be given by depositing a copy of this order in the office of the Secretary of the Commission and by filing a copy with the Director, Division of the Federal Register; and that copies be mailed to the Chairman of the Traffic Executive Association-Eastern Railroads, New York, N. Y., the Chairman of the Southern Freight Association, Atlanta, Georgia, the Chairman of the Executive Committee, Western Traffic Association, Chicago, Illinois, the Traffic Vice-President of the Association of American Railroads, Washington, D. C., and to the President of the American Short Line Railroad Association, Washington, D. C.

Dated at Washington, D. C., this 20th day of November 1953.

By the Commission, Commissioner Alldredge.

[Flood Order 4]

TRANSPORTATION OF HAY AND FEED TO FLORIDA

REDUCED RATES

In the matter of relief under section 22 of the Interstate Commerce Act.

It appearing that because of recent floods in the State of Florida, the Secretary of Agriculture by letter dated November 19, 1953, has requested the Commission to enter an order under section 22 of the Interstate Commerce Act authorizing railroads subject to the Commission's jurisdiction to transport hay and feed to Florida at reduced rates:

*It is ordered*, That carriers by railroad participating in the transportation of hay and feed to Florida be, and they are hereby, authorized under section 22 of the Interstate Commerce Act to establish and maintain until December 31, 1953, reduced rates for such transportation, the rates to be published and filed in the manner prescribed in section 6 of the Interstate Commerce Act except that they may be made effective one day after publication and filing instead of thirty.

*It is further ordered*, That the class of persons entitled to such reduced rates is hereby defined as persons designated as being in distress and in need of relief by the United States Department of Agriculture or by such State agents or agencies as may in turn be designated by the United States Department of Agriculture to assist in relieving the distress caused by the floods.

*It is further ordered*, That during the period in which any reduced rates authorized by this order are effective the carriers may, notwithstanding the provisions of section 4 of the Interstate Commerce Act, maintain higher rates to directly intermediate points and maintain through rates in excess of the aggregate of intermediate rates over the same routes if one or more of the factors of such aggregate of intermediate rates is a reduced rate established under the authority of this order.

*It is further ordered*, That any tariffs or tariff provisions published under the authority of this order shall explicitly so state making reference to this order by number and date.

*And it is further ordered*, That notice to the affected railroads and the general public shall be given by depositing a copy of this order in the office of the Secretary of the Commission and by filing a copy with the Director, Division of the Federal Register; and that copies be mailed to the Chairman of the Traffic Executive Association-Eastern Railroads, New York, N. Y., the Chairman of the Southern Freight Association, Atlanta, Georgia, the Chairman of the Executive Committee, Western Traffic Association, Chicago, Illinois, the Traffic Vice-President of the Association of American Railroads, Washington, D. C., and to the President of the American Short Line Railroad Association, Washington, D. C.

## SECURITIES AND EXCHANGE COMMISSION

[File No. 1-122]

FITZ SIMONS & CONNELL DREDGE & DOCK CO.

NOTICE OF APPLICATION TO WITHDRAW FROM LISTING AND REGISTRATION, AND OF OPPORTUNITY FOR HEARING

NOVEMBER 20, 1953.

Fitz Simons & Connell Dredge & Dock Company, pursuant to section 12 (d) of the Securities Exchange Act of 1934 and Rule X-12D2-1 (b) promulgated thereunder, has made application to withdraw its Common Stock, No Par Value, from listing and registration on the Midwest Stock Exchange.

The reasons alleged in the application for withdrawing this security from listing and registration are as follows:

(1) 56,559 shares of the 57,389 outstanding shares of the above stock, or about 98.6 percent, have been acquired by Merritt-Chapman & Scott Corporation.

(2) The number of shares of the above stock remaining outstanding in the hands of the public is not sufficient to warrant the continuance of an auction market on a national securities exchange.

Upon receipt of a request, prior to December 16, 1953, from any interested person for a hearing in regard to terms to be imposed upon the delisting of this security, the Commission will determine whether to set the matter down for hearing. Such request should state briefly the nature of the interest of the person requesting the hearing and the position he proposes to take at the hearing with respect to imposition of terms or conditions. In addition, any interested person may submit his views or any additional facts bearing on this application by means of a letter addressed to the Secretary of the Securities and Exchange Commission, Washington, D. C. If no one requests a hearing on this matter, this application will be determined by order of the Commission on the basis of the facts stated in the application, and other information contained in the official file of the Commission pertaining to the matter.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[File No. 54-127]

ELECTRIC BOND AND SHARE CO.

ORDER GRANTING RECITALS

NOVEMBER 20, 1953.

The Commission having heretofore approved a plan filed pursuant to section 11 (e) of the Public Utility Holding Company Act of 1935 ("act") by Electric Bond and Share Company ("Bond and Share"), a registered holding company, providing, among other things, for a capital distribution of a portion of its holdings of the common stock of United Gas Corporation ("United Gas"); and

Bond and Share having notified the Commission pursuant to Rule U-44 (c) of the rules and regulations under the act of the declaration of a dividend on the common stock of Bond and Share payable December 26, 1953, to stockholders of record on November 27, 1953, in shares of the common stock of United Gas at the rate of 2.6 shares of United Gas stock for each 100 shares of Bond and Share stock, which will require an aggregate of 136,509 shares of United Gas stock.

No fractional shares of United Gas stock will be delivered. In lieu thereof Bond and Share's dividend agent, Bankers Trust Company, will be instructed to sell on behalf of stockholders that number of shares of United Gas stock which would otherwise be delivered as fractional shares and to pay to the stockholders entitled thereto the gross proceeds to be derived from such sales. Bond and Share will assume expenses of sales.

The Commission having notified Bond and Share that no declaration need be filed with respect to this matter; and

Bond and Share having requested that the Commission enter an order containing the recitals required by section 1808 (f) and Supplement R of the Internal Revenue Code, and the Commission deeming it appropriate that such request be granted:

*It is ordered and recited*, That the payment by Electric Bond and Share Company as a capital distribution to its stockholders of 136,509 shares of common stock of United Gas Corporation is necessary or appropriate to the integration or simplification of the holding company system of which Electric Bond and Share Company is a member and is necessary or appropriate to effectuate the provisions of section 11 (b) of the Public Utility Holding Company Act of 1935, all in accordance with the meaning and requirements of the Internal Revenue Code and section 1808 (f) and Supplement R thereof.

By the Commission.

NARRAGANSETT ELECTRIC CO.

ORDER CORRECTING ERROR IN NOTICE OF FILING REGARDING SALE OF SHARES OF PREFERRED STOCK AT COMPETITIVE BIDDING

NOVEMBER 23, 1953.

*It is ordered*, That the Commission's notice, dated November 17, 1953, regarding the proposed issuance and sale by the Narragansett Electric Company of 150,000 shares of $50 par value preferred stock at competitive bidding be, and it hereby is, corrected so that the second parenthetical clause of the second paragraph of said notice shall read: "(which shall be not less than $50 and shall not exceed $51.375 per share)".

## TITLE 7—AGRICULTURE

### Chapter IX—Production and Marketing Administration (Marketing Agreements and Orders), Department of Agriculture

[Docket No. AO 10-A 18]

PART 903—MILK IN THE ST. LOUIS, MISSOURI, MARKETING AREA

ORDER AMENDING THE ORDER, AS AMENDED, REGULATING HANDLING

§ 903.0 *Findings and determinations.* The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and each of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon proposed amendments to the tentative marketing agreement and to the order, as amended, regulating the handling of milk in the St. Louis, Missouri, marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order, as amended, and as hereby further amended, and all of the terms and conditions of said order, as amended, and as hereby further amended, will tend to effectuate the declared policy of the act;

(2) The parity prices of milk produced for sale in the said marketing area as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supply of and demand for such milk, and the minimum prices specified in the order, as amended, and as hereby further amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk and be in the public interest;

(3) The said order, as amended, and as hereby further amended, regulates the handling of milk in the same manner as and is applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held; and

(4) The necessary expenses of the market administrator for maintenance and functioning of such agency will require the payment by each handler, as his pro rata share of such expenses, 2½

cents per hundredweight or such lesser amount as the Secretary may prescribe with respect to each hundredweight of (i) milk received from producers, (ii) Grade A other source milk (except milk subject to the Class I pricing provisions of another order issued pursuant to the act) allocated to Class I, or (iii) skim milk or butterfat distributed as Class I milk in the marketing area from a non-pool plant.

(b) *Additional findings.* It is necessary, in the public interest, to make this order, amending the order, as amended, effective not later than December 1, 1953. Any delay beyond that date in the effective date of this order would unnecessarily postpone needed changes in the provisions of the order.

The provisions of the said order are well known to handlers. The recommended decision containing all important amendment provisions of this order was published in the FEDERAL REGISTER November 3, 1953 (18 F. R. 6943). The decision of the Secretary concerning the proposed amendments was issued November 20, 1953. The changes effected by this order will not require extensive preparation or substantial alteration in method of operation for handlers. It is hereby found, therefore, that good cause exists for making this order effective December 1, 1953. (Sec. 4 (c); Administrative Procedure Act, 5 U. S. C. 1001 et seq.)

(c) *Determinations.* It is hereby determined that handlers (excluding cooperative associations of producers who are not engaged in processing, distributing or shipping milk covered by this order amending the order, as amended, which is marketed within the St. Louis, Missouri, marketing area) of more than 50 percent of the milk which is marketed within the said marketing area, refused or failed to sign the proposed marketing agreement regulating the handling of milk in the said marketing area, and it is hereby further determined that:

(1) The refusal or failure of such handlers to sign said proposed marketing agreement tends to prevent the effectuation of the declared policy of the act;

(2) The issuance of the order amending the order, as amended, is the only practical means, pursuant to the declared policy of the act, of advancing the interests of producers of milk which is produced for sale in the said marketing area; and

(3) The issuance of this order amending the order, as amended, is approved or favored by at least two-thirds of the producers who, during the determined representative period (September 1953), were engaged in the production of milk for sale in the said marketing area.

*Order relative to handling.* It is therefore ordered that on and after the effective date hereof, the handling of milk in the St. Louis, Missouri, marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as amended, and as hereby further amended as follows:

1. Delete § 903.87 (b) and substitute therefor the following:

(b) Received at a pool plant as Grade A other source milk (except milk subject to the Class I pricing provisions of another order issued pursuant to the act) and allocated to Class I, or.

2. Delete § 903.45 (a) (4) and substitute therefor the following:

(4) Subtract from the pounds of skim milk remaining in Class II milk an amount equal to such remainder, or the product obtained by multiplying by 0.05 the pounds of skim milk in approved milk received at plants qualified pursuant to § 903.10 (a), from (i) producers and (ii) plants qualified pursuant to § 903.10 (b) or (c), whichever is less;

3. Delete § 903.41 (b) (3) and substitute therefor the following:

(3) In shrinkage not to exceed an amount calculated (except with respect to milk diverted to a non-pool plant pursuant to § 903.7) as follows:

(i) 0.5 percent of milk received from dairy farmers and disposed of as whole milk in bulk tank lots;

(ii) 1.5 percent of the skim milk or butterfat received as other source milk (except milk received from dairy farmers) or as bulk tank lots of approved whole milk and disposed of in a form other than bulk tank lots of whole milk: *Provided*, That any disposition of whole milk in bulk tank lots shall be assigned first to receipts of milk in such form; and

(iii) 2.0 percent of milk received from dairy farmers and disposed of in a form other than bulk tank lots of whole milk:

*Provided*, That shrinkage of skim milk and butterfat not in excess of the percentages specified herein shall be assigned pro rata, pursuant to this subparagraph, to skim milk and butterfat, respectively, in approved milk and in other source milk.

4. In § 903.45 (a) (1) delete the word "producer" and substitute therefor the word "approved."

5. Delete § 903.45 (a) (3) and substitute therefor the following:

(3) Subtract from the pounds of skim milk remaining in Class II milk the remaining pounds of skim milk in other source milk which was not subject to the Class I pricing provisions of an order issued pursuant to the act: *Provided*, That skim milk so subtracted from Class II shall not result in the assignment of more skim milk in approved milk to Class I in a plant which is permitted to receive and bottle Grade A and non-Grade A milk than is contained in the Grade A other source and approved milk received at such plant: *And provided further*, That if the pounds of skim milk to be subtracted is greater than the remaining pounds of skim milk in Class II, the balance shall be subtracted from the pounds of skim milk in Class I;

6. Delete § 903.52 and substitute therefor the following:

§ 903.52 *Location differentials to handlers.* With respect to skim milk and butterfat contained in milk received from producers at a pool plant in Meramec or Bonhomme townships, St. Louis County, Missouri (except in the cities of Valley Park and Kirkwood), or outside the marketing area, which is classified as Class I milk, the price per hundredweight shall be reduced by the amounts set forth in the following schedule according to the airline distance from the plant where the milk is received from producers, or the plant from which the milk is diverted, to the City Hall in St. Louis:

| Mileage: | *Allowance (cents)* |
|---|---|
| Not more than 10 miles | 6 |
| More than 10 but not more than 20 miles | 12 |
| More than 20 but not more than 30 miles | 14 |
| More than 30 but not more than 40 miles | 16 |
| For each additional 10 miles or fraction thereof an additional | 1 |

*Provided*, That for the purpose of calculating such location differential with respect to milk transferred between pool plants, the Class II approved milk remaining in the transferee plant (except skim milk or butterfat in such plant which was subtracted pursuant to § 903.45 (a) (1), (2) and (b)) after deducting therefrom the amount of such milk or an amount equivalent to 0.05 times the producer milk at such plant, whichever is less, shall be assigned to approved milk from other plants in

sequence according to the location differential applicable at each plant, beginning with the plant having the largest differential, and then to producer milk.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Issued at Washington, D. C., this 24th day of November 1953, to be effective on and after December 1, 1953.

[SEAL] TRUE D. MORSE,
*Acting Secretary of Agriculture.*

## PART 904—MILK IN THE GREATER BOSTON MARKETING AREA

### ORDER SUSPENDING CERTAIN PROVISIONS

Pursuant to the applicable provisions of Public Act No. 10, 73rd Congress, as amended and reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 1940 ed. 601, et seq.), hereinafter referred to as the "act", and of the order, as amended, regulating the handling of milk in the Greater Boston, Massachusetts, marketing area, hereinafter referred to as the "order" it is hereby found and determined that:

1. For the month of December 1953, all the provisions of § 904.48 of the order, except the following, do not tend to effectuate the declared policy of the act: "§ 904.48 *Computation of New England basic Class I price.* The New England basic Class I price per hundredweight of milk containing 3.7 percent butterfat shall be determined for each month pursuant to this section.", and the words "Class I price" and the figure "$5.65" as they appear in paragraph (e) thereof.

2. For the month of January, 1954, all the provisions of paragraph (c) of § 904.48 of the order, except the following, do not tend to effectuate the declared policy of the act: "(c) The seasonal adjustment factor shall be the factor listed below for the month for which the price is being computed.", and the figure "1.08".

It is hereby found and determined that notice of proposed rule making and public procedure thereon in connection with the issuance hereof is impractical, unnecessary and contrary to the public interest in that (1) the information upon which this action is based did not become available in sufficient time for such compliance; (2) the suspension actions for the month of December and January must be taken simultaneously because the purpose thereof is to provide compensating adjustments in the prices which would otherwise obtain during these months; and (3) the issuance of this suspension order effective as set forth below is necessary to reflect current marketing conditions and to facilitate, promote and maintain the orderly marketing of milk produced for the said marketing area. The changes caused by this suspension order do not require of persons affected substantial or extensive preparation prior to its effective date.

Therefore, good cause exists for making this order effective immediately.

*It is therefore ordered*, (1) That the following provisions of the order be and they are hereby suspended for the month of December 1953:

All of § 904.48 except the following: "§ 904.48 *Computation of New England basic Class I price.* The New England basic Class I price per hundredweight of milk containing 3.7 percent butterfat shall be determined for each month pursuant to this section.", and the words "Class I price" and the figure "$5.65" as they appear in paragraph (e) thereof.

(2) That the following provisions of the order be and they are hereby suspended for the month of January 1954: All of paragraph (c) of § 904.48 except the following: "(c) The seasonal adjustment factor shall be the factor listed below for the month for which the price is being computed.", and the figure "1.08."

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Issued at Washington, D. C., this 24th day of November 1953, to be effective immediately.

[SEAL] TRUE D. MORSE,
*Acting Secretary of Agriculture.*

[Navel Orange Reg. 6]

## PART 914—NAVEL ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

### LIMITATION OF HANDLING

§ 914.306 *Navel Orange Regulation 6*—(a) *Findings.* (1) Pursuant to the marketing agreement and Order No. 14 (18 F. R. 5638), regulating the handling of navel oranges grown in Arizona and designated part of California, effective September 22, 1953, under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and upon the basis of the recommendation and information submitted by the Navel Orange Administrative Committee, established under the said marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such navel oranges, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions of this section effective as hereinafter set forth. The Navel Orange Administrative Committee held an open meeting on November 25, 1953, after giving due notice thereof, to consider supply and market conditions for navel oranges and the need for regulation; interested persons were afforded an opportunity to submit information and views at this meeting; the recommendation and supporting information for regulation during the period specified herein was promptly submitted to the Department after such meeting was held; the provisions of this section, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such navel oranges; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period herein specified; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed on or before the effective date hereof.

(b) *Order.* (1) The quantity of navel oranges grown in Arizona and designated part of California which may be handled during the period beginning at 12:01 a. m., P. s. t., November 29, 1953, and ending at 12:01 a. m., P. s. t., December 6, 1953, is hereby fixed as follows:

(i) District 1: 1,400 carloads;
(ii) District 2: Unlimited movement;
(iii) District 3: 140 carloads;
(iv) District 4: Unlimited movement.

(2) The prorate base of each handler who has made application therefor, as provided in the said marketing agreement and order, is hereby fixed in accordance with the prorate base schedule which is attached hereto and made a part hereof by this reference.

(3) As used in this section "handled," "handler," "carloads," "prorate base," "District 1," "District 2," "District 3," and "District 4" shall have the same meaning as when used in said marketing agreement and order.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 27th day of November 1953.

[SEAL] S. R. SMITH,
*Director, Fruit and Vegetable Branch, Production and Marketing Administration.*

[Docket No. AO 71 A-23]

## PART 927—MILK IN THE NEW YORK METROPOLITAN MARKETING AREA

### ORDER AMENDING ORDER, AS AMENDED

In F. R. Doc. 53-9640, appearing on page 5224 of the issue for Saturday, November 14, 1953, subparagraphs (1), (5) and (6) of § 927.0 (a) are corrected to read as follows:

(1) The order, as amended, and as hereby further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act.

* * * * *

(5) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply of and demand for milk in the marketing area, and the minimum prices specified in the order, as amended, and as hereby further amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest.

(6) The order, as amended, and as hereby further amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity, specified in a marketing agreement upon which a hearing has been held.

Done at Washington, D. C., this 24th day of November 1953.

[SEAL] EZRA TAFT BENSON,
*Secretary of Agriculture.*

## PART 927—MILK IN THE NEW YORK METROPOLITAN MARKETING AREA

### ORDER AMENDING THE ORDER, AS AMENDED

§ 927.0 *Findings and determinations.* The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of each of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) Findings upon the basis of the hearing record. Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order, as amended, regulating the handling of milk in the New York metropolitan milk marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order, as amended, and as hereby further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The parity prices of milk produced for sale in the said marketing area as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supplies of and demand for such milk, and the minimum prices specified in the order, as amended, and as hereby further amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk and be in the public interest; and

(3) The said order, as amended, and as hereby further amended, regulates the handling of milk in the same manner as and is applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held.

(b) *Additional findings.* It is hereby found and determined that good cause exists for making this order effective on December 1, 1953. This action is necessary in the public interest in order for the Class I–A price established for December to properly reflect economic conditions affecting the market supply and demand for milk in the marketing area. The provisions of the said amendatory order impose no obligations on regulated parties which are significantly different from those heretofore applicable and reasonable to be contemplated by such parties and such order will not require extensive preparation or substantial alteration in methods of operation for handlers. Reasonable time under the circumstances has been afforded persons affected to prepare for its effective date. Therefore, it would be impracticable, unnecessary, and contrary to the public interest to delay the effective date of this amendatory order 30 days after its publication in the FEDERAL REGISTER (See section 4 (c) Administrative Procedure Act, 5 U. S. C. 1001 et seq.).

(c) *Determinations.* It is hereby determined that handlers (excluding cooperative associations of producers who are not engaged in processing, distributing or

shipping milk covered by this order amending the order, as amended, which is marketed within the New York metropolitan milk marketing area) of more than 50 percent of the milk which is marketed within the said marketing area, refused or failed to sign the proposed marketing agreement regulating the handling of milk in the said marketing area, and it is hereby further determined that:

(1) The refusal or failure of such handlers to sign said proposed marketing agreement tends to prevent the effectuation of the declared policy of the act;

(2) The issuance of this order amending the order, as amended, is the only practical means, pursuant to the declared policy of the act, of advancing the interests of producers of milk which is produced for sale in the said marketing area; and

(3) The issuance of this order amending the order, as amended, is approved or favored by at least two-thirds of the producers who, during the determined representative period (July 1953), were engaged in the production of milk for sale in the said marketing area.

*Order relative to handling.* It is therefore ordered that on and after the effective date hereof, the handling of milk in the New York metropolitan milk marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as amended and as hereby further amended; and the aforesaid order, as amended, is hereby further amended as follows:

1. Amend § 927.40 (a) by adding at the end of the first sentence thereof the following proviso: "*Provided*, That the utilization percentage for the month of October 1953 used in making such computations shall be 60.5."

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Issued at Washington, D. C., this 24th day of November 1953, to be effective December 1, 1953.

[SEAL] TRUE D. MORSE,
*Acting Secretary of Agriculture.*

[Grapefruit Reg. 189]

PART 933—ORANGES, GRAPEFRUIT, AND TANGERINES GROWN IN FLORIDA

LIMITATION OF SHIPMENTS

§ 933.649 *Grapefruit Regulation 189*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 33, as amended (7 CFR Part 933), regulating the handling of oranges, grapefruit, and tangerines grown in the State of Florida, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended, and upon the basis of the recommendations of the committees established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of grapefruit, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective not later than November 30, 1953. Shipments of grapefruit, grown in the State of Florida, are presently subject to regulation by grades and sizes, pursuant to the amended marketing agreement and order, and will so continue until November 30, 1953, the recommendation and supporting information for continued regulation subsequent to November 29 was promptly submitted to the Department after an open meeting of the Growers Administrative Committee on November 24; such meeting was held to consider recommendations for regulation, after giving due notice of such meeting, and interested persons were afforded an opportunity to submit their views at this meeting; the provisions of this section including the effective time hereof, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such grapefruit; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period hereinafter set forth so as to provide for the continued regulation of the handling of grapefruit; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed by the effective time hereof.

(b) *Order.* (1) During the period beginning at 12:01 a. m., e. s. t., November 30, 1953, and ending at 12:01 a. m., e. s. t., December 21, 1953, no handler shall ship:

(i) Any white seeded grapefruit, grown in the State of Florida, which do not grade at least U. S. No. 1 Russet;

(ii) Any pink seeded grapefruit, grown in the State of Florida, which do not grade at least U. S. No. 2;

(iii) Any seedless grapefruit, grown in the State of Florida, which do not grade at least U. S. No. 2;

(iv) Any white seeded grapefruit, grown in the State of Florida, which are of a size smaller than a size that will pack 70 grapefruit, packed in accordance with the requirements of a standard pack, in a standard nailed box;

(v) Any pink seeded grapefruit, grown in the State of Florida, which are of a size smaller than a size that will pack 80 grapefruit, packed in accordance with the requirements of a standard pack, in a standard nailed box;

(vi) Any seedless grapefruit, grown in the State of Florida, which are of a size smaller than a size that will pack 96 grapefruit, packed in accordance with the requirements of a standard pack, in a standard nailed box;

(vii) Any white seedless grapefruit, grown in the State of Florida, that grade U. S. No. 2 or U. S. No. 2 Bright which are of a size smaller than a size that will pack 80 grapefruit, packed in accordance with the requirements of a standard pack, in a standard nailed box; or

(viii) Any white seedless grapefruit, grown in the State of Florida, that grade U. S. No. 1 Russet, U. S. No. 1, U. S. No. 1 Bronze, U. S. No. 1 Golden, U. S. No. 1 Bright or U. S. Fancy which are of a size smaller than a size that will pack 96 grapefruit, packed in accordance with the requirements of a standard pack, in a standard nailed box.

(2) As used in this section, "handler," "ship," and "Growers Administrative Committee," shall have the same meaning as when used in said amended marketing agreement and order; and "U. S. No. 1 Russett," "U. S. No. 1," "U. S. No 1 Bronze," "U. S. No 1 Golden," "U. S. No 1 Bright," "U. S. Fancy," "U. S. No. 2," "U. S. No. 2 Bright," "standard pack," and "standard nailed box" shall have the same meaning as when used in the revised United States Standards for Florida Grapefruit (§ 51.750 of this title).

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 25th day of November 1953.

[SEAL] S. R. SMITH,
*Director, Fruit and Vegetable Branch, Production and Marketing Administration.*

[Orange Reg. 245]

PART 933—ORANGES, GRAPEFRUIT, AND TANGERINES GROWN IN FLORIDA

LIMITATION OF SHIPMENTS

§ 933.650 *Orange Regulation 245*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 33, as amended (7 CFR Part 933), regulating the handling of oranges, grapefruit, and tangerines grown in the State of Florida, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended, and upon the basis of the recommendations of the committees established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of all oranges, except Temple oranges, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions of this section effective not later than November 30, 1953. Shipments of all oranges except Temple oranges, grown in the State of Florida, are presently subject to regulation by grades and sizes, pursuant to the amended marketing agreement and order, and will so continue until November 30, 1953; the recommendation and supporting information for continued regulation subsequent to November 29 was promptly submitted to the Department after an open meeting of the Growers Administrative Committee on November 24; such meeting was held to consider recommendations for regulation, after giving due notice of such meeting, and interested persons were afforded an opportunity to submit their views at this meeting; the provisions of this section, including the effective time hereof, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such oranges; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period hereinafter set forth so as to provide for the continued regulation of the handling of all oranges, except Temple oranges; and compliance with this section will not require any special preparation on the part of the persons subject thereto which cannot be completed by the effective time hereof.

(b) *Order.* (1) During the period beginning at 12:01 a. m., e. s. t., November 30, 1953, and ending at 12:01 a. m., e. s. t., December 21, 1953, no handler shall ship:

(i) Any oranges, except Temple oranges, grown in the State of Florida, which do not grade at least U. S. No. 1 Russet; or

(ii) Any oranges, except Temple oranges, grown in the State of Florida, which are of a size smaller than $2^{19}/_{16}$ inches in diameter, measured midway at a right angle to a straight line running from the stem to the blossom end of the fruit, except that a tolerance of 10 percent, by count, of oranges smaller than such minimum size shall be permitted, which tolerance shall be applied in accordance with the provisions for the application of tolerances, specified in the revised United States Standards for Florida oranges (§ 51.302 of this title): *Provided*, That in determining the percentage of oranges in any lot which are smaller than $2^{19}/_{16}$ inches in diameter, such percentage shall be based only on those oranges in such lots which are of a size $2^{13}/_{16}$ inches in diameter and smaller.

(2) As used in this section, the terms "handler," "ship," and "Growers Administrative Committee" shall each have the same meaning as when used in said amended marketing agreement and order; and the terms "U. S. Fancy," and "U. S. No. 1 Russet" shall have the same meaning as when used in the revised United States Standards for Florida Oranges (§ 51.1140 of this title).

(3) Shipments of Temple oranges, grown in the State of Florida, are subject to the provisions of Orange Regulation 244 (§ 933.647; 18 F. R. 7380).

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 25th day of November 1953.

[SEAL] S. R. SMITH,

[Tangerine Reg. 141]

PART 933—ORANGES, GRAPEFRUIT, AND TANGERINES GROWN IN FLORIDA

LIMITATION OF SHIPMENTS

§ 933.651 *Tangerine Regulation 141*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 33, as amended (7 CFR Part 933), regulating the handling of oranges, grapefruit, and tangerines grown in the State of Florida, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended, and upon the basis of the recommendations of the committees established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of tangerines, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions of this section effective not later than November 30, 1953. Shipments of tangerines, grown in the State of Florida, are presently subject to regulation by grades and sizes, pursuant to the amended marketing agreement and order, and will so continue until November 30, 1953; the recommendation and supporting information for continued regulation subsequent to November 29 was promptly submitted to the Department after an open meeting of the Growers Administrative Committee on November 24; such meeting was held to consider recommendations for regulation, after giving due notice of such meeting, and interested persons were afforded an opportunity to submit their views at this meeting; the provisions of this section including the effective time hereof, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such tangerines; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period hereinafter set forth so as to provide for the continued regulation of the handling of tangerines; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed on or before the effective date hereof.

(b) *Order.* (1) During the period beginning at 12:01 a. m., e. s. t., November 30, 1953, and ending at 12:01 a. m., e. s. t., December 21, 1953, no handler shall ship:

(i) Any tangerines, grown in the State of Florida, that do not grade at least U. S. No. 1; or

(ii) Any tangerines, grown in the State of Florida, which are of a size smaller than the size that will pack 176 tangerines, packed in accordance with the requirements of a standard pack, in a half-standard box (inside dimensions $9^1/_2$ x $9^1/_2$ x $19^1/_8$ inches; capacity 1,726 cubic inches).

(2) As used in this section, "handler," "ship," and "Growers Administrative Committee" shall have the same meaning as when used in said amended marketing agreement and order; and "U. S. No. 1" and "standard pack" shall have the same meaning as when used in the United States Standards for Tangerines (§ 51.1770 of this title).

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 25th day of November 1953.

[SEAL] S. R. SMITH,
*Director, Fruit and Vegetable Branch, Production and Marketing Administration.*

PART 934—MILK IN THE LOWELL-LAWRENCE, MASSACHUSETTS, MARKETING AREA

ORDER SUSPENDING CERTAIN PROVISIONS

Pursuant to the applicable provisions of Public Act No. 10, 73d Congress, as amended and reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 1940 ed. 601 et seq.), hereinafter referred to as the "act", and of the order, as amended, regulating the handling of milk in the Lowell-Lawrence, Massachusetts marketing area, hereinafter referred to as the "order" it is hereby found and determined that:

1. For the month of December 1953, all the provisions of § 934.48 of the order, except the following, do not tend to effectuate the declared policy of the act: "§ 934.48 *Computation of New England basic Class I price.* The New England basic Class I price per hundredweight of milk containing 3.7 percent butterfat shall be determined for each month pursuant to this section.", and the words "Class I price" and the figure "$5.65" as they appear in paragraph (e) thereof.

2. For the month of January, 1954, all the provisions of paragraph (c) of

§ 934.48 of the order, except the following, do not tend to effectuate the declared policy of the act: "(c) The seasonal adjustment factor shall be the factor listed below for the month for which the price is being computed.", and the figure "1.08".

It is hereby found and determined that notice of proposed rule making and public procedure thereon in connection with the issuance hereof is impractical, unnecessary and contrary to the public interest, in that (1) the information upon which this action is based did not become available in sufficient time for such compliance; (2) the suspension actions for the month of December and January must be taken simultaneously because the purpose thereof is to provide compensating adjustments in the prices which would otherwise obtain during these months; and (3) the issuance of this suspension order effective as set forth below is necessary to reflect current marketing conditions and to facilitate, promote and maintain the orderly marketing of milk produced for the said marketing area. The changes caused by this suspension order do not require of persons affected substantial or extensive preparation prior to its effective date.

Therefore, good cause exists for making this order effective immediately.

*It is therefore ordered*, (1) That the following provisions of the order be and they are hereby suspended for the month of December 1953:

All of § 934.48 except the following: "§ 934.48 *Computation of New England basic Class I price.* The New England basic Class I price per hundredweight of milk containing 3.7 percent butterfat shall be determined for each month pursuant to this section.", and the words "Class I price" and the figure "$5.65" as they appear in paragraph (e) thereof.

(2) That the following provisions of the order be and they are hereby suspended for the month of January 1954:

All of paragraph (c) of § 934.48 except the following: "(c) The seasonal adjustment factor shall be the factor listed below for the month for which the price is being computed.", and the figure "1.08".

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Issued at Washington, D. C., this 24th day of November 1953, to be effective immediately.

[SEAL] TRUE D. MORSE,
*Acting Secretary of Agriculture.*

[F. R. Doc. 53-10004; Filed, Nov. 27, 1953; 8:57 a. m.]

## PART 947—MILK IN THE FALL RIVER, MASSACHUSETTS, MARKETING AREA

### ORDER SUSPENDING CERTAIN PROVISIONS

Pursuant to the applicable provisions of Public Act No. 10, 73d Congress, as amended and reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 1940 ed. 601 et seq.), hereinafter referred to as the "act", and of the order, as amended, regulating the handling of milk in the Fall River, Massachusetts marketing area, hereinafter referred to as the "order" it is hereby found and determined that:

1. For the month of December 1953, all the provisions of § 947.48 of the order, except the following, do not tend to effectuate the declared policy of the act: "§ 947.48 *Computation of New England basic Class I price.* The New England basic Class I price per hundredweight of milk containing 3.7 percent butterfat shall be determined for each month pursuant to this section.", and the words "Class I price" and the figure "$5.65" as they appear in paragraph (e) thereof.

2. For the month of January 1954, all the provisions of paragraph (c) of § 947.48 of the order, except the following, do not tend to effectuate the declared policy of the act: "(c) The seasonal adjustment factor shall be the factor listed below for the month for which the price is being computed.", and the figure "1.08".

It is hereby found and determined that notice of proposed rule making and public procedure thereon in connection with the issuance hereof is impractical, unnecessary and contrary to the public interest, in that (1) the information upon which this action is based did not become available in sufficient time for such compliance; (2) the suspension actions for the month of December and January must be taken simultaneously because the purpose thereof is to provide compensating adjustments in the prices which would otherwise obtain during these months; and (3) the issuance of this suspension order effective as set forth below is necessary to reflect current marketing conditions and to facilitate, promote and maintain the orderly marketing of milk produced for the said marketing area. The changes caused by this suspension order do not require of persons affected substantial or extensive preparation prior to its effective date.

Therefore, good cause exists for making this order effective immediately.

*It is therefore ordered*, (1) That the following provisions of the order be and they are hereby suspended for the month of December 1953:

All of paragraph (c) of § 947.48 except the following: "(c) The seasonal adjustment factor shall be the factor listed below for the month for which the price is being computed.", and the figure "1.08".

(2) That the following provisions of the order be and they are hereby suspended for the month of January 1954:

All of paragraph (c) of § 947.48 except the following: "(c) The seasonal adjustment factor shall be the factor listed below for the month for which the price is being computed.", and the figure "1.08".

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Issued at Washington, D. C., this 24th day of November 1953, to be effective immediately.

[SEAL] TRUE D. MORSE,
*Acting Secretary of Agriculture.*

[F. R. Doc. 53-10003; Filed, Nov. 27, 1953; 8:56 a. m.]

## PART 953—LEMONS GROWN IN CALIFORNIA AND ARIZONA

### LIMITATION OF SHIPMENTS

§ 953.620 *Lemon Regulation 513*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 53, as amended (7 CFR Part 953, 18 F. R. 6767), regulating the handling of lemons grown in the State of California or in the State of Arizona, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and upon the basis of the recommendation and information submitted by the Lemon Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of the quantity of such lemons which may be handled, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions of this section effective as hereinafter set forth. Shipments of lemons, grown in the State of California or in the State of Arizona, are currently subject to regulation pursuant to said amended marketing agreement and order; the recommendation and supporting information for regulation during the period specified herein was promptly submitted to the Department after an open meeting of the Lemon Administrative Committee on November 24, 1953, such meeting was held, after giving due notice thereof to consider recommendations for regulation, and interested persons were afforded an opportunity to submit their views at this meeting; the provisions of this section, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such lemons; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period hereinafter specified; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed by the effective time thereof.

(b) *Order.* (1) The quantity of lemons grown in the State of California or in the State of Arizona which may be handled during the period beginning at 12:01 a. m., P. s. t., November 29, 1953, and ending at 12:01 a. m., P. s. t., December 6, 1953, is hereby fixed as follows:

(i) District 1: 35 carloads;
(ii) District 2: 195 carloads;
(iii) District 3: 20 carloads.

(2) The prorate base of each handler who has made application therefor, as provided in the said amended marketing agreement and order, is hereby fixed in accordance with the prorate base schedule which is attached hereto and made a part hereof by this reference.

(3) As used in this section, "handled," "handler," "carloads," "prorate base," "District 1," "District 2" and "District 3," shall have the same meaning as when used in said amended marketing agreement and order.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 25th day of November 1953.

[SEAL] S. R. SMITH,
*Director, Fruit and Vegetable Branch, Production and Marketing Administration.*

## PART 996—MILK IN THE SPRINGFIELD, MASSACHUSETTS, MARKETING AREA

### ORDER SUSPENDING CERTAIN PROVISIONS

Pursuant to the applicable provisions of Public Act No. 10, 73d Congress, as amended and reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 1940 ed. 601 et seq.), hereinafter referred to as the "act", and of the order, as amended, regulating the handling of milk in the Springfield, Massachusetts marketing area, hereinafter referred to as the "order" it is hereby found and determined that:

1. For the month of December 1953, all the provisions of § 996.48 of the order, except the following, do not tend to effectuate the declared policy of the act: "§ 996.48 *Computation of New England basic Class I price.* The New England basic Class I price per hundredweight of milk containing 3.7 percent butterfat shall be determined for each month pursuant to this section.", and the words "Class I price" and the figure "$5.65" as they appear in paragraph (e) thereof.

2. For the month of January 1954, all the provisions of paragraph (c) of § 996.48 of the order, except the following, do not tend to effectuate the declared policy of the act: "(c) The seasonal adjustment factor shall be the factor listed below for the month for which the price is being computed.", and the figure "1.08."

It is hereby found and determined that notice of proposed rule making and public procedure thereon in connection with the issuance hereof is impractical, unnecessary and contrary to the public interest, in that (1) the information upon which this action is based did not become available in sufficient time for such compliance; (2) the suspension actions for the months of December and January must be taken simultaneously because the purpose thereof is to provide compensating adjustments in the prices which would otherwise obtain during these months; and (3) the issuance of this suspension order effective as set forth below is necessary to reflect current marketing conditions and to facilitate, promote and maintain the orderly marketing of milk produced for the said marketing area. The changes caused by this suspension order do not require of persons affected substantial or extensive preparation prior to its effective date.

Therefore, good cause exists for making this order effective immediately.

*It is therefore ordered*, (1) That the following provisions of the order be and they are hereby suspended for the month of December 1953:

All of § 996.48 except the following: "§ 996.48 *Computation of New England basic Class I price.* The New England basic Class I price per hundredweight of milk containing 3.7 percent butterfat shall be determined for each month pursuant to this section.", and the words "Class I price" and the figure "$5.65" as they appear in paragraph (e) thereof.

(2) That the following provisions of the order be and they are hereby suspended for the month of January 1954:

All of paragraph (c) of § 996.48 except the following: "(c) The seasonal adjustment factor shall be the factor listed below for the month for which the price is being computed.", and the figure "1.08."

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Issued at Washington, D. C., this 24th day of November 1953, to be effective immediately.

[SEAL] TRUE D. MORSE,
*Acting Secretary of Agriculture.*

[F. R. Doc. 53-10005; Filed, Nov. 27, 1953; 8:57 a. m.]

## PART 999—MILK IN THE WORCESTER, MASSACHUSETTS, MARKETING AREA

### ORDER SUSPENDING CERTAIN PROVISIONS

Pursuant to the applicable provisions of Public Act No. 10, 73d Congress, as amended and reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 1940 ed. 601 et seq.), hereinafter referred to as the "act", and of the order, as amended, regulating the handling of milk in the Worcester, Massachusetts marketing area, hereinafter referred to as the

"order" it is hereby found and determined that:

1. For the month of December 1953, all the provisions of § 999.48 of the order, except the following, do not tend to effectuate the declared policy of the act: "§ 999.48 *Computation of New England basic Class I price.* The New England basic Class I price per hundredweight of milk containing 3.7 percent butterfat shall be determined for each month pursuant to this section.", and the words "Class I price" and the figure "$5.65" as they appear in paragraph (e) thereof.

2. For the month of January 1954, all the provisions of paragraph (c) of § 999.48 of the order, except the following, do not tend to effectuate the declared policy of the act: "(c) The seasonal adjustment factor shall be the factor listed below for the month for which the price is being computed.", and the figure "1.08".

It is hereby found and determined that notice of proposed rule making and public procedure thereon in connection with the issuance hereof is impractical, unnecessary and contrary to the public interest, in that (1) the information upon which this action is based did not become available in sufficient time for such compliance; (2) the suspension actions for the months of December and January must be taken simultaneously because the purpose thereof is to provide compensating adjustments in the prices which would otherwise obtain during these months; and (3) the issuance of this suspension order effective as set forth below is necessary to reflect current marketing conditions and to facilitate, promote and maintain the orderly marketing of milk produced for the said marketing area. The changes caused by this suspension order do not require of persons affected substantial or extensive preparation prior to its effective date.

Therefore, good cause exists for making this order effective immediately.

*It is therefore ordered*, (1) That the following provisions of the order be and they are hereby suspended for the month of December 1953:

All of § 999.48 except the following: "§ 999.48 *Computation of New England basic Class I price.* The new England basic Class I price per hundredweight of milk containing 3.7 percent butterfat shall be determined for each month pursuant to this section.", and the words "Class I price" and the figure "$5.65" as they appear in paragraph (e) thereof.

(2) That the following provisions of the order be and they are hereby suspended for the month of January 1954:

All of paragraph (c) of § 999.48 except the following: "(c) The seasonal adjustment factor shall be the factor listed below for the month for which the price is being computed.", and the figure "1.08."

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Issued at Washington, D. C., this 24th day of November 1953, to be effective immediately.

[SEAL] TRUE D. MORSE,
*Acting Secretary of Agriculture.*

[F. R. Doc. 53-10006; Filed, Nov. 27, 1953; 8:57 a. m.]

## TITLE 43—PUBLIC LANDS: INTERIOR

### Chapter I—Bureau of Land Management, Department of the Interior

Appendix—Public Land Orders

[Public Land Order 928]

ALASKA

EXCLUDING CERTAIN TRACTS FROM THE CHUGACH AND TONGASS NATIONAL FORESTS AND RESTORING THEM FOR PURCHASE AS HOMESITES

By virtue of the authority vested in the President by section 1 of the act of June 4, 1897 (30 Stat. 34, 36; 16 U. S. C. 473), and pursuant to Executive Order No. 10355 of May 26, 1952, it is ordered as follows:

The following-described tracts of public land in Alaska, occupied as homesites and identified by surveys of which plats and field notes are on file in the Bureau of Land Management, are hereby excluded from the Chugach and Tongass National Forests, Alaska, as hereinafter indicated, and restored, subject to valid existing rights, for purchase as homesites under section 10 of the act of May 14, 1898, as amended by the act of May 26, 1934 (48 Stat. 809; 48 U. S. C. 461):

CHUGACH NATIONAL FOREST

U. S. Survey No. 2528, lot 1, 4.78 acres; latitude 60°28'23" N., longitude 149°21' W. (Homesite No. 150, Trail Lake Group).

U. S. Survey No. 2530, lot E, 2.94 acres; latitude 60°20'20" N., longitude 149°22' W. (Homesite No. 117, Primrose Group).

U. S. Survey No. 3143, unsurveyed, lot 4, 3.5 acres; latitude 60°24' N., longitude 149°22' W. (Homesite No. 120, Lawing Group).

TONGASS NATIONAL FOREST

Beginning at a point located on line 3-4 of U. S. Survey No. 280, approximate latitude 55°32'15" N., longitude 132°24' W., from which corner No. 4 bears S. 42° 30' E. 9.52 chains, thence N. 42° 30' W., 3.50 chains to corner No. 2, HS 1095; N. 47° 30' E., 3.00 chains to corner No. 3, HS 1095; S. 42° 30' E., 3.50 chains to corner No. 4, HS 1095; S. 47° 30' W., 3.00 chains to corner No. 1, HS 1095 to point of beginning. (Homesite No. 1095, 1.05 acres.)

NOVEMBER 23, 1953.

ORME LEWIS,
*Assistant Secretary of the Interior.*

[F. R. Doc. 53-9970; Filed, Nov. 27, 1953; 8:48 a. m.]

## TITLE 47—TELECOMMUNICATION

### Chapter I—Federal Communications Commission

PART 2—FREQUENCY ALLOCATIONS AND RADIO TREATY MATTERS; GENERAL RULES AND REGULATIONS

FM INTER-CITY RELAY STATIONS

The Commission having under consideration the desirability of making certain editorial changes in Part 2 of its rules and regulations; and

It appearing, that the Commission, on October 28, 1953, adopted a report and order in Docket 10647 which amended Part 4 of the Commission's rules, in part, by changing the term "interim FM relay station" to "FM inter-city relay station"; and

It further appearing, that Part 2 of the Commission's rules, which contains definitions of various types of stations authorized by the Commission, was not amended concurrently to reflect the change in terminology; and

It further appearing, that the amendments adopted herein are editorial in nature, and, therefore, prior publication of notice of proposed rule making under the provisions of section 4 of the Administrative Procedure Act is unnecessary, and the amendments may become effective immediately; and

It further appearing, that the amendments adopted herein are issued pursuant to authority contained in sections 4 (i), 5 (d) (1) and 303 (r) of the Communications Act of 1934, as amended, and paragraph F-6 of the Commission's Order Defining the Functions and Establishing the Organizational Structure of the Office of the Secretary, dated February 15, 1952, as amended:

*It is ordered*, This 20th day of November 1953, that, effective immediately, Part 2 of the Commission's rules and regulations is revised as set forth below:

1. Amend Subpart A—Definitions, § 2.1 by deleting the definition "Interim FM relay station (FXM)" and inserting the following immediately after the definition for FM broadcasting station:

*FM inter-city relay station (FXM).* A fixed station used for the transmission of FM broadcasting programs from one FM broadcasting station to other FM broadcasting stations to provide simultaneous network FM broadcasting and operated only by FM broadcast licensees.

2. Amend Subpart B, § 2.101 *Station symbols* by changing "FXM—Interim FM relay station" to read "FXM—FM inter-city relay station".

3. Amend § 2.104 (a) (5) by changing footnote NG14 as it applies to the band 940–952 Mc to read as follows:

NG14 FM inter-city relay stations may be authorized to use the band 940–952 Mc on the condition that harmful interference will not be caused to stations operating in accordance with the table of frequency allocations.

(Sec. 4, 48 Stat. 1066 as amended; 47 U. S. C. 154. Interprets or applies sec. 303, 48 Stat. 1082, as amended, sec. 5, 66 Stat. 713; 47 U. S. C. 303, 155)

Released: November 23, 1953.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

[F. R. Doc. 53-9993; Filed, Nov. 27, 1953; 8:54 a. m.]

PART 12—AMATEUR RADIO SERVICE

REVISION OF RULES

Pursuant to authority contained in section 4 (i), 5 (d) (1), and 303 (r) of the Communications Act of 1934, as amended, and paragraph F-6 of the Commission's Order Defining the Functions and Establishing the Organizational Structure of the Office of Secretary, dated February 14, 1952, as amended, the following editorial changes are made in Part 12, Rules Governing Amateur Radio Service:

1. The Table of Contents is amended to reflect changes in the text of Part 12 which were made since the last official printing of this Part on June 6, 1951.

2. Section 12.20 is amended by deletion of all reference to footnotes, and footnotes numbered 1, 2, 3, and 4 are deleted.

3. Section 12.21 (a), footnote 5 and the reference thereto are deleted.

4. Section 12.21 (b) is amended to read: "New Advanced Class amateur operator licenses will not be issued; however, Advanced Class (or Class A) licenses may continue to be renewed as set forth in § 12.27."

5. Section 12.27, renumber footnote 6 as footnote 1.

6. Section 12.42, delete paragraph concerning element 4 (A).

7. Section 12.43, delete present paragraph (b) and change paragraphs (c), (d), (e), and (f) to (b), (c), (d), and (e).

8. Section 12.46, delete present paragraph (b) and renumber paragraphs to read: (a), (b), (c), and (d).

9. Section 12.48, change paragraph (a) to read: "Code tests for sending and receiving are graded separately. Failure to pass the required code test for either sending or receiving will terminate the examination."

10. Section 12.48 (b), delete all reference to Element 4 (A), and in the last line add "a" before the words, "separate examination."

11. Section 12.67, amend by substituting for the first sentence of paragraph (a) the following: "Application for renewal of station license without modification shall be submitted on FCC Form 405–A. Applications on Form 405–A should not be accompanied by the applicant's license."

12. Section 12.67 (b), amend by adding the following introductory clause in the first sentence: "A renewal application which includes a modification (change of address) shall be submitted on FCC Form 610, and".

13. Section 12.69 is amended in accordance with amended § 1.402.

14. Section 12.70 (b), in second sentence of this paragraph delete the words, "he and", so that the phrase will read: "It shall require the licensee against whom it is directed to appear at a place and time therein named • • •".

15. Section 12.82 (e), in first sentence, 7th line, change the word "voyage" to "flight."

16. Section 12.111, redesignate paragraphs as (a) through (m) and indicate appropriate subparagraphs by 1, 2, 3, etc.; make punctuation changes; delete footnote 7, and renumber footnote 8 as footnote 2.

17. Section 12.136, change first sentence to read: "Each licensee of an amateur station shall keep an accurate log of station operation which shall include the following:"

18. Section 12.155, in line 13 change "nor" to "or".

19. Appendix I, "Examination Points", page 1, paragraph 7, delete reference to Classes A and B examinations and substitute General Class therefor.

20. Appendix I, "Radio Districts", delete *District of Columbia* from district 4.

21. Appendix I, "Radio Districts", in district 4 opposite Maryland, delete counties, so that notation will read: "All except district 24."

22. Appendix I, "Radio Districts", in district 4 opposite *Virginia*, delete *Arlington*, and insert after *Fairfax*, "except district 24."

23. Appendix I, "Radio Districts", in district 5 opposite *Virginia*, delete *district 4* and add *districts 4 and 24*.

24. Appendix I, "Radio Districts", in district 5, delete *New Post Office* and substitute *Federal* therefor.

25. Appendix I, "Radio Districts", in district 18, delete *1300* and substitute *826*.

26. Appendix I, "Radio Districts", in district 20, delete *Federal* and substitute *Post Office*.

27. Appendix I, "Radio Districts", in district 21, delete *609 Stanoewald Bldg.*, and substitute *502 Federal Bldg.* therefor.

28. Appendix I, "Radio Districts", add the following new entry:

| Radio district | Address of the engineer in charge | States, etc. | Counties |
|---|---|---|---|
| 24 | 101 Briggs Bldg., 2nd and F Sts. NW., Washington 25, D. C. | District of Columbia | Washington, the District of Columbia. |
| | | Maryland | Montgomery. |
| | | Virginia | Fairfax. |

29. Delete Extracts From Radio Regulations (Cairo revision) and footnotes 1 and 2.

30. Appendix 2, Extracts From Radio Regulations, delete footnote 3.

31. Appendix I, Examination Points, delete from the list of "Semiannual" examination points and add to the list of "Annual" examination points, the following: Bangor, Maine; Jamestown, N. Dak.; Manchester, N. H.; Marquette, Mich.; and Tallahassee, Fla.

32. Appendix I, Examination Points, delete from the list of "Annual" examination points, the following: Cumberland, Md.; Las Vegas, Nev.; and Reno, Nev.

33. Appendix I, Examination Points, following the last paragraph (concerning Hawaii), add the following: "Canal Zone: By the Engineer in Charge, District 22 (San Juan, P. R.)."

34. Delete title, text, and footnotes of Appendix 3 and substitute new text.

35. Section 12.23, reference to footnote 5 is deleted.

36. Sections 12.27 (d) and (e) amend to read as follows:

(d) A renewal application which includes a modification (change of address or operator class) shall be submitted on FCC Form 610 and shall be accompanied by the applicant's amateur operator license, and also by his amateur station license if he holds one.

(e) Application for renewal of an amateur operator license without modification shall be submitted on FCC Form 405–A. Applications on Form 405–A should not be accompanied by the applicant's license . . .

In view of the fact that the amendments adopted herein are editorial in nature, prior publication of Notice of Proposed Rule Making under the provisions of section 4 of the Administrative Procedure Act is unnecessary, and the amendments are effective immediately.

It is noted that since Part 12 was last published in the FEDERAL REGISTER (June 6, 1951) a large number of amendments have been made thereto. Accordingly, for administrative convenience: *It is ordered*, That 20th day of November 1953, that, effective immediately, Part 12 of the Commission's Rules and Regulations is revised to include the foregoing editorial changes, and to include all outstanding amendments which became effective between June 6, 1951, and the date of this order.

FEDERAL COMMUNICATIONS COMMISSION,
WM. P. MASSING,
*Acting Secretary.*

NOTE: The revised Part 12 as published in this issue of the FEDERAL REGISTER will be available in the near future from the Superintendent of Documents, Washington 25, D. C.

SUBPART A—AMATEUR RADIO STATIONS AND OPERATORS

Sec.
12.0 Basis and Purpose.

DEFINITIONS

12.1 Amateur service.
12.2 Amateur operator.
12.3 Amateur station.
12.4 Amateur portable station.
12.5 Amateur mobile station.
12.6 Amateur radio communication.
12.7 Remote control.
12.9 Antenna structure defined.
12.10 Aircraft landing area defined.

AMATEUR OPERATORS

LICENSES; PRIVILEGES

12.20 Classes of amateur operator licenses.
12.21 Eligibility for license.
12.22 Application for amateur operator license.
12.23 Classes and privileges of amateur operator licenses.
12.25 Availability of operator license.
12.26 Duplicate license.
12.27 Renewal of amateur operator license.
12.28 Who may operate an amateur station.
12.29 License term.
12.30 Order of suspension.
12.31 Proceedings.

EXAMINATIONS

12.41 When examination is required.
12.42 Examination elements.

Sec.
12.43 Examination requirements.
12.44 Manner of conducting examination.
12.45 Additional examination for holders of Conditional Class operator licenses.

12.47 Examination procedure.
12.48 Grading.
12.49 Eligibility for reexamination.
12.50 Code Test procedure.

AMATEUR RADIO STATIONS

LICENSES

12.60 Limitations on antenna structures.
12.61 Eligibility for amateur station license.
12.62 Eligibility of corporations or organizations to hold license.
12.63 Application for amateur station license.
12.64 Location of station.
12.65 License period.
12.66 Authorized apparatus.
12.67 Renewal of amateur station license.
12.68 Availability of station license.
12.69 Revocation of station license.
12.70 Modification of station license.

CALL SIGNS

12.81 Assignment of call signs.
12.82 Transmissions of call signs.

PORTABLE AND MOBILE STATIONS

12.91 Requirements for portable and mobile operation.
12.93 Special provisions for nonportable stations.
12.94 Special provisions for mobile stations aboard ships or aircraft.

USE OF AMATEUR STATIONS

12.101 Points of communications.
12.102 No remuneration for use of station.
12.103 Broadcasting prohibited.
12.104 Radiotelephone tests.
12.105 Codes and ciphers prohibited.
12.106 One-way communications.
12.107 Special provisions regarding radio teleprinter transmissions.

ALLOCATION OF FREQUENCIES

12.111 Frequencies and types of emission for use of amateur stations.
12.113 Individual frequency not specified.
12.114 Types of emission.

EQUIPMENT AND OPERATION

12.131 Maximum authorized power.
12.132 Power supply to transmitter.
12.133 Purity and stability of emissions.
12.134 Modulation of carrier wave.
12.135 Frequency measurement and regular check.
12.136 Logs.
12.137 Retention of logs.

SPECIAL CONDITIONS

12.151 Additional conditions to be observed by licensee.
12.152 Restricted operation.
12.153 Second notice of same violation.
12.154 Third notice of same violation.
12.155 Answers to notices of violations.
12.156 Operation in emergencies.
12.157 Obscenity, indecency, profanity.
12.158 False signals.
12.159 Unidentified communications.
12.160 Interference.
12.161 Damage to apparatus.
12.162 Fraudulent licenses.

SUBPART B—RADIO AMATEUR CIVIL EMERGENCY SERVICE

3—Classification of emissions.
4—Convention between the United States of America and Canada.

AUTHORITY: §§ 12.0 to 12.257 issued under sec. 4, 48 Stat. 1066, as amended; 47 U. S. C. 154. Interpret or apply sec. 303, 48 Stat. 1082, as amended; 47 U. S. C. 303.

SUBPART A—AMATEUR RADIO STATIONS AND OPERATORS

§ 12.0 *Basis and purpose.* The rules and regulations in this part are designed to provide an amateur radio service having a fundamental purpose as expressed in the following principles:

(a) Recognition and enhancement of the value of the amateur service to the public as a voluntary noncommercial communication service, particularly with respect to providing emergency communications.

(b) Continuation and extension of the amateur's proven ability to contribute to the advancement of the radio art.

(c) Encouragement and improvement of the amateur radio service through rules which provide for advancing skills in both the communication and technical phases of the art.

(d) Expansion of the existing reservoir within the amateur radio service of trained operators, technicians, and electronics experts.

(e) Continuation and extension of the amateur's unique ability to enhance international good will.

DEFINITIONS

§ 12.1 *Amateur service.* The term "amateur service" means a radio service carried on by amateur stations.

§ 12.2 *Amateur operator.* The term "amateur operator" means a person interested in radio technique solely with a personal aim and without pecuniary interest, holding a valid license issued by the Federal Communications Commission authorizing him to operate licensed amateur stations.

§ 12.3 *Amateur station.* The term "amateur station" means a station used by an amateur operator, and it embraces all radio transmitting apparatus at a particular location used for amateur service and operated under a single instrument of authorization.

§ 12.4 *Amateur portable station.* The term "amateur portable station" means an amateur station that is so constructed that it may conveniently be moved about from place to place for communication, but which is not operated while in motion.

§ 12.5 *Amateur mobile station.* The term "amateur mobile station" means an amateur station that is so constructed that it may conveniently be transferred to or from a mobile unit or from one such unit to another, and is ordinarily used while such mobile unit is in motion.

§ 12.6 *Amateur radio communication.* The term "amateur radio communication" means radio communication between amateur stations solely with a personal aim and without pecuniary interest.

§ 12.7 *Remote control.* The term "remote control" as applied to the amateur radio service, means control of transmitting equipment of an amateur station from an operating position other than one at which the transmitter is in view and immediately accessible; except that, direct mechanical control or direct electrical control by wired connections of an amateur transmitter from a point located on board any aircraft, vessel or vehicle on which such transmitter is located shall not be considered remote control within the meaning of this definition.

§ 12.9 *Antenna structure defined.* The term "antenna structure" includes the radiating system and its supporting structures.

§ 12.10 *Aircraft landing area defined.* An aircraft landing area means any locality, either on land or water, including airports and intermediate landing fields, which is used, or approved for use, for landing and take-off of aircraft whether or not facilities are provided for the shelter, servicing, or repair of aircraft, or for the receiving or discharging of passengers or cargo.

AMATEUR OPERATORS

LICENSES, PRIVILEGES

§ 12.20 *Classes of amateur operator licenses.*

Amateur extra, class.
Advanced class (previously class A).
General class (previously class B).
Conditional class (previously class C).
Technician class.
Novice class.

§ 12.21 *Eligibility for license.* Persons are eligible to apply for the various classes of amateur operator licenses as follows:

(a) *Amateur extra class.* Any citizen of the United States who either (1) at any time prior to receipt of his application by the Commission has held for a period of two years or more a valid amateur operator license issued by the Federal Communications Commission, excluding licenses of the Novice and Technician Classes, or (2) submits evidence of having held a valid amateur radio station or operator license issued by any agency of the United States Government during or prior to April, 1917.

(b) *Advanced class.* New Advanced Class amateur operator licenses will not be issued; however, Advanced Class (or Class A) licenses may continue to be renewed as set forth in § 12.27.

(c) *General class.* Any citizen of the United States.

(d) *Conditional class.* Any citizen of the United States whose actual residence and amateur station location are more than 125 miles air line distant from the nearest location at which examinations are held at intervals of not more than 3 months for General Class amateur operator license; or who is shown by physician's certificate to be unable to appear for examination because of protracted disability; or who is shown by certificate of the commanding officer to be in the armed forces of the United States at an Army, Navy, Air Force or Coast Guard station and, for that reason, to be unable to appear for examination at the time and place designated by the Commission.

(e) *Technician class.* Any citizen of the United States.

(f) *Novice class.* Any citizen of the United States except a former holder of an amateur license of any class issued by any agency of the United States government, military or civilian.

§ 12.22 *Application for amateur operator license.* The application for any new amateur operator license, including application for any change in operating privileges, shall be submitted in person or by mail to the district field office of the Commission at which the applicant desires his application to be considered and acted upon, which office will make the final arrangements for conducting any required examination. If the application is for a license which is obtained upon successful completion of an examination by volunteer examiners under the special provisions of § 12.44 (c), the application shall be submitted to the district field office which supplied the examination material. Applications for renewal or modification of license, or for duplicate license, when no change in operating privileges is involved, shall be filed directly with the Commission at its Washington 25, D. C. office.

§ 12.23 *Classes and privileges of amateur operator licenses*—(a) *Amateur extra class.* All authorized amateur privileges including such additional privileges in both communication and technical phases of the art which the Commission may consider as appropriately limited to holders of this class of license.

(b) *Advanced class.* All amateur privileges except those which may be reserved to holders of the Amateur Extra Class license.

(c) *General and Conditional classes.* All authorized amateur privileges.

(d) *Technician class.* All authorized amateur privileges in the amateur frequency bands above 220 megacycles.

(e) *Novice class.* Those amateur privileges as designated and limited as follows:

(1) The d. c. plate power input to the vacuum tube or tubes supplying power to the antenna shall not exceed 75 watts.

(2) Only the following frequency bands and types of emission may be used, and the emissions of the transmitter must be crystal-controlled:

(i) 3700 to 3750 kc, radiotelegraphy using only type A–1 emission in accordance with the geographical restrictions set forth in § 12.111.

(ii) 7175 to 7200 kc, radiotelegraphy using only type A–1 emission.

(iii) 21.10 to 21.25 Mc, radiotelegraphy using only type A–1 emission.

(iv) 145 to 147 Mc, radiotelegraphy or radiotelephony using any type of emission except pulsed emission and type B emission.

§ 12.25 *Availability of operator license.* The original operator license of each operator shall be kept in the personal possession of the operator while operating an amateur station. When operating an amateur station at a fixed location, however, the license may be posted in a conspicuous place in the room occupied by the operator. The license shall be available for inspection by any authorized Government official whenever the operator is operating an amateur station and at other times upon request made by an authorized representative of the Commission, except when such license has been filed with application for modification or renewal thereof, or has been mutilated, lost or destroyed, and application has been made for a duplicate license in accordance with § 12.26. No recognition shall be accorded to any photocopy of an operator license; however, nothing in this section shall be construed to prohibit the photocopying for other purposes of any amateur radio operator license.

§ 12.26 *Duplicate license.* Any licensee applying for a duplicate license to replace an original which has been lost, mutilated, or destroyed, shall submit with the application the mutilated license or a statement setting forth the facts regarding the manner in which the original license was lost or destroyed. If, subsequent to receipt by the licensee of the duplicate license, the original license is found, either the duplicate or the original license shall be returned immediately to the Commission.

§ 12.27 *Renewal of amateur operator license.*[1] (a) An amateur operator license except the Novice Class, may be renewed upon proper application in which it is stated that the applicant has lawfully accumulated, at an amateur station licensed by the Commission, a minimum total of either 2 hours operating time during the last 3 months or 5 hours operating time during the last 12 months of the license term. Such operating time, for the purpose of renewal, shall be counted as the total of all that time between the entries in the station log showing the beginning and end of transmissions as required in § 12.136 (a), both during single transmissions and during a sequence of transmissions. The application shall, in addition to the foregoing, include a statement that the applicant can send by hand key, i. e., straight key or any other type of hand operated key such as a semi-automatic or electronic key, and receive by ear, in plain language, messages in the International Morse Code at a speed of not less than that which is required in qualifying for an original license of the class being renewed.

(b) The Novice Class license will not be renewed.

(c) The applicant shall qualify for a new license by examination if the requirements of this section are not fulfilled.

(d) A renewal application which includes a modification (change of address or operator class) shall be submitted on FCC Form 610 and shall be accompanied by the applicant's amateur operator license, and also by his amateur station license if he holds one.

(e) Application for renewal of an amateur operator license without modification shall be submitted on FCC Form 405–A. Applications on Form 405–A should not be accompanied by the applicant's license. Unless otherwise directed by the Commission, each application for renewal of license shall be filed during the last 120 days of the license term or within a period of grace of one year after the expiration date of such license. During this one year period of grace an expired license is not valid. A renewed license issued upon the basis of an application filed during the grace period will be dated currently and will not be back-dated to the date of expiration of the license being renewed. In any case

[1] Until further order of the Commission, the showing that the applicant actually operated an amateur radio station or stations for the periods of time specified in § 12.27 will not be required in cases where it is shown that the applicant was unable to conduct such operation because he was on active duty in the armed forces of the United States or was duly enrolled as an employee of an agency of the Federal Government and in the course of such employment was on duty in a foreign country continuously during the last year of the license term: *Provided*, That any such employee of the Federal Government shall submit with his application for renewal of license a statement signed by his agency head, or the chief of the Bureau or Division in which he is employed attesting to such employment.

in which the licensee has, in accordance with the Commission's rules made timely

notice of his right to be heard and to contest the proceeding. The effective

are more than 125 miles airline distance from the nearest location at which examinations are conducted by an au-

§ 12.46 *Examination credit.* (a) An applicant for a higher class of amateur operator license who holds a valid ama-

examination for a Conditional Class license.

tory showing of control of the transmitting station for which license is desired and of control of the specific premises

in which the licensee has, in accordance with the Commission's rules made timely and sufficient application for renewal of license, no license with reference to any activity of a continuing nature shall expire until such application shall have been finally determined.

(f) Renewal applications shall be governed by applicable rules in force on the date when application is filed.

§ 12.28 *Who may operate an amateur station.* An amateur radio station may be operated only by a person holding a valid amateur operator license. Such station may be operated by the licensee only in the manner and to the extent provided in his amateur operator license. Persons other than the station licensee, when operating such station, may operate it only to the extent and in the manner authorized to the licensee of the station and not exceeding the operating authority of such person's own amateur operator license. When an amateur station is used for telephony, the station licensee may permit any person to transmit by voice, provided during such transmission call signs are announced as prescribed by § 12.82 and a duly licensed amateur operator maintains actual control over the emissions, including turning the carrier on and off for each transmission and signing the station off after communication with each station has been completed.

§ 12.29 *License term.* Amateur operator licenses are normally valid for a period of 5 years from the date of issuance of a new or renewed license, except the Novice Class which is normally valid for a period of 1 year from the date of issuance. Modified and duplicate licenses shall bear the same date of expiration as the licenses for which they are modifications or duplicates.

§ 12.30 *Order of suspension.* No order of suspension of any operator's license shall take effect until 15 days' notice in writing thereof, stating the cause for the proposed suspension, has been given to the operator licensee who may make written application to the Commission at any time within said 15 days for a hearing upon such order. The notice to the operator licensee shall not be effective until actually received by him, and from that time he shall have 15 days in which to mail the said application. In the event that physical conditions prevent mailing of the application at the expiration of the 15-day period, the application shall then be mailed as soon as possible thereafter, accompanied by a satisfactory explanation of the delay. Upon receipt by the Commission of such application for hearing, said order of suspension shall be held in abeyance until the conclusion of the hearing which shall be conducted under such rules as the Commission shall deem appropriate. Upon the conclusion of said hearing the Commission may affirm, modify, or revoke said order of suspension.

§ 12.31 *Proceedings.* Proceedings for the suspension of an operator's license shall in all cases be initiated by the entry of an order of suspension. Respondent will be given notice thereof together with notice of his right to be heard and to contest the proceeding. The effective date of the suspension will not be specified in the original order but will be fixed by subsequent motion of the Commission in accordance with the conditions specified above. Notice of the effective date of suspension will be given respondent who shall send his operator license to the office of the Commission in Washington, D. C., on or before the said effective date, or, if the effective date has passed at the time notice is received, the license shall be sent to the Commission forthwith.

EXAMINATIONS

§ 12.41 *When examination is required.* Examination is required for the issuance of a new amateur operator license, and for a change in class of operating privileges. Credit may be given, however, for certain elements of examination as provided in § 12.46

§ 12.42 *Examination elements.* Examinations for amateur operator privileges will comprise one or more of the following examination elements:

Element 1 (A): *Beginner's code test.* Code test at five (5) words per minute.

Element 1 (B): *General code test.* Code test at thirteen (13) words per minute.

Element 1 (C): *Expert's code test.* Code test at twenty (20) words per minute.

Element 2: *Basic amateur practice.* Amateur radio operation and apparatus, including radiotelephone and radiotelegraph.

Element 3 (A): *Basic law.* Rules and regulations essential to beginners' operation, including sufficient elementary radio theory for the understanding of those rules.

Element 3 (B): *General regulations.* Provisions of treaties, statutes, and rules and regulations affecting all amateur stations and operators.

Element 4 (B): *Advanced amateur practice.* Advanced radio theory and operation as applicable to modern amateur techniques, including, but not limited to, radiotelephony, radiotelegraphy, and transmissions of energy for measurements and observations applied to propagation, for the radio control of remote objects and for similar experimental purposes.

§ 12.43 *Examination requirements.* Applicants for original licenses will be required to pass examinations as follows:

(a) *Amateur extra class.* Elements 1 (C), 2, 3 (B) and 4 (B).

(b) *General class.* Elements 1 (B), (2) and 3 (B).

(c) *Conditional class.* Elements 1 (B), 2 and 3 (B).

(d) *Technician class.* Elements 1 (A), 2 and 3 (B).

(e) *Novice class.* Elements 1 (A) and 3 (A).

§ 12.44 *Manner of conducting examinations.* (a) The examinations for all classes of amateur operator licenses, except Conditional Class, will be conducted by an authorized Commission employee or representative at locations and at times specified by the Commission. The examinations for Conditional Class, as well as Technician and Novice Class licenses, may be conducted in accordance with the provisions of paragraph (c) of this section under one or more of the following conditions:

(1) If the applicant's actual residence and proposed amateur station location are more than 125 miles airline distance from the nearest location at which examinations are conducted by an authorized Commission employee or representative at intervals of not more than 3 months for amateur operator licenses; or

(2) If the applicant is shown by physician's certificate to be unable to appear for examination because of protracted disability; or

(3) If the applicant is shown by certificate of the commanding officer to be in the armed forces of the United States at an Army, Navy, Air Force, or Coast Guard station and, for that reason, to be unable to appear for examination at the time and place designated by the Commission.

(b) A holder of a conditional, technician, or novice class license obtained on the basis of an examination under the provisions of paragraph (c) of this section is not required to be re-examined when changing residence and station location to within a regular examination area, nor when a new examination location is established within 125 miles of such licensee's residence and station location.

(c) Each examination for Conditional Class license, or for Technician, or Novice Class license under special conditions set forth in paragraph (a) of this section, shall be conducted and supervised by not more than two volunteer examiners, whom the Commission may designate or permit the applicant to select (not more than one examiner for the code test and not more than one examiner for the complete written examination). In the event the examiner for the code test is selected by the applicant, such examiner shall be the holder of an Extra Class, Advanced Class, or General Class of amateur operator license or shall have held, within the 5 years prior to the date of the examination, a commercial radiotelegraph operator license issued by the Commission or within that time shall have been employed in the service of the United States as the operator of a manually operated radiotelegraph station. The examiner for the written test shall be at least 21 years of age.

§ 12.45 *Additional examination for holders of Conditional Class operator licenses.* (a) The Commission may require a licensee holding a Conditional Class of operator license to appear for a General Class license examination at a location designated by the Commission. If the licensee fails to appear for the General Class examination when directed to do so, or fails to pass such examination, the Conditional Class operator license previously issued shall be subject to cancellation and, upon cancellation, a new license will not be issued for the Conditional Class privileges.

(b) Whenever the holder of a conditional class amateur operator license is required by the Commission to restrict the operation of his amateur station, in accordance with the provisions of §§ 12.152, 12.153 and 12.154, the necessity for those restrictions shall be considered sufficient grounds to require the holder of the Conditional Class license to appear for the General Class examination.

§ 12.46 *Examination credit.* (a) An applicant for a higher class of amateur operator license who holds a valid amateur operator license issued upon the basis of an examination by the Commission will be required to pass only those elements of the higher class examination that were not included in the examination for the amateur license held when such application was filed. However, credit will not be allowed for licenses issued on the basis of an examination given under the provisions of § 12.44 (c).

(b) An applicant for any class of amateur operator license, except the Extra Class, will be given credit for the telegraph code element if within 5 years prior to the receipt of his application by the Commission he held a commercial radiotelegraph first or second class operator license issued by the Federal Communications Commission.

(c) An applicant for Amateur Extra Class operator license will be given credit for examination elements 1 (c) and 4 (B) if he so requests and submits evidence of having held a valid amateur radio station or operator license issued by any agency of the United States Government during or prior to April 1917, and qualifies for or currently holds a valid amateur operator license of the General or Advanced Class.

(d) No examination credit, except as herein provided, shall be allowed on the basis of holding or having held any amateur or commercial operator license.

§ 12.47 *Examination procedure.* All written portions of the examinations for amateur operator privileges shall be completed by the applicant in legible handwriting or hand printing, and diagrams shall be drawn by hand, by means of either pen and ink or pencil. Whenever the applicant's signature is required, his normal signature shall be used. Applicants unable to comply with these requirements, because of physical disability, may dictate their answers to the examination questions and the receiving code test and if unable to draw required diagrams, may dictate a detailed description essentially equivalent. If the examination or any part thereof is dictated, the examiner shall certify the nature of the applicant's disability and the name and address of the person(s) taking and transcribing the applicant's dictation.

§ 12.48 *Grading.* (a) Code tests for sending and receiving are graded separately. Failure to pass the required code test for either sending or receiving will terminate the examination.

(b) Seventy-four percent is the passing grade for written examinations. For the purpose of grading, all elements, other than element 4 (B), required in qualifying for a particular license will be considered a single examination, and element 4 (B), will be considered as a separate examination.

§ 12.49 *Eligibility for re-examination.* An applicant who fails examination for amateur operator privileges may not take another examination for such privileges within 30 days, except that this limitation shall not apply to an examination for a General Class license following an examination for a Conditional Class license.

§ 12.50 *Code test procedure.* The code test required of an applicant for amateur radio operator license, in accordance with the provisions of §§ 12.42 and 12.43 shall determine the applicant's ability to transmit by hand key (straight key or if supplied by the applicant, any other type of hand operated key such as a semi-automatic or electronic key) and to receive by ear, in plain language, messages in the International Morse Code at not less than the prescribed speed, free from omission or other error for a continuous period of at least 1 minute during a test period of 5 minutes counting five characters to the word, each numeral or punctuation mark counting as two characters.

AMATEUR RADIO STATIONS

LICENSES

§ 12.60 *Limitation on antenna structures.* (a) No new antenna structure shall be erected for use by any station in the Amateur Radio Service, and no change shall be made in any existing antenna structure used or intended to be used by any station in the Amateur Radio Service so as to increase its over-all height above ground level, without prior approval by the Commission, in any case when either (1) the antenna structure proposed to be erected will exceed an over-all height of 170 feet above ground level, except in the case where the antenna is mounted on top of an existing man-made structure and does not increase the over-all height of such man-made structure by more than 20 feet, or (2) the antenna structure proposed to be erected will exceed an over-all height of one foot above the established elevation of any landing area for each 200 feet of distance, or fraction thereof, from the nearest boundary of such landing area, except in the case where the antenna structure does not exceed 20 feet above the ground or is mounted on top of an existing man-made structure or natural formation and does not increase the over-all height of such man-made structure or natural formation by more than 20 feet as a result of such mounting. Application for Commission approval, when such approval is required, shall be submitted on FCC Form No. 401–A, in triplicate.

(b) In cases where FCC Form No. 401–A is required to be filed, further details as to whether an aeronautical study and/or obstruction marking may be required, and specifications for obstruction marking when required, may be obtained from Part 17 of this chapter, "Rules Concerning the Construction, Marking, and Lighting of Antenna Towers and Supporting Structures." Information regarding requirements as to inspection of obstruction marking, recording of information regarding such inspection, and maintenance of antenna structures is also contained in Part 17.

§ 12.61 *Eligibility for amateur station license.* A license for an amateur station will be issued in response to proper application therefor to a license amateur operator who has made a satisfactory showing of control of the transmitting station for which license is desired and of control of the specific premises upon which all of the station apparatus is to be located, at a designated fixed location. An amateur station license may be issued to an individual, not a licensed amateur operator (other than an alien or a representative of an alien or of a foreign government), who is in charge of a proposed amateur station located in approved public quarters and established for training purposes in connection with the armed forces of the United States, but not operated by the United States Government.

§ 12.62 *Eligibility of corporations or organizations to hold license.* An amateur station license will not be issued to a school, company, corporation, association, or other organization, nor for its use, except that in the case of a bona fide amateur radio organization or society, a station license may be issued to a licensed amateur operator, other than the holder of a Novice Class license, as trustee for such society.

§ 12.63 *Application for amateur station license.* (a) Each application for an amateur station license shall comply with the Commission's rules and regulations and shall be made in writing, subscribed and verified on FCC Form No. 610 (application for amateur operator and/or station license). FCC Form No. 602 should be used where the applicant is in charge of a proposed amateur station located in approved public quarters and established for training purposes in connection with the armed forces of the United States, but not operated by the United States Government.

(b) One application and all papers incorporated therein and made a part thereof shall be submitted for each amateur station license. If the application is for station license only, it shall be filed directly with the Commission at its Washington 25, D. C. office. If the application also contains application for any class of amateur operator license, it shall be filed in accordance with the provisions of § 12.22.

§ 12.64 *Location of station.* (a) Every amateur station shall have a fixed transmitter location. Only one fixed transmitter location will be authorized and will be designated on the license for each amateur station, except that when remote control is authorized, the location of the remote control position as well as the location of the remotely controlled transmitter shall be considered as fixed transmitter locations and will be so designated on the station license. Unless remote control of the transmitting apparatus is authorized, such apparatus shall be operated only by a duly licensed amateur radio operator present at the location of such apparatus.

(b) Authority for operation of an amateur station with the licensed operator on duty at a specific remote control point in lieu of the remote transmitter location may be granted upon filing an application for a modified station license on FCC Form No. 610 or FCC Form No. 602, as appropriate, and provided that the following conditions are met:

(1) The remote control point as well as the remotely controlled transmitter, shall be located on premises controlled by the licensee.

(2) The remotely controlled transmitter shall be so installed and protected that it is inaccessible to other than duly authorized persons.

(3) In addition to the requirements of § 12.68 a photocopy of the amateur station license shall be posted in a conspicuous place at the location of the remotely controlled transmitter.

(4) Means shall be provided at the control point to permit the continuous monitoring of the emissions of the remotely controlled transmitter, and it shall be continuously monitored when in operation.

(5) Means shall be provided at the remote control point immediately to suspend the radiation of the transmitter when there is any deviation from the terms of the station license or from the Rules Governing Amateur Radio Service.

(6) In the event that operation of an amateur transmitter from a remote control point by radio is desired, an application for a modified station license on FCC Form No. 610 or FCC Form No. 602, as appropriate, should be submitted with a letter requesting authority to operate in such a manner stating that the controlling transmitter at the remote location will operate within amateur frequency bands 420 megacycles or higher and that there will be full compliance with § 12.64 (b), subparagraphs (1) through (5). Supplemental statements and diagrams should accompany the application and show how radio remote control will be accomplished and what means will be employed to prevent unauthorized operation of the transmitter by signals other than those from the controlling unit. There should be included complete data on control channels, relays and functions of each, directional antenna design for the transmitter and receiver in the control circuit, and means employed for turning on and off the main transmitter from the remote control location.

(c) An amateur transmitter may be operated from a remote control point in lieu of the remote transmitter location without special authorization by the Commission when there is direct mechanical control or direct electrical control by wired connections of the transmitter from a point located in the same or closely adjoining building or structure provided there is full compliance with the conditions set forth in § 12.64 (b), subparagraphs (1) through (5).

§ 12.65 *License period.* The license for an amateur station is normally valid for a period of 5 years from the date of issuance of a new or renewed license except that an amateur station license issued to the holder of a Novice Class amateur operator license is normally valid for a period of 1 year from the date of issuance. Any modified or duplicate license shall bear the same expiration date as the license for which it is a modification or duplicate.

§ 12.66 *Authorized apparatus.* An amateur station license authorizes the use under control of the licensee of all transmitting apparatus at the fixed location specified in the station license which is operated on any frequency, or frequencies allocated to the amateur service, and in addition authorizes the use, under control of the licensee, of portable and mobile transmitting apparatus operated at other locations.

§ 12.67 *Renewal of amateur station license.* (a) Application for renewal of station license without modification shall be submitted on FCC Form 405–A. Applications on Form 405–A should not be accompanied by the applicant's license. Unless otherwise directed by the Commission, each application for renewal of license shall be filed during the last 120 days of the license term or within a period of grace of one year after the expiration date of such license. During this one year period of grace an expired license is not valid. A renewed license issued upon the basis of an application filed during the grace period will be dated currently and will not be back-dated to the date of expiration of the license being renewed. This one year period of grace shall apply only to licenses expiring on or after January 1, 1951. In any case in which the licensee has, in accordance with the Commission's rules made timely and sufficient application for renewal of license, no license with reference to any activity of a continuing nature shall expire until such application shall have been finally determined.

(b) A renewal application which includes a modification (change of address) shall be submitted on FCC Form 610 and shall be accompanied by the applicant's amateur station license, and also by his amateur operator license if he holds one.

(c) Renewal applications shall be governed by applicable rules in force on the date when application is filed.

§ 12.68 *Availability of station license.* The original license of each amateur station or a photocopy thereof shall be posted in a conspicuous place in the room occupied by the licensed operator while the station is being operated at a fixed location or shall be kept in his personal possession. When the station is operated at other than a fixed location, the original station license or a photocopy thereof shall be kept in the personal possession of the station licensee (or a licensed representative) who shall be present at the station while it is being operated as a portable or mobile station. The original station license shall be available for inspection by any authorized Government official at all times while the station is being operated and at other times upon request made by an authorized representative of the Commission, except when such license has been filed with application for modification or renewal thereof, or has been mutilated, lost, or destroyed, and application has been made for a duplicate license in accordance with § 12.26.

§ 12.69 *Revocation of station license and issuance of cease and desist orders.* (a) Whenever it appears that a station license should be revoked for any of the reasons set forth in section 312 (a) of the Communications Act of 1934, as amended, or a cease and desist order should be issued for any of the reasons specified in section 312 (b) of the act, the Commission will issue an order directing the licensee to show cause why an order of revocation or a cease and desist order, as the case may be, should not be issued.

(b) Any order to show cause issued in accordance with paragraph (a) of this section will contain a statement of matters with respect to which the Commission is inquiring and will call upon the licensee to appear before the Commission at a time and place stated in the order, but in no event less than thirty (30) days after the receipt of such order, and give evidence upon the matter specified therein; except that where safety of life or property is involved, the Commission may provide in the order for a shorter period.

(c) In order to avail himself of the opportunity to appear before the Commission at the time and place stated in the show cause order to give evidence upon the matter specified therein, the licensee, in person or by his attorney, shall, within 30 days of the receipt of the order, or such shorter period as may be specified therein if the safety of life and property is involved, file with the Commission, in triplicate, a written appearance stating that he will appear and present evidence on the matter specified in the order.

(d) The hearing on the matter specified in the order to show cause, and the practice and procedure in connection therewith, shall accord with the provisions of Subparts F and G of Part 1 of the Commission's Rules of Practice and Procedure, except that in all such hearings the burden of proof shall be upon the Commission.

(e) If the licensee does not desire to appear before the Commission and give evidence upon the matter specified in the show cause order, he shall, within 30 days of the receipt of the order, or such shorter period as may be specified therein if the safety of life or property is involved, file with the Commission, in triplicate, a written waiver of hearing. Such waiver, which shall include the name of the licensee to whom the show cause order was addressed, the call letters of his station, if any, and the docket number of the proceeding, may be accompanied by a statement of reasons why the licensee believes that the order of revocation or a cease and desist order, as the case may be, should not be issued.

(f) If the licensee fails timely to respond to an order to show cause or fails to appear at a hearing, such failure will be deemed a waiver of hearing.

(g) If the licensee waives a hearing in accordance with the provisions of paragraph (e) of this section and fails to submit a statement therewith showing why he believes an order of revocation or a cease and desist order should not be issued, or if he is deemed to waive a hearing in accordance with the provisions of paragraph (f) of this section, the allegations specified in the order to show cause will be deemed to be admitted and a decision will be issued by the Commission invoking the sanction specified in the order to show cause. If a hearing is waived pursuant to paragraph (e) of this section but a written statement as to why an order of revocation or cease and desist order should not be issued is submitted, the Commission will, on the basis of the facts before it as supplemented by such written statement, issue a decision stating its reasons for invoking the sanction specified in the order to show cause or for dismissing the proceeding, as the case may be: *Provided*, That where the written statement contains factual allegations contrary to those upon which the show cause order was based, the Commission may call upon the submitting party to furnish additional information under oath, or, if necessary, designate the proceeding for oral hearing. The decisions of the Commission referred to in this paragraph shall have the same effect as an initial decision, and the procedure to be followed thereafter shall be the same as in the case of an initial decision issued in the course of the regular hearing procedure (see §§ 1.853–1.857 of Part 1, Rules of Practice and Procedure).

(h) Any order of revocation or cease and desist order issued pursuant to this section shall include a statement of the findings and the grounds and reasons therefor and specify the effective date of the order, and shall be served on said licensee.

§ 12.70 *Modification of station license.* (a) Whenever the Commission shall determine that public interest, convenience, and necessity would be served, or any treaty ratified by the United States will be more fully complied with, by the modification of any radio station license either for a limited time, or for the duration of the term thereof, it shall issue an order for such licensee to show cause why such license should not be modified.

(b) Such order to show cause shall contain a statement of the grounds and reasons for such proposed modification, and shall specify wherein the said license is required to be modified. It shall require the licensee against whom it is directed to appear at a place and time therein named, in no event to be less than 30 days from the date of receipt of the order to show cause why the proposed modification should not be made and the order of modification issued.

(c) If the licensee against whom the order to show cause is directed does not appear at the time and place provided in said order, a final order of modification shall issue forthwith.

CALL SIGNS

§ 12.81 *Assignment of call sign.* (a) The call signs of amateur stations will be assigned systematically by the Commission with the following exceptions:

(1) A specific unassigned call sign may be reassigned to the most recent holder thereof;

(2) A specific unassigned call sign may be assigned to a previous holder if not under license during the past 5 years;

(3) A specific unassigned call sign may be assigned to an amateur organization in memoriam to a deceased member and former holder thereof;

(4) A specific call sign may be temporarily assigned to a station connected with an event, or events, of general public interest;

(5) An unassigned "two-letter call sign" (a call sign having two letters following the numeral) may be assigned to a previous holder of a two-letter call sign the prefix of which consisted of not more than a single letter.

(b) An amateur call sign will consist of a sequence of one or two letters, a numeral designating the call sign area, and two or three letters. The call sign areas are as follows:

No.
1. Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut.
2. New York, New Jersey.
3. Pennsylvania, Delaware, Maryland, District of Columbia.
4. Virginia, North and South Carolina, Georgia, Florida, Alabama, Tennessee, Kentucky, Puerto Rico and Virgin Islands.
5. Mississippi, Louisiana, Arkansas, Oklahoma, Texas, New Mexico.
6. California, Hawaii and Pacific possessions except those included in area 7.
7. Oregon, Washington, Idaho, Montana, Wyoming, Arizona, Nevada, Utah, Alaska and adjacent islands.
8. Michigan, Ohio, West Virginia.
9. Wisconsin, Illinois, Indiana.
0. Colorado, Nebraska, North and South Dakota, Kansas, Minnesota, Iowa, Missouri.

§ 12.82 *Transmission of call signs.* (a) (1) The operator of an amateur station shall transmit the call sign of the station or stations (or may transmit the generally accepted identification of the network) being called or communicated with, or shall identify appropriately any other purpose of a transmission, followed by the authorized call sign of the station transmitting:

(i) At the beginning and end of each single transmission or;

(ii) At the beginning and end of a series of transmissions between stations having established communication, each transmission of which is of less than three minutes duration (the identification at the end of such a series may be omitted when the duration of the entire series is less than three minutes), and;

(iii) At least once every ten minutes or as soon thereafter as possible during a series of transmissions between stations having established communication, and;

(iv) At least once every ten minutes during any single transmission of more than ten minutes duration.

(2) The required identification shall be transmitted on the frequency or frequencies being employed at the time and, in accordance with the type of emission authorized thereon, shall be by either telegraphy using the International Morse Code, or telephony. In addition to the foregoing, when a method of communication other than telephony or telegraphy using the International Morse Code is being used or attempted, the prescribed identification shall also be transmitted by that method.

(b) In addition to complying with the requirements of paragraph (a) of this section, an operator of an amateur station operated as a portable or mobile station using radiotelegraphy shall transmit immediately after the call sign of such station, the fraction-bar character ($\overline{DN}$) followed by the number of the amateur call sign area in which the portable or mobile amateur station is then being operated, as for example:

*Example 1.* Portable or mobile amateur station operating in the third amateur call sign area calls a fixed amateur station: W1ABC W1ABC W1ABC DE W2DEF $\overline{DN}$ 3 W2DEF $\overline{DN}$ 3 W2DEF $\overline{DN}$ 3 $\overline{AR}$.

*Example 2.* Fixed amateur station answers the portable or mobile amateur station: W2DEF W2DEF W2DEF DE W1ABC K.

*Example 3.* Portable or mobile amateur station calls a portable or mobile amateur station: W3GHI W3GHI W3GHI DE W4JKL $\overline{DN}$ 4 W4JKL $\overline{DN}$ 4 W4JKL $\overline{DN}$ 4 $\overline{AR}$.

When telephony is used, the call sign of the station shall be preceded by the words "this is" or the word "from" instead of the letters "de," followed by an announcement of the geographical location in which the portable or mobile station is being operated.

*Example 4.* Portable or mobile amateur radiotelephone station operating in the third call area calls a fixed amateur station: W1ABC W1ABC W1ABC "this is" or the word "from" W2DEF W2DEF W2DEF operating portable (or mobile) 3 miles north of Bethesda, Md., over.

(c) When telephony is used, the transmission of call signs prescribed by paragraphs (a) and (b) of this section may be made by the person transmitting by voice in lieu of a duly licensed operator provided the licensed operator maintains the control required by § 12.28.

(d) When using telephony, phonetic aids to identify the call sign of the station may be employed.

(e) In addition to complying with the requirements of paragraph (a) of this section, an operator of an amateur station operated as a mobile station aboard a vessel on the high seas, or aboard an aircraft en route on an international flight, shall, when the vessel or aircraft is outside the 10 call sign areas prescribed by the Commission in § 12.81 (b), comply with the following calling procedure:

(1) Mobile operations aboard a vessel.

(i) When using telegraphy the amateur operator shall transmit immediately after the call sign of the station the fraction bar $\overline{DN}$ followed by the designator MM to indicate that the station is being operated as a mobile station aboard a vessel. In addition, the name of the vessel and its approximate geographical location shall be transmitted at the end of each transmission immediately prior to signing off. If the vessel does not have a name, the number of the vessel shall be transmitted in lieu of the name of the vessel.

(ii) When using telephony the call sign of the station shall be preceded by the words "this is", or the word "from" followed by the words "maritime mobile" to indicate that the station is being operated as a mobile station aboard a vessel. In addition the name of the vessel, and its approximate geographical location shall be transmitted at the end of each transmission immediately prior to signing off. If the vessel does not have a name, the number of the vessel shall be transmitted in lieu of the name of the vessel.

(2) Mobile operations aboard aircraft.

(i) When using telegraphy the amateur operator shall transmit immediately after the call sign of the station the fraction bar $\overline{DN}$ followed by the designator AM to indicate that the station is being operated as a mobile station aboard an aircraft. In addition, the number of the aircraft and its approximate geographical location shall be transmitted at the end of each transmission immediately prior to signing off.

(ii) When using telephony the call sign of the station shall be preceded by the words "this is", or the word "from" followed by the words "aeronautical mobile", to indicate that the station is being operated as a mobile station aboard an aircraft. In addition, the number of the aircraft and its approximate geographical location shall be transmitted at the end of each transmission immediately prior to signing off.

PORTABLE AND MOBILE STATIONS

§ 12.91 *Requirements for portable and mobile operation.* (a) Within the continental limits of the United States, its territories, or possessions, an amateur station may be operated as either a portable or a mobile station on any frequency authorized and available for the amateur radio service. Whenever portable operation is, or is likely to be, for an over-all period in excess of 48 hours away from the fixed transmitter location designated in the station license, the licensee shall give prior written notice to the Engineer in Charge of the radio inspection district in which such portable operation is intended. This notice is required even though the station is, or is likely to be, operated during any part of this over-all period at the fixed transmitter location. Whenever mobile operation is, or is likely to be, for a period in excess of 48 hours without return to the fixed transmitter location designated in the station license, the licensee shall give prior written notice to the Engineer in Charge of the radio inspection district in which such mobile operation is intended. The notice required for either portable or mobile operation shall state the station call sign, the name of the licensee, the date or dates of proposed operation and the contemplated portable station locations, or mobile station itinerary, as specifically as possible. Additional advanced written notice shall also be given, in accordance with the foregoing, whenever such operation away from the fixed station location designated in the station license exceeds one month, and for each additional month of such operation.

(b) Outside the continental limits of the United States, its territories or possessions, an amateur station may be operated as portable or mobile only in the amateur band 28.0 to 29.7 Mc except that within areas under the jurisdiction of a foreign government, operation is controlled by the laws of that government and the terms of any applicable treaty. (See Appendix 4 for such treaties or agreements as are in force and the pertinent terms thereof.) Whenever such portable or mobile operation is, or is likely to be, for a period in excess of 48 hours away from the continental limits of the United States, its territories, or possessions, the licensee shall give prior written notice to the Engineer in Charge of the radio inspection district in which the fixed transmitter site designated in the station license is located. Only one such notice shall be required during any continued absence from the continental limits of the United States, its territories, or possessions.

§ 12.93 *Special provisions for nonportable stations.* The specific provisions of these rules relative to portable stations are not applicable to a nonportable station except that—

(a) An amateur station that has been moved from one permanent location to another permanent location may be operated at the latter location, in accordance with the provisions governing portable stations (including notice to the Engineer in Charge of the district in which the station is located) for a period not exceeding four consecutive months, but in no event beyond the expiration date of the license, provided a formal application for modification of license to change the permanent location has been filed with the Commission.

(b) The licensee of an amateur station who changes residence temporarily, but retains a permanent residence associated with the fixed station location designated in the station license, and moves his amateur station to a temporary location associated with his temporary residence, or the licensee-trustee for an amateur radio society which changes the normal location of its amateur station to a different and temporary location, may use the station at such temporary location under the following conditions:

(1) Advance notice in writing shall be given by the amateur station licensee or licensee-trustee to the Commission in Washington, D. C., and, for each month of such operation, to the Engineer in Charge of the radio inspection district in which the station is to be temporarily operated.

(2) Similar notice shall be given for each change in such temporary location, for the return of the station to the former permanent location, or for the establishment of a new permanent location; *Provided*, That additional monthly notices to the Engineer in Charge shall not be required when such operation takes place at the fixed station location designated in the station license held by the licensee.

(3) The notice of operation at a temporary location, as required under the preceding provisions of this paragraph, shall clearly identify the station call-sign and licensee or licensee-trustee, shall indicate both the permanent and the temporary station locations, shall indicate the address at which the licensee or licensee-trustee can be readily reached during such temporary operation, and shall show the reason why operation at that location is considered temporary rather than a change of permanent location.

(c) When the station is operated under the provisions of this section the calling procedure specified in § 12.82 shall be used, including transmissions of the fractional bar character when telegraphy is used followed by the number of the amateur call sign area in which the station is being operated. When telephony is used, an announcement shall be made of the geographical location in which the station is being operated.

§ 12.94 *Special provisions for mobile stations aboard ships or aircraft.* In addition to complying with all other applicable rules, an amateur mobile station operated on board a ship or aircraft must comply with all of the following special conditions: (a) The installation and operation of the amateur mobile station shall be approved by the master of the ship or captain of the aircraft; (b) The amateur mobile station shall be separate from and independent of all other radio equipment, if any, installed on board the same ship or aircraft; (c) The electrical installation of the amateur mobile station shall be in accord with the rules applicable to ships or aircraft as promulgated by the appropriate government agency; (d) The operation of the amateur mobile station shall not interfere with the efficient operation of any other radio equipment installed on board the same ship or aircraft; and (e) The amateur mobile station and its associated equipment, either in itself or in its method of operation, shall not constitute a hazard to the safety of life or property.

USE OF AMATEUR STATIONS

§ 12.101 *Points of communication.* An amateur station may be used to communicate only with other amateur stations, except that in emergencies or for test purposes it may also be used temporarily for communication with other classes of stations licensed by the Commission, and with United States Government stations. Amateur stations may also be used to communicate with any radio station other than amateur which is authorized by the Commission to communicate with amateur stations. Amateur stations may be used also for transmitting signals, or communications, or energy, to receiving apparatus for the measurement of emissions, temporary observation of transmission phenomena, radio control of remote objects, and for similar experimental purposes and for the purposes set forth in § 12.106.

§ 12.102 *No remuneration for use of station.* An amateur station shall not be used to transmit or receive messages for hire, nor for communication for material compensation, direct or indirect, paid or promised.

§ 12.103 *Broadcasting prohibited.* Subject to the provisions of § 12.106, an amateur station shall not be used to engage in any form of broadcasting, that is, the dissemination of radio communications intended to be received by the public directly or by the intermediary of relay stations, nor for the retransmission by automatic means of programs or signals emanating from any class of station other than amateur. The foregoing provision shall not be construed to prohibit amateur operators from giving their consent to the rebroadcast by broadcast stations of the transmissions of their amateur stations, provided, that the transmissions of the amateur stations shall not contain any direct or indirect reference to the rebroadcast.

§ 12.104 *Radio telephone tests.* The transmission of music by an amateur station is forbidden. However, single audio-frequency tones may be transmitted for test purposes of short duration for the development and perfection of amateur radio telephone equipment.

§ 12.105 *Codes and ciphers prohibited.* The transmission by radio of messages in codes or ciphers in domestic and international communications to or between amateur stations is prohibited. All communications regardless of type of emission employed shall be in plain language except that generally recognized abbreviations established by regulation or custom and usage are permissible as are any other abbreviations or signals where the intent is not to obscure the meaning but only to facilitate communications.

§ 12.106 *One-way communications.* In addition to the experimental one-way transmissions permitted by § 12.101, the following kinds of one-way communications, addressed to amateur stations, are authorized and will not be construed as broadcasting: (a) Emergency communications, including bona-fide emergency drill practice transmissions; (b) Information bulletins consisting solely of subject matter having direct interest to the amateur radio service as such; (c) Round-table discussions or net-type operations where more than two amateur stations are in communication, each station taking a turn at transmitting to other station(s) of the group; and (d) Code practice transmissions intended for persons learning or improving proficiency in the International Morse Code.

§ 12.107 *Special provisions regarding radio teleprinter transmissions.* The following special conditions shall be observed during the transmission of radio teleprinter signals on authorized frequencies by amateur stations:

(a) A single channel five-unit (start-stop) teleprinter code shall be used which shall correspond to the International Telegraphic Alphabet No. 2 with respect to all letters and numerals (including the slant sign or fraction bar) but special signals may be employed for the remote control of receiving printers, or for other purposes, in "figures" positions not utilized for numerals. In general, this code shall conform as nearly as possible to the teleprinter code or codes in common commercial usage in the United States.

(b) The nominal transmitting speed of the radio teleprinter signal keying equipment shall be adjusted as nearly as possible to the standard speed of 60 words per minute and, in any event, within the range 55 to 65 words per minute.

(c) When frequency-shift keying (type F-1 emission) is utilized, the deviation in frequency from the mark signal to the space signal, or from the space signal to the mark signal, shall be adjusted as nearly as possible to 850 cycles and, in any event, within the range 800 to 900 cycles per second.

(d) When audio-frequency-shift keying (type A-2 or type F-2 emission) is utilized, the highest fundamental modulating audio frequency shall not exceed 3000 cycles per second, and the difference between the modulating audio frequency for the mark signal and that for the space signal shall be adjusted as nearly as possible to 850 cycles and, in any event, within the range 800 to 900 cycles per second.

ALLOCATION OF FREQUENCIES

§ 12.111 *Frequencies and types of emission for use of amateur stations.* Subject to the limitations and restrictions set forth in this section and in § 12.114, the following frequency bands and types of emissions are allocated and available for amateur station operation:

(a) 1800 to 2000 kc. Use of this band is on a shared basis with the Loran system of radionavigation. The amateur service may use, in any area, whichever bands, 1800–1825, 1875–1900, 1900–1925 or 1975–2000 kc, are not required for Loran in that area, in accordance with the following conditions:

(1) The use of these frequencies by the amateur service shall not be a bar to the expansion of the radionavigation (Loran) service.

(2) The use of these frequencies by stations in the amateur service shall not cause harmful interference to the Loran system of radionavigation. If an amateur station causes such interference, the station licensee shall, as directed by the Commission, immediately cease operation on the frequencies involved.

(3) Only type A1 or A3 emission shall be employed.

(4) Amateur operation shall be limited to the following areas, to the indicated frequency bands within each such area, and to the indicated maximum plate power input to the tube or tubes supplying energy to the antenna during day and night hours, respectively, on such frequencies:

| Area | Authorized bands, kc | DC plate input power in watts | |
|---|---|---|---|
| | | Day | Night |
| Minnesota, Iowa, Missouri, Arkansas, Louisiana and States to the east of these States, including District of Columbia | 1800–1825, 1875–1900 | 500 | 200 |
| North Dakota, South Dakota, Nebraska, Colorado, New Mexico, and States to the west of these States except the State of Washington | 1900–1925, 1975–2000 | 500 | 200 |
| State of Washington | 1900–1925, 1975–2000 | 200 | 50 |
| Texas, Oklahoma, and Kansas | 1800–1825, 1875–1900 | 200 | 75 |
| Hawaiian Islands | 1800–1925, 1975–2000 | 500 | 200 |
| Puerto Rico and Virgin Islands | 1800–1825, 1875–1900 | 500 | 200 |
| Alaska, Guam, and other Territories and Possessions of the United States not listed above. | None | No operation. | No operation. |

(5) The provisions of this subparagraph shall be considered as temporary in the sense that they shall remain subject to cancellation or to revision, in whole or in part, by order of the Commission without hearing whenever the Commission shall deem such cancellation or revision to be necessary or desirable in the light of the priority within this band of the Loran system of radionavigation.

(b) 3500 to 4000 kc, using type A-1 emission and, on frequencies 3500 to 3800 kc, using type F-1 emission and, on frequencies 3800 to 4000 kc, using type A3 emission and narrow band frequency or phase modulation for radiotelephony; to those stations located within the continental limits of the United States, the Territories of Alaska and Hawaii, Puerto Rico, the Virgin Islands, and all United States possessions lying west of the Territory of Hawaii to 170° west longitude.

(c) 7000 to 7300 kc, using type A-1 emission and, on frequencies 7000 to 7200 kc, using type F-1 emission and, on frequencies 7200 to 7300 kc, using type A-3 emission or narrow band frequency or phase modulation for radiotelephony.

(d) 14,000 to 14,350 kc, using type A-1 emission, 14,000 to 14,200 kc and 14,300 to 14,350 kc using type F-1 emission and on frequencies 14,200 to 14,300 kc, type A-3 emission or narrow band frequency or phase modulation for radiotelephony.

(e) 21.00 to 21.45 Mc, using type A-1 emission; 21.00 to 21.25 Mc, using type F-1 emission; 21.25 to 21.45 Mc, using type A-3 emission and narrow band frequency or phase modulation for telephony.

(f) 26.960 to 27.230 Mc using A0, A1, A2, A3, and A4 emission and also special emission for frequency modulation (radiotelephone transmissions and radiotelegraph transmissions employing carrier shift or other frequency modulation techniques), subject to such interference as may result from the emissions of industrial, scientific and medical devices within 160 kc of the frequency 27.120 Mc.

(g) 28.0 to 29.7 Mc, using type A1 emission and, on frequencies 28.5 to 29.7 Mc using type A3 emission and narrow band frequency or phase modulation for radiotelephony and, on frequencies 29.0 to 29.7, using special emission for frequency modulation (radiotelephone transmissions and radiotelegraph transmissions employing carrier shift or other frequency modulation techniques).

(h) 50.0 to 54.0 Mc, using types A1, A2, A3, and A4 emission and narrow band frequency or phase modulation for radiotelephony and on frequencies 52.5 to 54.0 Mc, special emission for frequency modulation (radiotelephone transmissions and radiotelegraph transmissions employing carrier shift or other frequency modulation techniques).

(i) 144 to 148 Mc, using types A0, A1, A2, A3, and A4 emission and special emission for frequency modulation (radiotelephone transmissions and radiotelegraph transmissions employing carrier

shift or other frequency modulation techniques).

(j) 220 to 225 Mc[1] using types A0, A1, A2, A3 and A4 emission and special emission for frequency modulation (radiotelephone transmissions and radiotelegraph transmissions employing carrier shift or other frequency modulated techniques).

(k) 420 to 450 Mc, using types A0, A1, A2, A3, A4, and A5 emissions and special emission for frequency modulation (radiotelephone transmissions and radiotelegraph transmissions employing carrier shift or other frequency modulation techniques). Peak antenna power shall not exceed 50 watts in order to minimize interference to aircraft altimeters temporarily allocated to this band.

(l) 1215 to 1300 Mc, using types A0, A1, A2, A3, A4, and A5 emission and special emission for frequency modulation (radiotelephone transmissions and radiotelegraph transmissions employing carrier shift or other frequency modulation techniques).

(m) 2300 to 2450 Mc, 3300 to 3500 Mc, 5650 to 5925 Mc, 10,000 to 10,500 Mc, 21,000 to 22,000 Mc, and any frequency or frequencies above 30,000 Mc, using on these frequencies types A0, A1, A2, A3, A4, A5 emission and special emission for frequency modulation (radiotelephone transmissions and radiotelegraph transmissions employing carrier shift or other frequency modulation techniques), and pulse emission. Operations in the frequency bands 2300 to 2450 Mc and 5650 to 5925 Mc are subject to such interference between 2400 and 2450 Mc and between 5775 and 5925 Mc, respectively, as may result from emissions of industrial, scientific and medical devices on the frequencies 2450 and 5850 Mc, respectively.

§ 12.113 *Individual frequency not specified.* Transmissions by an amateur station may be on any frequency within any authorized amateur band. Sideband frequencies resulting from keying or modulating a carrier wave shall be confined within the authorized amateur band.

[1] In those portions of the States of Texas and New Mexico in the area bounded on the south by parallel 31°53′ N., on the east by longitude 105°40′ W., on the north by parallel 33°24′ N., and on the west by longitude 106°40′ W., the frequency band 220–225 Mc. is not available for use by amateur stations engaged in normal amateur operation between the hours of 0500 and 1800 local time Monday through Friday inclusive of each week. However, the entire frequency band 220–225 Mc. shall be applicable in all areas to those amateur stations authorized to operate in an organized civil defense network during all periods when civil defense emergencies exist and, in addition, special arrangements for civil defense drills between the hours and within the area set forth above may be made upon mutual agreement between the Federal Communications Commission Engineer in Charge at Dallas, Texas, and the Area Frequency Coordinator at White Sands, New Mexico, if it appears necessary to conduct such drills. Such arrangements shall specify dates and times, and will depend upon the degree of use of the frequency band at White Sands at any particular time.

§ 12.114 *Types of emission.* (a) Type A0 emission, where not specifically designated in the bands listed in § 12.111, may be used for short periods of time when required for authorized remote control purposes or for experimental purposes. However, these limitations do not apply where type A0 emission is specifically designated.

(b) [Deleted]

(c) The use of narrow band frequency or phase modulation is subject to the conditions that the band-width of the modulated carrier shall not exceed the band-width occupied by an amplitude-modulated carrier of the same audio characteristics, and that the purity and stability of such emissions shall be maintained in accordance with the requirements of § 12.133.

EQUIPMENT AND OPERATION

§ 12.131 *Maximum authorized power.* Except on frequencies within the band 420 to 450 megacycles (where peak antenna power shall not exceed 50 watts), each amateur transmitter may be operated with a power input not exceeding 1 kilowatt to the plate circuit of the final amplifier stage of an amplifier-oscillator transmitter or to the plate circuit of an oscillator transmitter. An amateur transmitter operating with a power input exceeding 900 watts to the plate circuit shall provide means for accurately measuring the plate power input to the vacuum tube or tubes supplying power to the antenna.

§ 12.132 *Power supply to transmitter.* The license of an amateur station using frequencies below 144 megacycles shall use adequately filtered direct-current plate power supply for the transmitting equipment to minimize modulation from this source.

§ 12.133 *Purity and stability of emissions.* Spurious radiation from an amateur station being operated with a carrier frequency below 144 megacycles shall be reduced or eliminated in accordance with good engineering practice. This spurious radiation shall not be of sufficient intensity to cause interference in receiving equipment of good engineering design including adequate selectivity characteristics, which is tuned to a frequency or frequencies outside the frequency band of emission normally required for the type of emission being employed by the amateur station. In the case of A–3 emission, the amateur transmitter shall not be modulated to the extent that interfering spurious radiation occurs, and in no case shall the emitted carrier wave be amplitude-modulated in excess of 100 percent. Means shall be employed to insure that the transmitter is not modulated in excess of its modulation capability for proper technical operation. For the purposes of this section a spurious radiation is any radiation from a transmitter which is outside the frequency band of emission normal for the type of transmission employed, including any component whose frequency is an integral multiple or submultiple of the carrier frequency (harmonics and subharmonics), spurious modulation products, key clicks, and other transient effects, and parasitic oscillations. When using amplitude modulation on frequencies below 144 megacycles, simultaneous frequency modulation is not permitted and when using frequency modulation on frequencies below 144 megacycles simultaneous amplitude modulation is not permitted. The frequency of the emitted carrier wave shall be as constant as the state of the art permits.

§ 12.134 *Modulation of carrier wave.* Except for brief tests or adjustments and except for operation in the band 26.960 to 27.230 megacycles, an amateur radiotelephone station shall not emit a carrier wave on frequencies below 144 megacycles unless modulated for the purpose of communication.

§ 12.135 *Frequency measurement and regular check.* The licensee of an amateur station shall provide for measurement of the emitted carrier frequency or frequencies and shall establish procedure for making such measurement regularly. The measurement of the emitted carrier frequency or frequencies shall be made by means independent of the means used to control the radio frequency or frequencies generated by the transmitting apparatus and shall be of sufficient accuracy to assure operation within the amateur frequency band used.

§ 12.136 *Logs.* Each licensee of an amateur station shall keep an accurate log of station operation, which shall include the following:

(a) The date and time of each transmission. (The date need only be entered once for each day's operation. The expression "time of each transmission" means the time of making a call and need not be repeated during the sequence of communication which immediately follows; however, an entry shall be made in the log when signing off so as to show the period during which communication was carried on.)

(b) The signature of each licensed operator who manipulates the key of a radiotelegraph transmitter or the signature of each licensed operator who operates a transmitter of any other type and the name of any person not holding an amateur operator license who transmits by voice over a radiotelephone transmitter. The signature of the operator need only be entered once in the log, in those cases when all transmissions are made by or under the supervision of the signatory operator, provided a statement to that effect also is entered. The signature of any other operator who operated the station shall be entered in the proper space for that operator's transmission.

(c) Call sign of the station called. (This entry need not be repeated for calls made to the same station during any sequence of communication, provided the time of signing off is given.)

(d) The input power to the oscillator, or to the final amplifier stage where an oscillator-amplifier transmitter is employed. (This need be entered only once, provided the input power is not changed.)

(e) The frequency band used. (This information need be entered only once in the log for all transmissions until there is a change in frequency to another amateur band.)

(f) The type of emission used. (This need be entered only once until there is a change in the type of emission.)

(g) The location of the station (or the approximate geographical location of a mobile station) at the time of each transmission. (This need be entered only once provided the location of the station is not changed. However, suitable entry shall be made in the log upon changing the location. Where operating at other than a fixed location, the type and identity of the vehicle or other mobile unit in which the station is operated shall be shown.)

(h) The message traffic handled. (If record communications are handled in regular message form, a copy of each message sent and received shall be entered in the log or retained on file at the station for at least 1 year.)

§ 12.137 *Retention of logs.* The log shall be preserved for a period of at least 1 year following the last date of entry. The copies of record communications and station log required by § 12.136 shall be available for inspection by authorized representatives of the Commission.

SPECIAL CONDITIONS

§ 12.151 *Additional conditions to be observed by licensee.* In all respects not specifically covered by these regulations each amateur station shall be operated in accordance with good engineering and good amateur practice.

§ 12.152 *Restricted operation.* (a) If the operation of an amateur station causes general interference to the reception of transmissions from stations operating in the domestic broadcast service when receivers of good engineering design including adequate selectivity characteristics are used to receive such transmissions and this fact is made known to the amateur station licensee, the amateur station shall not be operated during the hours from 8 p. m. to 10:30 p. m., local time, and on Sunday for the additional period from 10:30 a. m. until 1 p. m., local time, upon the frequency or frequencies used when the interference is created.

(b) In general, such steps as may be necessary to minimize interference to stations operating in other services may be required after investigation by the Commission.

§ 12.153 *Second notice of same violation.* In every case where an amateur station licensee is cited within a period of 12 consecutive months for the second violation of the provisions of §§ 12.111, 12.113, 12.114, 12.132, or 12.133, the station licensee, if directed to do so by the Commission, shall not operate the station and shall not permit it to be operated from 6 p. m. to 10:30 p. m., local time, until written notice has been received authorizing the resumption of full-time operation. This notice will not be issued until the licensee has reported on the results of tests which he has conducted with at least two other amateur stations at hours other than 6 p. m. to 10:30 p. m., local time. Such tests are to be made for the specific purposes of aiding the licensee in determining whether the emissions of the station are in accordance with the Commission's rules. The licensee shall report to the Commission the observations made by the cooperating amateur licensees in relation to the reported violations. This report shall include a statement as to the corrective measures taken to insure compliance with the rules.

§ 12.154 *Third notice of same violation.* In every case where an amateur station licensee is cited within a period of 12 consecutive months for the third violation of §§ 12.111, 12.113, 12.114, 12.132 or 12.133, the station licensee if directed by the Commission, shall not operate the station and shall not permit it to be operated from 8 a. m. to 12 midnight, local time, except for the purposes of transmitting a prearranged test to be observed by a monitoring station of the Commission to be designated in each particular case. The station shall not be permitted to resume operation during these hours until the licensee is authorized by the Commission, following the test, to resume full-time operation. The results of the test and the licensee's record shall be considered in determining the advisability of suspending the operator license or revoking the station license, or both.

§ 12.155 *Answers to notices of violations.* Any licensee receiving official notice of a violation of the terms of the Communications Act of 1934, as amended, any legislative act, Executive order, treaty to which the United States is a party, or the rules and regulations of the Federal Communications Commission, shall, within 3 days from such receipt, send a written answer direct to the office of the Commission originating the official notice: *Provided, however,* That if an answer cannot be sent or an acknowledgment made within such 3-day period by reason of illness or other unavoidable circumstances, acknowledgment and answer shall be made at the earliest practicable date with a satisfactory explanation of the delay. The answer to each notice shall be complete in itself and shall not be abbreviated by reference to other communications or answers to other notices. If the notice relates to some violation that may be due to the physical or electrical characteristics of transmitting apparatus, the answer shall state fully what steps, if any, are taken to prevent future violations, and if any new apparatus is to be installed, the date such apparatus was ordered, the name of the manufacturer, and promised date of delivery. If the notice of violation relates to some lack of attention or improper operation of the transmitter, the name of the operator in charge shall be given.

§ 12.156 *Operation in emergencies.* In the event of an emergency disrupting normally available communication facilities in any widespread area or areas, the Commission, in its discretion, may declare that a general state of communications emergency exists, designate the area or areas concerned, and specify the amateur frequency bands, or segments of such bands, for use only by amateurs participating in emergency communication within or with such affected area or areas. Amateurs desiring to request the declaration of such a state of emergency should communicate with the Commission's Regional Manager of the area concerned. Whenever such declaration has been made, operation of and with amateur stations in the area concerned shall be only in accordance with the requirements hereinafter set forth, but such requirements shall in nowise affect other normal amateur communication in the affected area when conducted on frequencies not designated for emergency operation.

(a) All transmissions within all designated amateur emergency communication bands other than communications relating directly to relief work, emergency service, or the establishment and maintenance of efficient amateur radio networks for the handling of such communications, shall be suspended. Incidental calling, answering, testing or working (including casual conversation, remarks or messages) not pertinent to constructive handling of the emergency situation shall be prohibited within these bands.

(b) The Commission may designate certain amateur stations to assist in the promulgation of information relating to the declaration of a general state of communications emergency, to monitor the designated amateur emergency communications bands, and to warn noncomplying stations observed, to be operating in those bands. Such station, when so designated, may transmit for that purpose on any frequency or frequencies authorized to be used by that station, provided such transmissions do not interfere with essential emergency communications in progress; however, such transmissions shall preferably be made on authorized frequencies immediately adjacent to those segments of the amateur bands being cleared for the emergency. Individual transmissions for the purpose of advising other stations of the existence of the communications emergency shall refer to this section by number (§ 12.156) and shall specify, briefly and concisely, the date of the Commission's declaration, the area and nature of the emergency, and the amateur frequency bands or segments of such bands which constitute the amateur emergency communications bands at the time. The designated stations shall not enter into discussions with other stations beyond furnishing essential facts relative to the emergency, or acting as advisors to stations desiring to assist in the emergency, and the operators of such designated stations shall report fully to the Commission the identity of any stations failing to comply, after notice, with any of the pertinent provisions of this section.

(c) The special conditions imposed under the provisions of this section shall cease to apply only after the Commission, or its authorized representative, shall have declared such general state of communications emergency to be terminated; however, nothing in this paragraph shall be deemed to prevent the Commission from modifying the

terms of its declaration from time to time as may be necessary during the period of a communications emergency, or from removing those conditions with respect to any amateur frequency band or segment of such band which no longer appears essential to the conduct of the emergency communications.

§ 12.157 *Obscenity, indecency, profanity.* No licensed radio operator or other person shall transmit communications containing obscene, indecent, or profane words, language, or meaning.

§ 12.158 *False signals.* No licensed radio operator shall transmit false or deceptive signals or communications by radio, or any call letter or signal which has not been assigned by proper authority to the radio station he is operating.

§ 12.159 *Unidentified communications.* No licensed radio operator shall transmit unidentified radio communications or signals.

§ 12.160 *Interference.* No licensed radio operator shall willfully or maliciously interfere with or cause interference to any radio communication or signal.

§ 12.161 *Damage to apparatus.* No licensed radio operator shall willfully damage, or cause or permit to be damaged, any radio apparatus or installation in any licensed radio station.

§ 12.162 *Fraudulent licenses.* No licensed radio operator or other person shall obtain or attempt to obtain, or assist another to obtain or attempt to obtain, an operator license by fraudulent means.

## SUBPART B—RADIO AMATEUR CIVIL EMERGENCY SERVICE

### GENERAL

§ 12.200 *Temporary nature of this service.* (a) The Radio Amateur Civil Emergency Service provides a temporary phase of amateur operation for Civil Defense communications purposes only, and the rules are limited in their force and effect to the period of the present national emergency, including any emergency which may necessitate invoking of the President's War Emergency Powers under the provisions of section 606 of the Communications Act of 1934, as amended.

(b) Pursuant to the provisions of section 4 (j) of the Communications Act of 1934, as amended, records relating to the Radio Amateur Civil Emergency Service shall not be open to general public inspection.

§ 12.201 *Definitions.* For the purposes of this subpart, the following definitions are applicable:

(a) *Radio Amateur Civil Emergency Service.* A temporary radio-communication service carried on by licensed amateur radio stations while operating on specifically designated segments of the regularly allocated amateur frequency bands under the direction of authorized local, regional, or federal civil defense officials pursuant to an approved civil defense communications plan.

(b) *Radio Amateur Civil Emergency Station.* An amateur radio station which is authorized to operate in the Radio Amateur Civil Emergency Service for the purpose of transmitting and receiving civil defense communications.

(c) *Civil defense communications.* Communications or signals essential to the conduct of civil defense activities of duly authorized civil defense organizations, including communications directly concerning safety of life, preservation of property, maintenance of law and order, alleviation of human suffering and need and dissemination of warnings of enemy attack to the civilian population in case of actual or impending armed attack or in any disaster or other incident endangering the public welfare. Such communications may also include transmissions necessary to establishment and maintenance of the radio system and communications essential to the training of civil defense personnel.

(d) *Civil defense authority.* The legally appointed Director of Civil Defense, or his authorized alternate or representative, for the particular geographical area (city, county, etc.) which a proposed radio station is intended to serve, and who is responsible to local governmental authority for protection and aid to the civilian population in the event of armed attack or of any disaster or other incident endangering public safety.

(e) *Civil Defense Communications Officer.* The official of any duly constituted civil defense organization having direct responsibility under the Director of that organization for the provision, organization, maintenance, readiness, and utilization of all means of communication to be used by such civil defense organization in the performance of its lawful functions.

(f) *Civil Defense Radio Officer.* The duly designated official of a legally constituted civil defense organization who is directly responsible either to the Communications Officer or to the Director of such civil defense organization for the provision, organization, maintenance, readiness, and utilization of radio communications facilities for civil defense use.

(g) *Radio Amateur Civil Emergency Network.* All radio amateur civil emergency stations intended to be included in the civil defense communications plan of the area concerned and which operate, or are to operate, in conjunction with a single control station. Such network may be made up of several separately authorized radio amateur civil emergency stations or units of such stations, or may be made up of several units of the same station operated at different locations. In addition, the same radio amateur civil emergency station or any unit of such station may be a part of more than one network; e. g., the control station of one network may also be the control station or a member station of another network operated in conjunction therewith.

(h) *Control station.* The term "control station" or "net control station" means any authorized Radio Amateur Civil Emergency Station unit designated by the civil defense radio officer, with the approval of the Director of Civil Defense or the Civil Defense Communications Officer, to direct the use and operation of other station units of the same Radio Amateur Civil Emergency Network.

(i) *Civil defense communications plan.* A civil defense communications plan is the plan under which communications facilities are provided to all branches and phases of the civil defense organization in the area concerned and for all of its activities. Such plan may be drawn up in accordance with the needs of the particular area affected and the facilities, including licensed radio operators and stations, available in that particular area. Plans need not be uniform, but to be acceptable to the Commission they must comply with the following:

(1) The plan must be clearly described in writing, and it may include diagrams and sketches. It must include a general description of the facilities and personnel available to provide communications for civil defense purposes and the expected usage to be made thereof.

(2) The plan must have been approved by the state or territorial and federal civil defense authorities having jurisdiction of the area affected.

(3) The plan must include the name, address, official title, and a statement of the qualifications of the Civil Defense Radio Officer (and of any and all alternate Radio Officers) responsible for the organization, training, and utilization of the radio amateur civil emergency station networks under that plan, and the name, address, and official title of the civil defense official responsible for the coordination of all civil defense activities of the area concerned.

(4) The plan must include a general description of each radio amateur civil emergency station network under the jurisdiction of each respective Civil Defense Radio Officer, showing location of fixed installations, purpose, area of activity to be served, an estimate of the number of radio amateur stations and independent operating units of such stations intended to be used in the network, and a description, including the location and call sign, of its control station and any alternate control station or stations.

(5) The plan must include a general statement as to the frequency bands to be used by the radio amateur civil emergency station networks and the approximate number of stations, or units of such stations, to be operated in each such band, together with a description of the method which has been adopted for liaison and coordination of frequency usage with other similar networks in the same and adjacent areas.

(6) The plan must include a statement setting forth the facilities available to the area and the procedures to be followed in determining the loyalty and general reliability of all civil defense Radio Officers, amateur radio station licensees and radio operators intended to be utilized in the implementation of that plan. (See §§ 12.214 (b), 12.215 (c) and 12.241 (a) of this subpart.)

§ 12.202 *Applicability of rules governing amateur radio stations and operators.* In all cases not specifically covered by the regulations contained in this subpart, licensed amateur stations authorized to be operated in the Radio Amateur Civil Emergency Service shall be governed by the provisions of the rules governing amateur radio stations and operators (Subpart A of this part) which are not in conflict herewith. In any case of conflict, the rules governing the Radio Amateur Civil Emergency Service shall govern in respect to any station operated in that service.

### ORGANIZATION

§ 12.211 *Organization of networks.* To supplement or extend other means of communication available to the civil defense organization or to provide necessary communications for which no other means exist, local radio amateur civil emergency station networks shall be organized by the civil defense authority of the area concerned and under the immediate direction of the Civil Defense Radio Officer. Such networks shall include all licensed amateur radio stations which are intended to be included in the civil defense comunications plan of the area concerned. In any particular area there may be several such networks and each network may be independent of the others. Whenever there is more than one network in the same area, all such networks must share, under a single civil defense communications plan, the available frequencies in an efficient and orderly manner. The various networks in adjacent areas shall establish proper liaison and a description of the arrangements made shall become a part of their respective civil defense communications plans. Such arrangements shall provide for the efficient sharing of frequencies, plans for operating procedure designed to avoid mutual interference, and the exchange of communications facilities upon an inter-area basis where need for such exchange may arise.

§ 12.212 *Approval of civil defense communications plans.* (a) All civil defense communications plans which provide for the utilization of radio amateur civil emergency stations for civil defense purposes must be submitted to and approved by the responsible state (or territorial) and federal civil defense authorities before the licensed amateur stations intended to be used will be authorized to operate in the radio amateur civil emergency service.

(b) Material changes or modifications in such civil defense communications plans which alter the basic information required shall be submitted for approval in the same manner as the original plans.

(c) Written certification of approval by the competent state (or territorial) and federal civil defense authorities of each civil defense communications plan, or of any changes or modifications thereof, shall accompany the copies of such plans, changes, or modifications, which are submitted to the Commission in accordance with the provisions of this part.

§ 12.213 *Certification of Civil Defense Radio Officer.* (a) Certification of the Civil Defense Radio Officer shall be made on FCC Form 482. Such form shall be executed by the civil defense authority responsible for the coordination of all civil defense activities of the area concerned and show: (1) The name, address, and area of responsibility of such civil defense radio officer, (2) statement by him that he has accepted such appointment and agrees to perform faithfully the duties of that office, including those prescribed by this subpart, (3) a certification by the responsible civil defense authority that he has satisfied himself that the named civil defense radio officer is fully qualified in accordance with the provisions of § 12.214, and (4) the effective date of the appointment of the civil defense radio officer and the name of any previous civil defense radio officer whose appointment is terminated.

(b) FCC Form No. 482, when completed in accordance with this section, shall be forwarded to the Commission via the responsible state (or territorial) and federal civil defense officials whose approval (or disapproval) shall be clearly indicated on the form.

§ 12.214 *Qualifications of Civil Defense Radio Officer.* No person shall be considered qualified as a civil defense radio officer until he shall have been found to satisfy the following minimum requirements:

(a) He shall hold either (1) a valid commercial radio operator's license of either first or second class (radiotelegraph or radiotelephone) issued by the Commission, or (2) a valid amateur operator license issued by the Commission, other than the Technician or Novice Class.

(b) A determination shall have been made as to his loyalty to the United States and his general reliability, in accordance with the procedures provided in the approved civil defense communications plan of the area concerned.

(c) It shall have been determined that his technical and administrative qualifications are adequate for the proper performance of his duties.

§ 12.215 *Duties of Civil Defense Radio Officer.* The duties of the Civil Defense Radio Officer shall include among such other duties as may be assigned or as may be required in accordance with the provisions of this subpart.

(a) The direction and supervision of all radio stations forming the radio amateur civil emergency networks in accordance with the approved civil defense communications plan for the area involved.

(b) Provision for adequate monitoring of all transmissions of the stations under his supervision to assure compliance with the rules and regulations of the Commission, and to guard against improper use of the radio stations and intentional or inadvertent transmissions which might jeopardize the defense or security of the United States.

(c) The recommendation to the Commission for the granting of authorizations to individual amateurs for operation in this service, and certification to the Commission as to the loyalty to the United States and reliability of such individuals and the certification required in accordance with § 12.223.

(d) The recommendation to the Commission for cancellation of any authorization previously recommended or certified whenever subsequent investigation or circumstances indicate that the original recommendation or certification should not have been made.

### STATION AUTHORIZATIONS

§ 12.221 *Station authorization required.* No radio station may be operated in the Radio Amateur Civil Emergency Service except pursuant to an authorization for such operation issued by the Federal Communications Commission.

§ 12.222 *Eligibility for station authorization.* An authorization to operate a station in the Radio Amateur Civil Emergency Service will be issued only to a person who holds an amateur radio operator license, other than Technician or Novice Class, and an appropriate amateur radio station license.

§ 12.223 *Filing of application.* Each application for a station authorization shall be submitted on FCC Form 481–1, signed under oath or affirmation by the applicant and countersigned by the appropriate civil defense radio officer, who shall certify to the following:

(a) That the applicant has satisfied all requirements (both local and federal) for participation in the civil defense organization and is actually enrolled as a member of the local organization which serves the area where the station will operate.

(b) That the amateur station licensed in the name of the applicant has been approved for and, when authorized by the Commission, will actually constitute a unit of a civil defense communications network in accordance with an approved civil defense communications plan or amendment thereof.

§ 12.224 *Additional data required.* Each application for a station authorization in the Radio Amateur Civil Emergency Service shall be accompanied by the following data unless such material has already been submitted to the Commission, in which case the application shall clearly identify the material previously submitted:

(a) A copy of the approved communications plan (as defined in this part) for the civil defense communications network in which the station will operate, together with a copy of each approved amendment, change or modification of that plan.

(b) The official certification of the Civil Defense Radio Officer as provided in this subpart.

§ 12.225 *Single application for all equipment under one amateur station license.* Only one application need be filed for any one amateur station, including all transmitting equipment under the control of the licensee of that station, even though individual units of such station are capable of being operated and are intended to be operated independently at different locations, or as portable or mobile stations with no fixed locations. No distinction need be

made between those units which are personally owned by the amateur station licensee and those units which are otherwise under his technical control for operation in this service.

§ 12.226 *Issuance of station authorization.* An authorization to operate in this service, will be issued in the discretion of the Commission upon satisfactory completion of all requirements of this subpart and proper certification that the requirements of the civil defense organization for which the station will be used have been or are being complied with. The station authorization (Form 481-2) will be forwarded to the Civil Defense Radio Officer for delivery to the applicant. Such authorization will be accompanied by a stub (Form 481-3) which may be retained by the civil defense radio officer for his records.

§ 12.227 *Term of station authorization.* (a) Authorization to operate an amateur station in the Radio Amateur Civil Emergency Service will be issued for a term running concurrently with the term of the amateur radio station license. Application for renewal of such authorization shall be filed concurrently with application for renewal of the basic amateur radio station license.

(b) Whenever, under rules contained in Subpart A of this part, modification of the basic amateur station license becomes necessary, if such modification affects the information submitted with the original application for a license in this service, application for modification of the Radio Amateur Civil Emergency station license shall be submitted concurrently therewith.

(c) Nothing in this section shall be construed to alter or amend the temporary nature of a station authorization in the Radio Amateur Civil Emergency Service and the Commission's authority to cancel or amend it in accordance with the applicant's agreement as indicated on the initial application for station authorization.

§ 12.228 *Cancellation of station authorization.* (a) Each authorization for operation in the Radio Amateur Civil Emergency Service shall be issued with the express provision that such authorization is subject to revocation or cancellation without hearing whenever, in the opinion of the Commission, the security of the United States or the proper functioning of the Radio Amateur Civil Emergency Service would be served thereby, or termination of the national emergency makes it unnecessary to continue the operation of stations in this service.

(b) The station authorization shall be submitted to the Commission (via the Civil Defense Radio Officer) for cancellation under the following circumstances:

(1) The station for which the authorization was issued becomes inactive for a period of three months or it is not planned to use the station in the radio amateur civil emergency network for a period of at least three months.

(2) The basic amateur radio station license of the station has expired and has not been renewed.

(3) In cases where the amateur radio station license and the radio amateur civil emergency station authorization have both been modified, the original authorization of the latter shall be submitted to the Commission immediately upon receipt by the licensee of a new or modified authorization.

TECHNICAL REQUIREMENTS

§ 12.231 *Frequencies available.* (a) The following tabulation indicates the frequency bands, within the regularly allocated amateur frequency bands, which are available for use by stations in the Radio Amateur Civil Emergency Service. These frequency bands may be used, on a non-exclusive basis, by the classes of radio amateur civil emergency stations or units of such stations indicated, and only with the types of emission shown in the right-hand column.

(1) For use only by authorized stations or units of such stations which are operated under the direct supervision of duly designated and responsible officials of the civil defense organization:

| Frequency band: | *Authorized emission* |
|---|---|
| 1800–1825 kc [1] | 0 1A1, 6A3. |
| 1875–1900 kc [1] | 0 1A1, 6A3. |
| 1900–1925 kc [1] | 0 1A1, 6A3. |
| 1975–2000 kc [1] | 0 1A1, 6A3 |
| 3500–3510 kc | 0 1A1, 1 1F1. |
| 3900–4000 kc | 0 1A1, 1.1F1, 6A3, 6F3. |

[1] Use of frequencies in the band 1800–2000 kc is subject to the priority of the Loran system of radionavigation in this band and to the geographical, frequency, emission, and power limitations contained in § 12.111 of the rules governing amateur radio stations and operators (Subpart A of this part). The use of these frequencies by stations authorized to be operated in the Radio Amateur Civil Emergency Service shall not be a bar to expansion of the radionavigation (Loran) service, and such use shall be considered temporary in the sense that it shall remain subject to cancellation or to revision, in whole or in part, without hearing, whenever the Commission shall deem such cancellation or revision to be necessary or desirable in the light of the priority within this band of the Loran system of radionavigation.

(2) For use by all authorized stations:

| Frequency band: | *Authorized emission* |
|---|---|
| 28.55–28.75 Mc | 0 1A1, 6A3, 6A4, 6F3. |
| 29.45–29.65 Mc | 0 1A1, 1.1F1, 6A3, 6A4, 40F3. |
| 50.35–50.75 Mc | 0 1A1, 6A2, 6A3, 6A4, 6F3. |
| 53.35–53.75 Mc | 0 1A1, 1.1F1, 6A2, 6F2, 6A3, 6A4, 40F3 |
| 145.17–145.71 Mc | 0 1A1, 1 1F1, 6A2, 6F2, 6A3, 6A4 40F3 |
| 146.79–147.33 Mc | 0 1A1, 1 1F1, 6A2 6F2, 6A3 6A4, 40F3 |
| 220–225 Mc | 0 1A1, 1 1F1, 6A2 6F2, 6A3, 6A4, 40F3. |

(b) The selection and use of specific frequencies within the authorized frequency bands by stations in the Radio Amateur Civil Emergency Service shall be in accordance with a coordinated local area and adjacent area civil defense communications plan and applicable rules of this part.

(c) At such time as any or all of these frequency bands are withdrawn from availability to stations operating in the Amateur Radio Service, such bands shall be jointly available to stations in the Radio Amateur Civil Emergency Service and to stations in the military services for training and tactical operations. At that time, in areas where interference might occur, local mutual arrangements shall be made regarding times of operation such as to preclude or satisfactorily alleviate interference. In time of actual civil defense emergency, stations in the Radio Amateur Civil Emergency Service shall have absolute priority.

§ 12.232 *Classification of emissions.* (a) For the purposes of this subpart, the authorized emissions, as contained in the table of § 12.231, are defined as follows:

0 1A1—Continuous wave telegraphy.
1.1F1—Frequency shift telegraphy.
6A2—Telegraphy amplitude modulated at audio frequency.
6F2—Telegraphy frequency modulated at audio frequency.
6A3—Commercial quality amplitude modulated telephony.
6F3—Narrow band frequency or phase modulated telephony.
40F3—Wide band frequency or phase modulated telephony.
6A4—Amplitude modulated facsimile.

(b) On frequencies where wide band frequency or phase modulated telephony (40F3) is authorized, narrow band frequency or phase modulated telephony (6F3) may also be employed; similarly, where commercial quality amplitude modulated telephony (6A3) is authorized, single or double sideband amplitude modulated telephony, with or without carrier or with reduced carrier, may also be employed.

§ 12.233 *Transmitter power.* The transmitting equipment of a radio station in this service shall be adjusted in such manner as to produce the minimum radiation necessary to carry out the communications desired. No station operating in this service shall use a direct current plate power input to the vacuum tube or tubes supplying energy to the antenna in excess of that permitted to be used by a licensed amateur radio station when operated on the same frequencies or in the same frequency bands in accordance with the provisions of the rules governing amateur radio stations and operators (Subpart A of this part).

§ 12.234 *Equipment requirements.* (a) Except under the conditions specified in paragraph (b) of this section, all stations authorized to be operated in the Radio Amateur Civil Emergency Service shall be capable of receiving on the same frequencies or frequency bands utilized for transmission.

(b) When a station in this service is operated only on a single frequency or frequency band for cross-band operation in communication with a station or stations operating on another frequency or in another frequency band, or in other services, such station shall be capable of receiving the station with which it is communicating.

(c) The direct modulation of an oscillator with a frequency stability less than that obtainable with crystal control, or the radiation of a signal having simultaneous amplitude and frequency or phase modulation, is prohibited on frequencies below 220 Mc after December 31, 1952.

§ 12.235 *Alleviation of harmful interference.* (a) When emissions of stations in the Radio Amateur Civil Emergency Service, other than those necessary to carry on the desired communications, cause harmful interference to stations in this or any other service, the Commission may, in its discretion, require appropriate technical changes in th equipment to alleviate the interference.

(b) When the emissions of stations in the Radio Amateur Civil Emergency Service that are necessary to carry on the desired communications cause harmful interference to stations in other radio services, appropriate action shall be taken to alleviate such interference including, if necessary, the suspension (except during times of an actual state of civil emergency) of such emissions as cause the interference.

OPERATING REQUIREMENTS

§ 12.241 *Operator requirements.* (a) No person shall operate a station in the Radio Amateur Civil Emergency Service unless (1) that person holds a valid radio operator license of the proper grade, as described in this section, and (2) that person holds a valid written certification by the chief of the local, regional, or state Civil Defense organization of the area in which he serves that he has satisfied all federal, state, and local requirements for enrollment in the Civil Defense organization as a radio operator and is actually enrolled therein. Such certification shall clearly indicate that a determination has been made as to his loyalty to the United States and general reliability in accordance with the procedures described in the approved civil defense communications plan for the area concerned. (See §§ 12.201 (i) and 12.212.)

(b) The person manipulating the key of a manually operated radio-telegraph transmitter of a station authorized to operate in this service shall hold either (1) any class of amateur operator license issued by the Commission, other than the Technician or Novice Class, or (2) any class of commercial radiotelegraph operator license issued by the Commission other than the Temporary Limited Radiotelegraph Second Class Operator License, together with the certification required in accordance with the provisions of paragraph (a) of this section.

(c) Except as specifically provided in paragraphs (a) and (b) of this section, any station in the Radio Amateur Civil Emergency Service may be operated by the holder of any class of amateur or commercial radio operator license issued by the Commission other than a Temporary Limited Radiotelegraph Second Class Operator License or an Aircraft Radiotelephone Operator Authorization: *Provided*, That, when such operation is performed by the holder of a Novice Class amateur operator license or by the holder of a commercial radiotelephone or radiotelegraph third class operator license or restricted operator permit; (1) such operator shall be prohibited from making any adjustments that may result in improper transmitter operation, (2) the equipment shall be so designed and installed that none of the operations necessary to be performed during the course of the normal rendition of the service of the station may cause off-frequency operation or result in any unauthorized radiation, and (3) any needed adjustments of the transmitter that may affect the proper operation of the station shall be regularly made by or under the immediate supervision and responsibility of the holder of either an amateur operator license other than the Novice Class or a commercial radiotelephone or radiotelegraph first or second class operator license.

(d) All adjustments or tests during or coincident with the installation, servicing or maintenance of the transmitting equipment of a station in this service shall be made only by or under the immediate supervision and responsibility of the holder of either (1) an amateur operator license other than the Novice Class or (2) a commercial radiotelephone or radiotelegraph first or second class operator license issued by the Commission, who in addition holds the certification required in accordance with the provisions of paragraph (a) of this section.

§ 12.242 *Operation at other than licensed location.* A station in this service, or any unit thereof, may be operated at any location in accordance with the approved civil defense communications plan for the area concerned, in the discretion of and as directed by the Civil Defense Radio Officer, without notice to the Commission and without limitation as to the length of time within which such operation takes place: *Provided*, That nothing in this section shall be construed to waive the necessity for modification of the authorization of a station in this service when the address of the licensee or the basic location of the station is changed, or for any other reason where, because of a change of the communications plan or other reason, the information heretofore furnished the Commission with the original application may be materially altered or changed.

§ 12.243 *Availability of station authorizations and operator licenses.* (a) The original station authorization permitting operation of the licensed amateur station in the Radio Amateur Civil Emergency Service, or a photocopy thereof, shall be permanently attached to each transmitter of such station, including each transmitter which is capable of being operated and intended to be operated independently at different locations, if the transmitter is readily accessible, or, if the control position is located at a place other than the transmitter location, it may be posted at the control position: *Provided*, That, whenever a photocopy of the station authorization is utilized in compliance with the foregoing requirement, the original station authorization shall be made available for inspection upon reasonable request from any authorized representative of the Federal Government.

(b) The original radio operator license, or a verification card (FCC Form 758-F) in the case of the holder of a commercial radio operator license of the diploma type, of the operator controlling the emissions of a station authorized to be operated in this service together with the certification required by § 12.241 (a), shall be carried on his person or kept immediately available at the place where he is operating the station or any independent unit of a station: *Provided*, That, whenever a verification card (FCC Form 758-F) is utilized in compliance with the foregoing requirement, the original operator license shall be made available for inspection upon reasonable request from any authorized representative of the Federal Government.

(c) When a licensed amateur station, or an independent unit of such station, is operated at a location other than that shown in its license in compliance with the provisions of this subpart, the basic amateur station license required by Subpart A of this part need not be readily available at the station or unit location, but shall be made available for inspection upon reasonable request from any authorized representative of the Federal Government.

§ 12.244 *Radio station log.* (a) Except as otherwise expressly provided in this subpart, there shall be maintained at each radio amateur civil emergency station, or unit of such station, an accurate log of all operations. The following information shall be recorded in such station log:

(1) The name and address of the station licensee, the regularly assigned call sign of the station and unit number if any, the name of the radio amateur civil emergency network or networks in which the station is normally operated, and the d. c. plate power input to the vacuum tube or tubes supplying energy to the transmitting antenna system. This information need be entered only once in the log unless there is a change in any of the above items, but the original entry and each change shall show the date on which the entry was made.

(2) The date and time of beginning and end of each period during which the station was operated, the purpose of such operation, and the frequencies or bands of frequencies on which the operation took place.

(3) The call signs or other identification of all stations or units of such stations with which communications are established or attempted during such period of operation.

(4) The signature of the licensed operator on duty and in charge of the operation of the station or unit of such station during each period of operation, and the signature of each licensed operator who manipulated the key of any manually operated radiotelegraph transmitter of such station or unit. The signature of the operator shall be entered with the date and time at the beginning and end of each period during which he performed the foregoing duties, and at least once on each page additional to the first page, covering the period for which he was the responsible operator. The signatures of any additional operators who operate the transmitter(s) during the regular watch of another operator and details to indicate the periods during

which they operated the transmitter(s) shall be entered in the proper form.

(5) Upon completion of each period of operation for any purpose, there shall be entered in the log a summary of such operation describing the nature thereof and, if message traffic or other record communications were exchanged with other stations, an estimate of the amount of such traffic handled together with a report on any unusual delays which were experienced in the delivery of such messages.

(6) There shall be no erasure, obliteration, or destruction of any part of the log of any station or station unit. Corrections shall be made by striking out the erroneous portion and initialing and dating the corrections.

(b) Mobile radio amateur civil emergency stations or station units, and portable radio amateur civil emergency stations or station units, where not being operated at pre-determined fixed locations, shall be exempt from the requirements of maintaining a log to the extent that the entries required under the preceding paragraph of this section are substantially contained in the log of another station or stations operating in the same radio amateur civil emergency networks. All stations or station units operating in accordance with the provisions of this subpart shall be exempt from the requirements concerning station logs contained in Subpart A of this part whenever it is shown that compliance with these requirements would interfere with the expeditious handling of civil defense communications or communication drills.

(c) The current portion of the log shall be kept at the location of the operating or control position of the station or unit. Other portions of the log shall be retained by the licensee for a period of one year, at a place determined by the civil defense Radio Officer to be appropriate and advisable: *Provided*, That the logs of a station in this service shall be made available for inspection upon reasonable request by any authorized representative of the Federal Government: *And provided further*, That those portions of any log covering operation of a station in this service in connection with any actual condition jeopardizing the public safety or affecting the national defense or security shall not be destroyed unless prior approval for such destruction shall have been received from the Commission.

§ 12.245 *Station identification.* (a) Stations operating in the Radio Amateur Civil Emergency Service shall identify themselves in the same manner and under the same conditions as prescribed in the rules governing Amateur Radio Stations and Operators (Subpart A of this part), except that:

(1) Additional designators to indicate portable or mobile operation, or to indicate operation at a location other than that specified in the station license, shall not be used.

(2) When engaged in network operation, after a station or unit has been fully identified at least once, further identification by that station or unit may be accomplished by the use of abbreviated call signs or other distinctive signals prescribed by the civil defense Radio Officer in lieu of the call signs otherwise required to be transmitted by that station or unit. A record of such abbreviated call signs or other distinctive signals shall be maintained by the Radio Officer and shall be made available for inspection upon reasonable request by any authorized representative of the Federal Government.

(b) When two or more separate units of a station, which is authorized to be operated in the Radio Amateur Civil Emergency Service, are operated independently at different locations, each unit shall separately identify itself by the addition of a unit number at the end of its call sign. When transmitting by telegraphy such additional identification shall immediately follow the basic call sign and to avoid confusion with portable or mobile indicators, shall not be separated therefrom by the use of the "slant" or fraction bar, or other punctuation mark or symbol.

§ 12.246 *Tactical call signs.* Stations operating in this service, and independent units of such stations, may be assigned tactical or secret call signs by the Commission or by competent civil defense authority, and may utilize such tactical call signs in lieu of the call signs appearing on the station licenses when such use is directed by competent civil defense authority: *Provided*, That a list of all such tactical call signs assigned stations under his direction shall be maintained by the civil defense Radio Officer and shall be made available for inspection upon reasonable request by any authorized representative of the Federal Government: *And provided further*, That when such tactical call signs are intended to be used at times other than during communications in connection with actual or impending conditions which appear to jeopardize the defense or security of the United States, a list of such tactical call signs and the stations or units to which assigned shall be furnished the Commission prior to such use.

USE OF STATIONS

§ 12.251 *Limitations on use of stations.* (a) No station authorized to be operated at this service, other than a control station as defined in this subpart, shall be operated for the purpose of transmitting any signal, message, or other communications except with the permission and under the operational control of the control station of the network in which it is operating: *Provided*, That nothing in the foregoing shall be construed to prohibit the transmission by any station or unit of a station of such signals as may be necessary for the purpose of alerting or making contact with the control station of the network, or for the purpose of transmitting actual emergency civil defense communications if the control station is disabled or is otherwise inoperative.

(b) Nothing in this section shall be construed to prevent the operation of a station which is authorized to be operated in this service for the purpose of brief tests or adjustments during or coincident with the installation, servicing or maintenance of such station: *Provided*, That the transmissions of that station during such tests or adjustments shall not cause harmful interference to the conduct of communications by any other station.

(c) No station in this service shall be used to transmit or to receive messages for hire, nor to transmit communications for material compensation, direct or indirect, paid or promised.

§ 12.252 *Hours of operation.* Stations in this service may be operated at such times and under such conditions as may be prescribed by the Communications Officer or other responsible official of the civil defense organization having jurisdiction over the area which the station will serve: *Provided*, That the communications of such stations shall at all times be in accordance with the permissible communications authorized in this subpart.

§ 12.253 *Points of communication.* Stations in this service may communicate with each other, with stations in the Disaster Communications Service, and with stations of the United States Government which are authorized to exchange communications with stations in this service by the particular agency having control. In addition, stations in this service may communicate, for the purpose of exchanging civil defense communications, with any other station in any service provided by the Commission's rules, whenever such station is authorized to communicate with stations in the Radio Amateur Civil Emergency Service by the provisions of the Commission's rules governing the class of station concerned or in accordance with the provisions of § 2.405 of this chapter.

§ 12.254 *Permissible communications.* Stations in this service are authorized to transmit only the following types of civil defense communications:

(a) Communications for training purposes: Necessary drills and tests to insure establishment and maintenance of orderly and efficient operation of the radio amateur civil emergency networks and such other radio stations and networks as may be associated therewith for the conduct of civil defense communications, including communications directly concerned with the conduct of practice alerts, practice blackouts, practice mobilization, and other comparable situations as may be ordered or initiated by competent civil defense authority or by the United States governmental or military authority charged with the defense of the area concerned. All messages which are transmitted in connection with such drills and tests shall be clearly identified as such by the use of the words "Drill" or "Test" in the body of such messages.

(b) Communications when there is an impending or actual condition jeopardizing the public safety or affecting the national defense or security:

(1) Communications directly concerning the activation of the radio amateur civil emergency station networks or such other radio stations and networks as may be associated with the networks for the conduct of civil defense communications.

(2) Communications directly concerning the conduct of service by the radio amateur civil emergency networks and such other radio stations and networks as may be associated therewith.

(3) Communications directly concerning safety of life, preservation of property, maintenance of law and order, alleviation of human suffering and need, and combating of armed attack or sabotage.

(4) Communications directly concerning the accumulation and dissemination of public information or instructions to the civilian population essential to the activities of the civil defense organization or that of other authorized governmental or relief agencies.

(5) Communications directly concerning the transaction of business essential to public welfare.

§ 12.255 *Use of codes and ciphers.* Any station in this service is authorized to transmit messages in codes and ciphers and to utilize any method of secret or coded authentication of its transmissions when such method of concealing the contents of messages or such authentication procedure is prescribed by the competent civil defense authority of the area concerned and shall, in general, proved by the cognizant federal civil defense authorities.

§ 12.256 *Priority of communications.* The order of priority of communications by stations in this service, when there is an impending or actual condition jeopardizing the public safety or affecting the defense or security of an area, shall be determined by the cognizant civil defense authority of the area concerned or his authorized representative.

§ 12.257 *Operating procedure.* The operating procedure, and the method of circuit control by the control station of each network, shall be determined by the responsible civil defense authority of the area served by the station and is apconform as nearly as possible to the operating procedure normally followed in other services in the expeditious handling of message traffic by the method of transmission in use.

APPENDIX 1

EXAMINATION POINTS

Examinations for amateur radio operator licenses are conducted at the Commission's office in Washington, D. C., Monday through Friday, except holidays (office hours are from 8:30 a. m. to 5 p. m.), and at each radio district office of the Commission on the days designated by the Engineer in Charge of the office. Specific dates should be obtained from the Engineer in Charge. For a list of such offices see the following pages.

Examinations are also given frequently, by appointment, at the Commission's offices at the following points:

| | |
|---|---|
| Tampa, Fla. | Mobile, Ala. |
| Juneau, Alaska. | Savannah, Ga. |
| Anchorage, Alaska. | San Diego, Calif. |

Examinations are also given at greater intervals at the places named below, which are visited for that purpose by Commission examiners from the district offices for such locations. For current schedules, exact time, place, and other details, inquiry should be addressed to the office conducting examinations at the chosen point.

QUARTERLY POINTS

| | |
|---|---|
| Birmingham, Ala. | Nashville, Tenn. |
| Charleston, W. Va. | Oklahoma City, Okla. |
| Cincinnati, Ohio. | Omaha, Nebr. |
| Cleveland, Ohio. | Phoenix, Ariz. |
| Columbus, Ohio. | Pittsburgh, Pa. |
| Corpus Christi, Tex. | St. Louis, Mo. |
| Davenport, Iowa. | Salt Lake City, Utah. |
| Des Moines, Iowa. | San Antonio, Tex. |
| Fort Wayne, Ind. | Schenectady, N. Y. |
| Fresno, Calif. | Sioux Falls, S. Dak. |
| Grand Rapids, Mich. | Syracuse, N. Y. |
| Indianapolis, Ind. | Tulsa, Okla. |
| Jackson, Miss. | Williamsport, Pa. |
| Knoxville, Tenn. | Winston-Salem, N. C. |
| Little Rock, Ark. | |
| Memphis, Tenn. | |
| Milwaukee, Wis. | |

SEMIANNUAL

| | |
|---|---|
| Albuquerque, N. Mex. | El Paso, Tex. |
| Amarillo, Tex. | Hartford, Conn. |
| Bakersfield, Calif. | Hilo, Hawaii, T. H. |
| Boise, Idaho. | Jacksonville, Fla. |
| Butte, Mont. | Lihue, Kauai, T. H. |
| | Louisville, Ky. |

SEMIANNUAL—continued

| | |
|---|---|
| Portland, Maine. | Wichita, Kans. |
| Roanoke, Va. | Wilmington, N. C. |
| Spokane, Wash. | Wailuku, Maui, T. H. |
| Tucson, Ariz. | |

ANNUAL

| | |
|---|---|
| Bangor, Maine. | Marquette, Mich. |
| Billings, Mont. | Rapid City, S. Dak. |
| Jamestown, N. Dak. | Springfield, Mo. |
| Klamath Falls, Oreg. | Tallahassee, Fla. |
| Manchester, N. H. | |

Arrangements have also been made, including cooperation of other Federal agencies, for General Class examinations in outlying areas as follows:

Alaska: United States Signal Corps stations.

Guam: District Communications Officer, United States naval station.

Hawaii: At not exceeding one point on any island, by the Engineer in Charge (Honolulu).

Canal Zone: By the Engineer in Charge, District 22 (San Juan, P. R.).

RADIO DISTRICTS

| Radio district | Address of the engineer in charge | Territory within district | |
|---|---|---|---|
| | | States, etc. | Counties |
| 1 | 1600 Customhouse, Boston 9, Mass. | Connecticut | All counties. |
| | | Maine | Do. |
| | | Massachusetts | Do. |
| | | New Hampshire | Do. |
| | | Rhode Island | Do. |
| | | Vermont | Do. |
| 2 | 748 Federal Bldg., 641 Washington St., New York 14, N. Y. | New Jersey | Bergen, Essex, Hudson, Hunterdon, Mercer, Middlesex, Monmouth, Morris, Passaic, Somerset, Sussex, Union, and Warren. |
| | | New York | Albany, Bronx, Columbia, Delaware, Dutchess, Greene, Kings, Nassau, New York, Orange, Putnam, Queens, Rensselaer, Richmond, Rockland, Schenectady, Suffolk, Sullivan, Ulster, and Westchester. |
| 3 | Room 1613, New United States Customhouse, 2d and Chestnut Sts., Philadelphia 6, Pa. | Delaware | New Castle. |
| | | New Jersey | Atlantic, Burlington, Camden, Cape May, Cumberland, Gloucester, Ocean, and Salem. |
| | | Pennsylvania | Adams, Berks, Bucks, Carbon, Chester, Columbia, Cumberland, Dauphin, Delaware, Lancaster, Lebanon, Lehigh, Montgomery, Northampton, Perry, Philadelphia, Schuylkill and York. |
| 4 | Rm. 611 Town Bank Bldg., Conn. St. and Fallsway, Baltimore 2, Md. | Delaware | Kent and Sussex. |
| | | Maryland | All except district 24. |
| | | Virginia | Counties listed in district 24, Fairfax, Hanover, Isle of Wight, James City, King William, King and Queen, Lancaster, Northumberland, Warwick, Westmoreland, and York. |
| | | West Virginia | Berkeley, Brooke, Grant, Hampshire, Hancock, Hardy, Harrison, Jefferson, Lewis, Marion, Marshall, Monongalia, Morgan, Pendleton, Preston, Randolph, Taylor, Tucker, Upshur. |

APPENDIX 2

EXTRACTS FROM RADIO REGULATIONS ANNEXED TO THE INTERNATIONAL TELECOMMUNICATION CONVENTION

(Atlantic City, 1947)

ARTICLE 42—AMATEUR STATIONS

SECTION 1. Radiocommunications between amateur stations of different countries shall be forbidden if the administration of one of the countries concerned has notified that it objects to such radiocommunications.

SEC. 2. (1) When transmission between amateur stations of different countries are permitted they must be made in plain language and must be limited to messages of a technical nature relating to tests and to remarks of a personal character for which, by reason of their unimportance, resource to the public telecommunications service is not justified. It is absolutely forbidden for amateur stations to be used for transmitting international communications on behalf of third parties.

(2) The preceding provisions may be modified by special arrangements between the countries concerned.

SEC. 3. (1) Any person operating the apparatus in an amateur station must have proved that he is able to transmit, and to receive by ear, texts in Morse code signals. Administrations concerned may, however, waive this requirement in the case of stations making use exclusively of frequencies above 1000 (one thousand) Mc/s.

(2) Administrations shall take such measures as they judge necessary to verify the qualifications, from a technical point of view, of any person operating the apparatus of an amateur station.

SEC. 4. The maximum power of amateur stations shall be fixed by the administrations concerned, having regard to the technical qualifications of the operators and to the conditions under which these stations must work.

SEC. 5. (1) All the general rules of the Convention and of the present Regulations shall apply to amateur stations. In particular, the transmitting frequency must be as constant and as free from harmonics as the state of technical development for stations of this nature permits.

(2) During the course of their transmissions amateur stations must transmit their call sign at short intervals.

APPENDIX 3

CLASSIFICATION OF EMISSIONS

For convenient reference the tabulation below is extracted from the "Classification of Emissions" tables in Part 2 of the Commission's Rules and Regulations and in the Atlantic City (1947) Radio Regulations and it includes only those general classifications which appear most applicable to the Amateur Radio Service.

| Type of modulation or emission | Type of transmission | Symbol |
|---|---|---|
| 1. Amplitude | Absence of any modulation | A0 |
| | Telegraphy without the use of modulating audio frequency (on-off keying). | A1 |
| | Telegraphy by the keying of a modulating audio frequency or radio frequencies or by the keying of the modulated emission (special case: an unkeyed modulated emission). | A2 |
| | Telephony | A3 |
| | Facsimile | A4 |
| | Television | A5 |
| 2. Frequency (or phase) modulated. | Absence of any modulation | F0 |
| | Telegraphy without the use of modulating audio frequency (frequency shift keying). | F1 |
| | Telegraphy by the keying of a modulating audio frequency or audio frequencies or by the keying of the modulated emission (special case: an unkeyed emission modulated by audio frequency). | F2 |
| | Telephony | F3 |
| | Facsimile | F4 |
| | Television | F5 |
| 3. Pulsed emissions. | | P |

APPENDIX 4

*Convention Between the United States of America and Canada, Relating to the Operation by Citizens of Either Country of Certain Radio Equipment or Stations in the Other Country* (Effective May 15, 1952)

ARTICLE III

It is agreed that persons holding appropriate amateur licenses issued by either country may operate their amateur stations in the territory of the other country under the following conditions:

(a) Each visiting amateur may be required to register and receive a permit before operating any amateur station licensed by his government.

(b) The visiting amateur will identify his station by:

(1) *Radiotelegraph operation.* The amateur call sign issued to him by the licensing country followed by a slant (/) sign and the amateur call sign prefix and call area number of the country he is visiting.

(2) *Radiotelephone operation.* The amateur call sign in English issued to him by the licensing country followed by the words, "fixed," "portable" or "mobile", as appropriate, and the amateur call sign prefix and call area number of the country he is visiting.

(c) Each amateur station shall indicate at least once during each contact with another station its geographical location as nearly as possible by city and state or city and province.

(d) In other respects the amateur station shall be operated in accordance with the laws and regulations of the country in which the station is temporarily located.

[F. R. Doc. 53-9911; Filed, Nov. 27, 1953; 8:46 a. m.]

PART 14—RADIO STATIONS IN ALASKA (OTHER THAN AMATEUR AND BROADCAST)

In the matter of amendment of Part 14 of the Commission's rules and regulations to effect certain editorial changes therein.

The Commission having under consideration the desirability of making certain editorial changes in Part 14 of its rules and regulations; and

It appearing that the amendments adopted herein are editorial in nature, and, therefore, prior publication of notice of proposed rule making under the provisions of section 4 of the Administrative Procedure Act is unnecessary, and the amendments may become effective immediately; and

It further appearing that the amendments adopted herein are issued pursuant to authority contained in sections 4 (i), 5 (d) (1), and 303 (r) of the Communications Act of 1934, as amended, and paragraph F-6 of the Commission's Order Defining the Functions and Establishing the Organizational Structure of the Office of the Secretary, dated February 14, 1952, as amended;

*It is ordered*, This 20th day of November 1953, that, effective immediately, Part 14 of the Commission's rules and regulations is revised as set forth below.

Released: November 23, 1953.

FEDERAL COMMUNICATAONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

GENERAL

Sec.
14.1 Scope of part.
14.2 Place of filing applications.
14.3 Emergency service which may be rendered.
14.4 License period.
14.5 Frequencies.

FIXED PUBLIC SERVICE

14.10 Frequencies for communication from non-Government to Government and between non-Government stations.
14.14 Frequencies for short distance communication from non-Government to Government stations.
14.15 Frequencies for short distance communication between non-Government stations.

PUBLIC COAST STATIONS

14.31 Frequencies for communication with ships in Alaskan waters.
14.32 Frequencies for short distance communication from non-Government to Government stations and secondarily with ships in Alaskan waters.
14.33 Frequencies for communication with any ship station.

STATIONS ON SHIPBOARD IN THE MARITIME SERVICES

14.51 Service which may be rendered.
14.52 Frequencies for communication between ships and with public coast stations employing primarily telephony.
14.53 Frequencies for communication from non-Government to Government stations and secondarily with coast stations employing primarily telephony.
14.54 Frequencies for ship stations.

AUTHORITY: §§ 14.1 to 14.54 issued under sec. 4, 48 Stat. 1066, as amended; 47 U. S. C. 154. Interpret or apply sec. 303, 48 Stat. 1082, as amended, sec. 5, 66 Stat. 713; 47 U. S. C. 303, 155.

GENERAL

§ 14.1 *Scope of part.* The general rules and regulations for individual services shall apply to stations located in the Territory of Alaska so far as may be consistent with this part.[1]

§ 14.2 *Place of filing applications.* All applications for the operation of stations in Alaska covered by this part other than ship stations shall be filed with the Commission's Engineer in Charge at Seattle, Washington.

§ 14.3 *Emergency service which may be rendered.*[2] Any station in Alaska, regardless of the class in which licensed, may transmit messages concerning sickness, death, weather, ice conditions or other matters relating to safety of life and property, provided:

(a) There is no established means of communication between the points in question.

(b) No charge is made for the communication service.[3]

(c) A copy of each message so transmitted is kept on file at the transmitting station for a period of one year, to be made available upon request by authorized Government representatives.[4]

§ 14.4 *License period.* (a) The normal license period for each radio station in Alaska which operates in the Fixed Public Service or Public Coast Service shall be two years. Such licenses will be issued to expire concurrently on January 1 of the expiration year and, to achieve such scheduling, the Commission may, when necessary, modify the length of the license term.

(b) The license period for each radio station operating in Alaska, other than stations referred to in paragraph (a) of this section, shall coincide with the term established for similar stations operating in the continental United States, and may be determined by reference to the rules and regulations governing individual radio services.

§ 14.5 *Frequencies.* In addition to the frequencies specifically shown in this part, other frequencies may be authorized temporarily for the purpose of facilitating the implementation of the Agreement concluded at the Extraordinary Administrative Radio Conference, Geneva, 1951.

FIXED PUBLIC SERVICE[5]

§ 14.10 *Frequencies for communication from non-Government to Government and between non-Government stations.* The following frequency is allocated for communication from non-Government to Government stations, and between non-Government stations using A1 emission, maximum authorized transmitter power 650 watts: 149.60 kc.

§ 14.14 *Frequencies for short-distance communication from non-Government to Government stations.* The following frequencies are allocated primarily for short-distance communication from non-Government to Government stations, using types A1, A2 and A3 emission provided the maximum power shall not exceed 100 watts and upon the condition that no interference will result to other services:[6]

| | | | |
|---|---|---|---|
| 2466 | 2632 | [7] 5137.5 | [7] 8070 |
| 2474 | 2986 | [7] 5207.5 | |

(a) The frequencies 5207.5 and 8070 kc are also available for unlimited time operation for stations located in the Aleutian Islands west of 165 degrees west longitude.

§ 14.15 *Frequencies for short distance communication between non-Government stations.* The following frequencies are allocated primarily for short-distance communication between non-Government stations, using types A1, A2 and A3 emission, provided the maximum power shall not exceed 100 watts and upon the condition that no interference will result to other services:[7]

| | | | |
|---|---|---|---|
| 1632 | [8] 2292 | 2450 | 3201 |
| 1646 | 2382 | 2482 | [8] 3265 |
| 1660 | 2422 | 2512 | [7] 5167.5 |
| 1708 | 2430 | 2566 | |

[1] For definitions see Parts 6, 7 and 8 of this chapter.

[2] See § 2.405 of Part 2 of this chapter.

[3] The conditions under which common carriers are permitted to render free service are set forth in Part 41—Telegraph and Telephone Franks, of this chapter.

[4] Rules relating to station logs and records, see §§ 6.47 and 6.507 to 6.511 of Part 6; §§ 7.115, 7.192, 7.214 and 7.314 of Part 7 and §§ 8.115, 8.194, 8.330 and 8.368 of Part 8 of this chapter.

[5] See Part 6—Public Radiocommunications Services (Other Than Maritime Mobile), of this chapter.

[6] The main Intra-Alaska communications routes are operated by the Alaska Communications System under the jurisdiction of the U. S. Army Signal Corps. Those desiring to handle message traffic with this system should coordinate their applications with the nearest representative of the A. C. S. before submitting applications, in order to determine the proper frequency for transmission to the particular point or points desired.

[7] Not to be used between the hours of 6:00 p. m. and 6:00 a. m., P. s. t.

[8] May be used where originally authorized prior to March 1, 1937.

[9] For use in the vicinity of Circle, Alaska.

PUBLIC COAST STATIONS [10]

§ 14.31 *Frequencies for communication with ships in Alaskan waters.* The following frequencies are allocated to public coast stations employing primarily telephony for communication with ships in Alaskan waters, using types A1, A2 and A3 emission, provided the maximum power shall not exceed 100 watts and upon the condition that no interference will result to other services:

| | | | | |
|---|---|---|---|---|
| 1622 | *2292 | 2450 | 2566 | †5167.5 |
| 1646 | 2382 | 2482 | 3092.5 | |
| 1660 | 2422 | 2512 | 3201 | |
| 1708 | 2430 | 2538 | *3265 | |

§ 14.32 *Frequencies for short distance communication from non-Government to Government stations and secondarily with ships in Alaska waters.* The following frequencies, allocated primarily for short distance communication from non-Government to Government stations, are available on a secondary basis to public coast stations employing primarily telephony for communication with ships in Alaskan waters, using types A1, A2, and A3 emission, provided the maximum power shall not exceed 100 watts and upon the condition that no interference will result to other services: *

| | | | |
|---|---|---|---|
| 2466 | 2632 | †5137.5 | †8070 |
| 2474 | 2986 | †5207.5 | |

(a) The frequencies 5207.5 and 8070 kc are also available for unlimited time operation for stations located in the Aleutian Islands west of 165 degrees west longitude.

§ 14.33 *Frequencies for communication with any ship station.* The following frequencies are allocated to public coast stations employing telegraphy for communication with any ship station:

(a) Calling and working: 416 and 438 kc; A1, A2 emission; maximum authorized transmitter power, 265 watts.[11]

(b) Calling: 500 kc; A1, A2 emission; maximum authorized transmitter power, 265 watts.[11]

(c) Working: 2052.5 kc; A1 emission only; maximum authorized transmitter power, 150 watts.[11] [12]

STATIONS ON SHIPBOARD IN THE MARITIME SERVICES [13]

§ 14.51 *Service which may be rendered.* A ship in an Alaskan port where radio or wire communication is not provided, or when such radio or wire service is suspended, may accept messages for transmission to the nearest public coast station, and the radio equipment may be operated while the ship is alongside the dock or at anchor in such port, without regard to the restrictions contained in Part 8 of this chapter."

§ 14.52 *Frequencies for communications between ships and with public coast stations employing primarily telephony.* The following frequencies are allocated for communication between ships in Alaskan waters and to ship stations for communication with public coast stations employing primarily telephony in Alaska, using types A1, A2 and A3 emission, provided the maximum power shall not exceed 100 watts and upon the condition that no interference will result to other services:

| | | | |
|---|---|---|---|
| 1622 | *2292 | 2450 | 3092.5 |
| 1646 | 2382 | 2482 | 3201 |
| 1660 | 2422 | 2512 | *3265 |
| 1708 | 2430 | 2566 | †5167.5 |

§ 14.53 *Frequencies for communication from non-Government to Government stations and secondarily with coast stations employing primarily telephony.* The following frequencies, allocated primarily for short-distance communication from non-Government to Government stations, are available on a secondary basis for communication between ships in Alaskan waters and to ship stations for communication with public coast stations employing primarily telephony in Alaska, using types A1, A2 and A3 emission, provided the maximum power shall not exceed 100 watts and upon the condition that no interference will result to other services:

| | | | |
|---|---|---|---|
| 2466 | 2632 | †5137.5 | †8070 |
| 2474 | 2986 | †5207.5 | |

(a) The frequencies 5207.5 and 8070 kc are also available for unlimited time operation for ship stations operating in the Aleutian Islands waters, west of 165 degrees west longitude.

§ 14.54 *Frequencies for ship stations.* (a) The following frequency is allocated for use by ship stations in Alaskan waters in addition to those set forth in the general regulations: 2538 kc; A1, A2, A3 emission; maximum power, 100 watts.

(b) The frequency 2134 kc is allocated for use by ship stations in Alaskan waters for communication primarily with Government coast stations for types A1, A2 and A3 emission with a maximum power of 100 watts, upon the condition that no interference will result to other services.

(c) For communication by means of telegraphy with coast stations in Alaska when the coast station transmits on the frequency 2052.5 kc, each ship station shall transmit by means of class A1 emission only on one of its assigned frequencies with the band 2065–2107 kc exclusively, in accordance with the applicable provisions of Part 8 of this chapter.[12] When the ship station is within the territorial waters of Alaska, the maximum plate (anode) input power shall not exceed 150 watts when transmitting on a frequency within this band; this limitation shall apply without regard to the maximum power authorized to be used on such frequencies by the station license.

[F. R. Doc. 53-9910; Filed, Nov. 27, 1953; 8:45 a. m.]

Footnotes 6-9 on p. 7605.

[10] See Part 7—Stations on Land in the Maritime Services, of this chapter.

[11] The term "authorized transmitter power" is defined to mean, "the total plate input power to all electron tubes of the last radio stage of the transmitter which are used to supply radio-frequency power to the antenna."

[12] Pending clearance of the band 2065–2107 kc in accordance with the agreement concluded at the Extraordinary Administrative Radio Conference (Geneva, 1951) the frequency 2052.5 kc and each of the assignable frequencies within the band 2065–2107 kc may be authorized for use on a day only basis upon the express condition that harmful interference will not be caused to stations which, in the discretion of the Commission, may have priority on the frequency used by the station to which interference is caused.

[13] See Part 8—Stations on Shipboard in the Maritime Services of this chapter.

[14] See §§ 8.302, 8.303 and 8.304 of Part 8—Stations on Shipboard in the Maritime Services, of this chapter.

## TITLE 14—CIVIL AVIATION

### Chapter I—Civil Aeronautics Board

[Civil Air Regs., Amdt. 41-9]

PART 41—CERTIFICATION AND OPERATION RULES FOR SCHEDULED AIR CARRIER OPERATIONS OUTSIDE THE CONTINENTAL LIMITS OF THE UNITED STATES

FUEL QUANTITY INDICATORS

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 23d day of November 1953.

Section 41.25 (k) of the Civil Air Regulations requires that fuel quantity indicators, in serviceable condition, indicating the amount of fuel in each tank, be provided in aircraft used in scheduled air carrier operations outside the continental limits of the United States. This requirement had been based upon the premise that there exists no suitable alternative means by which the quantity of fuel available in each fuel tank may be determined. An aircraft without such fuel indicators or with an inoperative fuel indicator would not be permitted to initiate a flight under Part 41. In the event a fuel quantity indicator becomes inoperative in flight during night or instrument operation the pilot in command must either land at the nearest suitable landing area or at the next point of intended landing, whichever in his opinion is the safer procedure. Thereafter, the flight may not be redispatched until the fuel quantity indicator is returned to a serviceable condition.

A recent revision of Part 40 of the Civil Air Regulations has been adopted by the Board which provides greater flexibility than heretofore experienced by air carriers in the continuation of flight with required equipment inoperative. These provisions contemplate that a flight may continue to a scheduled terminus under conditions which are to be laid down in the air carrier manual. Revised Part 40 also authorizes the Administrator to permit continuation of flight beyond a scheduled terminus under certain conditions in which the safety of flight operations will not be jeopardized.

The Board intends that a proposal to amend the instrument and equipment requirements of Part 41 to conform to the provisions of revised Part 40 be included in the general revision of Part 41 which will be circulated in the near future. Meanwhile, however, the Board's attention has been drawn to the fact that § 41.25 (k) relating to fuel quantity indicators has been creating undue hardship for certain U. S. Flag Carriers. Certain fuel indicating systems installed in modern aircraft are highly complex and involve the use of electronic components, the repair of which may be accomplished only by skilled maintenance personnel. Situations have occurred in which flights have been canceled or delayed for considerable periods of time because of the difficulty in obtaining maintenance service for these components. This situation is reported to have resulted in serious economic penalty to the carriers involved as well as inconvenience to the passengers.

A proposal to amend § 41.25 (k) has previously been circulated and comment resulting from this circulation indicates that suitable alternative means may be provided by an air carrier in lieu of an operative fuel quantity indicator for the purpose of permitting an aircraft to be flown to the "nearest point where repairs or replacements can be made." Such alternative means will require the use of a fuel flow meter. These devices are of relatively simple design and assure greater reliability than some fuel quantity indicators. Fuel flow meters, however, are designed to indicate fuel consumption of an aircraft engine at any given moment. To determine accurately total fuel quantity used over an extended period of time, continuous reference to the instrument or a number of references of sufficient frequency must be made. So long as a member of the flight crew additional to the two pilots is carried, the Board believes that the use of fuel flow meters in lieu of a fuel quantity indicator on a temporary basis would be adequate for safe operations. The Board does not, at this time, intend to prejudice the question as to whether alternative means of indicating fuel quantity may be safely employed when an additional member of the flight crew is not available. However, we are of the opinion that adequate relief will be furnished by the imposition of such a condition until the more far reaching aspects of the question of a continuation of flight with required equipment inoperative is considered in conjunction with the revision of Part 41.

A recommendation has been made to the Board that a further condition be applied which would require the air carrier to include in the appropriate air carrier manual detailed procedure for the guidance of its personnel in the event required equipment becomes inoperative. However, such procedures were intended to be included in the provisions of § 41.120 which states that "The air carrier shall prepare and maintain a manual for the use and guidance of operations personnel which contains full information necessary to guide flight and ground personnel in the conduct of flight operations and to inform such personnel regarding their duties and responsibilities ...." The Board expects, therefore, that the air carrier will insure the inclusion of adequate information to enable its personnel to determine under what circumstances an alternative means may be used in the event fuel quantity indicators become unserviceable en route.

Interested persons have been afforded an opportunity to participate in the making of this amendment, and due consideration has been given to all relevant matter presented. Since this amendment imposes no additional burden on any person, it may be made effective without prior notice.

In consideration of the foregoing, the Civil Aeronautics Board hereby amends § 41.25 of Part 41 of the Civil Air Regulations (14 CFR Part 41) as follows, effective immediately:

1. By deleting paragraph (k) thereof and substituting therefor the folowing:

§ 41.25 *Instruments and equipment required for continuance of flight.* * * *

(k) Fuel quantity indicators indicating the amount of fuel in each tank to be used for the remainder of the flight, or, in the case of aircraft having a third flight crew member assigned as a member of the operating crew, an alternate means approved by the Administrator for determining the amount of fuel in each tank.

(Sec. 205, 52 Stat. 984; 49 U. S. C. 425. Interprets or applies secs. 601, 604, 52 Stat. 1007, as amended, 1010; 49 U. S. C. 551, 554)

By the Civil Aeronautics Board.

[SEAL] M. C. MULLIGAN, *Secretary.*

## TITLE 15—COMMERCE AND FOREIGN TRADE

### Chapter III—Bureau of Foreign and Domestic Commerce, Department of Commerce

Subchapter C—Bureau of Foreign Commerce

[6th Gen. Revision of Export Regs., Amdt. 74 [1]]

PART 371—GENERAL LICENSES

PART 372—PROVISIONS FOR INDIVIDUAL AND OTHER VALIDATED LICENSES

PART 380—AMENDMENTS, EXTENSIONS, TRANSFERS

MISCELLANEOUS AMENDMENTS

1. Section 371.9 *General in-transit license GIT* paragraph (b) *Special provisions*, subparagraph (1) *Shipments originating in Canada* is amended to read as follows:

(1) *Shipments originating in Canada.* (i) The provisions of General License GIT are applicable, as modified herein, to all shipments originating in Canada and moving in transit through the United States to any foreign destination, including Hong Kong, Macao, and Subgroup A countries. The United States collector of customs at the United States port of exit shall require, and the shipper shall submit to him, a copy of Canadian Customs Entry, Form B-13, certified or stamped by the Canadian customs authorities, for each such shipment. Positive List commodities may be exported from the United States under this general license only as authorized in the certified or stamped Canadian Customs Entry, Form B-13. Where the ultimate destination or any other pertinent detail of such shipment is not the same on the U. S. shipper's export declaration as that shown on the Canadian Customs Entry, Form B-13, a validated U. S. export license or a new Form B-13 authorizing the shipment is required. However, non-Positive List commodities may be exported under any general license applicable to the exportation of the same commodities of domestic origin whether or not there is a change of ultimate destination while the shipment is in transit. Non-Positive List commodities authorized by the Canadian Customs Entry, Form B-13, for export to Hong Kong, Macao, or Subgroup A country may proceed in transit through the United States under General License GIT according to that authorization. Other shipments of non-Positive List commodities to Hong Kong, Macao, or a Subgroup A country, not authorized to such a destination by the accompanying Canadian Customs Entry, Form B-13, require a validated U. S. export license or a new Form B-13 authorizing such an exportation.

(ii) Any parties to the exportation shall submit any further proof which the collector of customs at the United States port of entry or at the port of exit may require to enable him to determine that the shipment is properly exportable under General License GIT, including the fact that the destination of the shipment is properly authorized by the Canadian authorities. Exportations shall not be cleared for shipment by the collector of customs at the United States port of exit under General License GIT unless all provisions of this general license have been complied with.

This part of the amendment shall become effective as of December 19, 1953.

2. Section 372.5 *Ship stores, plane stores, supplies and equipment* is amended in the following particulars:

a. The title of the section is amended to read as follows:

§ 372.5 *Exportation of commodities for use in the construction or operation of vessels and aircraft.*

(b) Paragraphs (a) *Exportations requiring validated license* and (b) *Preparation of license applications* are amended to read as follows, respectively:

(a) *Exportations requiring validated license.* The provisions of § 371.13 of this subchapter establish general licenses for the exportation of ship stores, plane stores, supplies and equipment under prescribed conditions. Where any commodities to be used on operating vessels and aircraft are not authorized to be exported under the provisions of § 371.13 of this subchapter or where commodities are being exported for vessels under construction and are not authorized to be exported under any general license, the exportation must be authorized by a validated license.

NOTE: See § 371.13 (d) of this subchapter on exports to vessels located at foreign ports.

(b) *Preparation of license applications*—(1) *Vessels under construction.* Applications for licenses to export commodities, including ship stores, supplies and equipment, to vessels under construction shall be prepared on Form IT-419 (Revised April 1952) in accordance with the instructions contained in § 372.3 and Note, with the following modifications:

[1] This amendment was published in Current Export Bulletin No. 719, dated November 19, 1953, and in the reprint pages, dated November 19, 1953.

(i) Country of ultimate destination: Show country in which vessel is being constructed.

(ii) Ultimate consignee in foreign country: Show name and address of shipyard where vessel is being constructed.

(iii) Commodity description: In addition to a complete description of the commodities, show the following information in this item or on an attachment:

1. Hull number and name of vessel (if known).
2. Type of vessel.
3. Name and business address of prospective owner, and his nationality.
4. Country of registry, or intended country of registry.
5. Statement as to whether or not the vessel will call at a Subgroup A port.

(iv) End use of commodities covered by this application: If the vessel is a tanker, a certification from the prospective owner must be submitted stating whether or not the vessel will be used to transport petroleum or petroleum products directly or indirectly to any Subgroup A country.

(v) In all cases, all parties to the transaction, including the U. S. or foreign purchaser, must be identified with a clear statement of the capacity or function of each, as provided in paragraph 1 of the interpretative statement following § 372.2 (a).

(2) *Operating vessels and aircraft.* Applications for licenses to export commodities, including ship or plane stores, supplies and equipment, to operating vessels and aircraft, whether in operation or being repaired, shall be prepared on Form IT–419 (revised April 1952) in accordance with the instructions contained in § 372.3 and Note, with the following modifications:

(i) Country of ultimate destination: Show country where the vessel or aircraft will take on the commodities.

(ii) Ultimate consignee in foreign country: Show name of owner and port or place where commodities will be taken aboard. Also, if a vessel, show name of vessel.

(iii) Commodity description: Show the following information in this item or on an attachment:

1. Type of vessel.
2. Business address of owner and his nationality.
3. Name of charterer and the terms and type of charter, if under charter.
4. Country of registry.
5. Statement as to whether or not the vessel will call at a Subgroup A port.

(iv) End use of commodities covered by this application: If the vessel is a tanker, a certification must be submitted from the owner, or from the charterer, if under charter, stating whether or not the vessel will be used to transport petroleum or petroleum products directly or indirectly to any Subgroup A country.

(v) In all cases, all parties to the transaction, including the U. S. or foreign purchaser, must be identified with a clear statement of the capacity or function of each, as provided in paragraph 1 of the interpretative statement following § 372.2 (a).

In addition the Bureau of Foreign Commerce may require, where necessary, that the exporter submit a letter of confirmation or amplification of the information specified in § 372.5 (b).

This part of the amendment shall become effective as of December 19, 1953.

3. Section 372.9 *Documents accompanying applications for validated licenses*, paragraph (a) *Copies may be submitted* is amended to read as follows:

(a) *Copies may be submitted.* (1) Documents submitted in support of an application for an individual or other validated license will not be returned to the applicant or his agent, except when the application is returned without action. Accordingly, applicants need not submit original documents which they may subsequently require, unless such original documents are specifically required by the provisions of another section, but in lieu thereof, photostatic or other copies of an original document may be submitted. Individual certification of copies of original documents is not required by the Bureau of Foreign Commerce. By signing Form IT–419 the applicant certifies and represents that any copies of documents submitted with the application, or submitted in support of the application at any time before or after filing the application, are true copies of the original documents, and that the information contained in such documents is true, correct, and complete to the best of his knowledge and belief.

(2) Any document submitted in connection with a license application which is submitted separately from an application must be identified clearly as part of that application. Such document must be identified by a statement, signed by the applicant, that "this document is to be considered as a part of application number (give BFC case No.)." Unless documents filed separately from the license application are identified with the application in this manner, they will not be accepted by the Bureau of Foreign Commerce.

This part of the amendment shall become effective as of November 19, 1953.

4. Section 372.11 *Issuance and use of export licenses* is amended in the following particulars:

Paragraph (b) of Note 2 *Validation of IT–628* following paragraph (b) *Unit-process licenses* is amended to read as follows:

(b) License continuation sheets and other attachments to licenses will be validated by imprinting a facsimile of the Department of Commerce seal followed by a five digit number representing the date of validation.

This part of the amendment shall become effective as of November 19, 1953.

5. Section 380.1 *Transfer of license*, paragraph (c) *Information from transferor and form of request* is amended to read as follows:

(c) *Information from transferor and form of request.* (1) In requesting transfer of less than 15 outstanding licenses (including project licenses), the licensee must submit:

(i) A completed Form IT–763, "Request for and Notice of Amendment Action," in triplicate for each license(s).

(ii) The original license(s) if held by the licensee.

(iii) A signed letter from the person or firm to whom the license(s) is to be transferred as required by paragraph (d) of this section.

(iv) The following certification:

The undersigned hereby certifies that, if license number(s) ---------- is (are) transferred in accordance with my (or our) request, any and all documents evidencing the order covered by this (these) license(s) will be retained by me for three years from the date of this certification and will be made available upon demand. The undersigned will promptly report to BFC any material or substantive changes in the terms of the order and any other facts of the export transaction known or reported to the undersigned at any future time by any party to the export transaction.

---------- Signature of transferor
---------- By
---------- Title
---------- Date

(*a*) When setting forth reasons for the requested transfer in Item 10 of Form IT–763, the licensee shall also state whether or not any consideration has been or will be paid for the transfer. The name and address of the proposed transferee shall be shown in Item 12 of Form IT–763.

(*b*) If the original license(s) is being held by a collector of customs at the time the licensee submits the request for transfer, he must show in Item 11 of Form IT–763, the address of the collector of customs with whom the original license(s) has been deposited. Also, in such cases, the licensee must submit an additional triplicate (yellow) copy of Form IT–763, "Notice to Applicant," showing in Item 4 of one copy the name and address of the original licensee and on the additional copy the name and address of the person to whom the license is to be transferred. This additional triplicate (yellow) copy of Form IT–763 will be used for notifying the transferee of the action taken.

(2) Where the licensee requests a transfer of 15 or more outstanding licenses, the request must be made in the form of a letter setting forth the following:

(i) Either a list of the BFC case numbers and outstanding license numbers or a statement that all outstanding licenses in the name of the licensee are to be transferred and indicating the number of such outstanding licenses.

(ii) A listing showing the BFC Case Numbers of applications for export licenses pending in BFC which are to be transferred.

(iii) The name and address of the proposed transferee.

(iv) Facts necessitating transfer.

(v) A statement of whether or not any consideration has been or will be paid for the transfer.

(vi) The certification set forth in subparagraph (1) (iv) of this paragraph.

(3) Additional proof: In addition to the information required under subparagraphs (1) and (2) of this paragraph, the original licensee must identify by name the legal document (certificate, agreement, etc.) or other authority by which the new firm name is legally established, the new corporation or firm created, or the assets transferred, showing the effective date of such document, and the state where filed or recorded.

This part of the amendment shall become effective as of November 19, 1953.

6. Section 380.2 *Amendments or alterations of licenses* paragraph (f) (3) *Amendment requests on which field offices may not take action* is amended in the following particulars:

a. Subdivision (i) is amended by deleting the word "Hong Kong" to read as follows:

(i) Licenses covering exportations to Macao or Subgroup A countries, unless the amendment involves no more than a correction of obvious errors in the license, such as mistakes in typing.

b. A new subdivision (vi) is added to read as follows:

(vi) Requests for amendments or extensions of licenses for iron and steel scrap (Schedule B Nos. 601010, 601040, 601050, 601070, 601090, 601150), aluminum scrap (Schedule B No. 630050), copper scrap (Schedule B No. 641300), and copper-base alloy scrap (Schedule B No. 644000).

This part of the amendment shall become effective as of November 19, 1953.

(Sec. 3, 63 Stat. 7; 65 Stat. 43; 67 Stat. 62; 50 U. S. C. App. Sup. 2023. E. O. 9630, Sept. 27, 1945, 10 F. R. 12245, 3 CFR, 1945 Supp.; E. O. 9919, Jan. 3, 1948, 13 F. R. 59, 3 CFR, 1948 Supp.)

## TITLE 26—INTERNAL REVENUE

### Chapter I—Internal Revenue Service, Department of the Treasury

#### Subchapter C—Miscellaneous Excise Taxes

[T. D. 6053; Regs. 13, Amdt.]

#### PART 175—TRAFFIC IN CONTAINERS OF DISTILLED SPIRITS

#### REQUIREMENTS FOR MARKING LIQUOR BOTTLES AND EARTHENWARE CONTAINERS, LABELING DISTILLED SPIRITS, AND DISPOSING OF MARKED CONTAINERS

On August 6, 1953, notice of proposed rule-making, regarding amendments to Regulations 13 (26 CFR, Part 175), relating to the requirements for marking liquor bottles and earthenware containers, labeling spirits and disposing of marked containers was published in the FEDERAL REGISTER (18 F. R. 4626). After consideration of all such relevant matter as was presented by interested persons relating to the rules proposed, the amendments to Regulations 13 set forth below are hereby adopted:

PARAGRAPH 1. Section 175.33 is amended by striking the word "Commissioner" and inserting in lieu thereof "Assistant Regional Commissioner, or the Commissioner in the case of States,".

PAR. 2. Section 175.34 is amended as follows:

(A) By striking the word "Commissioner" in paragraph (c) and inserting in lieu thereof "Assistant Regional Commissioner, or by the Commissioner in the case of symbols and numbers assigned to States,".

(B) By striking the proviso and substituting in lieu thereof the following proviso: "*Provided*, That liquor bottles which are ascertained by the Commissioner to be of distinctive shape or design for the packaging of liqueurs, cordials, bitters, cocktails, gin fizzes, and such other specialties as may be specified from time to time by the Commissioner, and liquor bottles for the packaging of other distilled spirits authorized by the Commissioner under § 175.56a, may be manufactured and shipped, consigned, or delivered not marked as required by this section."

PAR. 3. Section 175.43 is amended to read as follows:

§ 175.43 *Name and address of bottler.* On labels of domestic distilled spirits, there shall be stated the phrase "Bottled by", immediately followed by the name of the bottler or the trade name under which the spirits are bottled, and the place where such spirits are bottled. If the bottler is the actual bona fide operator of more than one bottling plant engaged in bottling the same brand of distilled spirits, there may be stated immediately following the name (or trade name) of such bottler the addresses of the plants at which such product is bottled: *Provided*, That on labels of whisky and straight whisky there shall be stated the State of distillation of such whisky, if such whisky is not distilled in the State given in the address of the brand label: *Provided further:*

(a) That, where distilled spirits are bottled by or for the distiller thereof, there may be stated, in lieu of the phrase "Bottled by", followed by the bottler's name (or trade name) and address, the phrase "Distilled by", followed by the name (or trade name) under which the particular spirits were distilled, and the address (or addresses) of the distiller;

(b) That, where distilled spirits are bottled by or for the rectifier thereof, there may be stated, in lieu of the phrase "Bottled by", followed by the bottler's name (or trade name) and address, the phrase "Blended by", "Made by", "Prepared by", "Manufactured by", or "Produced by" (whichever may be appropriate to the act of rectification involved), followed by the name (or trade name) under which the distilled spirits were rectified, and the address (or addresses) of the rectifier;

(c) That, on labels of distilled spirits bottled for a retailer or other person who is not the actual distiller or rectifier of such distilled spirits there may also be stated the name and address of such retailer or other person, immediately preceded by the words "Bottled for" or "Distributed by", or other similar statement.

PAR. 4. The head note to Subpart E is amended to read as follows: "Subpart E—Use of Containers for Packaging Distilled Spirits".

PAR. 5. Section 175.55 is amended to read as follows:

§ 175.55 *Containers for distilled spirits.* The use for packaging distilled spirits for sale at retail of containers of one-half pint capacity or greater, not marked as prescribed by this part, is prohibited except as provided in §§ 175.56 to 175.58.

PAR. 6. Section 175.56 and headnote are amended to read as follows:

§ 175.56 *Distinctive liquor bottles for liqueurs and cordials.* Upon application (Form 98) by any bottler, the Assistant Regional Commissioner of the region in which the plant of such bottler is situated may, by the issuance of an appropriate permit, authorize the procurement and use by such bottler of liquor bottles which are ascertained by the Commissioner to be of distinctive shape or design for the packaging of liqueurs, cordials, bitters, cocktails, gin fizzes, and such other specialties as may be specified from time to time by the Commissioner, not marked as required by § 175.34.

PAR. 7. There is inserted immediately following § 175.56 the following new section:

§ 175.56a *Unmarked liquor bottles for other distilled spirits.* Upon application (Form 98) by any bottler, the Assistant Regional Commissioner of the region in which the plant is situated may, by the issuance of an appropriate permit, authorize the procurement and use by such bottler, for the packaging of distilled spirits such as whisky, brandy, rum, gin, vodka, etc., of liquor bottles, not marked as required by § 175.34, which the Commissioner finds will not afford a jeopardy to the revenue because of their unique or distinctive shape or design and cost of manufacture.

PAR. 8. Section 175.57 is amended to read as follows:

§ 175.57 *Earthenware containers for distilled spirits.* Upon application (Form 98) by any bottler, the Assistant Regional Commissioner of the region in which the plant of such bottler is situated may, by the issuance of an appropriate permit, authorize the procurement and use, for packaging distilled spirits, of earthenware containers marked legibly, by underglaze coloring, (a) either on the bottom or on the body with a symbol and number assigned by the Assistant Regional Commissioner, or by the Commissioner in the case of symbols and numbers assigned to States, to represent the name of the bottler procuring the same; and (b) on the shoulder with the words, "Federal Law Forbids Sale or Reuse of This Bottle": *Provided*, That upon application (Form 98) by any bottler, the Assistant Regional Commissioner of the region in which the plant is situated may, by the issuance of an appropriate permit, authorize the procurement and use by such bottler for the packaging of distilled spirits such as whisky, brandy, rum, gin, vodka, etc., of earthenware containers, not marked as required by this section, which the Commissioner finds will not afford a jeopardy to the revenue because of their unique or

distinctive shape or design and cost of manufacture.

PAR. 9. There is inserted immediately following § 175.57 the following new section:

§ 175.57a *Approval of distinctive unmarked containers.* Application in letter form for the approval of any distinctive container, accompanied by a specimen, photograph or drawing of the container, and in the case of any such container for the packaging of distilled spirits such as whisky, brandy, rum, gin, vodka, etc., a statement of the cost of manufacture shall be submitted to the Commissioner and approval procured, prior to submission of an application (Form 98) to the Assistant Regional Commissioner. Such application (Form 98) shall specify the number of the container assigned by the Commissioner.

PAR. 10. There is inserted immediately following § 175.59 the following new section:

§ 175.59a *Use of earthenware containers bearing the same indicia, by parent company and wholly-owned subsidiaries.* Any bottler authorized to bottle distilled spirits at more than one location may select, for marking on earthenware containers, any one permit symbol and number assigned to him, or to any of his wholly-owned subsidiaries, for use by him and at any or all of the premises of his wholly-owned subsidiaries at which distilled spirits are bottled. The bottler shall notify the Commissioner of such selection. Application (Form 98) filed by the bottler pursuant to § 175.57 for the procurement and use of earthenware containers shall give the location or locations to which such containers are to be shipped. Stocks of earthenware containers bearing such selected indicia held by the parent company or any of its wholly-owned subsidiaries may be transferred between such premises without obtaining a permit authorizing such transfer; however, earthenware containers bearing any symbol and number other than the selected indicia, may not be so transferred without first obtaining a permit from the Assistant Regional Commissioner.

PAR. 11. There is inserted immediately preceding § 175.89 the following new undesignated center head: "Importation of Filled Containers."

PAR. 12. Section 175.89 and headnote are amended to read as follows:

§ 175.89 *Importation of distilled spirits in unmarked containers.* No distilled spirits for sale at retail may be imported into the United States in containers of one-half pint capacity or greater, not marked as prescribed by this part: *Provided*, That upon application (Form 98) by the importer, the Assistant Regional Commissioner of the region in which the port of entry is situated may, by the issuance of an appropriate permit, authorize the importation of liquor bottles or earthenware containers containing distilled spirits such as whiskey, brandy, rum, gin, vodka, etc., not marked as prescribed by this part, which the Commissioner finds will not afford a jeopardy to the revenue because of their unique or distinctive shape or design and cost of manufacture. The provisions of this section shall not apply to the importation of distilled spirits in bulk containers of a capacity of 5 wine gallons or greater.

PAR. 13. The undesignated center head immediately preceding § 175.90 which reads "Indicia for Imported Filled Containers" is revoked.

PAR. 14. Section 175.90 is amended by striking the words "§§ 175.91 to 175.94" and inserting in lieu thereof "§§ 175.89, 175.91 to 175.94, and 175.95."

PAR. 15. Section 175.94 is amended to read as follows:

§ 175.94 *Distilled spirits in earthenware containers.* Upon application (Form 98) the Assistant Regional Commissioner of the region in which the port of entry is situated may issue a permit authorizing the importation of distilled spirits in earthenware containers marked legibly in underglaze coloring (a) either on the bottom or on the body with the name, and the name of the city or country of address, of the manufacturer of the spirits, or of the exporter abroad, or the name, and the name of the city of address, of the importer in the United States, and (b) on the shoulder with the words "Federal Law Forbids Sale or Reuse of This Bottle," except as provided in §§ 175.89 and 175.95.

PAR. 16. There is inserted immediately following § 175.94 the following new section:

§ 175.94a *Approval of distinctive unmarked containers.* Approval of distinctive unmarked containers shall be procured in accordance with the procedure prescribed by § 175.57a.

PAR. 17. Section 175.95 is amended by changing the period at the end of the first sentence to a colon and adding the following: "*Provided*, That upon application (Form 98) the Assistant Regional Commissioner of the region in which the port of entry is situated may, in nonrecurring cases, authorize the release from customs custody of distilled spirits in containers which, through unintentional error, are not marked completely in accordance with the provisions of this part, if the Commissioner finds that such release will not afford a jeopardy to the revenue."

PAR. 18. Section 175.115 is amended to read as follows:

§ 175.115 *Disposition of stocks of containers.* When the permit of a bottle manufacturer or bottler is suspended, revoked, or surrendered, stocks of liquor bottles and other authorized marked containers on hand or in process may be disposed of under permit to a person authorized to receive liquor bottles, in accordance with the directions of the Commissioner. Application shall be made on Form 98 by such person for permission to acquire the entire stock, regardless of place of storage or persons or concerns holding title thereto, and submitted to the Assistant Regional Commissioner of the region in which the applicant is located: *Provided*, That, where it is found that the entire stock cannot be disposed of to one authorized bottler, the Commissioner may authorize the disposal of such containers, in lots, by size or type, to more than one bottler if he finds that such authorization will not afford a jeopardy to the revenue. The application on Form 98 shall be supported by a statement filed by the vendor setting forth whether the Form 98 covers his entire stock, or his entire stock of a particular size or type of bottle. A sample of each size or type of container represented in the stock which the applicant or applicants desire to purchase shall be submitted to the Assistant Regional Commissioner with the application Form 98 and the supporting statement of the vendor. If such stocks are not disposed of in accordance with the directions of the Commissioner, they shall be seized and forfeited, as provided in section 2871 of the Internal Revenue Code.

PAR. 19. The note to the source of §§ 175.1 to 175.131, which reads "§§ 175.60, 175.62, 175.63, 175.74, 175.75, 175.76, 175.77, 175.78, 175.96 and 175.122 appearing herein are amendments effective only during the period of the unlimited national emergency proclaimed by the President on May 27, 1941 (Proc. 2519; 3 CFR 1943 Cum. Supp.). Upon termination of the unlimited national emergency these amendments will be automatically revoked and the regulations, as they existed prior to the issuance of Treasury Decision 5292, shall be reissued.", is revoked.

These regulations shall be effective upon the date of publication in the FEDERAL REGISTER.

# PROPOSED RULE MAKING

## CIVIL AERONAUTICS BOARD

### [ 14 CFR Parts 40, 41, 42 ]

[Draft Release 53-28]

LANDING WEIGHTS FOR NONTRANSPORT CATEGORY AIRPLANES IN SCHEDULED PASSENGER OPERATION

NOTICE OF PROPOSED RULE MAKING

Pursuant to authority delegated by the Civil Aeronautics Board to the Bureau of Safety Regulation, notice is hereby given that the Bureau will propose to the Board a Special Civil Air Regulation extending the present special rules applicable to nontransport category airplanes in scheduled overseas and foreign passenger operation until July 1, 1954.

Interested persons may participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should be submitted in duplicate to the Civil Aeronautics Board, attention Bureau of Safety Regulation, Washington 25, D. C. In order to insure their examination by the Board before taking further action on the proposed rule, communications must be received by December 14, 1953. Copies of such communications will be available after December 16, 1953, for examination by interested persons at the Docket Section of the Board, Room 5412, Department of Commerce Building, Washington, D. C.

Certain airplanes certificated as a basic type prior to June 30, 1942, and currently used in scheduled air carrier passenger operations have at various times since original certification been allowed increases in their maximum certificated take-off and landing weights. The increases have been allowed under the provisions of later adopted airworthiness requirements based upon different and more realistic safety criteria where the airplanes have been shown to comply with such requirements for particular operations.

However, these developments have not followed a consistent pattern, and prior to the adoption of SR–356 in 1950, airplanes of the same basic type were operated at differing maximum landing weights. For example, the usual maximum landing weight for a Douglas DC–3 (not certificated in the transport category) operated in scheduled passenger service is 24,400 pounds when operated in accordance with limitations established in the air carrier's operations specifications, whereas the maximum landing weight for a comparable airplane used by an irregular air carrier or commercial operator is 25,200 pounds subject, however, to operating limitations provided for in Part 42 of the Civil Air Regulations.[1]

The Board was asked by certain scheduled air carriers to permit operation of the DC–3 and the Lockheed Model 18 as nontransport category airplanes at the landing weights authorized for these same airplanes in irregular passenger service. The Board authorized the use of these higher weights for nontransport category airplanes by SR–356 on the condition that they be operated in accordance with the operating limitations established for such airplanes in Part 42.

Revised Part 40, effective January 1, 1954, prescribes operating rules for scheduled air carriers engaged in the carriage of passengers in interstate commerce which require these carriers to operate their nontransport category airplanes in accordance with requirements that are similar to those currently prescribed in Part 42 for such airplanes. A notice of proposed rule making, which will be issued concurrently with this notice, proposes that the nontransport category performance operating limitations for these airplanes be incorporated in Part 41 as of July 1, 1954, thus applying these rules to scheduled carriers carrying passengers in overseas and foreign air transportation. In view of the fact that these airplanes will be able to receive the same landing weights currently authorized by SR–356 when operating in accordance with the requirements in revised Part 40 and those proposed for Part 41, it is not necessary to extend this regulation with respect to operations under Part 40, or to extend it with respect to Part 41 after June 30, 1954. Accordingly, this proposed regulation only extends the provisions of SR–356 with respect to those operations under Part 41, scheduled service in overseas and foreign air transportation, until July 1, 1954. After that date SR–356 will not be necessary and it is not intended that elimination of this rule operate to affect the weights of aircraft previously established under SR–356.

In view of the foregoing, it is proposed to issue a Special Civil Air Regulation, effective January 1, 1954, to read as follows:

Contrary provisions of the Civil Air Regulations notwithstanding, an airplane type certificated prior to June 30, 1942, may be used for the carriage of persons in scheduled overseas and foreign air transportation at a maximum landing weight not exceeding its maximum certificated take-off weight for passenger service: *Provided*, That such landing weight does not exceed the weight for which the structure has been substantiated in accordance with the structural requirements upon which the original certification was based: *Provided further*, That the airplane is operated in accordance with the operating limitations prescribed in Part 42 of the Civil Air Regulations as heretofore or hereafter amended, for aircraft not certificated in the transport category: *And provided further*, That if an air carrier elects to operate aircraft under the provisions of this Special Civil Air Regulation it shall be required that all of its aircraft of the same or related types be operated thereunder.

It is proposed that this Special Civil Air Regulation shall terminate on June 30, 1954.

(Sec. 205 (a), 52 Stat. 984; 49 U. S. C. 425 (a). Interpret or apply secs. 601–610, 52 Stat. 1007–1012; 49 U. S. C. 551–560)

Dated November 20, 1953, at Washington, D. C.

By the Bureau of Safety Regulation.

[SEAL] JOHN M. CHAMBERLAIN,
*Director.*

### [ 14 CFR Part 41 ]

[Draft Release 53-27]

ELIMINATION OF REQUIREMENT FOR CERTIFICATION IN TRANSPORT CATEGORY AFTER DECEMBER 31, 1953, AND ESTABLISHMENT OF NONTRANSPORT CATEGORY OPERATING LIMITATIONS

NOTICE OF PROPOSED RULE MAKING

Pursuant to authority delegated by the Civil Aeronautics Board to the Bureau of

[1] The DC–3 is also eligible and is being operated at a maximum certificated take-off weight of 26,200 pounds and a maximum certificated landing weight of 26,000 pounds in accordance with transport category performance rules. The DC–3 when used for the carriage of cargo only is eligible and is being operated at maximum certificated take-off and landing weights as high as 26,900 pounds. Furthermore, corresponding military versions of the DC–3 have been operated at maximum weights in excess of 30,000 pounds.

Safety Regulation, notice is hereby given that the Bureau will propose to the Board amendments to Part 41 of the Civil Air Regulations which will remove the requirement that after December 31, 1953, all aircraft utilized in Part 41 operations be certificated in the transport category, and will establish nontransport category airplane performance operating limitations.

Interested persons may participate in the making of the proposed amendments by submitting such written data, views, or arguments as they may desire. Communications should be submitted in duplicate to the Civil Aeronautics Board, attention Bureau of Safety Regulation, Washington 25, D. C. In order to insure their consideration by the Board before taking further action on the proposed rules, communications must be received before December 14, 1953. Copies of such communications will be available after December 16, 1953, for examination by interested persons at the Docket Section of the Board, Room 5412, Department of Commerce Building, Washington, D. C.

Section 41.26 (c) of Part 41 currently states that after December 31, 1953, all aircraft operating under this part shall comply with the transport category certification requirements of either Part 4a or 4b and with the operating limitations prescribed in this part for transport category airplanes. This requirement was intended to remove from the scheduled air transportation such aircraft types as the Douglas DC–3 and the Lockheed L–18 after this date unless recertificated in the transport category. This provision was also contained in Part 40 of the Civil Air Regulations. In view of the safety record of the DC–3 and L–18 and their continued use in scheduled passenger operation, the Board, in revised Part 40, permitted the continued operation of these airplanes but required that they comply with certain performance operating limitations based on the nontransport category performance limitations that presently appear in Part 42.

In view of the action taken with respect to these airplanes in revised Part 40, it is proposed by this regulation to permit operation of nontransport category airplanes under Part 41 after December 31, 1953, but at the same time to prescribe the same performance operating limitations that are prescribed in revised Part 40. Since it is estimated that the affected air carriers will require about six months to implement these operating limitations for these aircraft, it is proposed that the operating limitations become effective on July 1, 1954. This will permit continued operation of these aircraft under present conditions until that date.

Accordingly, notice is hereby given that it is proposed that Part 41 of the Civil Air Regulations be amended as follows:

1. By deleting § 41.26 (c).

2. By adding new §§ 41.36, 41.36a, 41.36b, 41.36c, and 41.36d to read as follows:

§ 41.36 *Nontransport category airplane operating limitations.* In operating any large, nontransport category airplane in passenger service on or after July 1, 1954, the provisions of §§ 41.36a through 41.36d shall be complied with, unless deviations therefrom are specifically authorized by the Administrator on the ground that the special circumstances of a particular case make a literal observance of the requirements unnecessary for safety. Prior to that date such airplanes shall be operated either in accordance with §§ 41.36a through 41.36d or in accordance with such operating limitations as the Administrator determines will provide a safe relation between the performance of the airplanes and the airports to be used and the areas to be traversed. Performance data published or approved by the Administrator for each such nontransport category airplane shall be used in determining compliance with the provisions of §§ 41.36a through 41.36d.

§ 41.36a *Take-off limitations.* No take-off shall be made at a weight in excess of that which will permit the airplane to be brought to a safe stop within the effective length of the runway from any point during the take-off up to the time of attaining 105 percent of minimum control speed or 115 percent of the power-off stalling speed in the take-off configuration, whichever is the greater. In applying the requirements of this section:

(a) It may be assumed that take-off power is used on all engines during the acceleration;

(b) Account may be taken of not more than 50 percent of the reported wind component along the take-off path if opposite to the direction of take-off, and account shall be taken of not less than 150 percent of the reported wind component if in the direction of the take-off;

(c) Account shall be taken of the average runway gradient when the average gradient is greater than ½ percent. The average runway gradient is the difference between the elevations of the end points of the runway divided by the total length;

(d) It shall be assumed that the airplane is operating in the standard atmosphere.

§ 41.36b *En route limitations; one engine inoperative.* (a) No take-off shall be made at a weight in excess of that which will permit the airplane to climb at a rate of at least 50 feet per minute with the critical engine inoperative at an altitude of at least 1,000 feet above the elevation of the highest obstacle within 5 miles on either side of the intended track or at an altitude of 5,000 feet, whichever is the higher: *Provided*, That in the alternative an air carrier may utilize a procedure whereby the airplane is operated at an altitude such that, in event of an engine failure, the airplane can clear the obstacles within 5 miles on either side of the intended track by 1,000 feet, if the air carrier can demonstrate to the satisfaction of the Administrator that such a procedure can be used without impairing the safety of operation. If such a procedure is utilized, the rate of descent for the appropriate weight and altitude shall be assumed to be 50 feet per minute greater than indicated by the performance information published or approved by the Administrator. Before approving such a procedure, the Administrator shall take into account, for the particular route, route segment, or areas concerned, the reliability of wind and weather forecasting, the location and types of aids to navigation, the prevailing weather conditions, particularly the frequency and amount of turbulence normally encountered, terrain features, air traffic control problems, and all other operational factors which affect the safety of an operation utilizing such a procedure.

(b) In applying the requirements of paragraph (a) of this section, it shall be assumed that:

(1) The critical engine is inoperative;

(2) The propeller of the inoperative engine is in the minimum drag position;

(3) The wing flaps and landing gear are in the most favorable positions;

(4) The operative engine or engines are operating at the maximum continuous power available;

(5) The airplane is operating in the standard atmosphere;

(6) The weight of the airplane is progressively reduced by the weight of the anticipated consumption of fuel and oil.

§ 41.36c *Landing distance limitations; airport of intended destination.* No take-off shall be made at a weight in excess of that which, allowing for the anticipated weight reduction due to consumption of fuel and oil, will permit the airplane to be brought to a stop within 60 percent of the effective length of the most suitable runway at the airport of intended destination.

(a) This weight shall in no instance be greater than that permissible if the landing were to be made:

(1) On the runway with the greatest effective length in still air, and

(2) On the runway required by the probable wind, taking into account not more than 50 percent of the probable headwind component and not less than 150 percent of the probable tailwind component.

(b) In applying the requirements of this section it shall be assumed that:

(1) The airplane passes directly over the intersection of the obstruction clearance plane and the runway at a height of 50 feet in a steady gliding approach at a true indicated air speed of at least 1.3 $V_{s_0}$;

(2) The landing is made in such a manner that it does not require any exceptional degree of skill on the part of the pilot;

(3) The airplane is operating in the standard atmosphere.

§ 41.36d *Landing distance limitations; alternate airports.* No airport shall be designated as an alternate airport in a dispatch release unless the airplane at the weight anticipated at the time of arrival at such airport can comply with the requirements of § 41.36c: *Provided*, That the airplane can be brought to rest within 70 percent of the effective length of the runway.

This notice of proposed rule making is proposed under the authority of Title VI of the Civil Aeronautics Act of 1938, as amended. The proposal may be changed in the light of comments received in response to this notice of proposed rule making.

(Sec. 205 (a), 52 Stat. 984; 49 U. S. C. 425 (a). Interpret or apply secs. 601–610, 52 Stat. 1007–1012, as amended; 49 U. S. C. 551–560)

Dated: November 20, 1953, at Washington, D. C.

By the Bureau of Safety Regulation.

[SEAL] JOHN M. CHAMBERLAIN, *Director.*

## DEPARTMENT OF COMMERCE

### Civil Aeronautics Administration

### [ 14 CFR Part 42 ]

### EN ROUTE LIMITATIONS

### NOTICE OF PROPOSED RULE MAKING

Notice is hereby given that pursuant to the authority contained in § 42.80, the Administrator of Civil Aeronautics contemplates amending § 42.80–6, published on January 10, 1950, in 15 F. R. 93. The amendment would establish en route limitations for Aero Commander 520, Beech 50, Grumman G–21, and Lockheed 10A aircraft. All interested persons who desire to submit written data, views, or arguments for consideration by the Administrator in connection with the proposed rules, shall send them to the Civil Aeronautics Administration, Office of Aviation Safety, Washington 25, D. C., within 30 days after publication of this notice in the FEDERAL REGISTER. The Administrator proposes amending § 42.80–6, as follows:

§ 42.80–6 *En route limitations on multi-engine aircraft with maximum allowable take-off weights below 12,500 pounds (CAA rules which apply to § 42.16 and § 42.80).* The following en route limitations data, applicable to Aero Commander 520, Beech D18C, Beech D18S, Beech 50, Grumman G–21, Lockheed 10A, Lockheed 10E, and Lockheed 12A aircraft, shall be used in determining compliance with § 42.80. These data are presented in Table 1 and Figures 1 thru 5. En route performance data on other aircraft weighing less than 12,500 pounds and operated under § 42.16 will be made available upon application to the Administrator.

TABLE 1—EN ROUTE LIMITATIONS

AERO COMMANDER 520

| Weight in pounds | Terrain clearance in feet and climb speed in miles per hour (TIAS) | |
|---|---|---|
| | Feet | Miles per hour |
| 5,500 | 3,480 | 91.8 |
| 5,000 | 6,820 | 93.5 |
| 4,500 | 10,150 | 92.4 |

## DEPARTMENT OF JUSTICE

### Office of Alien Property

[Vesting Order 4118, Amdt.]

JOHN H. RADEMACHER

In re: Estate of John H. Rademacher, deceased. File D-28-2367; E. T. 4172.

Under the authority of the Trading With the Enemy Act, as amended (50 U. S. C. App. and Sup. 1-40); Pub. Law 181, 82d Cong., 65 Stat. 451; Executive Order 9193, as amended by Executive Order 9567 (3 CFR, 1943 Cum. Supp.; 3 CFR, 1945 Supp.); Executive Order 9788 (3 CFR, 1946 Supp.) and Executive Order 9989 (3 CFR, 1948 Supp.) and pursuant to law, after investigation, Vesting Order 4118 is hereby amended nunc pro tunc to read as follows:

It is hereby found: That the property described as follows: All right, title, interest and claim of any kind or character whatsoever of Heinrich Rademacher and his issue; Maria Rademacher and her issue; Rudolph Behrends (Behrens) and other issue, name or names unknown, of Emma Behrens; Helen Koster, Martha Koster and other issue, name or names unknown, of Wilhemine Koster; Emilie Neimier and her issue, name or names unknown; and issue, name or names unknown, of Carl Pienemann; and each of them, in and to the Estate of John H. Rademacher, deceased.

is property payable or deliverable to, or claimed by, nationals of a designated enemy country, Germany, namely

*Nationals and Last Known Address*

Heinrich Rademacher and his issue, Germany.

Maria Rademacher and her issue, Germany.

Rudolph Behrends (Behrens) and other issue, name or names unknown, of Emma Behrens, Germany.

Helen Koster, Martha Koster and other issue, name or names unknown, of Wilhemine Koster, Germany.

Emilie Neimier, and her issue, name or names unknown, Germany.

Issue, name or names unknown, of Carl Pienemann, Germany.

That such property is in the process of administration by The San Francisco Bank, as executor of the Estate of John H. Rademacher, acting under the judicial supervision of the Superior Court of the State of California in and for the City and County of San Francisco;

And it is hereby determined that to the extent that such nationals are persons not within a designated enemy country, the national interest of the United States requires that such persons be treated as nationals of a designated enemy country, (Germany);

And having made all determinations and taken all action required by law, including appropriate consultation and certification, and deeming it necessary in the national interest,

There is hereby vested the property described above, to be held, used, administered, liquidated, sold or otherwise dealt with in the interest of and for the benefit of the United States.

The terms "national" and "designated enemy country" as used herein and in said Vesting Order 4118 had and shall have the meanings prescribed in section 10 of Executive Order 9095, as amended by Executive Order 9193.

Executed at Washington, D. C. on November 24, 1953.

For the Attorney General.

[SEAL] DALLAS S. TOWNSEND,
*Assistant Attorney General, Director, Office of Alien Property.*

## DEPARTMENT OF COMMERCE

### Federal Maritime Board

MEMBER LINES OF ATLANTIC (PASSENGER) CONFERENCE ET AL.

NOTICE OF AGREEMENTS FILED WITH THE BOARD FOR APPROVAL

Notice is hereby given that the following described agreements have been filed with the Board for aproval pursuant to section 15 of the Shipping Act, 1916, as amended; 39 Stat. 733, 46 U. S. C. section 814.

(1) Agreement No. 7840-23, between the member lines of the Atlantic (Passenger) Conference, modifies the basic agreement of that conference (No. 7840) to provide (1) that commissions not to exceed the sub-agency scale of commissions may be paid on a reciprocal basis to airlines having arrangements with a member line for the interchange of trans-Atlantic passenger traffic on tickets or exchange orders issued by or transferred from such airline, and (2) that subsidiary agreements between the member lines and one or more airlines for the interchange of trans-Atlantic passenger traffic shall be tabled for the information of all member lines, and (3) that the member lines may agree upon a uniform form of agreement to be entered into with airlines relative to arrangements for each other's transportation, reciprocal payments of commissions, methods of settlement, etc., and providing generally for the procedures to be followed and responsibilities to be assumed.

(2) Agreement No. 7723-3 between Aktieselskapet Hav, Aktieselskapet Havtank, Aktieselskapet Inger and Edda Shipping Co., Inc., modifies the Staubo-Horn Line Joint service agreement (No. 7723) by providing for the withdrawal of the first two named companies and the substitution of Edda Shipping Co., Inc., in place of such companies; that Edda Shipping Co., Inc., be appointed as manager in lieu of Helmer Staubo & Co., and to provide that revenues and expenses of vessels chartered by the joint service will be shared equally by the parties.

(3) Agreement 7931, between Aktiebolaget Svenska Amerika Linien (Swedish American Line) and Norddeutscher Lloyd, provides for the cooperation of the parties in the operation of the vessels "Stockholm" and "Kungsholm" by Swedish American Line and of the vessel "Gripsholm" by Norddeutscher Lloyd by providing for the coordination of sailing schedules at Bremerhaven. The agreement further provides that the parties may agree to utilize the same agent or the same personnel for the solicitation and booking of passengers and cargo, the collection of revenues and the like, and provides that it shall remain in force until February 1, 1959.

Interested parties may inspect these agreements and obtain copies thereof at the Regulation Office, Federal Maritime Board, Washington, D. C., and may submit, within 20 days after publication of this notice in the FEDERAL REGISTER, written statements with reference to any of the agreements and their position as to approval, disapproval, or modification, together with request for hearing should such hearing be desired.

Dated: November 24, 1953.

By order of the Federal Maritime Board.

[SEAL] A. J. WILLIAMS,
*Secretary.*

## DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

### Office of the Secretary

[Interim Department Order 6]

FIELD ORGANIZATION

REGIONAL OFFICES

The field organization of the Department of Health, Education, and Welfare shall consist of nine regional offices. Each office shall be under the direction and supervision of a Director who shall be responsible to the Secretary of Health, Education, and Welfare for the proper discharge of all duties, powers, and functions assigned to him.

The location and boundaries of the regional offices are as follows:

Region I—Boston: Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont.

Region II—New York: Delaware, New Jersey, New York, Pennsylvania.

Region III—Washington, D. C.: District of Columbia, Kentucky, Maryland, North Carolina, Virginia, West Virginia, Puerto Rico, Virgin Islands.

Region IV—Atlanta: Alabama, Georgia, Florida, Mississippi, South Carolina, Tennessee.

Region V—Chicago: Illinois, Indiana, Michigan, Ohio, Wisconsin.

Region VI—Kansas City, Mo.: Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, South Dakota.

Region VII—Dallas: Arkansas, Louisiana, New Mexico, Oklahoma, Texas.

Region VIII—Denver: Colorado, Idaho, Montana, Utah, Wyoming.

Region IX: San Francisco: Arizona, California, Nevada, Oregon, Washington, Alaska, (Juneau), Hawaii (Honolulu).

Dated: November 23, 1953.

[SEAL] NELSON A. ROCKEFELLER,
*Acting Secretary.*

[F. R. Doc. 53-9983; Filed, Nov. 27, 1953; 8:51 a. m.]

## FEDERAL COMMUNICATIONS COMMISSION

[Docket Nos. 10547, 10548, 10549]

SOUTHERN BAPTIST COLLEGE (KRLW) ET AL.

ORDER ADJOURNING PRE-HEARING CONFERENCE

In re applications of Southern Baptist College (KRLW), Walnut Ridge, Arkansas, Docket No. 10547, File No. BP-8372; Sam C. Phillips, Clarence A. Camp and James E. Connolly, d/b as Tri-State Broadcasting Service, Memphis, Tennessee, Docket No. 10548, File No. BP-8775; Southern Broadcasting Service, Inc., Memphis, Tennessee, Docket No. 10549, File No. BP-8802; for construction permits for new standard broadcasting stations.

Whereas the parties to the above consolidated proceedings have been unable to complete the prehearing conference herein scheduled for this day as the result of the application filed by Newport Broadcasting Company and will be unable to do so until the Commission has taken action upon such application;

*It is ordered*, This 20th day of November 1953 that said prehearing conference is hereby continued without date.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

[F. R. Doc. 53-9994; Filed, Nov. 27, 1953; 8:54 a. m.]

[Docket Nos. 10761, 10762]

WREC BROADCASTING SERVICE AND WMPS, INC.

ORDER DESIGNATING APPLICATIONS FOR CONSOLIDATED HEARING ON STATED ISSUES

In re applications of Hoyt B. Wooten, d/b as WREC Broadcasting Service, Memphis, Tennessee, Docket No. 10761, File No. BPCT-452; WMPS, Inc., Memphis, Tennessee, Docket No. 10762, File No. BPCT-514; for construction permits for new television stations.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 18th day of November 1953;

The Commission having under consideration the above-entitled applications, each requesting a construction permit for a new television broadcast station to operate on Channel 3 in Memphis, Tennessee; and

It appearing, that the above-entitled applications are mutually exclusive in that operation by more than one applicant would result in mutually destructive interference; and

It further appearing, that pursuant to section 309 (b) of the Communications Act of 1934, as amended, the above-named applicants were advised by letters of the fact that their applications were mutually exclusive, of the necessity for a hearing and of all objections to their applications; and were given an opportunity to reply; and

It further appearing, that upon due consideration of the above-entitled applications, the amendments filed thereto, and the replies to the above letters, the Commission finds that under section 309 (b) of the Communications Act of 1934, as amended, a hearing is mandatory; and that each of the above-named applicants is legally, financially and technically qualified to construct, own and operate a television broadcast station;

*It is ordered*, That pursuant to section 309 (b) of the Communications Act of 1934, as amended, the above-entitled applications are designated for hearing in a consolidated proceeding to commence at 10:00 a. m. on the 18th day of December 1953 in Washington, D. C., upon the following issue:

1. To determine on a comparative basis which of the operations proposed in the above-entitled applications would better serve the public interest, convenience and necessity in the light of the record made with respect to the significant differences between the applications as to:

(a) The background and experience of each of the above-named applicants having a bearing on its ability to own and operate the proposed television station.

(b) The proposals of each of the above-named applicants with respect to the management and operation of the proposed station.

(c) The programming service proposed in each of the above-entitled applications.

*It is further ordered*, That the issues in the above-entitled proceeding may be enlarged by the Examiner, on his own motion or on petition properly filed by a party to the proceeding and upon sufficient allegations of fact in support thereof, by the addition of the following issue: To determine whether the funds available to the applicant will give reasonable assurance that the proposals set forth in the application will be effectuated.

Released: November 20, 1953.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

[F. R. Doc. 53-9995; Filed, Nov. 27, 1953; 8:54 a. m.]

[Docket No. 10763]

OLE MISS BROADCASTING CO., INC.

ORDER DESIGNATING APPLICATION FOR CONSOLIDATED HEARING ON STATED ISSUES

In re application of Ole Miss Broadcasting Co., Inc., Oxford, Mississippi, Docket No. 10763, File No. BP-8784; for construction permit.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 18th day of November 1953;

The Commission having under consideration the above-entitled application for construction permit for a new standard broadcasting station at Oxford, Mississippi to operate on 1230 kilocycles with a power of 100 watts, unlimited time.

It appearing, that the applicant is legally, technically and financially qualified to operate the proposed station, but that the application may involve interference with Station WCMA, Corinth, Mississippi and does not comply with the Standards of Good Engineering Practice; particularly with reference to the percentage of daytime population lost to the population to be served; and

It further appearing, that pursuant to section 309 (b) of the Communications Act of 1934, as amended, the subject applicant was advised by letter dated September 2, 1953 of the aforementioned deficiencies and that the Commission was unable to conclude that a grant of the application would be in the public interest; and

It further appearing, that replies have been received to the Commission's letter from the applicant and the Corinth Broadcasting Company, Inc.; and

It further appearing, that, the Commission, after consideration of the replies, is still unable to conclude that a grant would be in the public interest;

*It is ordered*, That, pursuant to section 309 (b) of the Communications Act of 1934, as amended, the said application is designated for hearing, at a time and place to be specified in a subsequent order, upon the following issues:

1. To determine the areas and populations which may be expected to gain or lose primary service from the operation of the proposed stations, and the availability of other primary service to such areas and populations.

2. To determine the type and character of program service proposed to be rendered and whether it would meet the requirements of the populations and areas proposed to be served.

3. To determine whether the operation of the proposed station would involve objectionable interference with Station WCMA, Corinth, Mississippi and, if so, the nature and extent thereof, the areas and populations affected thereby and the availability of other primary service to such areas and populations and the nature and character of the program service now being rendered by WCMA to such areas and populations.

4. To determine whether the installation and operation of the proposed station would be in compliance with the Commission rules and Standards of Good Engineering Practice Concerning Standard Broadcast Stations with particular reference to the high ratio of persons residing within the normally protected daytime service area who would not receive service from the proposed station because of interference from other stations, to the number of persons residing within the normally protected daytime service area of the proposed station.

*It is further ordered*, That, the Corinth Broadcasting Company, Inc., licensee of Station WCMA, Corinth, Mississippi, is made a party to this proceeding.

Released: November 20, 1953.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

## FEDERAL POWER COMMISSION

[Docket No. E-6533]

WISCONSIN PUBLIC SERVICE CORP. AND MENOMINEE AND MARINETTE LIGHT AND TRACTION CO.

NOTICE OF APPLICATION

NOVEMBER 20, 1953.

Take notice that on November 19, 1953, a joint application was filed with the Federal Power Commission, pursuant to section 203 of the Federal Power Act, by Wisconsin Public Service Corporation (hereinafter called Public Service) and its wholly owned subsidiary, Menominee and Marinette Light and Traction Company (hereinafter called M & M), seeking an order authorizing the merger of all of the facilities of M & M with those of Public Service through a statutory corporate merger. Public Service is a corporation organized under the laws of the State of Wisconsin and doing business in said State with its principal business office at Milwaukee, Wisconsin. M & M is a corporation organized under the laws of the States of Wisconsin and Michigan and doing business in said States with its principal business office at Milwaukee, Wisconsin. Applicants propose to merge all of the facilities of M & M with those of Public Service and Public Service will remain as the surviving corporation; all as more fully appears in the application on file with the Commission.

Any person desiring to be heard, or to make any protest with reference to said application, should on or before the 11th day of December, 1953, file with the Federal Power Commission, Washington 25, D. C., a petition or protest in accordance with the Commission's rules of practice and procedure. The application is on file with the Commission for public inspection.

## INTERSTATE COMMERCE COMMISSION

[4th Sec. Application 28675]

PHOSPHATE ROCK FROM TENNESSEE TO TULSA, OKLA.

APPLICATION FOR RELIEF

NOVEMBER 24, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for carriers parties to schedule listed below.

Commodities involved: Phosphate rock, carloads.

From: Points in Tennessee.

To: Tulsa, Okla.

Grounds for relief: Competition with rail carriers, circuitous routes, and additional routes.

Schedules filed containing proposed rates: C. A. Spaninger, Agent, I. C. C. No. 1386, supp. 2.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

*Secretary.*

[F. R. Doc. 53-9979; Filed, Nov. 27, 1953; 8:50 a. m.]

[4th Sec. Application 28676]

GRAIN FROM STATIONS ON KANSAS CITY SOUTHERN RAILWAY CO. TO MOBILE, ALA., FOR EXPORT

APPLICATION FOR RELIEF

NOVEMBER 24, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: The Kansas City Southern Railway Company for itself and on behalf of Louisiana & Arkansas Railroad Company and Louisville and Nashville Railroad Company.

Commodities involved: Grain, grain products, and related articles, carloads.

From: Stations on the Kansas City Southern Railway Company.

To: Mobile, Ala., for export.

Grounds for relief: Competition with rail carriers, circuitous routes.

Schedules filed containing proposed rates: Kansas City Southern Railway Company, I. C. C. No. 5303, supp. 11.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

[4th Sec. Application 28677]

RUBBER FROM TEXAS AND LOUISIANA TO GRANDVIEW, MO.

APPLICATION FOR RELIEF

NOVEMBER 24, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: F. C. Kratzmeir, Agent, for carriers parties to schedules listed below.

Commodities involved: Rubber, artificial, synthetic or neoprene, carloads.

From: Points in Texas and Louisiana.

To: Grandview, Mo.

Grounds for relief: Rail competition, circuity, to apply rates constructed on the basis of the short line distance formula, and additional destination.

Schedules filed containing proposed rates: F. C. Kratzmeir, Agent, I. C. C. No. 3967, supp. 287; F. C. Kratzmeir, Agent, I. C. C. No. 3906, supp. 196; W. P. Emerson, Jr., Agent, I. C. C. No. 417, supp. 38.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

[4th Sec. Application 28678]

ANHYDROUS AMMONIA FROM ARKANSAS, TEXAS AND LOUISIANA TO SUFFOLK, VA., GROUP

APPLICATION FOR RELIEF

NOVEMBER 24, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: F. C. Kratzmeir, Agent, for carriers parties to schedule listed below.

Commodities invovled: Anhydrous ammonia, in tank-car loads.

From: Points in Arkansas, Texas and Louisiana.

To: Suffolk, Va., and points grouped therewith.

Grounds for relief: Rail competition, circuity, to apply rates constructed on the basis of the short line distance formula, and additional destinations.

Schedules filed containing proposed rates: F. C. Kratzmeir, Agent, I. C. C. No. 3746, supp. 128.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. ## OFFICE OF DEFENSE MOBILIZATION

[General Administrative Order III-1]

ESTABLISHING THE POSITION OF ASSISTANT DIRECTOR FOR FINANCIAL POLICY

By virtue of the authority vested in me by the National Security Act of 1947, as amended, pursuant to and by Reorganization Plan No. 3 of 1953; the Defense Production Act of 1950, as amended; and Executive Order 10438 of March 13, 1953, Executive Order 10461 of June 17, 1953, and Executive Order 10480 of August 14, 1953, it is hereby ordered:

1. There is established in the Office of Defense Mobilization the position of Assistant Director for Financial Policy who shall:

a. Review and develop policies, procedures and criteria for the issuance of necessity certificates under section 124A of the Internal Revenue Code;

b. Review and develop policies, procedures and criteria for the issuance of certificates of essentiality in connection with section 302 of the Defense Production Act of 1950, as amended;

c. Review and develop financial policies, procedures and criteria for the installation of Government-owned facilities in Government-owned or private plants as authorized under section 303 of the Defense Production Act of 1950, as amended;

d. Review and develop financial policies, procedures and criteria for the exploration of strategic and critical minerals and metals as authorized under section 303 of the Defense Production Act of 1950, as amended;

e. Review and develop financial policies, procedures and criteria concerning the use of stockpile funds in collaboration with the Assistant Directors for Materials and Production Requirements and Programs;

f. Direct and coordinate the financial policies of the programs for the expansion of defense production and capacity as authorized by the Defense Production Act of 1950, as amended;

g. Review, develop and coordinate financial policies, procedures and criteria in collaboration with the Assistant Directors for Materials and Production Requirements and Programs to promote the most effective use of necessity certificates, certificates of essentiality, and contractual arrangements under section 303 of the Defense Production Act of 1950, as amended, and Public Law 520 with a view to securing the needed expansion of productive capacity or supply at minimum cost to the Treasury in the light of the exigencies of the mobilization program;

h. Through the General Counsel, consult with officials of the Department of Justice regarding the application of the antitrust provisions of section 708 (e) of the Defense Production Act of 1950, as amended; and

i. Maintain adequate records to reflect the activities outlined above and furnish reports as required by the Director.

2. In order to carry out the foregoing, there is hereby delegated to the Assistant Director for Financial Policy authority necessary to:

a. Approve borrowings from the Treasury of the United States under section 304 (b) of the Defense Production Act of 1950, as amended;

b. Perform the functions of the Director as the Certifying Authority under section 124A of the Internal Revenue Code;

c. Perform the functions of the Director under sections 301, 302 and 304 of Title III of the Defense Production Act of 1950, as amended;

d. Certify expansion programs approved by the Assistant Director for Materials or the Assistant Director for Production Requirements and Programs under section 303 of the Defense Production Act of 1950, as amended;

e. Perform the functions of the Director of reviewing loan applications in regard to which certificates of essentiality have been issued but on which the Secretary of the Treasury or the Export-Import Bank are unable to obtain acceptable loan terms and conditions; and

f. Perform the functions of the Director as the Certifying Authority under section 450 of the Internal Revenue Code concerning exemptions from excess profits taxes on certain materials upon the advice and recommendation of the Assistant Director for Materials.

3. The Assistant Director for Financial Policy may, at his discretion, delegate any of his functions or authority to other officials of his division.

4. This order shall take effect on November 5, 1953.

OFFICE OF DEFENSE MOBILIZATION,
ARTHUR S. FLEMMING,
*Director.*

[F. R. Doc. 53-10043; Filed, Nov. 25, 1953; 4:45 p. m.]

[General Administrative Order IV-1]

ESTABLISHING THE POSITION OF ASSISTANT DIRECTOR FOR MANPOWER

By virtue of the authority vested in me by the National Security Act of 1947, as amended; Reorganization Plan No. 3 of 1953; the Defense Production Act of 1950, as amended; Executive Order 10438 of March 13, 1953; Executive Order 10461 of June 17, 1953; and Executive Order 10480 of August 14, 1953, it is hereby ordered:

1. There is established in the Office of Defense Mobilization the position of Assistant Director for Manpower who will be the principal advisor to the Director in regard to the formulation and execution of manpower policies and the development of supply and requirements for manpower relative to defense mobilization programs.

2. The Assistant Director for Manpower shall coordinate the development and execution of manpower policies and programs by appropriate departments and agencies of the Executive Branch. Specifically, he will provide the leadership and direction to these departments and agencies necessary to increase the nation's potential for partial and full mobilization through maximum use of its manpower resources by:

a. Determining and evaluating the availability of manpower for meeting the current and potential requirements of the armed forces and supporting civilian economy, including programs for safeguarding and strengthening the national security. This includes developing manpower information and policy for the setting of industrial expansion and production goals and for the distribution of procurement and of production facilities to permit the maximum utilization of manpower.

b. Collecting and evaluating the manpower requirements of principal claimant agencies such as the Department of Defense, Atomic Energy Commission, Federal Civil Defense Administration, and for developing measures to meet these requirements in the event of full mobilization.

c. Integrating research activities relative to improving the techniques for determining manpower resources and requirements.

d. Developing policies for assuring an adequate supply of manpower with critical skills, including craftsmen, scientists, engineers and other highly trained workers, to meet current and potential requirements of the armed forces, other national security units and the supporting civilian economy.

e. Developing, in collaboration with management and labor, the necessary measures for expanding, stabilizing, and effectively using our total manpower resources in the event of full mobilization.

f. Developing plans for an effective manpower organization consistent with the over-all administrative organization for full mobilization.

g. In performing these functions, the Assistant Director for Manpower will consult with and receive the advice of all government agencies having manpower responsibilities and to the extent practicable from leaders in the fields of management, labor, science, engineering, and education. On the formal level, this consultation will be through such arrangements as the ODM Committee on Specialized Personnel, the interagency Manpower Policy Committee, and the National Labor-Management Manpower Policy Committee, the Assistant Director for Manpower serving as Chairman or Co-chairman of such committees. In dealing with manpower problems of defense procurement and the location or expansion of production facilities, he will chair interagency committees such as the Surplus Manpower Committee. He will develop such other arrangements for formal consultation as he finds necessary and desirable.

3. The Assistant Director for Manpower will be responsible for:

a. Providing the Assistant Director for Materials with data, guidance and assistance relative to manpower supply and requirements as they affect materials expansion programs.

b. Providing the Assistant Director for Production Requirements and Programs with data, guidance and assistance relative to manpower supply and requirements as they affect expansion programs other than materials.

c. Providing the Assistant Director for Stabilization with data, guidance and assistance relative to manpower supply and requirements as they affect mobilization planning for wage control, price control, rent control and other mobilization controls planning.

d. Providing the Assistant Director for Non-Military Defense with data, guidance and assistance relative to manpower supply and requirements as they affect the development of plans and policies for dealing with post-attack industrial rehabilitation and production problems.

e. Providing the staff member designated by the Director with manpower data needed by the Director for the performance of his functions as a member of the National Security Council.

4. The Assistant Director for Manpower shall maintain adequate records to reflect the activities outlined above and furnish reports as required by the Director.

5. This order shall take effect on November 5, 1953.

OFFICE OF DEFENSE MOBILIZATION,
ARTHUR S. FLEMMING,
*Director.*

[F. R. Doc. 53-10044; Filed, Nov. 25, 1953; 4:45 p. m.]

---

[General Administrative Order V-1]

ESTABLISHING THE POSITION OF ASSISTANT DIRECTOR FOR MATERIALS

By virtue of the authority vested in me by the National Security Act of 1947, as amended, pursuant to and by Reorganization Plan No. 3 of 1953; the Defense Production Act of 1950, as amended; and Executive Order 10438 of March 13, 1953, Executive Order 10461 of June 17, 1953 and Executive Order 10480 of August 14, 1953, it is hereby ordered:

1. There is established in the Office of Defense Mobilization the position of Assistant Director for Materials who shall be responsible for the functions of the Director in regard to the determination of the adequacy of materials [1] required to meet defense and stockpile needs and for the development of materials expansion and procurement programs. He will be responsible for obtaining data relative to supplies controls and procurement from agencies charged with these responsibilities and for the determination of the procedures and methods to be followed by agencies of the Government to effectuate such programs. He will receive requirements data from the Assistant Director for Production Requirements and Programs.

2. In order to carry out the foregoing, there is hereby delegated to the Assistant Director for Materials authority necessary to:

a. Approve and certify for implementation by the Assistant Director for Financial Policy programs and goals for the expansion of materials production which require government incentives in the form of the amortization deduction under section 124A of the Internal Revenue Code.

b. Approve and recommend for certification by the Assistant Director for Financial Policy to the General Services Administrator programs for the expansion of materials production involving Government loans under section 302 of the Defense Production Act of 1950, as amended.

c. Approve and recommend for certification by the Assistant Director for Financial Policy to the General Services Administrator defense materials expansion programs authorizing and directing purchase or commitments to purchase metals, minerals and other materials and to the Secretary of Agriculture authorizing and directing purchase or commitments to purchase food and plant fibers (except abaca), for Government use or resale under section 303 of the Defense Production Act of 1950, as amended.

d. Approve and recommend for certification by the Assistant Director for Financial Policy to the General Services Administrator programs for the development and mining of critical and strategic minerals and metals under section 303 of the Defense Production Act of 1950, as amended.

e. Approve and recommend for certification by the Assistant Director for Financial Policy to the Secretary of the Interior programs for the exploration of critical and strategic minerals and metals under section 303 of the Defense Production Act of 1950, as amended.

f. Approve and recommend for certification by the Assistant Director for Financial Policy to the General Services Administrator programs for the installation of additional equipment, facilities, processes or improvements to plants, factories, and other industrial facilities owned by the United States Government, and to install government-owned equipment in plants, factories, and other in-

[1] The term "materials" as used herein is defined in Appendix I to this order.

dustrial facilities owned by private persons to the extent required for continued or increased materials production.

g. Perform the functions of the Director in making the findings as authorized by and subject to the provisions of section 303 (c) of the Defense Production Act of 1950, as amended, relating to subsidy payments on domestically produced materials, and in approving and recommending for certification by the Assistant Director for Financial Policy to the General Services Administrator programs for such subsidy payments.

h. Perform the functions of the Director in authorizing the transfer of metals, minerals and materials acquired pursuant to the provisions of section 303 of the Defense Production Act of 1950, as amended, to the national stockpile.

i. Designate for certification by the Assistant Director for Financial Policy to the Secretary of the Treasury minerals essential to the defense effort of the United States which have not been normally produced in appreciable quantities in the United States within the meaning and purposes of section 450 of the Internal Revenue Code, relating to exemptions from the excess profits tax.

j. Perform the functions of the Director under the Strategic and Critical Materials Stock Piling Act, as amended (50 U. S. C. 98, et seq.), including the determination required by item (2) of section 6 (a) of said act, authorizing the Director to determine that certain materials surplus to the needs of the owning agency and transferable to the stockpile are not available in appreciable quantities or cannot economically be converted to warrant such transfer.

k. Advise the Assistant Director for Production Requirements and Programs as to the need for priority directives in the materials area relative to stockpile procurement.

l. Perform the functions of the Director under section 4 (h) of the Commodity Credit Corporation Act, as amended (15 U. S. C. 714b (h)), relating to transfers to the stockpile of strategic and critical materials acquired in exchange for agricultural commodities.

m. Perform the functions of the Director under section 201 (e) of the Federal Property and Administrative Services Act of 1949 (40 U. S. C. 485 (e)), in determining whether a material is strategic and critical and hence acceptable in lieu of cash as payment under certain contracts.

n. Establish policies and procedures and review for implementation by the agencies charged with maintaining plants, equipment and industries for the production of materials in such condition that they can quickly reach their maximum output potentials in time of war.

o. Provide technical guidance, assistance and advice to the Assistant Director for Production Requirements and Programs with regard to supply balances in the materials area.

3. In performing the functions of the Director under paragraph (j) above in regard to the Strategic and Critical Materials Stock Piling Act, as amended (50 U. S. C. 98, et seq.), the Assistant Director for Materials shall consult with and obtain the advice and recommendation of the Assistant Director for Production Requirements and Programs.

4. To the extent that the exercise of any of the above authorities entails the use of Government funds or financial incentives, the Assistant Director shall also obtain the advice and recommendation of the Assistant Director for Financial Policy.

5. The Assistant Director for Materials shall provide to the Assistant Director for Manpower information relative to defense materials programs necessary for the determination of manpower requirements and policy.

6. The Assistant Director for Materials shall maintain adequate records to reflect the activities outlined above and furnish reports as required by the Director.

7. Through the General Counsel, the Assistant Director for Materials shall consult with officials of the Department of Justice regarding the application of the antitrust provisions of section 708 (e) of the Defense Production Act of 1950, as amended.

8. This order shall take effect on November 5, 1953.

OFFICE OF DEFENSE MOBILIZATION,
ARTHUR S. FLEMMING,
*Director.*

APPENDIX 1

The Assistant Director for Materials will be responsible for all materials, minerals, and fibers, except the following, which will be the responsibility of the Assistant Director for Production Requirements and Programs:

a. All iron and steel products other than pig iron and steel ingot.

b. All copper products other than electrolytic and fire refined ingot.

c. All aluminum products other than ingot and basic shapes.

d. Petroleum, petroleum products, and natural gases.

e. Textiles, including synthetics (all fibers, including cordage, are the responsibility of the Assistant Director for Materials).

f. Cement.

[General Administrative Order VI-1]

ESTABLISHING THE POSITION OF ASSISTANT DIRECTOR FOR NON-MILITARY DEFENSE

By virtue of the authority vested in me by the National Security Act of 1947, as amended, pursuant to and by Reorganization Plan No. 3 of 1953; the Defense Production Act of 1950, as amended; and Executive Order 10421 of December 31, 1952, Executive Order 10438 of March 13, 1953, Executive Order 10461 of June 17, 1953, and Executive Order 10480 of August 14, 1953, it is hereby ordered:

1. There is established in the Office of Defense Mobilization the position of Assistant Director for Non-Military Defense. Non-military defense includes the over-all national security measures taken by civilian agencies to (1) minimize the effects of enemy attack on cities, industry and government; (2) assure continuity of essential production and governmental functions in event of attack; and (3) deal with conditions resulting from attack and restore the industrial, governmental and community facilities to support the national security. The Assistant Director shall:

a. Develop the broad features of the total non-military defense system and coordinate the policies and programs of the Federal agencies concerned;

b. Determine policies and standards for use of Federal agencies in assisting the systematic reduction of vulnerability of urban target areas;

c. Determine policies and standards for use of Federal agencies in carrying out essential functions of government in event of attack;

d. Determine policies and standards in collaboration with the Assistant Directors for Financial Policy, Manpower, Materials, Production Requirements and Programs, and Stabilization for use of Federal agencies in carrying out programs to assure the continuity of essential production in event of attack;

e. Perform the functions of the Director in establishing policies and standards for rating critical facilities and the review and approval of such ratings under Executive Order 10421;

f. Perform the functions of the Director in utilizing the services of the Facilities Protection Board, establishing policies and standards for physical security and assigning rated facilities to the cognizance of appropriate agencies under Executive Order 10421;

g. Review and evaluate the non-military defense activities of all Federal agencies and prepare reports on their status and recommendations for their continued improvement; and

h. Maintain close relationship with military defense and internal security agencies on matters affecting continental defense.

2. The Assistant Director for Non-Military Defense shall maintain adequate records to reflect the activities outlined above and furnish reports as required by the Director.

3. This order shall take effect on November 5, 1953.

OFFICE OF DEFENSE MOBILIZATION.
ARTHUR S. FLEMMING,
*Director*

[F. R. Doc. 53-10046; Filed, Nov. 25, 1953; 4:46 p. m.]

[General Administrative Order VII-1]

ESTABLISHING THE POSITION OF ASSISTANT DIRECTOR FOR PRODUCTION REQUIREMENTS AND PROGRAMS

By virtue of the authority vested in me by the National Security Act of 1947, as amended, pursuant to and by Reorganization Plan No. 3 of 1953; the Defense Production Act of 1950, as amended; and Executive Order 10438 of March 13, 1953, Executive Order 10480 of June 17, 1953 and Executive Order 10480 of August 14, 1953, it is hereby ordered:

1. There is established in the Office of Defense Mobilization the position of Assistant Director for Production Requirements and Programs. For purposes of both current and full mobilization, he shall be responsible for; determining and evaluating over-all requirements for all defense materials and productive facilities and end items; the development of policies and procedures for the most effective allocation and utilization of available resources; the determination of the adequacy of facilities needed to meet defense production, other than materials[1] production; the development of programs for the expansion of defense production, other than materials; and offer advice and technical assistance in regard to the evaluation of the over-all feasibility of all expansion programs and evaluate the feasibility of all production programs.

2. The Assistant Director for Production Requirements and Programs shall:

a. Develop and evaluate current and full mobilization requirements for all defense materials, productive facilities and end items in such form and substance as needed for the conduct of current programs and the determination of expansion goals. In doing so, he will review military logistics programs, will determine appropriate and balanced end item production programs, feasible and necessary to carry out military mobilization planning and to supply war-supporting industries, friendly foreign countries, and the civilian population. In connection with this function he will develop the economic frame of reference within which all agencies will work out their proposed mobilization production programs, including the setting of assumptions, guidelines, etc., of an economic character to be observed by all agencies uniformly.

b. For purposes of evaluating supply-requirements balances for the most effective allocation of resources under current or full-mobilization, obtain data on availability of resources (except manpower) within the domestic economy and by import from friendly foreign nations.

c. For purposes of identifying areas in which expansion is required (except materials) obtain data on availabilities of resources within the domestic economy and by import from friendly foreign nations. He will assure that programs are developed to maintain the mobilization base; to identify, measure and erase critical gaps.

d. Develop policies and coordinate the work done by other Government agencies in preparing orders and regulations (in the Production Area) for use in time of war. These orders and regulations will cover the distribution of all scarce resources (except manpower) among all users in time of war and will include draft orders with respect to the kinds of production which may or which may not be undertaken in time of war.

e. Act as central point for requesting, developing, reviewing and disseminating requirements data (except manpower) on the military and atomic energy programs.

[1] The term "materials" as used herein is defined in Appendix I to this order.

f. On behalf of the Director, participate in periodic reviews of the military, AEC and other national security budget proposals.

g. Provide technical guidance, assistance, and advice to the Assistant Director for Materials in regard to supply-requirements balances in the materials area.

h. In discharging these responsibilities, he will obtain wide participation of Government agencies, industry, agriculture, labor and the public.

i. Establish policies and procedures and review their implementation by the agencies charged with maintaining plants, equipment and industries (except for materials production facilities), in such condition that they can quickly reach their maximum output potentials in time of war.

3. In order to carry out the foregoing, there is hereby delegated to the Assistant Director for Production Requirements and Programs authority necessary to:

a. Administer on behalf of the Director the priorities and allocations authority under Title I of the Defense Production Act of 1950, as amended.

b. Approve and certify for implementation by the Assistant Director for Financial Policy programs and goals for the expansion of defense production, other than materials, which require government incentives in the form of the amortization deduction under section 124A of the Internal Revenue Code.

c. Approve and recommend for certification by the Assistant Director for Financial Policy to the General Services Administrator the program for the expansion of defense production, other than materials, involving Government loans under section 302 of the Defense Production Act of 1950, as amended.

d. Approve and recommend for certification by the Assistant Director for Financial Policy to the General Services Administrator the defense expansion programs, other than materials, authorizing and directing purchase or commitments to purchase under section 303 of the Defense Production Act of 1950, as amended.

e. Approve and recommend for certification by the Assistant Director for Financial Policy to the General Services Administrator the programs for the installation of additional equipment, facilities, processes, or improvements to plants, factories and other industrial facilities, owned by private persons to the extent required for continued or increased defense production, other than materials.

f. Perform the functions of the Director in making the findings as authorized by and subject to the provisions of section 303 (c) of the Defense Production Act of 1950, as amended, relating to subsidy payments on domestic production, other than materials, and in approving and recommending for certification by the Assistant Director for Financial Policy to the General Services Administrator the programs for such subsidy payments.

g. Perform the functions of the Director in regard to obtaining reports and making determinations relative to idle Government-owned production equipment and machine tools and advise the Director relative to the need for policy changes or directives relative to the activities required.

4. In performing the functions of the Director under Title I of the Defense Production Act of 1950, as amended, in the exercise of the priorities and allocations authority, the Assistant Director for Production Requirements and Programs shall consult with and obtain the advice and recommendation of the Assistant Director for Materials.

5. To the extent that the exercise of any of the foregoing authorities entails the use of Government funds or financial incentives, the Assistant Director shall also obtain the advice and recommendation of the Assistant Director for Financial Policy.

6. The Assistant Director for Production Requirements and Programs shall provide to the Assistant Director for Manpower information relative to mobilization requirements and defense production programs necessary to the determination of manpower requirements and policies.

7. The Assistant Director for Production Requirements and Programs shall maintain adequate records to reflect the activities outlined above and furnish reports as required by the Director.

8. Through the General Counsel, the Assistant Director for Production Requirements and Programs shall consult with officials of the Department of Justice regarding the application of the antitrust provisions of section 708 (e) of the Defense Production Act of 1950, as amended.

9. This order shall take effect on November 5, 1953.

OFFICE OF DEFENSE MOBILIZATION,
ARTHUR S. FLEMMING,
*Director.*

APPENDIX I

The Assistant Director for Materials will be responsible for all materials, minerals, and fibers, except the following, which will be the responsibility of the Assistant Director for Production Requirements and Programs:

a. All iron and steel products other than pig iron and steel ingot.

b. All copper products other than electrolytic and fire refined ingot.

c. All aluminum products other than ingot and basic shapes.

d. Petroleum, petroleum products, and natural gases.

e. Textiles, including synthetics (all fibers, including cordage, are the responsibility of the Assistant Director for Materials).

f. Cement.

[General Administrative Order VIII-1]

ESTABLISHING THE POSITION OF ASSISTANT DIRECTOR FOR STABILIZATION

By virtue of the authority vested in me by the National Security Act of 1947, as amended, pursuant to and by Reorganization Plan No. 3 of 1953; the Defense Production Act of 1950, as amended; and

Executive Order 10438 of March 13, 1953, Excutive Order 10461 of June 17, 1953, and Executive Order 10480 of August 14, 1953, and in order to provide, as an integral part of general mobilization preparedness, for the development of a coordinated stabilization program in the event of an emergency, it is hereby ordered:

1. There is established in the Office of Defense Mobilization the position of Assistant Director for Stabilization who will be the principal advisor to the Director on all stabilization policy questions which may arise.

2. The responsibilities of the Assistant Director for Stabilization shall include:

a. Developing a balanced stabilization program, including both direct and indirect measures that would be required in a national emergency, including wage, price and rent controls, and rationing; in developing stabilization plans he shall work with other agencies of the government;

b. Reviewing and improving techniques for control programs to reduce the hardship and burdens of controls to the greatest extent consistent with an effective stabilization program;

c. Advising on the integration of stabilization plans with other mobilization plans, e. g., materials and production controls, manpower policies, military procurement, and non-military defense plans;

d. Maintaining adequate records to reflect the activities outlined above and furnish reports as required by the Director.

3. The Assistant Director for Stabilization may at his discretion delegate any of his functions or authority to other officials of his area.

4. This order shall take effect on November 5, 1953.

OFFICE OF DEFENSE MOBILIZATION,
ARTHUR S. FLEMMING,
*Director.*

[F. R. Doc. 53-10048; Filed, Nov. 25, 1953; 4:47 p. m.]

[General Administrative Order IX-1]

ESTABLISHING THE POSITION OF ASSISTANT DIRECTOR FOR TELECOMMUNICATIONS

By virtue of the authority vested in me by Executive Order 10312 of December 10, 1952, Executive Order 10438 of March 13, 1953, Executive Order 10460 of June 17, 1953, and Executive Order 10461 of June 17, 1953, it is hereby ordered:

1. There is established in the Office of Defense Mobilization the position of Assistant Director for Telecommunications who shall assist, advise and act for the Director with respect to the following described telecommunication functions and such other telecommunication functions as the Director may designate in order to provide for the formulation, planning and coordination of federal policies, programs, and actions dealing with national telecommunication matters:

a. Coordinating the development of telecommunications policies and standards applying to the executive branch of the Government;

b. Developing high standards governing telecommunications management within the executive branch of the Government;

c. Coordinating the development by the several agencies of the executive branch of telecommunications plans and programs designed to assure maximum security to the United States in time of national emergency with a minimum interference to continuing nongovernmental requirements;

d. Assisting and advising the President with respect to the assignment of radio frequencies to Government agencies under the provisions of section 305 of the Communications Act of 1934, as amended (47 U. S. C. 305), and establishing policies and procedures governing such assignments and their continued use;

e. Developing United States Government frequency requirements; and

f. Approving plans relating to the control of electromagnetic radiation (Conelrad).

2. The Interdepartment Radio Advisory Committee (IRAC) shall in the future report to and assist the Director of the Office of Defense Mobilization through the Assistant Director for Telecommunications.

3. The Assistant Director for Telecommunications shall maintain adequate records to reflect the activities outlined above and furnish reports as required by the Director.

4. This order shall take effect on November 5, 1953.

OFFICE OF DEFENSE MOBILIZATION,
ARTHUR S. FLEMMING,
*Director.*

## SECURITIES AND EXCHANGE COMMISSION

[File No. 70-3075]

COLUMBIA GAS SYSTEM, INC., ET AL.

SUPPLEMENTAL ORDER EXTENDING DATE FOR CONSUMMATION OF MERGER

NOVEMBER 23, 1953.

In the matter of the Columbia Gas System, Inc., Cumberland and Allegheny Gas Company, and the Manufacturers Light and Heat Company; File No. 70-3075.

The Commission on October 5, 1953, having entered an order herein authorizing certain steps to be taken by the applicants, the Columbia Gas System, Inc. ("Columbia"), a registered holding company, and its wholly-owned public-utility subsidiaries Cumberland and Allegheny Gas Company ("Cumberland") and the Manufacturers Light and Heat Company ("Manufacturers"), for the purpose of merging Cumberland into Manufacturers; and

The applicants on November 13, 1953, having filed an amended application-declaration requesting that the time for the consummation of said merger be extended to June 1, 1954, in order to allow time for the conclusion of pending rate proceedings of Cumberland and Manufacturers prior thereto; and

The Commission finding it appropriate in the public interest and in the interest of investors and consumers that the extension be granted as requested:

*It is ordered*, That the effective date for consummation of the proposed merger of Cumberland into Manufacturers as heretofore authorized be, and the same hereby is, extended to June 1, 1954.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
*Secretary.*

## UNITED STATES TARIFF COMMISSION

[Investigation No. 30]

FLUORSPAR, ACID GRADE

NOTICE OF INVESTIGATION DISCONTINUED AND DISMISSED

Upon request filed in behalf of the applicants, the United States Tariff Commission discontinued and dismissed the investigation instituted on October 29, 1953, under section 7 of the Trade Agreements Extension Act of 1951, as amended, and section 332 of the Tariff Act of 1930, with respect to fluorspar, containing more than 97 per centum of calcium fluoride, provided for in paragraph 207 of the Tariff Act of 1930. Notice of the institution of the investigation was published in 18 F. R. 6979.

I certify that the action by the Tariff Commission was taken on November 23, 1953.

Issued: November 24, 1953.

[SEAL] DONN N. BENT,
*Secretary.*

Livestock—Continued
Standards, carcass and live animal. *See* Meat and meat products.
Marketing orders, for certain commodities. *See* Citrus fruits; Filberts; Peaches; Pecans; Plums; Potatoes; *and* Walnuts.
Marketing quotas, for various agricultural commodities. *See* Corn; Cotton; Rice; Tobacco; *and* Wheat.
Marmalade, orange. *See* Citrus fruits.
Meat and meat products; standards, carcass and live animals:
Pork carcasses; barrow and gilt, proposed rule making 8207
Swine; slaughter barrows and gilts, proposed rule making 8207
Milk, cream, and byproducts; marketing in various marketing and sales areas:
Arkansas; Fort Smith 8671
Illinois:
Chicago 8671
Rockford-Freeport 8671
Indiana; South Bend-La Porte 8671
Kansas:
Neosho Valley area 8671
Wichita 8671
Kentucky:
Ashland (Tri-State) 8671
Louisville 8671
Paducah 8671
Michigan:
Detroit 8671
Muskegon 8671
Minnesota; Minneapolis-St Paul 8671
Missouri:
Kansas City (Greater) 8671, 8673
Neosho Valley area 8671
St. Louis 8671
Springfield 8671
New York; New York metropolitan area 8444, 8674
Ohio:
Cincinnati 8671, 8721
Cleveland 8671
Columbus 8671
Dayton-Springfield 8671
Lima 8671
Marietta, Ironton, Gallipolis, etc. (Tri-State) 8671
Stark County 8178, 8671
Toledo 8671, 8872
Oklahoma:
Oklahoma City 8671
Tulsa-Muskogee 8671
Pennsylvania; Philadelphia 8176, 7675
Tennessee:
Knoxville 8671
Memphis 7643, 8671
Nashville 8671
Texas:
North Texas 8671
San Antonio 8585, 8671, 8820
Washington; Puget Sound 8090, 8671, 8819
West Virginia; Huntington and Parkersburg (Tri-State) 8671
Wisconsin; Milwaukee 8671
Mixed vegetables:
*See also* Vegetables.
Standards, for frozen mixed vegetables 8070
Mushrooms:
*See also* Vegetables.
Standards, for canned mushrooms 8011
Nuts:
Marketing of nuts grown in various States. *See* Filberts; Pecans; *and* Walnuts.
Standards, for shelled English walnuts. *See* Walnuts.
Oils:
Grading, inspection, and certification of olive oil 7904
Standards, for olive oil 8014
Okra:
*See also* Vegetables.
Standards, for frozen okra 8013
Oranges and products. *See* Citrus fruits.

**AGRICULTURE DEPARTMENT—Continued** Page

Packers and Stockyards Division:
Rules and regulations under Packers and Stockyards Act; revision proposed, extension of time for submitting data, etc 7825
Stockyards, commission merchants, etc., notices respecting posting:
Cook Brothers Livestock Commission Market 7663
Holton Brothers Stock Yards 7659
Hoover, Jim, Sales Pavilion 7663
Idaho Stockyards 7659
Memphis Union Stock Yards 7877
Parsnips, fresh; consumer standards, proposed rule making 8871
Peaches:
*See also* Fruits and berries.
Marketing of peaches grown in Georgia 7895
Pears:
*See also* Fruit and berries.
Standards, for canned pears 8019
Peas:
*See also* Vegetables.
Standards, for field peas and black-eye peas:
Canned peas 8027
Frozen peas 8028
Pecans grown in Georgia, Alabama, Florida, Mississippi, and South Carolina, marketing of 8129
Pineapple and juice:
*See also* Fruits and berries.
Standards:
Pineapple:
Canned 8033
Frozen 8037
Pineapple juice, canned 8040
Plums:
*See also* Fruits and berries.
Marketing of plums grown in California 8873
Standards, for canned plums 8041
Potatoes:
*See also* Vegetables.
Marketing of Irish potatoes grown in various States:
California (Modoc and Siskiyou Counties); limitation of shipments 7844, 8567, 8674, 8720
Idaho (certain designated counties); limitation of shipments 8720
Oregon:
Crook, Deschutes, Jefferson, Klamath, and Lake Counties; limitation of shipments 7844, 8567, 8674, 8720
Malheur County; limitation of shipments 8720
Standards:
Canned white potatoes 8044
Fresh white potatoes; proposed rule making 8732
Preserves and jams. *See* Fruit preserves and jams.
Puerto Rico, agricultural conservation, 1954 8627
Raisins:
*See also* Fruits and berries.
Standards, for processed raisins 8046
Raspberries:
*See also* Fruits and berries.
Standards, for frozen raspberries 8050
Rice; marketing quotas, acreage allotments, etc., 1954 crop, proposed 8121
Spinach:
*See also* Vegetables.
Standards:
Canned spinach 8053
Frozen spinach 8055
Squash:
*See also* Vegetables.
Standards:
Frozen cooked squash 8056
Frozen squash (summer type) 8058
Stockyards, orders, etc., respecting. *See* Packers and Stockyards Division.
Strawberries:
*See also* Fruits and berries.
Standards, for frozen strawberries 8059
Succotash:
*See also* Vegetables.
Standards, for frozen succotash 8063

Sugar:
Consumption requirements and quotas:
Continental United States; consumption requirements and quotas:
*See also* Quotas, *below*.
Allotment of sugar quotas:
Domestic beet sugar area, 1954; proposed rule making 8175
Mainland cane sugar area:
1953; revision 7842, 8818
1954 8175, 8886
Consumption requirements, for 1954 8257
Entry of sugar into. *See* Entry of sugar.
Entry of sugar into continental United States; ex-quota, for refining and return to Custom's custody 7898, 8706
Hawaii; consumption requirements and quotas:
*See also* Quotas, *below*.
Local consumption requirements for 1954 8564
Puerto Rico; consumption requirements and quotas:
*See also* Quotas, *below*.
Local consumption requirements, for 1954 8562
Quotas, and proration of quota deficits, for domestic area (Hawaii, Puerto Rico, Virgin Islands, and continental United States), and for Cuba, Republic of Philippines and other foreign countries; 1954 quota 8257, 8563, 8747
Prices; sugarcane:
Puerto Rico, 1953–54 crop 8887
Virgin Islands, 1954 crop 8818
Quotas. *See* Consumption requirements and quotas.
Wage rates; sugar beets, 1954 crop California, Southwestern Arizona, Southern Oregon and Western Nevada 8474
Sweetpotatoes:
*See also* Vegetables.
Standards, for canned sweetpotatoes 8065
Tangerines and products. *See* Citrus fruits.
Tobacco; marketing quotas, acreage allotments, etc., 1954–55 marketing year:
Burley and flue-cured tobacco; apportionment of quotas among States 7653
Cigar filler, and cigar-filler and binder tobacco; referendum results 8474
Fire-cured, dark air-cured and Virginia sun-cured; apportionment of quotas among States 7563
Maryland tobacco; referendum results 8473
Tomato products; standards:
Chili sauce 8075
Tomato catsup 8069
Vegetables:
Grading, inspection, and certification of processed vegetables 7904
Marketing of Irish potatoes. *See* Potatoes.
Standards, for various fresh and processed vegetables. *See* Asparagus; Beans, dried, canned; Beans, lima; Beans, snap; Broccoli; Brussels sprouts; Carrots; Cauliflower; Cucumbers; Greens; Mixed vegetables; Mushrooms; Okra; Parsnips; Peas; Potatoes; Spinach; Squash; Succotash; Sweetpotatoes; *and* Tomato products.
Walnuts:
Marketing of walnuts grown in California, Oregon and Washington 8260
Standards, for shelled English walnuts; proposed rule making 8583
Wheat:
Export program, wheat and wheat flour—International Wheat Agreement; terms and conditions of Commodity Credit Corporation program, 1953–54, general conditions of eligibility 8715
Marketing quota, acreage allotments, etc., determination of county normal yields, 1954 crop 8585, 8885

**AIR FORCE DEPARTMENT:**
Aircraft:
Danger areas over military installations, designation in coordination with Air Force. *See main heading* Civil Aeronautics Administration.
Transportation by aircraft, joint regulations respecting. *See main heading* Defense Department.

**AIR FORCE DEPARTMENT—Continued** Page
Authority, delegation of, from Secretary of Defense; reassignments of real property 7645
Claims against United States, arising from activities of Military Assistance Advisory Groups; authority of Foreign Claims Commission of Department respecting settlement 8513
Reserve forces:
Enlisted Reserve, cross reference respecting short or special tours of active duty 8307
Officers' Reserve:
Appointment of officers in Regular Air Force 8301
Short and special tours of active duty 8304
Transportation by aircraft, joint regulations respecting. *See main heading* Defense Department.

**ALASKA GAME COMMISSION:**
Fur management areas, proposed rule making 8732
Guides, employment of, and qualifications for guide licenses; proposed rule making 8732
Licenses:
Guides. *See* Guides.
Resident trapping, hunting and fishing; proposed rule making 8732
Poisons prohibited in killing of game, fur animals, and birds; possession, sale, use, etc., proposed rule making 8732
Special permits for hunting mountain sheep, bison, elk, and moose; proposed rule making 8732

**ALIEN PROPERTY, OFFICE OF:**
Claims, rules of procedure for: substitution of term, Chief of Claims Section, for reference to, Chief of Claims Branch, in various provisions 8476
Organization statement and delegations of final authority 7895
Authority 7896
Establishment and direction 7895
Form of signature 7897
Information 7897
Organization 7896
Vesting orders, etc.; return of vested property, notices respecting:
Aldobrandini, Clemente and Ferdinando 8668
Bandettini di Poggio, Adolfo, Alfonso, and Ubaldo 8669
Barstow, John Montagu Orczy 8668
Barstow-Orczy, Emmuska 8669
Bradley, Mrs. William Aspenwall 8668
Carisio, Bice Viale 8669
di Poggio, Adolfo, Alfonso, and Ubaldo Bandettini 8669
Ficken, Lueder 8668
Kompaneizeff, Jacob 8668
Lobstein, Jean Alexandre 7645
Oliva, Elisa Viale 8669
Orczy-Barstow, John Montagu 8668
Psichari, Lucien 8737
Refsdal, Anfinn 8669
Theodorsen, Olav Trygve 8668
Viale, Gorgio 8669

**ANIMAL INDUSTRY BUREAU:**
Animal breeds, recognition of breed and books of record; dogs 7825, 8635
Interstate transportation of animals and poultry, prohibition of movement of animals infected with vesicular exanthema; designation of areas in which swine are affected 8727

**ARMY DEPARTMENT:**
*See Engineers, Corps of.*
Aircraft:
Danger areas over military installations, designation in coordination with Army. *See main heading* Civil Aeronautics Administration.
Transportation by aircraft, joint regulations respecting. *See main heading* Defense Department.
Appointment of commissioned officers and warrant officers:
General eligibility requirements; age requirements:
Army Nurse Corps 8223
Women's Medical Specialist Corps 8223
Medical, Dental, Veterinary, Medical Service, Army Nurse, and Women's Medical Specialist Corps, appointment in:
Action within Department 8223
Age and special eligibility requirements 8222
Application 8223

**ARMY DEPARTMENT—Continued** Page
Appointment of commissioned officers and warrant officers—Continued
Medical, Dental, Veterinary, Medical Service, Army Nurse, and Women's Medical Specialist Corps, appointment in—Continued
Grade determination 8222
Service credit 8222
Attack conditions; plans and programs for transportation in preparation for attack conditions, under attack conditions, and in post-attack rehabilitation, responsibility of Secretary respecting 8133
Authority, delegation of, from Secretary of Defense; reassignments of real property 7646
Claims and accounts:
Bills and accounts, payment of, vouchers pertaining to money accounts; certification, vendor's certificate, rubber-stamp signatures 7655
Claims against United States, arising from activities of Military Assistance Advisory Groups; authority of Foreign Claims Commission of Department respecting settlement 8513
Disaster relief. *See* Relief assistance.
Nurse Corps, Army; appointment of commissioned officers and warrant officers in 8223
Procurement; Army procurement procedure:
Contract clauses and forms:
Clauses:
Cost-reimbursement type contracts:
Allowable cost, fixed-fee and payment; revocation 8203
Records, revocation 8203
Fixed-price supply contracts:
Clauses to be used when applicable; military security requirements, revocation 8203
Default, report of termination of contract 8203
Forms, approved:
Construction contracts, standard forms 7655
Security requirements check list, DD form 254 8203
Coordinated procurement, single department:
Execution and administration of contracts 8203
Preparation of procurement requests, instructions 8203
General provisions, basic policies; place of delivery, domestic shipments 8203
Relief assistance, disaster relief:
Army Department policies 8490
Engineers, Corps of 8490
Responsibility of armed forces 8490
Reserves, organized, Reserve Officers' Training Corps; training camps, transportation where legal residence and institution attended are in Puerto Rico, Alaska, or Hawaii 8698
Transportation:
By aircraft, joint regulations respecting. *See main heading* Defense Department.
In preparation for attack conditions, under attack conditions, and in post-attack rehabilitation; plans and programs, responsibility of Secretary respecting 8133
Women's Medical Specialist Corps, appointment of commissioned officers and warrant officers in 8223

B

**BUSINESS AND DEFENSE SERVICES ADMINISTRATION:**
Chapter designation 8111
Loan Guarantee Advisory Board, representation on 8148

Chapter redesignation 8111
Organization and functions 8907

C

**CANAL ZONE GOVERNMENT:**
Employment in Canal Zone; suspension of certain statutory provisions relating to (Executive Order 10502) 7667

**CENSUS BUREAU:**
Surveys, proposed:
Glass containers 7827
Lumber 7827

**CENSUS BUREAU—Continued** Page
Surveys, proposed—Continued
Power cranes and shovels 7827
Service trades; receipts of selected trades with supplementary information for motion picture theatres, hotels, motels and tourist courts, and laundry and cleaning establishments 7827
Steel mill products 7827
Wholesale trade survey of sales, cash-credit business, bad debt losses, operating expenses, and end-of-year receivables 7827

CHRISTMAS HOLIDAYS; excusing Federal employees from duty one-half day on December 24, 1953, and one-half day on December 31, 1953 (Executive Order 10508) 8221

**CIVIL AERONAUTICS ADMINISTRATION:**
Altitudes, instrument. *See* Instrument flight rules.
Approach procedures, standard instrument. *See* Instrument flight rules.
Civil airways, designation of:
Colored civil airways:
Blue civil airways 7816, 8173, 8869
Green civil airways 7815, 8173, 8867
Red civil airways 7815, 8173, 8867
VOR civil airways 7816, 8868
Control areas, control zones, and reporting points:
Control areas:
Colored civil airways:
Amber civil airways 7817, 8868
Blue civil airways 7817, 8869
Red civil airways 7817, 8868
Extension of control areas 7817, 8174, 8869
VOR civil airways 7818, 8869
Control zones:
Additional control zones 7817, 8174, 8869
Five-mile radius around various airports 8869
Reporting points:
Colored civil airways:
Amber civil airways 7818, 8869
Blue civil airways 7818, 8869
Green civil airways 7818, 8174, 8869
Red civil airways 7818, 8869
VOR reporting points, domestic 7818, 8174, 8869
Danger areas over Army, Navy, and Air Force installations in New Jersey and Alaska:
Alaska 8567
New Jersey 8111
Instrument flight rules:
Instrument altitudes, minimum en route; particular routes:
Colored civil airways:
Amber civil airways 8174
Blue civil airways 7627, 8174, 8175, 8685
Green civil airways 7627, 8174, 8684
Red civil airways 7627, 8174, 8684
Direct routes; United States 8685
VOR civil airways 7627, 8175, 8685
Instrument approach procedures, standard:
Automatic direction finding procedures 7712, 7779, 8083, 8088, 8225, 8570
Ground controlled approach procedures 7754, 7781, 8086, 8226
Instrument landing system procedures 7732, 7779, 8084, 8089, 8225, 8571, 8636
Radio range procedures:
High frequency range procedures 7711
Low frequency range procedures 7674, 7778, 8081, 8087, 8224, 8568
Very high frequency omnirange procedures 7756, 7776, 7782, 8086, 8583, 8637

**CIVIL AERONAUTICS BOARD:**
Air carriers:
Foreign. *See* Foreign air carriers.
Irregular air carriers. *See* Irregular air carriers and off-route rules.
Reports, filing of. *See* Economic regulations.
Scheduled air carriers. *See* Scheduled air carriers.
Air taxi operators; classification and exemption. *See* Economic regulations.
Air traffic rules:
Certificate of waiver 7814
Conversion of speed and distance provisions to knots and nautical miles, proposed rule making 7659, 8600
Long distance domestic flight at certain altitudes; extension of authority (SR–396B) 8866

**CIVIL AERONAUTICS BOARD—Continued** Page

Airworthiness; requirements for various types of aircraft and equipment:
- Aircraft equipment:
  - Engine:
    - Certification; proposed rule making 8187
    - Turbine engines, block tests; endurance tests, proposed rule making 8188
  - Propeller:
    - Airworthiness; design and construction, reversible propellers, proposed rule making 8188
    - Certification; proposed rule making 8188
- Airplane:
  - Acrobatic category airplane. *See* Normal, utility, and acrobatic categories.
  - Normal, utility, and acrobatic categories:
    - Certification, proposed rule making 8182
    - Design and construction, fuselage; emergency provisions, fire precaution, proposed rule making 8183
  - Transport categories 8821
    - Design and construction 8840
      - Emergency provisions; emergency evacuation, proposed rule making 8184
      - Personnel accommodations; pilot compartment, controls, etc., proposed rule making 8184
    - Equipment 8857
      - Equipment, systems, and installations; power supply, proposed rule making 8185
      - Powerplant instruments; proposed rule making 8185
    - Flight 8824
    - General 8822
      - Certification; proposed rule making 8184
    - Operating limitations and information 8863
      - Airplane flight manual; operating procedures, editorial change, proposed 8185
    - Powerplant installation 8848
      - Fuel system operation and arrangement; determination of unusable fuel supply and fuel system operation on low fuel, proposed rule making 8185
      - Installation; propeller reversing system, proposed rule making 8185
    - Structure 8830
- Glider airworthiness; certification, proposed rule making 8185
- Rotorcraft airworthiness:
  - Certification, proposed rule making 8186
  - Flight; rotor limitations and pitch settings, proposed rule making 8187
  - Powerplant installation; rotor drive and control mechanism endurance tests, proposed rule making 8187

Economic regulations:
- Classification and exemption of air taxi operators; elimination of prohibition against using words "airways", "airlines", or "airline", in names 8080
- Reports, filing of, by certificated air carriers, and uniform accounting requirements:
  - Balance sheet accounts:
    - Current liabilities, accrued salaries and wages; proposed rule making 8622
    - Deferred credits, proposed rule making 8623
  - Operating revenue accounts; Federal subsidy 8612
  - Reporting procedures, changes in; proposed rule making 8622

Foreign air carriers, navigation of, within United States; authorization, extension of effective date 7654

Hearings, investigations, etc.; companies and cases, list of, *see list at end of this agency.*

Irregular air carrier and off-route rules:
- Aircraft equipment; radio equipment used in large airplanes, extension or time to meet installation requirements 8746
- Aircraft requirements; extension of date requiring nontransport category airplanes used in passenger operations to comply with standards other than those currently in effect 8747

**CIVIL AERONAUTICS BOARD—Continued** Page

Irregular air carrier and off-route rules—Continued
- C–46 type aircraft used for carriage of passengers for remuneration or hire; weight limitations to be determined in accordance with performance requirements of transport category aircraft, with certain exceptions (SR–391B), extension of effective date 7660, 8746
- Certificate rules; air taxi operator certificates, proposed rule making 8182
- Conversion of speed and distance provisions to knots and nautical miles, proposed rule making 7659, 8600
- Operating limitations, for large passenger-carrying airplanes; en route limitations, two engines inoperative, proposed rule making 8185
- "Star route" air carriers of mail, issuance of operating certificates to; special regulation, proposed 8247

Maintenance, repair, and alteration of airframes, powerplants, propellers, and appliances, for aircraft for which airworthiness certificates have been issued; performance rules standards, proposed note 8189

Navigation of foreign civil aircraft within United States; authorization. *See* Foreign air carriers.

Procedural regulations; economic proceedings, rule of practice in:
- Economic enforcement proceedings; substitution of term "Office of Compliance" for "Office of Enforcement", and term "Compliance Attorney" for "Enforcement Attorney" 8747
- General rules; subpenas, for testimony by Board personnel and production of Board records 7625

Scheduled air carriers:
- Interstate air carrier certification and operation rules (amendments proposed and, or adopted):
  - Airmen requirements:
    - Airman and crew member 8612
    - Flight crew and dispatcher 8612, 8682
  - Airplane performance operating limitations:
    - Nontrapsport category 8678, 8679
    - Transport category 8185, 8678
  - Airplane requirements (certification, limitation, and tests) 8611
  - Airworthiness requirements, special 8611
  - Certification rules and operations specifications 8607, 8609, 8676, 8678, 8866
  - Conversion of speed distance provisions to knots and nautical miles, proposed rule making 7659, 8600
  - Delegation of authority to Administrator to authorize compliance with revised Part 40 (effective April 1, 1954), in lieu of presently effective Parts 40 and 61 (SR–393B) 8866
  - Dispatching rules 8684
  - Effective date, postponement of 8865
  - Instruments and equipment:
    - All operations 8611
    - Radio equipment 8612
    - Special operations 8612
  - Long distance domestic flight at certain altitudes; extension of authority (SR–396B) 8866
  - Maintenance and inspection requirements 8612
  - Manual requirements 8609, 8611
  - Services and facilities 8609

Operations outside continental limits of United States:
- Conversion of speed and distance provisions to knots and nautical miles, proposed rule making 7659, 8600
- Nontransport category airplanes (type certificated prior to July 1, 1942), use of, for carriage of persons in scheduled or irregular service at maximum landing weight not exceeding maximum certificated take-off weight for passenger service, under certain conditions (SR–356A) 8745

Passenger operation rules; aircraft requirements, limitations:
- Aircraft certification limitations; elimination of requirement for certification in transport category after December 31, 1953 8743

**CIVIL AERONAUTICS BOARD—Continued** Page

Scheduled air carriers—Continued
- Operations outside continental limits of United States—Continued
  - Passenger operation rules; aircraft requirements, limitations—Continued
    - En route limitations; airplanes with four or more engines, two engines inoperative, proposed rule making 8185
    - Nontransport category airplane operating limitations 8743
- Operations within continental limits of United States:
  - Delegation of authority to Administrator to authorize compliance with revised Part 40 (effective April 1, 1954), in lieu of presently effective Parts 40 and 61 (SR–393B) 8866
  - Long distance domestic flight at certain altitudes; extension of authority (SR–396B) 8866
  - Rescission of Part; postponement of effective date 8867

**Hearings, investigations, etc.:**
- Air freight forwarder investigation 8251
- Allegheny Airlines, Inc 7647
- American Airlines, Inc 7664, 8103
- British Overseas Airways Corp 8252
- Charleston, W. Va., and Columbus, Ohio, case 8252
- Hawaiian Airlines, Ltd.; mail rates 7899, 8811
- Lake Central Airlines, Inc 7647
- New York-Balboa through service proceeding 7664
- North Central Airlines, Inc 7647, 8148
- Northeast Airlines, Inc 8124
- Ozark Airlines, Inc 7647
- Trans-Pacific Airlines, Ltd.; mail rates 8522, 8811
- Trans-Texas Airways 7828, 8123
- United Air Lines, Inc 8908

**CIVIL SERVICE COMMISSION:**

Allowances to Federal personnel on foreign duty. *See* Foreign duty of Federal personnel.

Appeals of preference eligibles under Veterans' Preference Act of 1944:
- Appeals to Commission 8227
- Notification of adverse decisions of administrative officers of agencies 8227

Appointment to positions excepted from competitive service. *See* Exceptions from competitive service.

Exceptions from competitive service, Civil Service Rule VI:
- Schedule A, positions other than confidential or policy-determining for which an examination is not practicable:
  - Agencies with positions in Schedule A:
    - Business and Defense Services Administration 7651
    - Commerce Department 7651
    - Customs Bureau 8131
    - Housing and Home Finance Agency 7903
    - Immigration and Naturalization Service 8471

  - Agencies with positions revoked from Schedule C:
    - Agriculture Department 8885
    - Farm Credit Administration 8885
    - National Production Authority 7651

Foreign and territorial duty of Federal personnel:
- Allowances for cost-of-living, quarters, and representation, statutory authority (Executive Order 10503) 7667
- State Department personnel. *See main heading* State Department.
- Territorial cost-of-living allowances excludable from gross income for income tax purposes 8131

Holidays, Christmas; excusing Federal employees from duty one-half day on December 24, 1953, and one-half day on December 31, 1953 (Executive Order 10508) 8221

Territorial duty of Federal personnel. *See* Foreign and territorial duty of Federal personnel.

Travel and transportation expenses of civilian officers and employees when transferred from one official station to another for permanent duty; commutation of expenses at rates in Schedule A (Executive Order 10507) 8220

Veterans, appeals. *See* Appeals.

COAL MINE SAFETY BOARD OF REVIEW. *See* Federal Coal Mine Safety Board of Review.

**COAST GUARD:**

Authority, delegation of, by Secretary of Treasury, to Commandant, with respect to enlistment, appointment, and training of persons in Coast Guard Reserve, and other related personnel matters, and to make available necessary supplies, equipment, services, and facilities of Regular Coast Guard to Reserves 8190

Cargo and miscellaneous vessels:
- Fire protection equipment; fire extinguishing systems:
  - Extinguishing equipment, in engineroom where oil fuel units or settling tanks are used 7854
  - Hand portable fire extinguishers, arrangements and details; spare charges 7854
- Inspection and certification:
  - Annual inspection; scope 7854
  - Initial inspection; scope 7853
- Lifesaving equipment:
  - Distress signal, ship's; deletion of requirement regarding daylight signaling lamp on vessels of 500 gross tons and over on an international voyage 7854
  - Lifeboats and life rafts, equipment for; emergency drinking water 7854
  - Line-throwing appliances; equipment for impulse-projected rocket type 7854
- Operations:
  - Fire and emergency equipment; marking of lifeboat oars 7855
  - Log book entries; action required to be logged, receipt of fuel oil on board 7855
  - Reports of accidents, repairs, and unsafe equipment; breaking of safety valve 7855
  - Station bills; manning of lifeboats and life rafts 7854
  - Steam, excess, carrying of; master and chief engineer responsibility with respect to steam pressure in boilers 7855
  - Tests, drills, and inspection:
    - Fuel oil, requirements for 7855
    - Lifeboats, radio apparatus for 7855
- Vessel control and miscellanous systems and equipment; radiotelegraph and radiotelephone, required by Federal Communications Commission 7854

COAST GUARD—Continued — Page

Coast Guard military personnel; United States Coast Guard Reserve:
- Authority of Commandant with respect to enlistment, appointment, and training of persons, and supplies, equipment, services and facilities for Reserves — 8190
- Physical examinations and standards; revision — 8579
- Transfers to and placement in reserve categories; assignment to Retired Reserve — 8581

Coast Guard vessels — 7641
- Lights for Coast Guard vessels of special construction, exemption of statutory requirements for — 7641, 8897

Electrical engineering:
- Communication and alarm systems and equipment; sound powered telephone and voice tube systems, general requirements, vessels equipped with radio installation — 8900
- Electrical systems, general requirements; testing and inspection, special survey of unclassed vessels, cancellation — 8900
- Emergency lighting and power system; storage battery installation, general requirements — 7855

Equipment; approval of miscellaneous items — 8210
- Correction of prior document — 8212
- Manufacturers address, change in — 8212
- Terminations of approvals of equipment — 8208

Explosives or other dangerous articles or substances and combustible liquids on board vessels; transportation or storage:
- Definitions of term; inside containers — 8229

Explosives, detailed regulations governing:
- Classes A, B, and C explosives — 8231
- Samples of explosives and explosive articles for laboratory and examination purposes; new explosives — 8232
- Storage and storage chart of explosives and other dangerous articles, miscellaneous amendments — 8232
- Table A—Classification, Class A, dangerous explosives, miscellaneous amendments — 8232
- Table C—Classification, Class C, relatively safe explosives, amendment — 8233

Gases, compressed, detailed regulations governing:
- Definition, compressed gases — 8239
- Liquid chlorine in bulk — 8240
- "On deck" stowage — 8239
- Stowage clearance — 8239
- Stowage securing means — 8239
- Table G—Classification, compressed gases; miscellaneous amendments — 8241

Hazardous articles, detailed regulations governing:
- Cotton, baled; requirements and conditions for loading, stowing and transporting — 8246
- Table K—Classification, hazardous articles; amendments — 8247

Inflammables:
- Liquids, detailed regulations governing:
  - Definition, inflammable liquids — 8233
  - Limited quantity shipments — 8233
  - Table D—Classification, inflammable liquids; miscellaneous amendments — 8233, 8234, 8235
- Solids and oxidizing materials, detailed regulations governing:
  - Elemental phosphorus in water in bulk — 8235
  - Exemptions for inflammable solids and oxidizing materials; nickel catalyst — 8235
  - Table E—Classification, inflammable solids and oxidizing materials; miscellaneous amendments — 8236, 8237

Liquids:
- *See also* Inflammables
- Combustible, detailed regulations governing; Table J—Classification, miscellaneous amendments — 8246
- Corrosive, detailed regulations governing; Table F—Classification, corrosive liquids, miscellaneous amendments — 8237, 8238, 8239

List of explosives and other dangerous articles and combustible liquids, editorial changes — 8229, 8230

Poisonous articles, detailed regulations governing:
- Exemptions for poisons, Class B — 8242
- Table H—Classification, Class B, less dangerous poisons; miscellaneous amendments — 8243, 8244, 8245, 8246

COAST GUARD—Continued — Page

Explosives or other dangerous articles or substances and combustible liquids on board vessels; transportation or storage—Continued
- Repairs, or work involving welding or burning or other hazards — 8228
- Shipper's requirements respecting packing, marking, labeling and shipping papers:
  - Domestic shipments only, marking and labeling — 8230
  - Labels for mixed packing — 8231
  - Mixed packing — 8230

Load lines, for merchant vessels, tugs and barges:
- Foreign and coastwise voyage, merchant vessels; form of load line certificates — 7847
- Variances for steam colliers, tugs and barges engaged in special services in inter-island and coastwise voyages; use of load line mark "MS" for vessels operating on Great Lakes when authorized — 7847

Manning of vessels; manning requirements:
- Computations; engineers — 7855
- Officers' Competency Certificates Convention, 1936 — 8582
- Special provisions; licensed operators for motorboats — 8583

Marine engineering:
- Construction; dished heads, detail requirements — 7848
- Installations, tests, inspections, etc., of boilers, pressure vessels and machinery:
  - *See also* Installations contracted for prior to July 1, 1935.
  - Tests and inspections:
    - Boiler mountings and attachments — 7851
    - Machinery and equipment:
      - Dry dock examination — 8900
      - Special surveys for unclassed vessels; cancellation — 8900
      - Tail shaft survey — 8900
- Installations contracted for prior to July 1, 1953; construction:
  - Procedures and general requirements; repairs, replacements, or alterations — 7851
  - Shell joints; riveted joints — 7851
- Machinery, main and auxiliary, general requirements; fuel oil for boilers — 7851
- Piping systems, pumps, refrigeration machinery, and fuel tanks:
  - Detail requirements; joint and flange connections — 7849
  - Pumping arrangements and piping systems:
    - Piping, bilge and ballast; passenger vessels on international voyages — 7849
    - Pumps, bilge; location — 7849
- Welding:
  - Arc welding and gas welding and brazing; tests and procedures for qualified welders, use of radiography — 7849
  - Tests and inspection; radiographic test procedures, nondestructive tests, etc — 7849

Merchant marine officers and seamen; licensing of officers, etc.:
- Deck officers licenses (inspected vessels), professional requirements; examination subjects for deck officers on ocean or coastwise steam or motor vessels — 8620
- Motorboat operators, licensing of; applicants' evidence of experience — 8620

Navigation requirements; boundary lines for inland waters (Gulf Coast):
- Alabama; Mobile Bay to Mississippi Passes, Louisiana — 7893
- Louisiana:
  - Mississippi Passes:
    - To Mobile, Alabama — 7893
    - To Sabine Pass, Texas — 7894
  - Mississippi River — 7893
- Mississippi; Mississippi River — 7893
- Texas:
  - Brazos River:
    - To Galveston — 7894
    - To Rio Grande — 7894
  - Galveston:
    - To Brazos River — 7894
    - To Sabine Pass — 7894
  - Galveston Harbor; cancellation — 7894

COAST GUARD—Continued — Page

Navigation requirements; boundary lines for inland waters (Gulf Coast)—Continued
- Texas—Continued
  - Sabine Pass:
    - To Galveston — 7894
    - To Mississippi Passes, Louisiana — 7894

Passenger vessels:
- Construction and arrangement; rail and guard requirements, application to vessels contracted for on or after November 19, 1952 — 7852
- Fire protection equipment:
  - Fire detecting systems; table, changing requirements for machinery spaces containing oil fired boilers — 7852
  - Hand portable fire extinguishers, details and arrangements; spare charges — 7852
- Inspection and certification:
  - Annual inspection; scope — 7852
  - Initial inspection; scope — 7851
  - Special surveys of unclassed vessels, cancellation — 8900
- Lifesaving equipment:
  - Lifeboats and life rafts, equipment for; emergency drinking water — 7852
  - Line-throwing appliances; equipment for impulse-projected rocket type — 7852
- Operations:
  - Log book entries; actions required to be logged, receipt of fuel oil on board — 7853
  - Reports of accidents, repairs and unsafe equipment; breaking of safety valve seal — 7853
  - Station bills; manning of lifeboats and life rafts, applicability to motorboats carrying passengers for hire — 7853
  - Steam, excess, carrying of; master and chief engineer responsibility with respect to steam pressure in boilers — 7853
  - Tests, drills, and inspection:
    - Fuel oil, requirements for — 7853
    - Lifeboats, radio apparatus for — 7853
- Vessel control and miscellaneous systems and equipment; radiotelegraph and radiotelephone, required by Federal Communications Commission — 7863
- Watertight subdivision; bulkheads, watertight doors, indicators and warning signals, for Class 3 doors — 7852

Specifications, for various types of lifesaving equipment, material, etc., for merchant vessels:
- Effective date of amendments, change in — 8901
- Engineering equipment, for merchant vessels; combination solid stream and water spray fire house nozzles — 7871

Lifesaving equipment:
- Buoyant apparatus, for merchant vessels; strength tests — 8583
- Life floats, for merchant vessels:
  - Balsa wood body life floats — 8583
  - Military specifications — 8583
  - Strength tests — 8583
- Life preservers:
  - Balsa wood (jacket type), Models 42 and 46 — 7860, 8901
  - Cork (jacket type), Models 32 and 36 — 7858, 8901
  - Fibrous glass, adult and child (jacket type), Models 51, 52, 55, and 56 — 7862, 8901
  - Kapok, adult and child (jacket type), Models 2, 3, 5, and 6 — 7855, 8901
- Lifeboats, for merchant vessels — 7866
- Line-throwing appliance; impulse-projected rocket type (and equipment), for merchant vessels — 7871
- Repairing and cleaning life preservers; subpart heading change — 7864
- Water, emergency drinking (in hermetically sealed containers), for merchant vessels — 7864, 8901

Materials, for merchant vessels:
- Bulkhead panels — 7874, 8901
- Deck coverings — 7874

COAST GUARD—Continued — Page

Tank vessels (amendments proposed and/or adopted):
- Fire-fighting equipment:
  - Boiler room and machinery spaces, fixed fire extinguishing systems; requirements for oil fuel units or settling tanks — 7847
  - Lamp and paint rooms and similar compartments on tank ships constructed or converted on or after November 19, 1952; fixed fire extinguishing systems — 7847
- Lifesaving appliances:
  - Life preservers, distribution and storage; additional life preservers for personnel on watch in engine room and pilothouse — 7847
  - Line-throwing appliances; equipment for impulse-projected rocket type — 7847
- Special equipment, machinery, and hull requirements; safety requirements, elimination of requirements for rails on unmanned tank barges — 7847

Uninspected vessels (motorboats), requirements; fire extinguishing equipment — 8511

Waivers of navigation and vessel inspection laws and regulations; nationality of crews of nonsubsidized merchant vessels, cancellation — 7903

COMMERCE DEPARTMENT:

Appeals Board:
- Cases involving suspension of license privileges; Atlantic & Pacific Wire & Cable Co., Inc — 8122
- Procedures. *See* Appeals procedures.

Appeals procedures, of Appeals Board for Department of Commerce; applicability of certain regulations — 8111

Denial or suspension of export privileges, appeals in connection with; grounds for appeals and procedures, applicability of regulations of former Foreign and Domestic Commerce Bureau — 8111

Foreign excess property, disposal of; appeals procedure when application is denied — 8111

Hearing commissioners, practice before Appeals Board, applicability of RP 1 of National Production Authority — 8111

National Production Authority appeals cases, procedures and operations of Board under Regulation 5; applicability of Regulation 5 — 8111

Attack conditions; plans and programs for transportation in preparation for attack conditions, under attack conditions, and in post-attack rehabilitation, responsibility of Secretary respecting — 8133

Authority, delegation of, by Secretary:
- Compliance Commissioners for Export Control; authority to administer oaths and affirmations and to issue subpoenas in proceedings for denial of licensing privileges — 7898
- Deputy Director of Foreign Commerce Bureau, and Director and Deputy Director of Office of Export Supply; authority respecting inspection of records, premises or property and issuance of subpoenas — 7898
- Director; authority respecting inspection of records, premises or property, issuance of subpoenas, rules and regulations in connection with enforcement of export control authority — 7898
- Special agents in Export Control Investigation Staff; authority to make investigations, to administer oaths and affirmations, etc., concerning matters under investigation — 7898

Codification of Title 15 in conformity with organizational pattern of Department — 8111

Committees and boards:
- Commodity advisory committees, interdepartmental; representation on:
  - Chemicals and Rubber Committee — 7892
  - Fibers Committee — 7893

Continuation in effect of orders, regulations, and similar instruments 7835

**FARM CREDIT ADMINISTRATION—Continued** Page
Federal farm loan system; federal land banks generally, bonds, exchange and assignments, lost, stolen, etc 7669
Federal Farm Mortgage Corporation, Deputy Governor and Director of Land Bank Service designated members of Board of Directors of 7835
Land Bank Service, Deputy Governor and Director of, designated members of Board of Directors of Federal Farm Mortgage Corporation 7835
Officials, amendment of references to, to reflect change in designations 7813

**FEDERAL CIVIL DEFENSE ADMINISTRATION:**
Attack conditions, transportation under; coordination of plans respecting 8134

**FEDERAL COAL MINE SAFETY BOARD OF REVIEW:**
Procedure, prior to finding; annulment or revision of order of inspector under certain conditions 7655

**FEDERAL COMMUNICATIONS COMMISSION:**
Amateur radio service, portable and mobile amateur stations, requirements for operations of, outside continental limits of United States; proposed operation in frequency band 21.0–21.45 mc, scheduling of oral argument in regard to 8906
Aviation services; proposed rule making:
Aeronautical metropolitan station; eligibility for station license, frequencies available, points of communication, etc 7662
Air carrier aircraft stations; availability of certain aeronautical frequencies 7662
Aircraft radio stations; foreign aircraft stations operating within United States 7662
Application for aircraft radio station license; application for air carrier aircraft radio station license, scheduled air carrier 7662
Definitions; aeronautical metropolitan station 7662
Frequency assignments for telephony of coast, ship, and aircraft stations within band 4000—18,000 kc, changes in; third further notice of proposed rule making 8248
Canada:
Assignment of frequencies to broadcast station in; changes in list modifying appendix to North American Regional Broadcasting Agreement 8193
Department of Transport; change in policy, in coordination with FCC, in reference to use of certain radio channels for Government weather information to ships on Great Lakes 8709
Color television. *See* Radio broadcast services: television broadcast stations.
Common carrier regulations for telephone and telegraph companies. *See* Telephone and telegraph companies.
Cuba, assignment of frequencies to broadcast stations in; new stations, changes, and deletions in accordance with North American Regional Broadcasting Agreement 7664
Diathermy equipment. *See* Industrial, scientific and medical service.
Educational broadcast stations. *See* Radio broadcast services.
Employees, compensation of: Annual Report Form 324, applicable to standard broadcast, FM, television, and international stations, Schedules 10–A and 10–B, deletion 8731
Epilation equipment, short wave; applicability to, of regulations governing industrial, scientific and medical service 7802
Equipment, radio, acceptability of; application and licensing procedure, proposed rule making 8141
Experimental and auxiliary broadcast services; television auxiliary broadcast stations, further notice of proposed rule making 8144
Emission authorized; redesignation 8146
Emission and bandwidth 8146
Equipment changes 8146
Frequency assignment 8145
Frequency selection to avoid interference 8146
Frequency tolerance 8147
Licensing requirements:
Channel assignment to licensees 8146
Licensing of more than one television STL transmitter; deletion of provisions respecting 8145

**FEDERAL COMMUNICATIONS COMMISSION—Con.** Page
Experimental and auxiliary broadcast services; television auxiliary broadcast stations, further notice of proposed rule making—Continued
Sound channels 8146
Use of listed frequencies and remote pickup broadcast stations 8146
Station identification 8147
Temporary authorizations 8146
FM broadcast stations. *See* Radio broadcast services.
Federal-State Market News Service, California; availability of certain frequencies to 7800, 7826
Frequencies and channels, allocation and use of:
*See also* Frequency allocations and radio treaty matters.
Frequency bands:
535–21,750 kc 8134
2000–3000 kc 8709
2500–2600 kc 8709
2514 kc 8248
4000–18,000 kc 7800
24 mc and below 8140
890 mc and above 8145
1990–13,200 mc 8906
Services and stations:
Amateur radio services 7661, 8248
Aviation services 8193
Canada; broadcast stations 7664
Cuba; broadcast stations 7661
FM broadcast stations, Class B; revised tentative allocations plan, amendments, proposed 8249
Hawaii; stations in 7825, 8901
Industrial radio services 8248, 8709
Maritime radio services 7800, 7825
Public radiocommunication services (other than maritime mobile) 7800, 7825
Public safety radio services 7661, 7801
Standard broadcast stations 7801,
Television broadcast stations 7821, 8134, 8135, 8136
Frequency allocations and radio treaty matters; general rules and regulations:
Allocation assignment and use of radio frequencies:
Station symbols; list of stations, proposed rule making:
Additions:
FLC—Common carrier land station 8140
FXS—Standard broadcast STL station 8140
MOC—Common carrier mobile station 8140
Deletion; MOZ—Mobile (except television pickup) station 8140
Table of frequency allocations:
Broadcasting service frequency bands; addition of footnote, where now lacking, with respect to use of such frequencies by experimental and contract and export developmental stations under certain noninterference limitation 8134
Domestic fixed services; proposed deletion of authority for use of frequencies below 25 mc for purposes other than safety of life and property, hearing 7800
Operational fixed stations licensed to a State; proposed amendment of regulations to permit such stations to provide coordinated service to State agencies for public safety, administrative and agricultural information traffic 7825
Reallocation of frequencies above 890 mc to non-Government fixed and mobile services; proposed rule making 8140
Definitions; proposed rule making:
Common carrier land station (FLC) 8140
Common carrier mobile station (MOC) 8140
Mobile, except television pickup, station (MOZ); deletion 8140
Standard broadcast STL station (FXS) 8140
Equipment type approval and type acceptance for licensing; proposed rule making 8141
Identification and changes in equipment 8143
Limitation on availability of equipment files for public reference 8143
Making available type approval or type accepted equipment for testing or inspection 8143

**FEDERAL COMMUNICATIONS COMMISSION—Con.** Page
Frequency allocations and radio treaty matters; general rules and regulations—Continued
Equipment type approval and type acceptance for licensing; proposed rule making—Continued
Program defined 8141
Radio equipment list 8143
Submission of technical data for application reference 8142
Type acceptance 8141, 8142
Type approval 8141
Hawaii; proposed assignment of frequencies 8212.6 and 17,302.1 kc for telephone communication by ship and coast stations 8249
Hearings, orders, etc.; list of names of companies and stations, *see list at end of this agency.*
Heating equipment. *See* Industrial, scientific, and medical service.
Industrial radio services:
*See also* Industrial, scientific, and medical service.
Operational fixed stations licensed to a State; proposed amendment of regulations to permit such stations to provide coordinated service to State agencies for public safety, administrative and agricultural information traffic 7825
Petroleum radio service, frequencies available for base and mobile stations; natural gas suppliers, use of power radio service frequencies for communication with distributors 8902
Power radio service:
Frequencies available for base and mobile stations; gas supply and distribution activities, use of petroleum radio service frequencies for 8901
Redesignation 8901
Technical standards; proposed rule making:
Acceptability of transmitters for licensing 8143
Power and antenna height; power tolerance 8144
Industrial, scientific, and medical service:
Hearing respecting unauthorized operation of electronic heating equipment by Veri-Trim Products Co 8518
Operation for which license is required; existing equipment, certain short-wave epilation equipment, deferment of applicability of regulations to, for certain periods, proposed rule making 7802
Operation without license; medical diathermy equipment, withdrawal of certificate of type approval 8144
International agreements relating to radio in which United States participates; assignment of frequencies to broadcasting stations in North America. *See* North American Regional Broadcasting Agreement.
Land transportation radio services; technical standards, proposed rule making:
Acceptability of transmitters for licensing 8143
Power and antenna height; power tolerance 8144
Maritime radio services:
Land stations, telephony, changes in frequency assignments of coast, ship, and aircraft stations within 4000–18,000 kc band; areas other than Mississippi River and connecting inland waterways (except Great Lakes), plan of frequency assignments for maritime mobile service, third further notice of proposed rule making 8248
Availability of 4427.6 and 17,302.1 kc in certain areas to public coast stations 8249
Deletion of 4287.5 kc frequency in all areas 8249
Mobile maritime radiotelephone service; plan of frequency assignments within 4000–18,000 kc band for areas other than Mississippi River and connecting inland waters (except Great Lakes), third further notice of proposed rule making 8248
Shipboard stations:
Radiotelephony:
Changes in frequency assignments of ship, coast, and aircraft stations within 4000–18,000 kc band; areas other than Mississippi River and connecting inland waterways (except Great Lakes), plan of frequency assignments for maritime mobile service, third further notice of proposed rule making 8248
Availability of frequency 8212.6 kc to ship stations in Hawaii 8249

FEDERAL COMMUNICATIONS COMMISSION—Con. Page

Maritime radio services—Continued
Shipboard stations—Continued
Radiotelephony—Continued
Great Lakes weather information; notice to shipping interests, station licensees, etc., with respect to use of frequency 2514 kc only, for weather information reception, after March 15, 1954 8709
Safety of Life at Sea Convention, 1948, temporary rules to govern United States ships subject to:
Convention certificates for cargo vessels of less then 1600 gross tons; redesignation 8139
Operating controls for radiotelegraph installation 8139
Weather information; change in use of certain radio channels for scheduled transmission of Government weather information to ships on Great Lakes 8709
Medical diathermy equipment. *See* Industrial, scientific and medical service.
North American Regional Broadcasting Agreement; lists of changes in assignments for stations in various countries:
Canada 8193
Cuba 7664
Petroleum radio service. *See* Industrial radio services.
Power radio service. *See* Industrial radio services.
Practice and procedure:
Forms; table of forms currently in effect; revision and republication 8731
Radio licenses, applications and proceedings affecting:
Acceptance of applications; mutually exclusive television broadcast applications, list of cities grouped according to priorities established in revised temporary processing procedure for competing applications 8874
Reports, financial, broadcast licensees and permitees:
Annual Report Form 324, amendment of, and time of filing 8731
Deletion of Form 324A (Summary Estimates of Station Broadcast Revenues and Expenses) 8731
Public radiocommunication services (other than maritime mobile):
Domestic fixed services; proposed deletion of authority for use of frequencies below 25 mc for purposes other than safety of life and property, hearing 7800
Domestic public land mobile radio service; hearings respecting additional service:
Dallas and Fort Worth areas 7806, 8737
St. Louis, Missouri 7806, 8875
Seattle, Washington 7806, 8876
Operational fixed stations licensed to a State; proposed amendment of regulations to permit such stations to provide coordinated service to State agencies for public safety, administrative and agricultural information traffic 7825
Public safety radio services:
Domestic fixed services; proposed deletion of authority for use of frequencies below 25 mc for purposes other than safety of life and property, hearing 7800
Operational fixed stations licensed to a State; proposed amendment of regulations to permit such stations to provide coordinated service to State agencies for public safety, administrative and agricultural information traffic 7825
Revision and republication of regulations, including all outstanding amendments to date of issuance, and editorial changes 8491
Technical standards; proposed rule making:
Acceptability of transmitters for licensing 8143
Power and antenna height; power tolerance 8144
Radio broadcast services:
Auxiliary broadcast services. *See* Experimental and auxiliary broadcast services, *above*.
Color television. *See* Television broadcast stations.
Educational broadcast stations, noncommercial; inapplicability of certain provisions respecting multiple ownership to 7800

FEDERAL COMMUNICATIONS COMMISSION—Con. Page

Radio broadcast services—Continued
FM broadcast stations:
Channels, allocation of, revised tentative allocation plan for channels allocated to Class B stations; amendments, proposed rule making 7661
Multiple ownership 7799
Multiple ownership of broadcast stations; regulations and report of proceedings respecting 7796, 8904
Reports, annual:
Deletion of Form 324-A 8731
Form 324, amendment of, and requirement respecting filing of, by each network, licensee of broadcast stations, etc., before April 1, 1954 8731
Standard broadcast stations:
Definitions, technical; blanketing 8137
Facilities, allocation of; broadcast facilities, showing required:
Population requirements 8136
Redesignation 8136
Frequency allocations by classes of stations:
Clear channels, assignment of, to Class I and II stations; proposed rule making 7661, 7801
Multiple ownership 7799
Use of 1540 kc frequency by Class I–B station, Waterloo, Iowa 7801
Operation; blanketing interference 8137
Standards of Good Engineering Practice; transmitters of standard broadcast stations, locations of, blanketing requirements, etc 8136, 8578
Television broadcast stations:
Applications, filing of, etc.:
*See also* Practice and procedure.
Multiple ownership 7799, 8904
Mutually exclusive television broadcast applications; list of cities grouped according to priorities established in revised temporary processing procedure for competing applications for new television stations 8874
Auxiliary television broadcast stations. *See* Experimental and auxiliary broadcast services.
Color television:
Amendment of regulations with respect to color transmission requirements and report of proceedings with regard to 8649
Television broadcasts utilizing new color standards, general temporary authorization respecting 8662
Rules governing television broadcast stations (Part 3, E):
Appendix III; graphs, etc.:
Assumed ideal detector output 8661
Idealized picture transmission amplitude characteristic 8660
Television synchronizing wave-form 8660
Applications and authorizations; multiple ownership 7799, 8904
Maximum permissible ownership of television stations, increase in; proposed rule making 8904
Channel utilization; table of assignments:
Addition of listed localities to table:
New York, Carthage; Channel 7 8135
Tennessee; proposed:
Lexington; Channel 11 7801
Rock Island; Channel 7 7801
Sneedville; Channel 2 7801
Wisconsin, Whitefish; Channel 6 8136
Changes, deletions, etc., affecting channel assignments in listed States:
*See also* Addition of listed localities to table, *above*.
Maryland; proposed 8735
Michigan 7825, 8136
Minnesota 7825
Mississippi; proposed 7801
North Dakota 7825
Ohio; proposed 8248
Wisconsin 8136
Ownership, multiple:
Maximum permissible ownership of television stations, increase in; proposed rule making 8904
Report of proceedings and amendment of regulations 7796

FEDERAL COMMUNICATIONS COMMISSION—Con. Page

Radio broadcast services—Continued
Television broadcast stations—Continued
Rules governing television broadcast stations (Part 3, E)—Continued
Technical standards:
Definitions 8657
Transmission standards and changes; transmission standards 8658
Transmitters and associated equipment; visual transmitter 8659
Attenuation requirements respecting upper sidebands; postponement of compliance with regulations with regard to 7796
Requirements applicable to both visual and aural transmitters; automatic means provision 8660
Standard broadcast stations. *See* Radio broadcast services.
Telephone and telegraph companies, common carrier regulations; extension of lines and discontinuance of service by carriers:
Applications under Section 214, general provisions:
Copies of applications required 8902
Reports required, rescission 8903
Discontinuance, reduction, and impairment of service; proposed rule making:
Objection to proposed discontinuance or impairment of telegraph service by carrier, action of Commission respecting 8701
Publication and posting of notices 8701
Extensions and supplements:
Construction, commencement and completion of; increase in authorized amount of expenditures of projects 8902
Small projects for supplementing of facilities, special provisions:
Continuing authority for certain small projects 8902
Increase in dollar amounts of projects for which applications may be filed 8902
Temporary or emergency service, providing of, by construction or installation of facilities, under certain limitation 8902
Television broadcast stations. *See* Radio broadcast services.
Weather information; transmission of Government weather information to ships on Great Lakes, change in use of radio channels for 8709

## TITLE 8—ALIENS AND NATIONALITY

### Chapter I—Immigration and Naturalization Service, Department of Justice

PART 231—LISTS OF ALIENS AND CITIZEN PASSENGERS ARRIVING OR DEPARTING

DESIGNATION OF PORTS OF ENTRY

The following amendments to Part 231 of Chapter I of Title 8 of the Code of Federal Regulations are hereby prescribed:

a. Paragraph (b) of § 231.6 *Ports of entry for aliens arriving by vessel or by land transportation* is amended in the following respects:

1. The list of Class G ports of entry under District No. 6—Miami, Fla., is amended by adding "Pascagoula, Miss."

2. Effective as of September 1, 1953, the list of Class A ports of entry under District No. 14—San Antonio, Tex., is amended by inserting "Progreso, Tex." between "Port Arthur, Tex.," and "Rio Grande City, Tex." and deleting "Thayer, Tex."

3. The list of Class B ports of entry under District No. 14—San Antonio, Tex., is amended by deleting "Delores, Tex."

4. The list of Class B ports of entry under District No. 17—Honolulu, T. H., is deleted and the list of Class C ports of entry is amended by inserting "Hilo, T. H." before "Kahului, T. H."

b. Paragraph (a) of § 231.7 *Ports of entry for aliens arriving by aircraft* is amended by deleting "Swanton, Vt., Warren R. Austin Airport" from the list of ports of entry for aliens arriving by aircraft.

(Sec. 103, 66 Stat. 173; 8 U. S. C. 1103)

NOTE: The record-keeping and reporting requirements of these regulations have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

Dated: November 23, 1953.

HERBERT BROWNELL, Jr.,
*Attorney General.*

Recommended: November 5, 1953.

ARGYLE R. MACKEY,
*Commissioner of Immigration and Naturalization.*

## TITLE 14—CIVIL AVIATION

### Chapter I—Civil Aeronautics Board

Subchapter C—Procedural Regulations

[Reg. PR-22]

PART 302—RULES OF PRACTICE IN ECONOMIC PROCEEDINGS

SUBPOENAS; TESTIMONY BY BOARD PERSONNEL AND PRODUCTION OF BOARD RECORDS

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 25th day of November 1953.

The present § 302.19 of the procedural regulations, relating to subpoenas, does not now contain any specific provision restricting the issuance of subpoenas for testimony by Board personnel or the production of Board documents in economic proceedings. However, when the section is considered in the light of the grant of the subpoena power in section 1004 of the Civil Aeronautics Act and the restriction contained in Board Administrative Regulations, it is clear that it was not the purpose or intention of the board that subpoenas should be issued under the section to obtain testimony of Board personnel or the production of Board records. Under existing administrative regulations, Board officers or employees are forbidden to disclose official information, in response to a subpoena from any source, unless specifically authorized to do so.

Although this is the Board's interpretation of the existing regulations, it is deemed desirable as a matter of notice to issue a clarifying amendment to § 302.19 of the procedural rules containing this view of the application of the section.

By this action the Board does not intend to deprive parties of the opportunity to request, in appropriate situations, the testimony of Board personnel or the production of Board documents. The rule set forth below provides a procedure for such purpose by way of motion under Rule 18. A denial of such a motion will not be reviewed by the Board unless the Examiner grants an appeal from his ruling under Rule 18 (f). Since Board regulations prohibit officers and employees from disclosing official information without Board authorization, an Examiner's ruling granting a motion for testimony

by Board members, officers, or employees or the production of documents in their custody will be reviewed by the Board on its own motion. In making such a review the Board will follow the general policy of making such evidence available (a) if found relevant and of reasonable scope, (b) if there is an adequate showing by the moving party of a need for the evidence requested, and (c) if no other substantial considerations, such as security or the Board's investigative or decisional processes are involved.

Since this amendment is not a substantive rule but one of agency procedure, notice and public procedure hereon are unnecessary, and the amendment may be made effective upon less than 30 days notice.

In consideration of the foregoing, the Civil Aeronautics Board hereby amends Part 302 of the procedural regulations (14 CFR Part 302) as follows, effective November 25, 1953:

1 By adding to § 302.19 a new paragraph (e) to read as follows:

(e) The provisions of this section are not applicable to the attendance of Board members, officers or employees or the production of documentary evidence in the custody thereof at a hearing. Applications therefor shall be addressed to the Examiner in writing and shall set forth the need of the moving party for such evidence and its relevancy to the issues of the proceeding. Such applications shall be processed as motions in accordance with § 302.18 (Rule 18), except that the grant thereof by an Examiner, in whole or in part, shall be immediately reviewed by the Board upon its own initiative and shall be subject to final Board action.

(Sec. 205, 52 Stat. 984, 49 U. S. C. 425. Interprets or applies sec. 1001, 52 Stat. 1017; 49 U. S. C. 641)

By the Civil Aeronautics Board.

[SEAL] M. C. MULLIGAN,
*Secretary.*

[F. R. Doc. 53-10053, Filed, Nov. 30, 1953; 8:51 a. m.]

## Chapter II—Civil Aeronautics Administration, Department of Commerce

[Amdt. 51]

### PART 610—MINIMUM EN ROUTE IFR ALTITUDES

MISCELLANEOUS AMENDMENTS

The minimum en route IFR altitudes appearing hereinafter have been coordinated with interested members of the industry in the regions concerned insofar as practicable. The altitudes are adopted without delay in order to provide for safety in air commerce. Compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedure Act would be impracticable and contrary to the public interest, and therefore is not required.

Part 610 is amended as follows:

1. Section 610.14 *Green civil airway No. 4* is amended to read in part:

| From— | To— | Minimum altitude |
|---|---|---|
| Columbus, Ohio (LFR) | Adamsville (INT), Ohio. | 2,400 |
| Adamsville (INT), Ohio | Wheeling, W. Va. (LF RBN). | 2,400 |
| Wheeling, W. Va. (LF RBN). | Pittsburgh, Pa. (LFR) | 2,500 |
| Pittsburgh, Pa. (LFR) | New Alexandria, Pa. (LF RBN). | 3,000 |
| New Alexandria, Pa. (LF RBN). | Altoona, Pa. (LFR) | 4,500 |

(2) Minimum crossing altitude at New Alexandria (LF RBN), eastbound.

2. Section 610.211 *Red civil airway No. 11* is amended to eliminate:

| From— | To— | Minimum altitude |
|---|---|---|
| Georgetown (INT), Ky. | Huntington, W. Va. (LFR). | 2,400 |

3. Section 610.218 *Red civil airway No. 18* is amended to read in part:

| From— | To— | Minimum altitude |
|---|---|---|
| Cincinnati, Ohio (LFR) | Huntington, W. Va. (LF RBN). | 2,500 |

4. Section 610.219 *Red civil airway No. 19* is amended to read in part:

| From— | To— | Minimum altitude |
|---|---|---|
| Sandusky (INT), Ohio | Int. SE crs. Detroit, Mich. (LFR) and W crs. Akron, Ohio (LFR). | 2,300 |
| Int. SE crs. Detroit, Mich. (LFR) and W crs. Akron, Ohio (LFR). | Akron, Ohio (LFR) | 2,500 |
| Akron, Ohio (LFR) | Int. SW crs. Pittsburgh, Pa. (LFR) and NW crs. Morgantown, W. Va. (LFR). | 2,500 |
| Int. SW crs. Pittsburgh, Pa. (LFR) and NW crs. Morgantown, W. Va. (LFR). | Morgantown, W. Va. (LFR). | 3,000 |

5. Section 610.220 *Red civil airway No. 20* is amended to read in part:

| From— | To— | Minimum altitude |
|---|---|---|
| Akron, Ohio (LFR)... | Columbiana (INT), Ohio. | 2,500 |
| Columbiana (INT), Ohio. | Pittsburgh, Pa. (LFR) | 2,600 |

6. Section 610.285 *Red civil airway No. 85* is amended to read in part:

| From— | To— | Minimum altitude |
|---|---|---|
| Columbus (INT), Ohio | Butler, Pa. (LF RBN). | 2,500 |
| Butler, Pa. (LF RBN). | Int. NE crs. Pittsburgh, Pa. (LFR) and 139° (true) fm Greensburg, Pa. (LF RBN). | 2,500 |
| Int. NE crs. Pittsburgh, Pa. (LFR) and 139° (true) fm Greensburg, Pa. (LF RBN). | Altoona, Pa. (LF RBN). | 4,500 |

7. Section 610.302 *Red civil airway No. 102* is amended to read in part:

| From— | To— | Minimum altitude |
|---|---|---|
| Lexington, Ky. (LF RBN). | Huntington, W. Va. (LF RBN). | 2,500 |

8. Section 610.615 *Blue civil airway No. 15* is amended to read in part:

| From— | To— | Minimum altitude |
|---|---|---|
| Huntington, W. Va. (LF RBN). | Columbus, Ohio (LF R). | 2,500 |

9. Section 610.621 *Blue civil airway No. 21* is amended to read in part:

| From— | To— | Minimum altitude |
|---|---|---|
| Int. Scrs. Youngstown, Ohio (LFR) and NW crs. Pittsburgh, Pa. (LFR). | Youngstown, Ohio (LFR). | 2,700 |
| Youngstown, Ohio (LFR). | Int. N crs. Youngstown, Ohio (LFR) and SW crs. Erie, Pa. (LFR). | 2,200 |

10. Section 610.673 *Blue civil airway No. 73* is amended by adding:

| From— | To— | Minimum altitude |
|---|---|---|
| Pittsburgh, Pa. (LFR) | Brookville, Pa. (LF RBN). | 3,500 |

11. Section 610.6017 *VOR civil airway No. 17* is amended to read in part:

| From— | To— | Minimum altitude |
|---|---|---|
| Laredo, Tex. (VOR)... | Cotulla, Tex. (VOR) | 1,800 |

(Sec. 205, 52 Stat. 984, as amended; 49 U. S. C. 425. Interpret or apply sec. 601, 52 Stat. 1007, as amended; 49 U. S. C. 551)

These rules shall become effective December 8, 1953.

[SEAL] F. B. LEE,
*Administrator of Civil Aeronautics.*

# TITLE 22—FOREIGN RELATIONS

## Chapter I—Department of State

[Dept. Reg. 108.199]

## PART 75—INTERNATIONAL TRAFFIC IN ARMS, AMMUNITION AND IMPLEMENTS OF WAR

NOVEMBER 25, 1953.

The regulations governing the international traffic in arms, ammunition and implements of war issued on June 2, 1942 (Part 75, Title 22 Code of Federal Regulations) are hereby revoked and superseded in their entirety by the issuance of the following regulations effective January 1, 1954.

DEFINITIONS AND INTERPRETATIONS

Sec.
75.1 General.
75.2 Components, parts, accessories, or attachments subject to section 12 of joint resolution.
75.3 Definition of "fuel thickeners".
75.4 Definition of "chemical toxicological agents".
75.5 Definition of propellants and explosives.
75.6 Definition of specialized military equipment.
75.7 Definition of vessels of war.
75.8 Definition of aircraft.
75.9 Cathode ray tubes being shipped with radar.
75.10 Forgings, castings and machined bodies.

REGISTRATION

75.11 Requirements for registration.
75.12 Production for experimental or scientific purposes.
75.13 Application for registration.
75.14 Certificate of registration.
75.15 Notification of changes in information furnished by registrants.
75.16 Records of manufacture, exportation and importation.

LICENSES

75.17 Application for license.
75.18 Export licenses.
75.19 Import licenses.
75.20 Intransit licenses.
75.21 Validity and terms of licenses.
75.22 Amendments and alterations.
75.23 Ports of exit or entry.
75.24 Country of ultimate destination.
75.25 Exportation of arms, ammunition and implements of war to Cuba.
75.26 Licenses filed with collectors of customs.
75.27 Shippers' export declaration.
75.28 Shipment by parcel post.
75.29 National Firearms Act; Federal Firearms Act; Federal Explosives Act.
75.30 Foreign trade zones.
75.31 Export of vessels of war.
75.32 Repairs or alterations of vessels.
75.33 Saving clause.

GENERAL PROVISIONS AND EXEMPTIONS

75.34 Shipment by or to the United States Government.
75.35 Authorization to collectors of customs to waive presentation of license document under prescribed conditions.
75.36 Canadian shipments.
75.37 United States aircraft on temporary sojourn abroad.
75.38 Aircraft of foreign registry entering the United States.
75.39 Articles returned to the United States for repair or overhaul and reexport.
75.40 Antique arms and implements of war.
75.41 Arms carried on person or in baggage.
75.42 Arms for the individual use of members of the armed forces.

VIOLATIONS AND PENALTIES

75.43 Violation in general.
75.44 Penalties for violations.
75.45 Authority of collectors of customs.
75.46 Seizure and forfeiture.

AUTHORITY: §§ 75.1 to 75.46 issued under sec. 12, 54 Stat. 10, 22 U. S. C. 452. Statutory provisions interpreted or applied are cited to text in parentheses.

DEFINITIONS AND INTERPRETATIONS

§ 75.1 *General.* (a) The term "proclamation" shall mean Presidential Proclamation 3758 (18 F. R. 7305) or any superseding proclamation issued pursuant to the provisions of subsection (1) of section 12 of the joint resolution.

(b) The term "article" shall mean any of the arms, ammunition, and implements of war enumerated in the proclamation referred to above, and components, parts, accessories or attachments covered by § 75.2.

§ 75.2 *Components, parts, accessories or attachments subject to section 12 of joint resolution.* The following components, parts, accessories, and attachments and related items for each of the articles enumerated in the proclamation arranged under categories and titles corresponding to those in the proclamation shall be considered arms, ammunitions and implements of war for the purpose of section 12 of the joint resolution.

CATEGORY 1: *Small arms and machine guns.* Components and parts and the following accessories and attachments: Bayonets, slings and straps, gun-mounts and belts, links and magazines for machine guns.

CATEGORY 2: *Artillery and projectors.* Components and parts and the following accessories and attachments: Mounts and carriers.

CATEGORY 3: *Ammunition.* The following components, parts, accessories and attachments: Cartridge cases, powder bags, bullets, jackets, cores, shells (excluding shotgun), projectiles; boosters, percussion caps, fuses or fuzes and components thereof, primers, and other detonating devices for such ammunition.

CATEGORY 4: *Bombs, torpedoes, rockets, and guided missiles.* Components and parts including but not limited to fuses or fuzes and components thereof; bomb racks and shackles; bomb shackle release units; bomb ejectors; torpedo tubes; torpedo and guided missile boosters; launching racks, projectors; control mechanisms and control systems; pistols (exploders); ignitors; detonators; mine detectors; fuze or fuse arming devices; and the following items related thereto: intervalometers and components thereof; bomb lift trucks; bomb and torpedo handling trucks; trailers, hoists, and skids for handling bombs; guided missile launchers; fuel thickeners (see § 75.3).

CATEGORY 5: *Fire control equipment and range-finders.* Components, parts, accessories and attachments specifically designed for the articles enumerated under category V of the proclamation.

CATEGORY 6: *Tanks and ordnance vehicles.* Components, parts, accessories and attachments, specifically designed for such vehicles.

CATEGORY 7: *Toxicological agents.* Components, parts, attachments, and accessories specifically designed for equipment for the dissemination, detection, identification of and defense from the chemical toxicological agents defined in § 75.4 and of biological toxicological agents.

CATEGORY 8: *Propellants and explosives.* See § 75.5.

CATEGORY 9: *Vessels of war and special naval equipment.* See also § 75.7. The following components, parts, accessories and attachments of vessels of war: turrets and gun mounts; submarine storage batteries, and catapults. Also armor plate which is included under category XI (c) of the proclamation.

(b) Components, parts attachments and accessories specifically designed for mine laying, mine detection, and detonation, and mine sweeping equipment.

(c) Components, parts, attachments and accessories specifically designed for submarine nets.

CATEGORY 10: *Aircraft.* All components, parts and accessories for aircraft. This does not include ground handling and maintenance equipment and bulk materials, such as dopes, paints, oils, cable, wire, tubing, hose, aluminum sheets. (See § 75.8.)

CATEGORY 11: *Miscellaneous equipment.* No components, parts, accessories or attachments are included for sub-categories (b), (d), (f) and (h) of category XI of the proclamation. (a) All components, parts, attachments, and accessories specifically designed for use in:

(1) Radar;
(2) Electronic countermeasures and jamming equipment;
(3) Underwater sound equipment;
(4) Other electronic equipment specially designed for military use, except cathode ray tubes for radar (see § 75.9);
(5) Radio communications equipment bearing a military designation and specially designed for military use;
(6) Electronic navigational aids such as radio direction finding equipment;
(7) Radio distance measuring systems such as Shoran and hyperbolic grid systems such as Raydist, Loran, and Decca.

(c) Components and parts specifically designed for use in military steel helmets, body armor, and flak suits.

(e) Components and parts specifically designed for pressurized breathing equipment, partial pressure suits, anti "G" suits, aircraft crash helmets, parachutes, and liquid oxygen converters.

(g) Components, parts, attachments and accessories for specialized military training equipment as defined in § 75.6.

§ 75.3 *Definition of "fuel thickeners".* As used in § 75.2, Category 4, these are liquids or solids in granular forms (commonly metallic salts of fatty acids such as the aluminum salt of octoic acid) which when mixed with petroleum products produce a gel-type mixture. The burning characteristics of such a gel can be controlled by the type of thickener used and the quantity added such as napalm and octal.

§ 75.4 *Definition of "chemical toxicological agents".* The term "chemical toxicological agents" as used in § 75.2, Category 7, shall include but not be limited to: Cyanogen chloride, hydrogen cyanide, diphosgene, fluorine (but not fluorene), Lewisite gas, mustard gas (dichlorodiethyl sulfide), phenylcarbylamine chloride, phosgene, adamsite (diphenylaminochloroarsine), dibromodimethyl ether, dichlorodimethyl ether, diphenylchloroarsine, diphenylcyanarsine, ethyldibromoarsine, ethyldichloroarsine, methyldichloroarsine, phenyldibromoarsine, phenyldichloroarsine, cyanodimethylaminoethyloxyphosphine oxide, fluoroisopropoxymethylphosphine oxide, fluoromethylpinacoloxyphosphine oxide, and related compounds.

§ 75.5 *Definition of propellants and explosives.* (a) As used in § 75.2, Category 8, the term "propellants" shall include but not be limited to propellant powders. The term "military high explosives" shall include ammonium picrate, black soda powder, potassium nitrate powder, hexanitrodiphenylamine, pentaerythritetetranitrate (penthrite, pentrite or PETN), nitrocellulose having a nitrogen content of more than 12.20 percent, tetryl (trinitrophenylmethylnitramine or "tetranitromethylaniline"), trimethylenetrinitramine (RDX, Cyclonite, Hexogen or T4), trinitroanisol, trinitronaphthalene, dinitronaphthalene, tetranitronaphthalene, trinitrotoluene, trinitrexylene.

(b) Explosive mixtures or devices which are not listed above but which contain minor quantities of the types of explosives listed here are not considered to be arms, ammunition, and implements of war, solely for the reason that they may contain such explosive components.

§ 75.6 *Definition of specialized military equipment.* As used in § 75.2, Category 11 (g), specialized military equipment shall include but not be limited to link-type trainers, attack trainers, operational flight trainers, radar target generators, gunnery training devices, anti-submarine warfare trainers, flight simulators, radar trainers, instrument flight trainers, navigation trainers, target equipment, armament trainers, pilotless aircraft trainers, and mobile training units.

§ 75.7 *Definition of vessels of war.* As used in § 75.2, category 9, the following types of vessels are considered to be vessels of war:

(a) *All combatant vessels and craft, including the following:* Battleships (BB); command ships (CBC, CLC); cruisers (CA, CAG, CB, CL, CLAA, CLG); aircraft carriers (CVA, CVL, CVE); destroyers (DD, DL, DDE, DDR); submarines (SS, SSN, SSG, SSK, SSR, SST, ASSA, ASSP). Amphibious force-flag ship (ACC); cargo ship attack (AKA); transports (APA, APD); fire support ships (IPS); landing ships (LSFF, LSTL, LSSL, LSD, LSM, LSMR, LST, LSV); landing craft (LOC, LCI, LCM, LCP, LCP-G, LCB-S, LCV, LCVP, LVT-A, LCT-A, LVT); weasels (M-24, M-29), landing vessels (LVW, DUKV, LCU); mine vessels (ACM, AM, AMC, AMCU, AMS, CM, CMC, DM, DMS, MSB, XMAP, YMP, YMS, YNG), patrol vessels (PY, YP); motor torpedo boat (PT); escort vessels (DE, DEC, DER, PCE, PCER, PCEC); subchasers (PCC, PCSC, SCC, SC, PC, PCS); frigate (PF); motor gun boats (PGM, PR).

(b) *Naval auxiliary and service vessels and craft.* Destroyer tender (AD); degaussing vessel (ADG), ammunition ship (AE); store ship (AF); ice breaker (AGB); motor torpedo boat tender (AGP); surveying ships (AGS, AGSC); auxiliary submarine (AG-(SS)); net laying ship (AN); oilers and tankers (AO, AOG, AOS); transports (AP, APC); barrack ships (APB, APL); repair ships (AR, ARB, ARG, ARH, ARL, ARV, ARVA, ARVE); cable repairing or laying ship (ARC); salvage vessels (ARS, ARSD, ARST); submarine tenders and rescue vessels (AS, ASR, X); tugs ARA, ATF, ATR, YTB, YTL, YTM); guided missile ship (AVM); tenders (AV, AVP, YDT); crane and service vessels (AB, YD, YSD); miscellaneous (AG, AW, PYC, YAG, YHB, YPD); aviation supply ship (AVS); floating dry dock and shop craft (AFDB, AFDL, AFDM, ARD, YFD, YRDH, YRDM); naval lighters (AVC, YC, YCK, YCV, YCF, YF, YFB, YFN, YFNG, YFNX, YFP, YFR, YFRN, YFT, YG, YGN, YFND, YFNB, YVC, YRL); naval barges (YO, YOG, YOGN, YON, YOS, YDK, YR, YRB, YRS, YTT, YW, YAN), naval dredge (YN).

(c) *Coast guard patrol and service vessels and craft.* Submarine repair and berthing barge (YRB); labor transportation barracks ship (APL); Coast Guard cutter (CGC); gun boat (WPG); patrol craft (WPC, WSC, WPG); sea plane tender (WAVP); ice breaker (WAGB); cargo ship (WAK); buoy tenders and boats (WAGL, WD); cable layer (WARC); lightship (WAL); CG tugs (WAT, WYT); radio ship (WAGR); special vessel (WIX); auxiliary vessels (WAC, WAGE). Other Coast Guard patrol or rescue craft over 300 horse power capacity.

(d) *Air Force crash rescue boat.*

(e) *Army vessels and craft.* Transportation Corps tug—100 ft. (LT), 65 ft. (ST); T-boat, Q-boat, J-boat, B-boat; barges (BG, BC, BR, BK, BSP, BSPI, BKI, BCF, BBL, BARC); cranes, floating (BD); dry dock, floating (FDL); repair ship, floating (FMS); trainer, amphibious 20 ton wheeled tow boat, inland waterway (LTI, STI).

§ 75.8 *Definition of aircraft.* As used in § 75.2, Category 10, the term aircraft shall include piloted, pilotless, robot and lighter-than-air aircraft of all types, military and civilian.

§ 75.9 *Cathode ray tubes being shipped with radar.* As used in § 75.2, Category 11 (a), applications for license to ship radar equipment may include cathode ray tubes installed in or intended for use in such equipment provided the tubes are being shipped with such equipment. (If shipped separately, information concerning licensing requirements for cathode ray tubes should be obtained from the Bureau of Foreign Commerce, Department of Commerce.)

§ 75.10 *Forgings, castings and machined bodies.* Forgings, castings, extrusions and machined bodies of any of the articles enumerated in the proclamation which have reached such a stage in manufacture that they are clearly identifiable as such articles are considered to constitute arms, ammunition, and implements of war for the purposes of section 12 of the joint resolution.

REGISTRATION

§ 75.11 *Requirement for registration.* Persons engaged in the business, within the United States, its territories or possessions, of manufacturing, exporting or importing articles enumerated in the proclamation or as defined in the regulations in this part (§§ 75.2 to 75.9) are required to register with the Secretary of State.

§ 75.12 *Production for experimental or scientific purposes.* The fabrication of arms, ammunition and implements of war for experimental or scientific purposes including research and development is not considered as manufacture for the purposes of section 12 of the joint resolution.

§ 75.13 *Application for registration.* Applications for registration shall be submitted to the Secretary of State on forms prescribed by him and shall be accompanied by a registration fee of $100 in the form of a postal money order or a certified check payable to the Secretary of State.

§ 75.14 *Certificate of registration.* Upon receipt of an application for registration properly executed, accompanied by the registration fee, the Secretary of State shall issue to the applicant a certificate of registration valid for five years. Such certificate does not constitute an authorization to export or import. (See § 75.17.) Certificates of registration are not transferable. No portion of the registration fee may be refunded. Certificates of registration are renewable for further periods of five years upon submission of an application for registration properly executed and the payment for each renewal of a fee of $100.

§ 75.15 *Notification of changes in information furnished by registrants.* Registered persons shall notify the Secretary of State of any change in the information set forth in their applications for registration. Upon receipt of such information an amended certificate of registration including this information will be issued if appropriate. An amended certificate of registration will be issued without charge in such cases and will remain valid until the date of expiration of the original certificate.

§ 75.16 *Records of manufacture, exportation and importation.* (a) Persons required to register shall maintain, subject to the inspection of the Secretary of State, or any person or persons designated by him, permanent records in which shall be kept the quantity and estimated values of the articles manufactured by them for export and similar records of articles imported or exported by them. The records of articles imported shall, in addition, contain information as to the consignor and the country of origin. The records of articles exported shall, in addition, contain information as to the source of supply, consignee, purchaser, and the initial and ultimate destination of each shipment. These records shall also contain orders, quotations and other papers relating to exports or imports or proposed exports or imports.

(b) Special agents of the Department of State and any United States Customs agents are hereby designated as the representatives of the Secretary of State for the purpose of this section.

LICENSES

§ 75.17 *Application for license.* Persons who intend to export from or import into the United States, its territories or possessions any of the articles enumerated in the proclamation or any component, part, accessory, attachment or related item as defined in these regulations, shall make application for license to the Secretary of State on the forms prescribed by him and obtain a license covering any such articles prior to exportation or importation.

§ 75.18 *Export licenses.* The Secretary of State will issue export licenses on the basis of applications therefor, unless a proposed exportation would be in violation of a law of the United States, or any regulations issued pursuant thereto, or a treaty to which the United States is a party, in which case a license shall not be issued. Furthermore, an export license shall not be issued in any case when it shall have been determined under the authority of the Export Control Act of 1949 (Public Law 11, 81st Congress), as amended, that the proposed exportation would not further the foreign policy of the United States nor be in the interest of the national security. Prior to the issuance of an export license, the Secretary of State may also require documentary evidence pertinent to the proposed transaction.

§ 75.19 *Import licenses.* The Secretary of State will issue import licenses, on the basis of applications therefor, unless a proposed importation would be in violation of a law of the United States, or any regulations issued pursuant thereto, or a treaty to which the United States is a party, in which case a license shall not be issued. Prior to the issuance of an import license, the Secretary of State may also require evidence pertinent to the proposed transaction.

§ 75.20 *Intransit licenses.* Articles to be moved intransit through the United States, its territories or possessions shall require both an import and an export license. However, arms, ammunition and implements of war entering or leaving a port of the United States, intransit through continental United States to a foreign country, will not be considered as imported or exported within the meaning of section 12 of the joint resolution if such articles are consigned from any place in a foreign country whose territory is contiguous to that of the United States to any other place in the same foreign country.

§ 75.21 *Validity and terms of licenses.* Export and import licenses are valid for six months from the date of issuance unless a different period of validity is stated thereon. Licenses are not transferable, and are subject to revocation, suspension or revision without notice. Licenses which have been revoked or which have expired must be returned immediately to the Secretary of State.

§ 75.22 *Amendments and alterations.* No amendment or alteration of a license may be made except by the Secretary of State, or by collectors of customs or postmasters when specifically authorized to do so by the Secretary of State.

§ 75.23 *Ports of exit or entry.* Applications for license shall show the proposed port or ports of exit or entry. If shipping arrangements subsequent to the issuance of the license necessitate a change of ports, no amendment of the license in such case shall be necessary but the Secretary of State must be notified of this change.

§ 75.24 *Country of ultimate destination.* The country designated on an application for license to export as the country of ultimate destination must be the country wherein the articles being exported are to be used or consumed, not a country receiving the shipment in transit. If it is the intention of the exporter that the articles being exported and consigned to one country are to be transshipped to another country or are to pass through the hands of an intermediate consignee in a foreign country, this fact must be clearly indicated on the license application and the Secretary of State must be informed prior to shipment of all the relevant facts pertaining to such transshipment.

§ 75.25 *Exportation of arms, ammunition and implements of war to Cuba.* Article II of the convention between the United States and Cuba to suppress smuggling, signed at Habana March 11, 1926, reads in part as follows (Treaty Series 739; 44 Stat. 2403):

> The High Contracting Parties agree that clearance of shipments of merchandise by water, air, or land, from any of the ports of either country to a port of entry of the other country, shall be denied when such shipment comprises articles the importation of which is prohibited or restricted in the country to which such shipment is destined, unless in this last case there has been a compliance with the requisites demanded by the law of both countries.

The Secretary of State will permit the exportation to Cuba of the articles listed in the proclamation only when applications for license to export these articles bear the stamp of approval of the Cuban Embassy in Washington. In such cases, the original, duplicate, and triplicate of the application shall be forwarded to the Cuban Embassy by the applicant for stamping and transmission to the Department by the Cuban Embassy.

§ 75.26 *Licenses filed with collectors of customs.* Export or import licenses shall be filed prior to exportation or importation with the collector of customs at the port through which the shipment authorized is being made. Shippers' export declarations (United States Department of Commerce Form 7525–V) must also be filed with and authenticated by the collector before the commodities are exported or imported. (See also § 75.28.)

§ 75.27 *Shippers' export declaration.* The shippers' export declaration (United States Department of Commerce Form 7525–V), covering arms, ammunition and implements of war for which an export license is required, must contain the same information in regard to the description, destination and value of the articles to be exported as that which appears on the application for license. If the person designated on the export declaration as the actual shipper of the goods is not the person to whom the export license has been issued by the Secretary of State, the name of this shipper should appear on the export license as that of the consignor in the United States.

§ 75.28 *Shipment by parcel post.* Export and import licenses for articles which are being transported by mail shall be filed with the postmaster at the post office where the article is mailed or received.

§ 75.29 *National Firearms Act; Federal Firearms Act; Federal Explosives Act.* (a) The provisions of the regulations in this part shall be considered as binding, in addition to, and not in lieu of, those established under the provisions of the National Firearms Act, approved by the President June 26, 1934 (48 Stat. 1236; Subchapter B, Chapter 25 and Part VIII, Chapter 27, Title 26, U. S. C.), as amended April 10, 1936 (49 Stat. 1192), June 16, 1938 (52 Stat. 756), August 11, 1945 (59 Stat. 531), and Public Law 353, 82d Congress, 2d Session; under the provisions of the Federal Firearms Act, approved by the President June 30 1938 (52 Stat. 1250; 15 U. S. C. 901–909), as amended March 10, 1947 (61 Stat. 11), August 6, 1939 (53 Stat. 1222), and February 7, 1950 (64 Stat. 3); and under the provisions of the Federal Explosives Act, approved by the President October 6, 1917 (40 Stat. 385; 50 U. S. C. ch. 8), as amended December 26, 1941 (55 Stat. 863; 50 U. S. C. ch. 8).

(b) The National Firearms Act imposes certain taxes upon manufacturers, importers, and dealers in certain firearms; taxes upon the making of certain firearms, and taxes on transfers of certain firearms. The term "firearm", as used in this act, includes "a shotgun or rifle having a barrel of less than eighteen inches in length, or any other weapon, except a pistol or revolver, from which a shot is discharged by an explosive if such weapon is capable of being concealed on the person, or a machine gun, and includes a muffler or silencer for any firearm whether or not such firearm is included within the foregoing definition, but does not include any rifle which is within the foregoing provisions solely by reason of the length of its barrel if the caliber of such rifle is .22 or smaller and if its barrel is sixteen inches or more in length."

(c) The Federal Firearms Act applies to manufacturers and dealers who are engaged in interstate or foreign commerce in firearms and ammunition. The term "firearm", as used in this act, means "any weapon, by whatever name known, which is designed to expel a projectile or projectiles by the action of an explosive and a firearm muffler or firearm silencer, or any part or parts of such weapon"; and the term "ammunition" includes "all pistol or revolver ammunition. It shall not include shotgun shells, metallic ammunition suitable for use only in rifles, or any .22 caliber rim fire ammunition."

(d) The Federal Explosives Act is applicable to the manufacture, distribution, storage, use, and possession of explosives in time of war. The term "explosives", as used in this act, means "gunpowders, powders used for blasting, all forms of high explosives, blasting materials, fuzes (other than electric circuit breakers), detonators, and other detonating agents, smokeless powders, and any chemical compounds or mechanical mixture that contains any oxidizing and combustible units, or other ingredients, in such proportions, quantities, or packing that ignition by fire, by friction, by concussion, by percussion, or by detonation of the compound or mixture or any part thereof may cause an explosion".

(e) Rules and regulations for the enforcement of the National Firearms Act and the Federal Firearms Act are prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury. Rules and regulations for the enforcement of the Federal Explosives Act are prescribed by the Director of the Bureau of Mines, Department of the Interior.

§ 75.30 *Foreign trade zones.* For the purpose of the regulations in this part the foreign trade zones of the United States have no special status but are considered as an integral part of the United States. Accordingly, persons who intend to ship articles into foreign trade zones of the United States (established pursuant to 19 U. S. C. 81c Supp. 5) shall submit application for import license as described in § 75.17, and obtain license therefor, prior to the entry of such articles. Persons who intend to ship such articles from foreign trade zones to foreign destinations shall submit application for export license, as described in § 75.18, and obtain a license therefor, prior to shipment therefrom.

§ 75.31 *Export of vessels of war.* The transfer of a vessel of war as defined in § 75.7, from United States registry to foreign registry, and the registration of an undocumented vessel of war under a foreign flag shall be considered an exportation for which a license is required. The provisions of the regulations in this part shall be considered as binding in addition to and not in lieu of the provisions of the United States Shipping Act of 1916, as amended (46 U. S. C. 835), United States Maritime Administration approval is required prior to the sale and/or transfer to alien ownership, registry and/or flag of vessels of war. The United States registry of a documented vessel is cancelled under the regulations of the Maritime Administration when such vessel is sold to a purchaser for use under foreign registry.

§ 75.32 *Repairs or alterations of vessels.* Operators of foreign vessels entering the territorial waters of the United States for repairs or alterations shall obtain an export license for articles enumerated in the proclamation and as defined in these regulations which are required in connection with such repairs or alterations.

§ 75.33 *Saving clause.* Outstanding licenses or certificates of registration issued pursuant to the regulations of June 2, 1942, as amended, shall remain valid for the same period as if the regulations in this part had not been promulgated.

GENERAL PROVISIONS AND EXEMPTIONS

§ 75.34 *Shipment by or to the United States Government.* The exportation of arms, ammunition, and implements of war by the United States Government or any agency thereof is not subject to the provisions of the joint resolution and therefore an export license is not required. The importation of arms, ammunition, and implements of war consigned to the United States Government or any agency thereof is not subject to the provisions of the joint resolution and therefore an import license is not required.

§ 75.35 *Authorization to collectors of customs to waive presentation of license document under prescribed conditions.* Customs officers are authorized in their discretion to permit arms, ammunition and implements of war to enter and depart from the United States without requiring the presentation of a license under certain conditions as set forth in §§ 75.36 to 75.42 inclusive, provided the prescribed conditions are met and there is satisfactory evidence that all other requirements are being or will be adhered to. In case of doubt as to compliance with any of the exemptions, collectors of customs should refer the matter to the Office of Munitions Control, Department of State, for determination as to whether such exemption applies.

§ 75.36 *Canadian shipments.* (a) Collectors of customs may release shipments of arms, ammunition and implements of war to or from Canada without requiring the presentation of an individual license provided a UAC release certificate (form DSP–21) covering each shipment has been properly executed and transmitted to the Secretary of State and a copy thereof is presented to the collector of customs at the port of entry or exit.

(b) This procedure furthermore must not be used in connection with intransit shipments through the United States to or from Canada. Applications for both import and export licenses must be submitted to the Department in connection with each such shipment.

(c) The exportations to Canada of parts, components and accessories for rifles, carbines, pistols and revolvers with the exception of barrels and breech mechanisms shall not be subject to the provisions of paragraph (a) of this section provided a copy of the invoice or other document adequately describing the shipment and giving the name of the purchaser and the terms of sale is mailed to the Department before shipment is made. If such copy is furnished, presentation of individual license covering such shipments will be waived.

(d) Arms, ammunition and implements of war entering Canada from a country other than the United States and shipped to the United States within one year after entry into Canada may not be imported into the United States under the UAC release certificate procedure described above, but individual license applications therefor must be submitted to the Secretary of State.

§ 75.37 *United States aircraft on temporary sojourn abroad.* (a) Collectors of customs may permit aircraft flown or shipped from the United States for a temporary sojourn abroad of not to exceed six months' duration to depart from the United States without requiring the presentation of an export license issued by the Secretary of State provided the collector of customs at the port of exit is satisfied that the conditions set forth in paragraph (b) of this section have been met.

(b) Owners or operators of aircraft departing from the United States for temporary sojourn abroad under the provisions of § 75.34 shall file an affidavit in the form indicated below and must satisfy the collector of customs that:

(1) The aircraft will not be sold or disposed of;

(2) The aircraft will be returned to the United States within six months;

(3) It will be operated only by a United States licensed pilot, except on demonstration flights;

(4) It will remain under United States registry while abroad.

(c) The requirement of an affidavit may be waived for personal type aircraft (one to five-seaters) and executive type aircraft (privately owned non-revenue), provided the owner-operator of such aircraft submits evidence satisfactory to the collector of customs that subparagraphs (1) through (4) of paragraph (b) of this section will be complied with. Such aircraft may then be permitted to leave the United States for a temporary sojourn abroad not to exceed six (6) months duration without the necessity of submitting an individual license or affidavit therefor.

(d) When an affidavit is required, it must be submitted in the following form:

AFFIDAVIT OF TEMPORARY SOJOURN

COUNTY OF
STATE OF ss.

The undersigned, being duly sworn, says that he is the (owner) (operator) of an aircraft identified as a ------ bearing markings ------; that it is departing from the United States on a temporary sojourn abroad not to exceed six (6) months; that he is the holder of CAB letter of registration for this aircraft dated ------; that the aircraft's ultimate destination outside the United States is ------; that it will reenter the United States through the port of ------ on or about ------; that he will not dispose of the aircraft, its parts, components or accessories in any foreign country nor permit its use in military activities; that it will be operated by a U. S. licensed pilot (except in demonstration flights) while abroad; that he will not change its U. S. registration while abroad; that if the aircraft or any of its parts is to be sold or disposed of in a foreign country, it will be immediately returned to the U. S. and an export license obtained; that he will not transport in such aircraft arms, ammunition or implements of war as defined by Presidential proclamation unless authorized by the Secretary of State; and that the purpose of the temporary sojourn abroad is as follows:

---

---

This statement is given to U. S. Customs authority at ------ or the Secretary of State pursuant to regulations of the Secretary of State, Title 22, Code of Federal Regulations section 75.37 in support of claim for exemp-

tion from the Department of State requirements relating to licenses to export aircraft enumerated in the Presidential proclamation.

Signed _____
(Owner-operator)

Address _____

_____

Subscribed and sworn to before me at _____ this ____ day of _____, 19__.

_____
(Signature and title of officer)

(c) When a copy of the affidavit of temporary sojourn (above form) is accepted by the customs officer at the port of exit it shall be endorsed by him and returned to the owner or operator prior to the departure of the airplane. Upon the return of the aircraft to the United States, the endorsed copy of the affidavit must be surrendered to the collector of customs at the port of reentry. If the port of reentry is not the same as that from which the aircraft departed the customs officer shall forward the surrendered copy of the affidavit to the customs authority at the port from which the aircraft originally departed, noting thereon the date of reentry. The affidavits shall be retained by the collectors of customs for possible future examination.

§ 75.38 *Aircraft of foreign registry entering the United States.* (a) Collectors of customs are authorized to permit aircraft of foreign registry to enter and depart from the United States without requiring the presentation of an individual license provided it is established to their satisfaction that the country of ultimate destination is the same as the country of origin and that the airplane will not be sold or disposed of in the United States and will not remain in the United States in excess of a period of six months.

(b) This section does not apply to aircraft returning to the United States for major overhaul and reexport. The provisions of § 75.39 are applicable to such aircraft.

§ 75.39 *Articles returned to the United States for repair or overhaul and reexport.* Collectors of customs are authorized on presentation of satisfactory evidence to permit arms, ammunition, and implements of war to enter the United States which have been legally exported from the United States, and which are returned to the United States worn or damaged for repair and reexport without requiring the presentation of an individual import license. An individual export license, however, is required before such articles may be reexported. (The collector of customs at the port of entry requires a temporary importation bond for American as well as foreign articles entered under the provisions of this section.)

§ 75.40 *Antique arms and implements of war.* Collectors of customs are authorized on presentation of satisfactory evidence to permit antique arms and implements of war, components, parts, accessories and attachments therefor enumerated in the proclamation which are more than one hundred years old to enter the United States or to depart therefrom without requiring the presentation of an individual license.

§ 75.41 *Arms carried on person or in baggage.* Collectors of customs are authorized on presentation of satisfactory evidence to permit rifles, carbines, revolvers, or pistols and ammunition therefor to enter the United States or depart therefrom without requiring the presentation of an individual license when these articles enter or leave the United States on the person of an individual or in his baggage, and are intended exclusively for the personal use of that individual for sporting or scientific purposes or for personal protection. No more than three arms and no more than five hundred cartridges shall in any case be carried from or into the United States by an individual under the provisions of this section.

§ 75.42 *Arms for the individual use of members of the armed forces.* (a) Collectors of customs are authorized to permit members of the United States armed forces, presenting written authorization from their commanding officer, to ship or bring into the United States war trophies and souvenirs consisting of rifles, carbines, revolvers, pistols, and ammunition therefor, without requiring the presentation of an individual license.

(b) Collectors of customs are authorized to permit rifles, carbines, revolvers and pistols in single units to leave the United States without requiring the presentation of a license provided they are consigned to individual members of the armed forces of the United States through army, air force, or navy postal services (APO or FPO).

(c) Collectors of customs are authorized to permit components and parts of rifles, carbines, revolvers and pistols to leave the United States without requiring the presentation of a license provided they are consigned to individual members of the armed forces of the United States through army, air force, or navy postal services (APO's or FPO's) and provided that the value of any such consignment does not exceed $25.

VIOLATIONS AND PENALTIES

§ 75.43 *Violations in general.* Section 12 of the joint resolution of Congress approved November 4, 1939 provides in effect that it shall be unlawful for any person to export or attempt to export from the United States any of those articles defined as arms, ammunition and implements of war by proclamation, to import or attempt to import into the United States, any of the arms, ammunition, and implements of war enumerated in the proclamation without first having complied with the regulations in this part and having obtained a license therefor.

§ 75.44 *Penalties for violations.* Section 15 of the joint resolution approved November 4, 1939, provided that: "In every case of the violation of any of the provisions of this joint resolution or of any rule or regulation issued pursuant thereto where a specific penalty is not herein provided, such violator or violators, upon conviction, shall be fined not more than $10,000 or imprisoned not more than two years, or both."

(54 Stat. 11; 22 U. S. C. 455)

§ 75.45 *Authority of collectors of customs.* The sections of the United States Code cited below provide in effect as follows:

(a) Collectors of customs are authorized to take appropriate action to insure observance of the regulations in this part as to the importation, or attempt to import, or exportation, or attempt to export, arms, ammunition and implements of war, whether or not authorized by the licenses issued under the regulations in this part, including, but not limited to, inspection and loading or unloading from carriers.

(b) When a license is presented to a collector of customs authorizing the exportation or importation of arms, ammunition, and implements of war, together with such other documents as may be required by customs regulations, the collector may require the production of other documents and information relating to the proposed exportation or importation including invoices, orders, packing lists, shipping documents, correspondence, instructions, and other relevant information and documents.

(Sec. 1, 40 Stat. 223, as amended. R. S. 3062, as amended, secs. 510–512, 595, 46 Stat. 733, 734, 752, sec. 1, 62 Stat. 716; 22 U. S. C. 401, 19 U. S. C. 483, 1510–1512, 1595, 18 U. S. C. Sup. 545)

§ 75.46 *Seizure and forfeiture.* The sections of the United States Code cited below provide in effect as follows: Whenever an attempt is made to import, or bring into the United States, or to export, or ship from, or take out of the United States, any arms, ammunition, and implements of war, in violation of law, the several collectors of customs may seize and detain any such arms, ammunition, and implements of war, and the vessel or vehicle containing the same, and retain possession thereof until released or disposed of as directed by law.

(Sec. 1, 40 Stat. 223, as amended, R. S. 3062, as amended, sec. 1, 62 Stat. 716; 22 U. S. C. 401, 19 U. S. C. 483, 18 U. S. C. Sup. 545)

For the Secretary of State.

SCOTT MCLEOD,
*Administrator, Bureau of Security and Consular Affairs.*

## TITLE 24—HOUSING AND HOUSING CREDIT

### Chapter II — Federal Housing Administration, Housing and Home Finance Agency

Subchapter B—Property Improvement Loans

PART 204—TITLE I MORTGAGE INSURANCE; RIGHTS AND OBLIGATIONS OF MORTGAGEE UNDER INSURANCE CONTRACT

PREMIUMS

1. Section 204.4 (18 F. R. 7295, November 18, 1953) is hereby corrected by deleting paragraph (d).

2. Section 204.5 is hereby amended to read as follows:

§ 204.5 *Pro rata refund in event of prepayment.* Upon such prepayment the contract of insurance shall terminate and the Commissioner will refund to the mortgagor an amount equal to the pro rata portion of the current annual mortgage insurance premium theretofore paid which is applicable to the portion of the year subsequent to such payment, computed from the first day of the month following the month in which such prepayment occurs: *Provided*, That no such refund will be made in any case where the prepayment occurs in the twelfth month of the premium year.

(Sec. 2, 48 Stat. 1246, as amended; 12 U. S. C. 1703. Interprets or applies sec. 102, 64 Stat. 48; 12 U. S. C. 1706c)

Issued at Washington, D. C., as of November 10, 1953.

WALTER L. GREENE,
*Acting Federal Housing Commissioner.*

## TITLE 15—COMMERCE AND FOREIGN TRADE

### Chapter III—Bureau of Foreign and Domestic Commerce, Department of Commerce

Subchapter C—Bureau of Foreign Commerce

[8th Gen. Revision of Export Regs., Amdt. P. L. 63 [1]]

PART 399—POSITIVE LIST OF COMMODITIES AND RELATED MATTERS

MISCELLANEOUS AMENDMENTS

1. Section 399.1 *Appendix A—Positive List of Commodities* is amended in the following particulars:

The revised entries set forth below are substituted for entries presently on the Positive List. Where the Positive List contains more than one entry under a single Schedule B number, the entry to be superseded is identified by a numerical reference enclosed in parentheses following the commodity description in the revised entry.

| Dept. of Commerce Schedule B No. | Commodity | Unit | Processing code and related commodity group | GLV dollar-value limits | Validated license required |
|---|---|---|---|---|---|
| 800600 | Cotton pulp [2] | Lb. | TFXT | 100 | RO |
| 489000 | Paper, paperboard, and products, n. e. s.: The following papers when valued at 15 cents per pound or less: Filter paper, except filter paper, chemical (including filter paper impregnated with chemicals for diagnostic use, coated or uncoated, n. e. s. (specify by name and indicate thickness) [2] | Lb. | TFXT | 15 | RO |
| 591100 | Petroleum, crude (barrel of 42 gallons) [2] | Bbl. | PETR 1 | 1,000 | RO |
| 591200 | Natural gasoline (barrel of 42 gallons) [2] | Bbl. | PETR 1 | 125 | RO |
| 591300 | Unfinished oils for further refining [2] | Bbl. | PETR 1 | 1,000 | RO |
| 591350 | Topped crude oil (barrel of 42 gallons) [2] | Bbl. | PETR 1 | 1,000 | RO |
| 591500 | Refined oils: Motor fuel and gasoline (report octane rating): Automotive and other motor fuels and gasoline (barrel of 42 gallons) [2] | Bbl. | PETR 1 | 125 | RO |
| 591700 | Kerosene, except distillate fuel oil (barrel of 42 gallons) [2] | Bbl. | PETR 1 | 250 | RO |
| 591900 | Naphtha in containers over 4 ounces, mineral spirits, solvents, and other finished light products, n. e. s. (barrel of 42 gallons) [2] | Bbl. | PETR 1 | 125 | RO |
| 592300 | Kerosene, except distillate fuel oil (barrel of 42 gallons) [2] | Bbl. | PETR 1 | 125 | RO |
| 592500 | Distillate fuel oil (barrel of 42 gallons) [2] | Bbl. | PETR 1 | 125 | RO |
| 592700 | Residual fuel oil, including bunker C fuel oil (barrel of 42 gallons) [2] | Bbl. | PETR 1 | 1,000 | RO |

See footnotes at end of table.

[1] The G.L.V. dollar-value limit is increased.
[2] The G.L.V. dollar-value limit is decreased.
[3] The processing code is changed or related commodity group number is changed (see § 372.2 (b) and (c)).
[4] The letter "A" is added in the column headed "Commodity Lists," indicating that the commodity is subject to the I.C.D.V. procedure (see § 373.2).
[5] The letter "A" is deleted in the column headed "Commodity Lists," indicating that the commodity is no longer subject to the I.C.D.V. procedure (see § 373.2).
[6] The letter "B" is added in the column headed "Commodity Lists," indicating that the commodity is subject to D.L. restrictions (see § 374.2), and is excepted from the Time Limit licensing procedure (see Part 377, effective December 15, 1953).
[7] The letter "B" is deleted in the column headed "Commodity Lists," indicating that the commodity is no longer subject to D.L. restrictions (see § 374.2), and is no longer excepted from the Time Limit licensing procedure (see Part 377).
[8] The letter "D" is added in the column headed "Commodity Lists," indicating that the commodity is subject to evidence of availability or purchase (see § 373.5).
[9] The letter "D" is deleted in the column headed "Commodity Lists," indicating that the commodity is no longer subject to evidence of availability requirements (see § 373.5).
[10] The letter "E" is added in the column headed "Commodity Lists," indicating that the commodity may be exported under the Periodic Requirements licensing procedure (see Part 376).
[11] The letter "E" is deleted in the column headed "Commodity Lists," indicating that the commodity may no longer be exported under the Periodic Requirements licensing procedure (see Part 376, effective December 19, 1953).
[12] The letter "F" is added in the column headed "Commodity Lists," indicating that the commodity may be exported under the Foreign Distribution licensing procedure (see Part 378).
[13] The letter "F" is deleted in the column headed "Commodity Lists," indicating that the commodity may no longer be exported under the Foreign Distribution licensing procedure (see Part 378, effective December 19, 1953).
[14] The letter "G" is added in the column headed "Commodity Lists," indicating that the commodity may be exported under general license GLV to Rated Destinations, only within the dollar-value limit specified on the Positive List (see § 371.10 (e)), effective December 19, 1953.
[15] The letter "G" is deleted in the column headed "Commodity Lists," indicating that the commodity may be exported to Group O destinations under general license GLV within the $500 dollar-value limit (see § 371.10 (e)).
[16] The destination control is changed from R to RO.
[17] The destination control is changed from RO to R.
[18] The commodity description is revised without substantive change.
[19] The unit of quantity is changed.
[20] The commodity is excepted from the provisions of General In-Transit GIT License (see § 371.9 (e)), effective December 19, 1953.
[21] The commodity is no longer excepted from the provisions of General In-Transit License GIT (see § 371.9 (e)).
[22] The effect of this revision is to change the basis for determining license requirements for dielectric paper to include only such paper when 0.005 inches or less in thickness.
[23] Carbon steel welding rods are deleted from the Positive List.
[24] Zinc welding rods and wire are presently included in the last entry on the Positive List under Schedule B No. 679670.
[25] Parts and accessories, n. e. c., specially fabricated for power and distribution transformers under 100 kilovolt amperes are removed from the Positive List.
[26] The effect of this revision is to delete parts for detachable outboard motors under 50 horsepower.
[27] The effect of this revision is to delete hardness testers not of the micro hardness type which do not use diamond penetrators.
[28] The requirement to specify type, intake and delivery pressures, and intake capacity of compressors for which parts are intended, and whether pressure parts are fabricated of or lined with corrosion-resistant materials is removed; and the Periodic Requirements (PR), Items (see Part 376) is made available for parts for gas compressors included on the Positive List under Schedule B No. 770625.
[29] The requirement to specify whether pressure parts are fabricated of or lined with any corrosion-resistant materials is removed.
[30] The effect of this revision is to extend the coverage of the entry to include all types of automatic control valves when their pressure parts are made of or wholly lined with corrosion-resistant materials, effective November 27, 1953.
★The commodities described in this Positive List entry are excepted from the provisions of General In-Transit License, GIT. See § 371.9 (e).
†The G.L.V. dollar-value limit for shipments to Mexico is $1,000.

Shipments of any commodities removed from general license to Country Group R or Country Group O destinations as a result of changes set forth in this amendment, which were on dock, on lighter, laden aboard an exporting carrier, or in transit to a port of exit pursuant to actual orders for export prior to 12:01 a. m., November 27, 1953, may be exported under the previous general license provisions up to and including December 19, 1953. Any such shipment not laden aboard the exporting carrier on or before December 19, 1953, requires a validated license for export.

This part of the amendment shall become effective as of November 19, 1953, unless otherwise indicated in the footnotes.

2. Section 399.2 *Appendix B—Commodity Interpretations* is amended by adding thereto *Interpretation 13* to read as follows:

INTERPRETATION 13: VARIABLE SPEED TRANSMISSION

Variable speed transmissions, as listed on the Positive List under Schedule B No. 775400, are intended to include two types of power transmissions: mechanical and hydraulic, except vehicular.

Mechanical transmissions are those that transmit power by mechanical connection between the driving and driven elements. The changes of speed are variable at will, being limited only by the design range, while the unit is in operation. This is accomplished by changing the pitch ratio between the driving and driven pulleys or by shifting the drive belt position on two cones which are mounted in reversed positions on their respective shafts.

Hydraulic transmissions are those that transmit by circulating fluid, of variable pressure and or volume between the driving and driven elements. The driving fluid may be used to produce linear or rotary motion and the volume may be varied to produce any speed range within the design limitations of the unit.

Specially fabricated parts and components, n. e. c. (Schedule B No. 775400), are not included on the Positive List and may be shipped under General License GRO. Included in this category of parts and components are the pumps specially fabricated for hydraulic power transmission. They do not deliver liquids but operate on a closed recirculating system in which the liquid is used as the medium for transmitting power but is not itself transported beyond the limits of its own circulation system.

Pumps which may be adapted to hydraulic power transmission but can be used in other applications as well, are not intended to be included in Schedule B No. 775400. Pumps of this type must be reported elsewhere, depending on the specifications (see Schedule B. Nos. 770900-770980).

This part of the amendment shall become effective as of November 19, 1953.

# TITLE 33—NAVIGATION AND NAVIGABLE WATERS

## Chapter I—Coast Guard, Department of the Treasury

### Subchapter M—Coast Guard Vessels

[CGFR 53-50]

### PART 135—LIGHTS FOR COAST GUARD VESSELS OF SPECIAL CONSTRUCTION

### EXEMPTIONS OF STATUTORY REQUIREMENTS FOR COAST GUARD VESSELS

The provisions of section 2 and Rule 13 (b) in section 6 of the act of October 11, 1951 (65 Stat. 407, 415; 33 U. S. C. 143a, 145k), and section 1 of the act of December 3, 1945, as amended (59 Stat. 590; 33 U. S. C. 360), provide, in essence, that Coast Guard vessels of special construction may be exempted from certain requirements of the various applicable laws with respect to the number, position, range of visibility, or arc of visibility of the lights required to be displayed by vessels when navigating on the high seas or on navigable waters of the United States, its territories or possessions. Section 2 of the act of October 11, 1951, and section 1 of the act of December 3, 1945, also provide that if any exempted vessel or class of vessels, by reason of special construction, cannot comply with the applicable requirements, the lights prescribed shall conform as closely to the requirements of the applicable laws as it is found or certified to be feasible. These laws also require that notice of such findings or certifications, together with the requirements describing the character and position of the lights to be displayed on such exempted vessel, or class of vessels, shall be published in the FEDERAL REGISTER and in the Notice to Mariners.

The new Subchapter M, containing Part 135, for placement in Chapter I of Title 33 of the Code of Federal Regulations, as contained in this document, sets forth the findings, certifications, exempted requirements, and the requirements certified to be found feasible for certain Coast Guard vessels with respect to lights.

By virtue of the authority vested in me as Commandant, United States Coast Guard, by Treasury Department Order No. 167-6, dated November 17, 1953, Chapter I of Title 33 CFR is amended by adding the following new regulations which shall be effective on and after January 1, 1954:

Sec
135.01 Purpose of regulations.
135.05 Authority for regulations.
135.10 Definition of terms used in this part.
135.15 General findings and certifications.
135.20 Extent of compliance.
135.25 International Rules; horizontal separation of range lights.
135.30 International Rules; height of forward masthead light.
135.50 Great Lakes Rules; horizontal separation of range lights.

AUTHORITY: §§ 135.01 to 135.50 issued under sec. 1, 59 Stat. 590, sec. 2, 65 Stat. 407; 33 U. S. C. 360, 143a. Statutory provisions interpreted or applied are cited to text in parentheses.

§ 135.01 *Purpose of regulations.* The regulations in this part set forth findings, certifications, exemptions from certain statutory requirements, and those requirements found or certified to be feasible for Coast Guard vessels, by reason of special construction, with respect to the number, position, range of visibility, or arc of visibility of the lights required to be displayed by vessels when navigating on the high seas or navigable waters of the United States, its territories or possessions.

§ 135.05 *Authority for regulations.* The authority to prescribe regulations in this part for Coast Guard vessels of special construction is set forth in section 2 of the act of October 11, 1951, as amended (65 Stat. 407; 33 U. S. C. 143a), and section 1 of the act of December 3, 1945, as amended (59 Stat. 590; 33 U. S. C. 360). Rule 13 (b), International Rules (Section 6, Part B, 65 Stat. 415; 33 U. S. C. 145k), authorizes the Government to make certain special rules which will apply on the high seas, so far as its naval or other military vessels of special construction are concerned. In accordance with these laws the Acting Secretary of the Treasury by Treasury Department Order No. 167-6, dated November 17, 1953, delegated to the Commandant these functions pertaining to lights for Coast Guard vessels of special construction.

§ 135.10 *Definition of terms used in this part*—(a) *International Rules.* The term "International Rules" means the "Regulations for Preventing Collisions at Sea, 1948," as set forth in section 6 of the act of October 11, 1951, as amended (65 Stat. 403-420, as amended; 33 U. S. C. 144-147d).

(b) *Inland Rules.* The term "Inland Rules" means the rules for the navigation of rivers, harbors, and inland waters of the United States, except (1) the Great Lakes and their connecting and tributary waters as far east as Montreal, (2) the waters of the Mississippi River between its source and the Huey P. Long Bridge and all of its tributaries emptying thereinto and their tributaries, (3) that part of the Atchafalaya River above its junction with the Plaquemine-Morgan City alternate waterway, and (4) the Red River of the North, as set forth in the act of June 7, 1897, as amended (30 Stat. 96-103, as amended; 33 U. S. C. 154-232).

(c) *Great Lakes Rules.* The term "Great Lakes Rules" means the act to regulate navigation on the Great Lakes and their connecting and tributary waters of February 8, 1895, as amended (28 Stat. 645-650, as amended; 33 U. S. C. 241-294).

§ 135.15 *General findings and certifications.* (a) It is hereby found that the Coast Guard vessels of special construction described in this part cannot comply with certain applicable statutory requirements, enumerated in various sections of this part, relating to the lights required to be displayed by vessels when navigating on the high seas or navigable waters of the United States, its territories or possessions, without seriously affecting the military characteristics and functions of the vessels concerned.

(b) It is hereby found and certified that the requirements regarding lights, as stated in the various sections of this part, which will be carried by the Coast Guard vessels described, conform as closely as feasible to the applicable statutory requirements.

§ 135.20 *Extent of compliance.* Except as provided otherwise in this part, the Coast Guard vessels described in this part are in full compliance with the other provisions of the applicable International Rules, Inland Rules, or Great Lakes Rules governing the areas where the vessels are being operated.

§ 135.25 *International Rules; horizontal separation of range lights.* (a) Rule 2 (a) (iii), International Rules, requires in part that the minimum horizontal separation between the forward masthead light and the after range light shall be at least 45 feet (33 U. S. C. 145 (a) (iii)). Because of special construction, the Coast Guard vessels named in this section cannot comply with this requirement and are therefore exempted.

(b) The following Auxiliary vessel shall carry the forward masthead light and the after range light with a horizontal separation of 34 feet:

U. S. C. G. C. Storis (WAG-38).

(c) The following Icebreakers shall carry the forward masthead light and after range light with a horizontal separation of 23 feet:

U. S. C. G. C. Eastwind (WAGB-279).
U. S. C. G. C. Northwind (WAGB-282).
U. S. C. G. C. Westwind (WAGB-281).

(d) The following Escort vessels shall carry the forward masthead light and after range light with a horizontal separation of 34 feet:

U. S. C. G. C. Chambers (WDE-491).
U. S. C. G. C. Durant (WDE-489).
U. S. C. G. C. Falgout (WDE-424).
U. S. C. G. C. Finch (WDE-428).
U. S. C. G. C. Forster (WDE-434).
U. S. C. G. C. Koiner (WDE-431).
U. S. C. G. C. Lansing (WDE-488).
U. S. C. G. C. Lowe (WDE-425).
U. S. C. G. C. Newell (WDE-422).
U. S. C. G. C. Ramsden (WDE-482).
U. S. C. G. C. Richey (WDE-485).
U. S. C. G. C. Vance (WDE-487).

(e) The following Buoy Tenders, Class 180-A, shall carry the forward masthead light and after range light with a horizontal separation of 24 feet:

U. S. C. G. C. Balsam (WAGL-62).
U. S. C. G. C. Cactus (WAGL-270).
U. S. C. G. C. Citrus (WAGL-300).
U. S. C. G. C. Clover (WAGL-292).
U. S. C. G. C. Conifer (WAGL-301).
U. S. C. G. C. Cowslip (WAGL-277).
U. S. C. G. C. Evergreen (WAGL-295).
U. S. C. G. C. Gentian (WAGL-290).
U. S. C. G. C. Laurel (WAGL-291).
U. S. C. G. C. Madrona (WAGL-302).
U. S. C. G. C. Sorrel (WAGL-296).

(f) The following Buoy Tenders, Class 180-B, shall carry the forward masthead light and after range light with a horizontal separation of 16 feet:

U. S. C. G. C. Buttonwood (WAGL-306).
U. S. C. G. C. Ironwood (WAGL-297).
U. S. C. G. C. Papaw (WAGL-308).
U. S. C. G. C. Planetree (WAGL-307).
U. S. C. G. C. Sweetgum (WAGL-309).

(g) The following Buoy Tenders, Class 180–C, shall carry the forward masthead light and after range light with a horizontal separation of 16 feet:

U. S. C. G. C. Basswood (WAGL-388).
U. S. C. G. C. Bittersweet (WAGL-389).
U. S. C. G. C. Blackhaw (WAGL-390).
U. S. C. G. C. Blackthorn (WAGL-391).
U. S. C. G. C. Bramble (WAGL-392).
U. S. C. G. C. Firebush (WAGL-393).
U. S. C. G. C. Hornbeam (WAGL-394).
U. S. C. G. C. Iris (WAGL-395).
U. S. C. G. C. Mallow (WAGL-396).
U. S. C. G. C. Mariposa (WAGL-397).
U. S. C. G. C. Sagebrush (WAGL-399).
U. S. C. G. C. Salvia (WAGL-400).
U. S. C. G. C. Sassafras (WAGL-401).
U. S. C. G. C. Sedge (WAGL-402).
U. S. C. G. C. Spar (WAGL-403).
U. S. C. G. C. Sweetbrier (WAGL-405).

(h) The following Gunboat shall carry the forward masthead light and after range light with a horizontal separation of 17 feet:

U. S. C. G. C. Tampa (WPG-164).

(Sec. 6, Rule 13 (b), 65 Stat. 415, sec. 4, 62 Stat. 250; 33 U. S. C. 145k, 356)

§ 135.30 *International Rules; height of forward masthead light.* (a) Rule 2 (a) (iii), International Rules, requires the forward masthead light to be carried at a height above the hull of not less than 20 feet, and, if the breadth of the vessel exceeds 20 feet, then at a height above the hull not less than such breadth, but the light need not be placed at a greater height above the hull than 40 feet (33 U. S. C. 145 (a) (iii)). Because of special construction, the Coast Guard vessels named in this section cannot comply with this requirement and are therefore exempted.

(b) The following Gunboat has a breadth of over 40 feet and shall carry the forward masthead light at a height of 27 feet above the hull:

U. S. C. G. C. Tampa (WPG-164).

(c) The following Escort vessels have a breadth of 37½ feet and shall carry the forward masthead light at a height of 27 feet above the hull:

U. S. C. G. C. Chambers (WDE-491).
U. S. C. G. C. Durant (WDE-489).
U. S. C. G. C. Falgout (WDE 424).
U. S. C. G. C. Finch (WDE-428).
U. S. C. G. C. Forster (WDE-434).
U. S. C. G. C. Kolner (WDE 431).
U. S. C. G. C. Lansing (WDE-488).
U. S. C. G. C. Lowe (WDE-425).
U. S. C. G. C. Newell (WDE 422).
U. S. C. G. C. Ramsden (WDE-482).
U. S. C. G. C. Richey (WDE-485).
U. S. C. G. C. Vance (WDE-487).

(Sec. 6, Rule 13 (b), 65 Stat. 415, sec. 4, 62 Stat. 250, 33 U. S. C. 145k, 356)

§ 135.50 *Great Lakes Rules; horizontal separation of range lights.* (a) Rule 3 (e), Great Lakes Rules, requires in part that the minimum horizontal separation between the forward masthead light and the after range light shall be more than 50 feet (33 U. S. C. 252 (e)). Because of special construction, the Coast Guard vessels named in this section cannot comply with this requirement and are therefore exempted.

(b) The following Buoy Tenders, Class 160–A, shall carry the forward masthead light and after range light with a horizontal separation of 24 feet:

U. S. C. G. C. Tupelo (WAGL-303).
U. S. C. G. C. Woodbine (WAGL-289).

(c) The following Buoy Tender, Class 180–B, shall carry the forward masthead light and after range light with a horizontal separation of 16 feet:

U. S. C. G. C. Mesquite (WAGL-305).

(d) The following Buoy Tenders, Class 180–C, shall carry the forward masthead light and after range light with a horizontal separation of 16 feet:

U. S. C. G. C. Acacia (WAGL-406).
U. S. C. G. C. Sundew (WAGL-404).
U. S. C. G. C. Woodrush (WAGL-407).

(e) The following Icebreaker shall carry the forward masthead light and after range light with a horizontal separation of 36 feet:

U. S. C. G. C. Mackinaw (WAGB-83).

Dated: November 25, 1953.

[SEAL] A. C. RICHMOND,
*Real Admiral, U. S. Coast Guard, Acting Commandant.*

## TITLE 43—PUBLIC LANDS: INTERIOR

### Chapter I—Bureau of Land Management, Department of the Interior

#### Appendix—Public Land Orders

[Public Land Order 929]

ALASKA

REVOKING EXECUTIVE ORDER NO. 7888 OF MAY 16, 1938

By virtue of the authority vested in the President by section 1 of the act of June 25, 1910 (36 Stat. 847; 43 U. S. C. 141), and pursuant to Executive Order No. 10355 of May 26, 1952, it is ordered as follows:

Executive Order No. 7888 of May 16, 1938, temporarily withdrawing the following-described lands for classification and pending determination as to the advisability of reserving them for national monument purposes, is hereby revoked:

SEWARD MERIDIAN

T. 4 N., R. 11 W.,
Sec. 20, E½;
Secs. 21 and 28;
Sec. 29, E½.

The areas described aggregate 1,920 acres.

The lands are within the exterior limits of the Kenai National Moose Range as established by Executive Order No. 8979 of October 16, 1941, and are included in the withdrawal for classification and examination and in aid of proposed legislation made by Public Land Order No. 487 of June 16, 1948.

ORME LEWIS,
*Assistant Secretary of the Interior.*

NOVEMBER 24, 1953.

[F. R. Doc. 53-10014; Filed, Nov. 30, 1953; 8:46 a. m.]

## TITLE 45—PUBLIC WELFARE

### Chapter IV—Office of Vocational Rehabilitation, Department of Health, Education, and Welfare

PART 402—BUSINESS ENTERPRISES PROGRAM FOR THE BLIND

TERMS

Pursuant to the authority conferred by Title II of Pub. Law 170, 83d Cong., governing Federal reimbursement for one-half of necessary expenditures for acquisition of vending stands and other equipment to be controlled by the State Agency for the use of blind persons, the regulations prescribed pursuant to Title II of Pub. Law 165, 80th Cong. (12 F. R. 4644), as revised by the regulations relating to the same subject prescribed pursuant to Title II of Ch. V of Pub. Law 759, 81st Cong. (15 F. R. 6449), are hereby adopted and prescribed as the regulations under Title II of Pub. Law 170, 83d Cong., with the following change:

Section 402.2 (a) is hereby changed to read as follows:

§ 402.2 *Terms.* • • •

(a) "Act" means Title II of Pub. Law 170, 83d Cong.

(39 Stat. 929, as amended, 49 Stat. 1559, sec. 7, 57 Stat. 374; 20 U. S. C. 11–30, 107–107f, 29 U. S. C. 37)

Dated: November 24, 1953.

[SEAL] NELSON A. ROCKEFELLER,
*Acting Secretary.*

[F. R. Doc. 53-10023; Filed, Nov. 30, 1953; 8:48 a. m.]

## TITLE 49—TRANSPORTATION

### Chapter I—Interstate Commerce Commission

[5th Rev. S. O. 95, Amdt. 2]

PART 95—CAR SERVICE

APPOINTMENT OF REFRIGERATOR CAR AGENT

At a session of the Interstate Commerce Commission, Division 3, held at its office in Washington, D. C., on the 24th day of November A. D. 1953.

Upon further consideration of the provisions of Fifth Revised Service Order No. 95 (18 F. R. 473, 3732), and good cause appearing therefor: It is ordered, that:

Section 95.95 *Appointment of refrigerator car agent*, of Fifth Revised Service Order No. 95, be, and it is hereby, amended by substituting the following paragraph (d) for paragraph (d) thereof:

(d) This section, as amended, shall expire at 11:59 p. m., June 30, 1954, unless otherwise modified, changed, suspended, or annulled by order of this Commission.

It is further ordered, that this amendment shall become effective at 11:59 p. m., November 30, 1953; that a copy of this order and direction be served upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and per diem agreement under the terms of that agreement; and that notice of this order be given to the general public by depositing a copy in the office of the Secretary of the Commission at Washington, D. C., and by filing it with the Director, Division of the Federal Register.

(Sec. 12, 24 Stat. 383, as amended; 49 U. S. C. 12. Interprets or applies sec. 1, 24 Stat. 379, as amended; 49 U. S. C. 1)

By the Commission, Division 3.

[SEAL] GEORGE W. LAIRD,
*Secretary.*

[F. R. Doc. 53-10024; Filed, Nov. 30, 1953; 8:49 a. m.]

[2d Rev. S. O. 872, Amdt. 3]

PART 95—CAR SERVICE

MOVEMENT OF GRAIN TO TERMINAL ELEVATORS BY PERMIT

At a session of the Interstate Commerce Commission, Division 3, held at its office in Washington, D. C., on the 24th day of November, A. D. 1953.

Upon further consideration of the provisions of Second Revised Service Order No. 872 (17 F. R. 10738; 18 F. R. 1858, 4503), and good cause appearing therefor: It is ordered, that:

Section 95.872 Second Revised Service Order No. 872, *Movement of grain to terminal elevators by permit* be, and it is hereby, amended by substituting the following paragraph (e) hereof for paragraph (e) thereof:

(e) *Expiration date.* This section shall expire at 11:59 p. m., April 30, 1954, unless otherwise modified, changed, suspended, or annulled by order of this Commission.

It is further ordered, that this amendment shall become effective at 11:59 p. m., November 30, 1953; that a copy of this order and direction be served upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and per diem agreement under the terms of that agreement; and that notice of this order be given to the general public by depositing a copy in the office of the Secretary of the Commission at Washington, D. C., and by filing it with the Director, Division of the Federal Register.

(Sec. 12, 24 Stat. 383, as amended; 49 U. S. C. 12. Interprets or applies sec. 1, 24 Stat. 379, as amended; 49 U. S. C. 1)

By the Commission, Division 3.

[SEAL] GEORGE W. LAIRD,
*Secretary.*

[F. R. Doc. 53-10025; Filed, Nov. 30, 1953; 8:49 a. m.]

# PROPOSED RULE MAKING

## DEPARTMENT OF AGRICULTURE

### Production and Marketing Administration

[7 CFR Part 918]

[Docket No. AO 210-A3]

HANDLING OF MILK IN MEMPHIS, TENNESSEE, MARKETING AREA

NOTICE OF HEARING ON PROPOSED AMENDMENTS TO TENTATIVE MARKETING AGREEMENT AND TO ORDER, AS AMENDED

Pursuant to the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), notice is hereby given of a public hearing to be held in the Military Room, King Cotton Hotel, Memphis, Tennessee, beginning at 10:00 a. m., December 17, 1953, for the purpose of receiving evidence with respect to economic conditions which relate to the handling of milk in the Memphis, Tennessee, marketing area and to the proposed amendments hereinafter set forth, or appropriate modifications thereof, to the tentative marketing agreement heretofore approved by the Secretary of Agriculture and to the order, as amended, regulating the handling of milk in the Memphis, Tennessee, marketing area (7 CFR 918 et seq.). These proposed amendments have not received the approval of the Secretary of Agriculture.

Proposals No. 1 and No. 3 relative to the enlargement of the marketing area and to a change in the producer definition, respectively, raise the issue as to whether the provisions of the present order would tend to effectuate the declared policy of the act if applied to the marketing area as proposed to be extended and to the additional producers who would be included under the proposed definition, or if not, what modifications of the classification, pricing (including differentials) and payment provisions of the order, as amended, are appropriate to effectuate the declared policy of the act.

Amendments to the order, as amended, regulating the handling of milk in the Memphis, Tennessee, milk marketing area have been proposed as follows:

By Mid-South Milk Producers Association:

1. Delete § 918.6 and substitute therefor the following:

§ 918.6 *Memphis, Tennessee, marketing area.* "Memphis, Tennessee, marketing area," hereinafter called the "marketing area" means all the territory within the boundaries of the county of Shelby and the city of Jackson within the State of Tennessee; and all of the territory within the limits of the City of West Memphis in the State of Arkansas.

2. Delete § 918.7 and substitute therefor the following:

§ 918.7 *Fluid milk plant.* "Fluid milk plant" means (a) any milk plant approved to sell or dispose of milk in the marketing area and used during the month for the processing and packaging of Grade A milk and from which not less than 5 percent of the milk received from producers is distributed in the container in which packaged from delivery routes or plant stores as Class I milk in the marketing area; or (b) any approved receiving station at which producer milk is received and cooled for delivery to a plant(s) described under paragraph (a) in this section.

3. Delete § 918.10 and substitute therefor the following:

§ 918.10 *Producer.* "Producer" means any person, except a producer-handler, who produces milk under a dairy farm inspection permit issued by a health authority duly authorized to administer laws and regulations governing the quality of milk for consumption as milk in the marketing area and whose milk is: (a) Received at a fluid milk plant, or (b) diverted by a handler from a fluid milk plant to a nonfluid milk plant: *Provided*, That any such milk so diverted shall be deemed to have been received at the fluid milk plant by the handler who causes it to be diverted.

4. Add a new § 918.14 which shall read as follows:

§ 918.14 *Chicago butter price.* "Chicago butter price" means the simple average as computed by the market administrator of the daily wholesale selling prices (using the midpoint of any price range as one price) per pound of Grade A (92-score) bulk creamery butter at Chicago as reported by the Department of Agriculture during the month.

5. Delete § 918.41 and substitute therefor the following:

§ 918.41 *Classes of utilization.* Subject to the conditions set forth in §§ 918.43 and 918.44, the classes of utilization shall be as follows:

(a) Class I milk shall be all skim milk (including concentrated or reconstituted skim milk solids) and butterfat (1) disposed of in fluid form as milk, skim milk, cream (including sour cream), buttermilk, milk drinks (plain or flavored) except skim milk and butterfat disposed of in fluid form for livestock feed; (2) disposed of in fluid form as any milk product which is required by the appropriate health authority in the marketing area to be made from milk, skim milk or cream, from sources approved by such authority; and (3) not accounted for as Class II milk.

(b) Class II milk shall be all skim milk and butterfat the utilization of which is established: (1) As used to produce any product other than those specified in paragraph (a) of this section, (2) as disposed of by transfer or diversion to a nonfluid milk plant and classified as Class II milk under the provisions of § 918.44 (c), (3) as disposed of for livestock feed, (4) in plant shrinkage of skim milk and butterfat up to 2 percent of skim milk and butterfat received from producers, and (5) in plant shrinkage in other source milk.

(c) Class II milk shall be all skim milk and butterfat the utilization of which is established: (1) As used to produce any product other than those specified in paragraph (a) of this section, (2) as disposed of by transfer or diversion to a nonfluid milk plant and classified as Class II milk under the provisions of § 918.44 (c), (3) as disposed of for livestock feed, (4) in plant shrinkage of skim milk and butterfat up to 2 percent of skim milk and butterfat received from producers, and (5) in plant shrinkage in other source milk.

6. Add a new paragraph (c) in § 918.43 which shall read as follows:

(c) If any of the water contained in the milk from which a product is made is removed before such product is disposed of by a handler, the hundredweight of skim milk disposed of in such product shall be considered to be an amount equivalent to the nonfat solids contained in such product, plus all of the water originally associated with such solids.

7. Delete § 918.50 and substitute therefor the following:

§ 918.50 *Basic formula price to be used in determining the Class I price.* The basic formula price to be used in determining the price per hundredweight of Class I milk shall be the highest of the prices computed pursuant to paragraphs (a), (b), and (c) of this section and paragraph (b) of § 918.51, all for the preceding month.

(a) To the average of the basic or field prices per hundredweight reported to have been paid or to be paid for milk of 3.5 percent butterfat content received from farmers during the month at the following plants or places for which prices have been reported to the market administrator or to the Department of Agriculture:

*Companies and Location*

Borden Co., Mount Pleasant, Mich.
Borden Co., New London, Wis.
Borden Co., Orfordville, Wis.
Carnation Co., Berlin, Wis.
Carnation Co., Chilton, Wis.
Carnation Co., Oconomowoc, Wis.
Carnation Co., Richland Center, Wis.
Carnation Co., Sparta, Mich.
Pet Milk Co., Belleville, Wis.
Pet Milk Co., Coopersville, Mich.
Pet Milk Co., Hudson, Mich.
Pet Milk Co., New Clarus, Wis.
Pet Milk Co., Wayland, Mich.
White House Milk Co., Manitowoc, Wis.
White House Milk Co., West Bend, Wis.

Add an amount computed by multiplying the Chicago butter price for the current month by 0.12 and then by 5.

(b) The price per hundredweight computed by adding together the values determined pursuant to subparagraphs (1) and (2) of this paragraph:

(1) Add 20 percent to the Chicago butter price for the month and multiply by 4.0.

(2) From the simple average as computed by the market administrator of the weighted averages of carlot prices per pound for nonfat dry milk solids, spray and roller process, respectively, for human consumption, f. o. b. manufacturing plants in the Chicago area as published for the period from the 26th day of the preceding month to the 25th day of the current month by the Department of Agriculture, deduct 5 cents, and multiply by 7.5.

(c) The price per hundredweight resulting from the following formula:

(1) Multiply by 8.53 the average of the daily prices per pound of cheese at Wisconsin primary markets ("cheddars," f. o. b. Wisconsin assembly points, cars or truckloads) as reported by the U. S. D. A. during the month;

(2) Add 0.902 times the Chicago butter price for the month;

(3) Subtract 34.3 cents; and

(4) Add an amount computed by multiplying the Chicago butter price for the month by 0.12 and then by 5.

8. Delete § 918.51 and substitute therefor the following:

§ 918.51 *Class prices.* Subject to the provisions of §§ 918.52 and 918.53, the minimum prices per hundredweight to be paid by each handler for milk received at his fluid milk plant(s) from producers during the month shall be as follows:

(a) *Class I milk.* The price for Class I milk for the month shall be the amount set forth below for such month opposite the price range within which the basic formula price falls plus or minus any amounts calculated pursuant to subparagraph (1) of this paragraph:

| I[illegible] (Simple avg. of daily prices per pound received) | Amount per hundredweight | |
|---|---|---|
| | September through February | March through August |
| Not over (less $2.00) | $2.18 | $3.08 |
| $2.00 but not more than $2.10 | 3.08 | 3.28 |
| $2.10 but not more than $2.20 | 3.88 | 3.48 |
| $2.20 but not more than $2.30 | 4.08 | 3.68 |
| $2.30 but not more than $2.40 | 4.28 | 3.88 |
| $2.40 but not more than $2.50 | 4.48 | 4.08 |
| $2.50 but not more than $2.60 | 4.68 | 4.28 |
| $2.60 but not more than $2.70 | 4.88 | 4.48 |
| $2.70 but not more than $2.80 | 5.08 | 4.68 |
| $2.80 but not more than $2.90 | 5.28 | 4.88 |
| $2.90 but not more than $3.00 | 5.48 | 5.08 |
| $3.00 but not more than $3.10 | 5.68 | 5.28 |
| $3.10 but not more than $3.20 | 5.88 | 5.48 |
| $3.20 but not more than $3.30 | 6.08 | 5.68 |
| $3.30 but not more than $3.40 | 6.28 | 5.88 |
| $3.40 but not more than $3.50 | 6.48 | 6.08 |
| $3.50 but not more than $3.60 | 6.68 | 6.28 |
| $3.60 but not more than $3.70 | 6.88 | 6.48 |
| $3.70 but not more than $3.80 | 7.08 | 6.68 |
| $3.80 but not more than $3.90 | 7.28 | 6.88 |
| $3.90 but not more than $4.00 | 7.48 | 7.08 |
| Add for each additional 20 cents or fraction thereof | An additional 20 cents. | |

(1) Add if the net utilization percentage calculated pursuant to subparagraph (2) of this paragraph is less than, or subtract if it is more than the base utilization range, an amount determined by multiplying such net utilization percentage by the appropriate figure shown in the following tabulation:

| Pricing months: | *Cents* |
|---|---|
| January–February | 3 |
| March–June | 1 |
| July–September | 3 |
| October–December | 4 |

(2) The figure calculated for each month as follows shall be known as the net utilization percentage: Divide the net pounds of Class I milk disposed of by all handlers for the second and third preceding months into the total receipts of milk from producers by all handlers for the same months, multiply by 100, round to the nearest whole percentage number and determine the amount by which such member exceeds the higher figure or is less than the lower figure of the appropriate base utilization range in the following table:

| Pricing month | Second and third preceding month | Base utilization range |
|---|---|---|
| January | October–November | 100–105 |
| February | November–December | 101–106 |
| March | December–January | 106–111 |
| April | January–February | 110–115 |
| May | February–March | 112–117 |
| June | March–April | 119–124 |
| July | April–May | 128–133 |
| August | May–June | 128–133 |
| September | June–July | 124–129 |
| October | July–August | 122–127 |
| November | August–September | 115–120 |
| December | September–October | 106–111 |

(b) *Class II milk.* The price for Class II milk shall be the average of the basic or field prices reported to have been paid or to be paid for ungraded milk of 4.0 percent butterfat content, without deduction for hauling or other charges to be paid by the farm shipper, received from dairy farmers during the month at the following plants or places for which prices have been reported to the market administrator or to the Department of Agriculture:

*Concern and Location*

Olive Branch Cheese Co., Olive Branch, Miss.
Borden Co., Starkville, Miss.
Carnation Co., Tupelo, Miss.
Pet Milk Co., Mayfield, Ky.
Pet Milk Co., Kosciusko, Miss.
Armour Cheese Plant, New Albany, Miss.
Kraft Cheese Plant, Corinth, Miss.

9. Delete § 918.52 and substitute therefor the following:

§ 918.52 *Butterfat differential to handlers.* If the weighted average butterfat content of milk received from producers allocated to Class I milk or Class II milk, respectively, pursuant to § 918.46, for a handler is more or less than 4.0 percent, there shall be added to or subtracted from, as the case may be, the price for such class, for each one-tenth of one percent that such weighted average butterfat test is above or below 4.0 percent, a butterfat differential (computed to the nearest tenth of a cent), calculated for each class as follows:

(a) *Class I Price.* Multiply by 1.2 the Chicago butter price for the month and divide the result by 10.

(b) *Class II Price.* For the months of July through March, multiply by 1.2 the Chicago butter price for the month and divide the result by 10, and for the months of April, May and June, multiply by 1.15 the Chicago butter price for the month and divide by 10.

10. Delete § 918.53 and substitute therefor the following:

§ 918.53 *Transportation differential.* With respect to that portion of milk which is received from producers at a fluid milk plant specified in § 918.7 (b) which is (a) moved as milk from such plant directly to a fluid milk plant located in the marketing area and classified as Class I milk or (b) moved from such plant in fluid form to a nonfluid milk plant and classified as Class I milk, the prices specified in § 918.51 (a) shall be reduced by the amount per hundredweight set forth in the following schedule based on the shortest distance via hard surfaced highway, as determined by the market administrator, from the plant where the milk is first received from producers to the City Hall in Memphis, Tennessee:

| Distance from the City Hall in Memphis (miles): | *Amount per hundredweight (cents)* |
|---|---|
| 40 but less than 50 | 17 |
| 50 but less than 60 | 18 |
| 60 but less than 70 | 19 |
| Within each 10-mile zone thereafter. | An additional 1 cent. |

*Provided,* That for purposes of calculating such location differential with respect to milk transferred between fluid milk plants, the Class II milk remaining in the transferee-plant after the subtraction pursuant to § 918.46 (a) (2) and (b) shall be assigned to producer milk from other plants in sequence according to the transportation differential applicable at each plant beginning with the plant having the largest differential.

11. Amend paragraphs (c) and (d) of § 918.72 and make any further amendments as will accomplish an equitable allocation of adjustments resulting from the receipts and utilization of milk of the members of a cooperative association.

12. Change the reference in § 918.46 (a) (1) from § 918.41 (b) (3), as stated therein, to "§ 918.41 (b) (4)" and make any and all other appropriate changes and/or corrections to conform other provisions of the order to the foregoing amendments.

Make such adjustments as may be necessary to make the entire order conform with any amendments thereto that may result from this hearing.

Copies of this notice of hearing and of the order now in effect may be procured from the market administrator, 198 S. Main Street, Memphis 3, Tennessee, or from the Hearing Clerk, Room 1353, South Bldg., U. S. Department of Agriculture, Washington 25, D. C., or may be there inspected.

Dated: November 25, 1953.

[SEAL] ROY W. LENNARTSON,
*Assistant Administrator.*

## SECURITIES AND EXCHANGE COMMISSION

### [ 17 CFR Part 250 ]

REQUIREMENT OF PUBLIC INVITATION OF PROPOSALS FOR PURCHASE OR UNDERWRITING OF SECURITIES

REGULATION AND EXEMPTION OF VARIOUS FINANCIAL TRANSACTIONS

Notice is hereby given that the Securities and Exchange Commission has under consideration a proposal to amend § 250.50 (Rule U-50) under the Public Utility Holding Company Act of 1935, which requires with certain exceptions competitive bidding for the purchase or underwriting of securities issued or sold by registered holding companies and subsidiary companies.

The proposal to amend Rule U-50 is made pursuant to the provisions of sections 6 (b) and 20 (a) of the Public Utility Holding Company Act of 1935.

Rule U-50 in its present form was adopted in 1941. Except in the cases specified in paragraph (a) of the rule, it requires that the issue or sale of securities by registered holding companies and subsidiary companies be at competitive bidding.

It is proposed to add to the cases excepted from the operation of the rule the issue and sale of its own securities by a public utility subsidiary of a registered holding company which is not itself a registered holding company, if the issue and sale are subject to exemption under section 6 (b) of the act from the provisions of section 6 (a) of the act. This is proposed in connection with the consideration by the Commission of the issuance of rules which would implement the specified purpose of section 6 (b) to place primary regulatory responsibility upon the local regulatory body which is in the closest and broadest day to day contact with the regulated company.

Section 6 (b) of the act contains the following directive: "The Commission by rules and regulations or order, subject to such terms and conditions as it deems appropriate in the public interest or for the protection of investors or consumers, shall exempt from the provisions of subsection (a) the issue or sale of any security by any subsidiary company of a registered holding company, if the issue and sale of such security are solely for the purpose of financing the business of such subsidiary company and have been expressly authorized by the State Commission of the State in which such subsidiary company is organized and doing business * * *" The Conference Committee Report (H. Rep. No. 1903, 74th Cong., 1st Sess., p. 67) stated that this provision "* * * directs the Commission to exempt the issue of securities by subsidiary companies in cases where holding company abuses are unlikely to exist."

Under the Commission's present practice each exemption under the quoted provision has been granted by order only and the procedures and policies followed have been substantially equated to those applicable to a declaration filed under section 7.

The text of paragraph (a) of Rule U-50 as proposed to be amended would read as follows:

§ 250.50 *Requirement of public invitation of proposals for the purchase or underwriting of securities*—(a) *Scope of section.* This section is applicable to every declaration and application regarding the issuance or sale of any securities of, or owned by, any registered holding company or subsidiary company thereof except:

(1) The issuance or sale of securities pro rata to existing holders of securities of the applicant or declarant (i) pursuant to any preemptive right or privilege or (ii) in connection with any liquidation or reorganization; or

(2) The issuance of any bond, note, or other evidence of debt of a maturity of ten years or less to a commercial bank, insurance company, or similar institution not for resale to the public, provided no finder's fee or other fee, commission, or remuneration is to be paid in connection therewith to any third person (except an associate service company) for negotiating the transaction; or

(3) The issuance or sale of securities to any registered holding company or subsidiary company thereof whose acquisition of such securities has been approved by the Commission pursuant to section 10 of the act; or

(4) The issuance or sale of securities the total proceeds whereof to the issuer or vendor will not exceed $1,000,000; or

(5) The issue and sale by a public-utility company, which is a subsidiary company of a registered holding company and is not itself a registered holding company, of securities of such subsidiary company where such issue and sale are subject to exemption from the provisions of section 6 (a) of the act by reason of the provisions of section 6 (b) of the act; or

(6) The issuance or sale of securities as to which the Commission finds that compliance with paragraph (b) of this section with respect to such issuance or sale is not (i) appropriate to aid the Commission (in carrying out the provisions of section 7 of the act) to determine whether the fees, commissions, or other remuneration to be paid directly or indirectly in connection with the issue, sale, or distribution of such securities are reasonable, or whether any term or condition of such issue or sale is detrimental to the public interest or the interest of investors or consumers; or (ii) appropriate in the public interest or for the protection of investors or consumers as a condition to the exemption of such issuance or sale from the provisions of section 6 (a) of the act, or to aid the Commission (in carrying out the provisions of section 6 (b) of the act) to determine such terms and conditions as it may be appropriate to impose in the public interest or for the protection of investors or consumers in exempting such issuance or sale from the provisions of section 6 (a) of the act; or (iii) necessary or appropriate in the public interest or for the protection of investors or consumers to assure the maintenance of competitive conditions, the receipt of adequate consideration or the reasonableness of any fees or commissions to be paid with respect to sales of securities subject to section 12 (d) of the act. Such a finding may be made in connection with the declaration or application regarding such issuance or sale, or upon a separate application for such a finding.

Nothing in this section shall be deemed to preclude the Commission from entering any order which would otherwise be appropriate under the applicable provisions of the act.

All interested persons are invited to submit data, views and comments on this proposal in writing to the Secretary, Securities and Exchange Commission, at its principal office 425 Second Street NW., Washington 25, D. C., on or before December 31, 1953. After the comments have been received and considered, the Commission will determine whether it is appropriate in the public interest to hold a public hearing on the proposals before further consideration by the Commission.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
*Secretary.*

NOVEMBER 20, 1953.

## DEPARTMENT OF THE TREASURY

### Internal Revenue Service

[Commissioner's Reorganization Order 15, Amdt. 1]

REGIONAL COMMISSIONERS AND DISTRICT DIRECTORS OF INTERNAL REVENUE

GENERAL DELEGATION OF FUNCTIONS

Pursuant to the authority vested in me as Commissioner of Internal Revenue, paragraph 5 of Commissioner's Reorganization Order No. 15, dated July 1, 1953, is hereby amended to read:

5. *Designation to act as Regional Commissioner or District Director.* Designations to act as Regional Commissioner or District Director shall be made as follows:

(a) *Regional Commissioner.* The Regional Commissioner shall designate an Assistant Regional Commissioner as Acting Regional Commissioner to perform the functions of the Office of Regional Commissioner during any period of absence of the Regional Commissioner. Such designation shall not be applicable if the position of Regional Commissioner becomes vacant. In that event the Commissioner will designate the employee to serve as Acting Regional Commissioner.

(b) *District Director.* In a District Office having an Assistant District Director, such Assistant shall become Acting District Director and perform the functions of the Office of District Director in case of the death, separation, or absence of the District Director, unless and until the Regional Commissioner designates another officer or employee to serve as Acting District Director. In a District Office where there is no Assistant District Director, (1) the Regional Commissioner shall designate the employee who shall become Acting District Director and perform the functions of the Office of District Director in case of the death or separation of the District Director, and (2) the District Director shall designate the employee who shall become Acting District Director and perform the functions of the Office of District Director in the absence of the District Director, unless and until the Regional Commissioner designates another officer or employee to serve as Acting District Director.

(c) *Recording.* Designations as Acting Regional Commissioner and Acting District Director shall be made a matter of record.

(d) *Bonding.* Any requirement for bond for the faithful performance of duty by the District Director shall apply to any officer or employee performing the functions of the District Director as herein provided.

This amendment is effective December 1, 1953.

[SEAL] O. GORDON DELK,
*Acting Commissioner.*

NOVEMBER 23, 1953.

## DEPARTMENT OF DEFENSE

### Office of the Secretary

SECRETARIES OF ARMY, NAVY, AND AIR FORCE

DELEGATION OF AUTHORITY WITH RESPECT TO REASSIGNMENTS OF REAL PROPERTY

Pursuant to the authority vested in me by Section 202 (f) of the National Security Act of 1947, as amended, 5 U. S. C. 171a, and in accordance with section 202 (c) of the Federal Property and Administrative Services Act of 1949, Public Law 152, 81st Congress, as amended, the following delegation of authority is effective this date.

The Secretary of the Army, the Secretary of the Navy, and the Secretary of the Air Force are hereby respectively authorized:

(a) To make reassignments of real property among activities and organizations within their respective military departments,

(b) To make reassignments of real property to other military departments within the Department of Defense.

Dated: November 21, 1953.

ROGER M. KYES,
*Acting Secretary of Defense.*

## SECURITIES AND EXCHANGE COMMISSION

[File Nos. 59-10, 54-82, 59-39, 54-50, 54-117]

NORTH AMERICAN CO. ET AL.

SUPPLEMENTAL ORDER APPROVING PAYMENT OF ADDITIONAL FEE

NOVEMBER 23, 1953.

In the Matter of the North American Company and its subsidiary companies, File No. 59-10; the North American Company, File No. 54-82; North American Light & Power Company Holding Com-

pany System and the North American Company, File No. 59-39; North American Light & Power Company, File No. 54-50; Illinois Power Company, File No. 54-147.

The Commission by memorandum opinions and orders herein dated December 21, 1959, and May 7, 1951, having approved the payment by North American Light & Power Company to James F. Masterson of a counsel fee in the amount of $21,975 and reimbursement for expenses in the amount of $615.47 and having denied the payment to James F. Master on the amount of $10,000 as additional counsel fee; and

The United States District Court for the District of Delaware, on the 15th day of August 1952, having ordered and decreed that the Commission amend its aforesaid memorandum opinions and orders to permit North American Light & Power Company to pay to said James F. Masterson the said additional fee of $10,000, which said order of the United States District Court for the District of Delaware has been affirmed on appeal: It is so ordered.

By the Commission.
